KTAB, Oakland, Calif. (239.9m-250kc), 8-10 p. m., Breuner's.
KWSC, Pullman, Wash. (348.6m-860kc), 7:15-9 p. m., Dorothy Ruemelin, vocalist; Pauline Williams, pianist; Boy Scout's band; Esther Olson, reader.

Crosley Station Adds Two New Features for Farmers

CINCINNATI.—Two new Radio features have been added to the Crosley WLW broadcasting station's programs for Wednesday and Thursday afternoons. The United States department of agriculture is sponsoring a lecture for boys and girls by "Uncle Bert," a ficticious character who speaks to the children upon the subject of "Gardening the Radio Way," at 4:45 o'clock Central time, every Wednesday afternoon. "Fifty Farm Flashes" is the title of a series of talks in the question and answer style and will deal with agricultural subjects, which are being broadcast every Thursday afternoon at 4:30.

Radio Saves Army $48,086

WASHINGTON, D. C.—During the first half of the current fiscal year the army signal corps, by use of its Radio nets throughout the country, has been able to make a saving of $48,086.43 for nineteen governmental departments.

Arctic Ships to Carry Full Radio Equipment

Byrd Expedition Will Broadcast With Short and Long Waves

WASHINGTON, D. C.—The Byrd arctic expedition will be equipped with the latest type of Radio equipment, according to officials of the navy department who are completing plans for the trip to the frozen north. The objects of the equipment are safety of ship, plane, fog and weather reports, entertainment by broadcasters and messages from home, and it is anticipated that many tests and experiments in communication may be carried out with both long and short waves.

The SS Chantier, with call letters KEGK, will be equipped with a 1-k. w. navy spark transmitters, sending on 300, 600 and 800 meters. It will also have a short wave transmitter, to work on 80, 40, 20 and 10 meters. The airplane is to carry a 50-watt short wave transmitter, capable of working on 61 and 44 meters.

BASEBALL GOES ON AIR

(Continued from page 3)

Cubs will be on Wednesday, April 21, when they play the Cincinnati Reds.

Saturday home games of the Chicago Cubs will also be broadcast play-by-play by WGN, The Chicago Tribune station. Quin Ryan, aided by "Sam 'n' Henry," the colored comic team, will handle the mike.

WSB, Atlanta, Already Under Way

All Fools Day, April 1, WSB began its fifth consecutive season of baseball broadcasting. This southern station, owned by the Atlanta Journal, considers baseball its most valuable summer feature. In a statement from WSB, it is said that the station would be maintained for that purpose alone, even if all nightly entertainments were discontinued.

WSB was the first station in America to report a World Series game in detail, play-by-play, through telegraphic relay. This was in 1922. Since then WSB has reported all the Southern league games played by the Atlanta Crackers team, whether at home or on the road. It is a significant fact that for each succeeding year the Atlanta club has broken all attendance records for the city and for the league.

WSB this year will again report all the Atlanta club games and likewise report the Dixie championship between the pennant winners of the Southern and Texas leagues, the baseball classic of the South. The World Series will also be broadcast. Every night at 8:30 p. m. Central time WSB announces a tabulation of all games played in the principal leagues.

Fort Worth Games Over WBAP

WBAP, the Fort Worth Star-Telegram, will broadcast all the home games of the Fort Worth nine, which is a member of the Texas league. These will be handled play-by-play direct from the ball park. The Dixie series will also be given by WBAP.

Harold Hough, WBAP official, announces that an open grandstand microphone will be used to pick up the cheering, hooting, crack of the bat and even the pursuasive sales cries of the peanut venders. He is of the opinion that such an arrangement adds much color to the play-by-play broadcast and enables Radio listeners to form a more complete and interesting picture of the game.

WDAF and WHAS Plans

WDAF, the Kansas City Star's popular station, will feed the ball fans of the great Southwest with inning scores and game results for the major leagues and American association, of which Kansas City is a member. These will be given every afternoon at 3:30, 4:00, 4:35 and 6:00 o'clock, Central time.

Credo Harris, director of the Louisville Courier-Journal and Times broadcaster, WHAS, announces that his station will give daily results of the major league, American association, and other important games. Besides, under Mr. Harris' personal direction, his invention of 1925, in which the World Series was broadcast and re-played play-by-play by living players at the Louisville ball park, will again be put in operation at the conclusion of the 1926 season as the World Series takes all fans' attention.

WJAG and Printer's Devil Active

WJAG, the Norfolk (Nebr.) Daily News station and home of the Printer's Devil, has plans ready for giving the national pastime reports to its listeners. Along with flashes on results in the bush leagues and town teams in three states, the Printer's Devil will give a daily resume of results in the major leagues with standings of each team and in cases of important games, score by innings descriptions. The daily average and baseball diamond dust gossip will be the foundation from which the famous World Series stories will be broadcast by Karl Stefan, the Printer's Devil.

The play-by-play description of the World Series this year will again be read direct from the telegraph wire by Mr. Stefan, who will simultaneously keep a box score for listeners.

Station 6BM, Bournmouth, England, recently organized a cross-word puzzle competition. A diagram appeared in the station's published program, and listeners were asked to keep it and follow the clues read out by the announcer.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912,
Of Radio Digest, Illustrated, published weekly at Chicago, Ill., for April 1, 1926.

State of Illinois, County of Cook, ss.—Before me, a notary public in and for the State and county aforesaid, personally appeared E. C. Rayner, who, having been duly sworn according to law, deposes and says that he is the publisher of the Radio Digest, Illustrated, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form to-wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are: Publisher, E. C. Rayner, 2335 Commonwealth Ave., Chicago, Ill.; Editor, Evans E. Plummer, 934 Lawrence Ave., Chicago, Ill.; Managing Editor, None; Business Manager, V. E. Huffer, 5220 Cornell Ave., Chicago, Ill.

2. That the owner is: (If the publication is owned by an individual his name and address, or if owned by more than one individual the name and address of each, should be given below; if the publication is owned by a corporation the name of the corporation and the names and addresses of the stockholders owning or holding one per cent or more of the total amount of stock should be given.) E. C. Rayner, 2335 Commonwealth Ave., Chicago, Ill.; George Seaman, 2350 Parkway, West Chicago, Ill.; F. T. Ryan, 510 N. Dearborn St., Chicago, Ill.; D. R. Seaman, 49 Cedar Ave., Chicago, Ill.; Joseph Seaman, 250 5th Ave., New York, N. Y.; V. E. Huffer, 5220 Cornell Ave., Chicago, Ill.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragtaphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is.....
(This information is required from daily publications only.)

E. C. RAYNER,
(Signature of publisher.)

Sworn to and subscribed before me this 29th day of March, 1926.
(SEAL.) A. C. McKITRICK.
(My commission expires October 1st, 1928.)

"Your radio is always top notch. What do you do to keep it so full of pep?"

KEEPING your "B" batteries full of pep, without frequent renewals, is simply a matter of using the right size Eveready for your particular set with a "C" battery*.

The rule which determines the right size "B" batteries to use is so simple no one can make a mistake, and once learned it definitely settles the question of "B" battery service and economy.

On 1 to 3 tubes—Use Eveready No. 772.
On 4 or more tubes—Use the Heavy Duty "B" Batteries, either No. 770, or the even longer-lived Eveready Layerbilt No. 486.
On all but single tube sets—Use a "C" battery.

When following these rules, No. 772, on 1 to 3 tube sets, will last for a year or more, and Heavy Duties on sets of 4 or more tubes, for 8 months or longer.

These life figures are based on the established fact that the average year-round use of a set is 2 hours a day.

A pair of Eveready No. 772's for a 5-tube set instead of 2 Eveready No. 770's or 2 Eveready Layerbilts No. 486—looks at first glance like an economy because of lower first cost. But in a few months the 772's will be exhausted and have to be replaced. After the same length of time the Eveready No. 770's or the Eveready Layerbilts No. 486 will still be good for many more months of service.

We have prepared for your individual use a new booklet, "Choosing and Using the Right Radio Batteries," which we will be glad to send you upon request. This booklet also tells about the proper battery equipment for use with the new power tubes.

*NOTE: In addition to the increased life which an Eveready "C" Battery gives to your "B" batteries, it will add a quality of reception unobtainable without it.

SHORT WAVES

By Marcella

(Continued from page 6)

however, that he is doing announcing regularly anywhere.

* * *

This much of your question I can answer, M. W. F., and that is about H. W. Arlin, former KDKA announcer. He is off the air and in the electrical appliance sales business. Akron, Ohio, I think, is his new home. I'll answer the rest later.

* *

The Duncan Sisters, Edwin, are still on the road with "Topsy and Eva," I believe, but am not sure. Are they married? No, neither of them is. Ages? Another thing I don't know—and a bad thing to guess about—a lady's age. However, I don't think they would be interested in matrimony. Gypsy and Marta, the Mona Motor Oil Twins, are billed every Tuesday at 9 p. m. Pacific time at KPO, Hale Brothers, San Francisco. Perhaps this is the other team you are seeking?

* *

V. K. Y., an ardent "Marcellite," wants other members of the order to know that KMOX, the well-liked "Voice of St. Louis," has engaged the good-looking-but-married George Junkin as announcer. Considering George's experience as a theatrical producer, motion picture actor, and microphone star, it is too bad that a lady from the "show me" state married him away back in 1913.

* *

Adele, J just don't know where Clyde Hager, ex-WMBB, Chicago, has gone. They tell me, however, that he is on the road—but where, for whom and doing what, I do not know.

* *

Hah—ah and another ah. Here's the first opportunity for several weeks, girl friends. Louis John Johnen, who arranges the programs heard through WLW, Crosley station in Cincinnati, is a BACHELOR! He is also interlocutor of the WLW minstrel show heard every Tuesday evening, and he announces about half the time. As if that weren't enough, he sings baritone solos now and then, and during his leisure moments teaches vocal at the Cincinnati Conservatory of Music.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

KOA Player to Musical Comedy

DENVER.—High recognition was again given the KOA dramatic players when Will Morgan, leading man and widely known in western theatricals, was recently chosen for one of the principal roles in "No, No, Nanette," famous musical comedy.

WHAT IS SOUP STOCK?

(Continued from page 6)

It is not always necessary to have new material to make soup stock. In fact, in many cases the scraggy meat and bones from roasts, chops and steaks will make all the stock you need. If you are buying meat to use for soup, buy a shank of veal or a shin of beef. These cuts come far down on the leg of the animal where there is a large amount of the tissue which makes jelly, and also some very juicy and well-flavored meat. Ordinarily a good proportion to use is one quart of water for one pound of meat. With less water the result will be a stiff jelly. For a good, rich stock, use two or three pounds of meat or meat and bone for each quart of finished stock. Any meat may be used except that which has been smoked or pickled.

In addition to the meat and bone, use several different vegetables for flavoring. From one-half to one tablespoon of each vegetable is sufficient for each quart of stock. The favorite vegetables are carrots, celery, onions and turnips. Leftover vegetables may be utilized in the soup, but the soup should never be a general dumping ground for scraps. After the soup is done, let it stand until cool, and then remove the solid layers of fat and all small particles of fat. Strain to remove all of the meat and vegetables. The soup is then ready to serve as an ordinary soup with the addition of diced vegetables, noodles, rice, macaroni or anything you like.

How to Clarify Stock

If you wish to clarify the stock for bouillon, proceed as follows: Use one egg white and shell for each quart of stock. Beat the egg slightly and crush the shell. Stir into the stock and heat slowly to the boiling point, stirring constantly. Boil without stirring from 5 to 15 minutes until all of the particles collect with the egg to form in a heavy scum. The length of time required depends upon the quantity of soup. Let stand to settle, then strain through a double cheese cloth. If any additional bubbles of the fat remain on the soup, they may be removed by touching the surface with absorbent paper. A crepe paper napkin is good for this purpose.

Soup stock is used as the foundation for many different kinds of soup. Stock that is jellied may be kept for a long time if kept in a cold place. It will keep as long as it is jelly and has a layer of solid fat on top to keep out the air, or it may be sealed in fruit jars and kept in a cool place. It is better not to cook vegetables in the stock if you expect to keep it any length of time. They may be added later as you make up the soup to serve.

Fewer Radio Stations

WASHINGTON, D. C.—The total number of broadcasting stations has been decreased to 532, according to W. D. Terrell.

Food for Noises

"FOUR feet of snow, plus a temperature of twelve degrees below zero, plus an open car in which to travel, plus unlimited interference, equals a happy life for the Radio inspector in the northern states," reports one of the federal Radio men who was sent from Chicago to Minnesota to make special investigations.

How would you like to trade jobs with the inspector and receive his small salary and transportation allowance? Not so pleasant to anticipate is it?

Yet congress and the budget bureau feel that they have done their best in appropriating $335,000 with which the Radio section of the department of commerce must work during the next twelve months. This fund will buy patches for the older inspectors' last year's suits and provide enough extra money to pay the meager salaries of a few youths in the various districts who will sit at night and listen to broadcasting stations that persist in sliding their wave lengths up and down the scale and radiating their programs on anywhere from two to sixteen different wave lengths.

But the third of a million dollars won't begin to do the work necessary to police the air one hundred per cent perfect. We don't believe the fund allowed is half enough.

The Radio inspectors could be of great assistance in running down and correcting bloopers, leaking power lines and transformers, faulty broadcasting station transmitters, and interference by amateurs and boats—but the inspection force is not financed or manned enough to begin to do all of this work. As a result we sit by and tune in to every kind of noise and nuisance the electron is capable of producing or the ether of carrying.

When we said that $500,000 annually was not too much to devote to the work of the Radio section, we meant it. Please remind your congressmen.

Listen to the Good Ads

AN AGITATION against undue advertising on the air is in progress. A number of newspapers have been carrying articles of late lamenting on the number of lottery contests and advertising announcements on the air. The complaint is that these announcements and contests are unwelcome and that they should be barred by legislation.

It is our belief that legislation is unnecessary and is ill advised. Our forefathers founded this country upon certain definite principles. It is a democracy. Personal and business liberties were not to be controlled by the government. We have enough laws. But there are always those persons who would add a few more to the already overcrowded statute books. Let's first enforce the laws we have.

The advertising situation will govern itself far better than it is within the power of the federal government to control it. Let us prove this contention.

If a station by its boring sales announcements, its nauseous telegram reading, or its monthly or more frequent lotteries, becomes unentertaining and distasteful, it is within the power of every listener to tune that station out. Of course there are certain exceptions where the receiving post is under the shadow of the bothersome station's towers—but that is an exception, and the rule will take care of the situation.

If the station is tuned out often enough, and if the advertisers paying for time on the air through that station are told, in letters from disgusted fans, what a bore their Radio advertising is proving to be, that firm will not continue to broadcast through the station—or the method of broadcast advertising therefrom will be altered greatly. No business company is going to continue long to advertise via the microphone in an unprofitable way.

And remember—the listener always has the option of twisting the dials around to another station whose program is more to his taste. That is the American privilege, the right to do as one pleases, the ability to hear what one chooses.

Who is there to say that there is not sufficient variety on the air from which to make a satisfactory selection?

RADIO INDI-GEST

Buncha Din

There's a sound of armies clashing,
There's the roar of breakers dashing
Wreakage up against a rugged dike;
There's a roll of distant thunder
As the clouds are rent asunder—
Cannons fired broadside at the mike.
There's a scream of vultures dying;
Of demented people crying;
A yelping savage beating on a drum.
There's a most discordant banging
Like the fire engines clanging
And tearing up the cobbles as they come.
There's a shriek, a scream, a clatter—
What on earth can be the matter?
Are the elements engaging in a fight?
It's the noise of all creation
Headed straightway for damnation—
Ah, go on—It's only silent night.

THE NIGHT HERD

When You Call Me That, Smile!

Dear Indi: Apropos of the argument between the linguists and purists over "Radiocasting" and "broadcasting," do you think WBAP at Fort Worth can sneak their cowboy show in under the name "Rodeocasting?"

ELOISE R

What a Dirty Dig!

Dear Indi: See in last week's issue that an unknown movie extra is to be popularized on air. Whadyu mean? Hot Air?

PABLO

My Radio

I sit me down at eventide,
My faithful radio beside,
And scour the ether, far and wide,
For music, soft and low.
And, like a million other saps,
With "DX" written on their maps,
In my ears the static snaps,
And fills my soul with woe.

Anon, I exercise my wiles,
I twist and turn the cussed dials
And think that, from a thousand miles,
I'll tear a lot of guff,
To find when I tune in a guy
And steal his skill from out the sky,
To bring the sparkle to my eye,
It's only local stuff.

My Frau assures me I'm a nut,
That bug-house is my occiput,
And a darned fool I am nothing but,
Plumb dead above the neck,
It may be so, but, I'll be cussed,
I'll have my Radio or bust,
For there are millions, who are just
As nuts as I, By Heck.

WILSON E. ROGERS

Where Men Are Men an' Women Are—Not

Dear Indi: Where is the Night Herd from? A guy couldn't dope out all he does from the "Smog" of Chicago or the cold grey of N'Yawk. Bet he's from the great open spaces.

SHOBIE

"A FLOP ON THE STAIRS"

by THE THIRD TROMBONE PLAYER

Episode 2—Is Beer All?

Synopsis.—It seems that C. Densed, a prominent writer of Radio criticisms, is plotting to re-write the dictionary as it does not agree with his spelling. He organizes a gang called the "Jazzbo Six" to destroy by means of Radio waves all existing copies of Webster's important, although somewhat unromantic, masterpiece. In this he is opposed by Marten Dirkun, a fearless copy boy with big blue eyes, rosy cheeks and a sweet temper. Now go on with the story, Pancrace.

IT WAS Dirkun who, with blazing eyes, faced the scowling C. Densed. Little did he know what was in store for him.

"Lay off that there dictionary, big boy, or I'll turn 135 volts B battery on your quivering flesh."

"You can't harm me," hissed C. Densed, "cause I'm Dielectric and don't conduct electricity." With this he smote our hero on the bean with a Whistlinghouse R. C. set.

As he was about to drag out the body, a woman's scream rent the air. Again this mysterious scream!

(Boys, this is getting serious. Wonder who that female is?)

(TO BE CONTINUED)

Found Out at Last

Dear Indi: And here, all the time, I thought you were a nice old man and, heck, you know about Ponjola, Congressional and Boy bobs!!! How come???

KITTEE KEY

Franque's Filosofee

Although Radio keeps a man at home, all the while he is trying to get as far away as possible.

Stations Were Down on the List

What do you think of the guy that wrote in and expressed indignation because a number of stations listed in the programs had "Silent Night" and, after trying to tune them all in, he failed to hear it even once?

INDI

News of the Week

Condensed

BY DIELECTRIC

When the instruments are in tune and the rhythm is maintained, dance orchestras sound very much alike to this reviewer, which may be a frank confession of ignorance. If so, the plaintiff loses. Nothing in the playing of dance music by an orchestra from Station WJJD, Moosehart, provoked me to slander nor to eulogy. It was the manner of announcing which led me to put that station down for mention. In a short time those stations failing to give call and city between numbers will be so few as to cause them to feel their own delinquency. "WJJD, Moosehart," follows so quickly each number there is always time for it. They are to be commended for their policy.

Station WGN, Chicago, hit upon a feature of duo value: presenting old-time favorites with prizes awarded to those guessing them correctly. Old-time songs are not dying out, nor are they likely to, and yet the titles of these pieces are ofttimes difficult to recall. Hence, listeners will make an effort to learn the names of all these songs and at the same time familiarize themselves anew with their beauty.

Edward Johnson, of the Metropolitan Opera company, New York, sang for the Atwater Kent concert series in a manner most pleasing. There may be some to whom this tenor's voice lacked certain wanted qualities, but to most listeners his work was highly engaging. After listening to each of the famous operatic tenors for some years back sing the well-known "Pagliacci's Lament," from the opera of that name, I hesitate to deprive Mr. Johnson of the laurels justly due him. His artistry was notable in each phrase of the aria, coloring his tones with intelligence and displaying a voice of sweetness and warmth, a truly magnificent rendition of this recital of woe.

Another dance program listened to was one presented by the Golden Pheasant orchestra through Station WTAM, Cleveland. Previous mention has been made of the good work of this musical organization and is repeated here. Something more than that is slated to be said before commencing comment on the next feature, however, and it is to the effect that the Willard station is open to censure because of the announcer's allowing several numbers to go by without announcement. I am in entire agreement with those fans would urge giving the call letters following each feature and again preceding the next.

Station WWAE, Plainfield, Ill., had a happy group of broadcasters in their studio one night a short time ago who dispensed cheer lavishly, not sparing themselves in the least. When the time came for them to depart, the announcer interrupted his standard explanation to bid Bill, Dick, Joe, etc., a fond farewell. Is he supposed to be human or merely a mechanical bulletin of past and coming events? Your votes for the world's most popular announcer should tell.

With all the excitement over prohibition enforcement it is not surprising to have a number of speakers from as many stations broadcasting their remarks on the subject. Station WLW, Cincinnati, stood fast while Senator Edwards, New Jersey, delivered a speech which included nearly all the uncomplimentary adjectives contained in the dictionary, having immediately in mind everyone supporting the latest check to freedom. His immediate audience was composed of Irishmen. I don't know how cosmopolitan was the Radio audience. Everyone with a receiving set may firmly exclaim "Amen" or "bosh" and not interrupt these meetings. That's the beauty of listening in.

Super-Torodyne: An Improved 8-Tube Super

Part I—Analysis of the Circuit

By J. E. Owen, Univ. of Okla.

THE Super-Torodyne is offered on the basis of its merit, and with a realization of the necessity for further development in the super-heterodyne circuit field for the reception of broadcast programs.

When the work was started on the Super-Torodyne, it was realized that certain factors had been utilized quite satisfactorily in other circuits that had not (for no obvious reason) been carried over into the super-heterodyne circuit. The fact was obvious, that the super-heterodyne at that date was, from the viewpoint of oscillator and antenna coupler units, considerably outranked by other circuits. Thousands of dollars had been spent in experimental work on tuned radio frequency circuits in the development of low loss toroid coils that had characteristics suitable for inter-stage coupling. Also, the super-heterodyne is often bulky and inconvenient from the viewpoint of installation. To partially overcome certain of these features of the usual super-heterodyne, the Super-Torodyne was devised.

Weeks of careful selection of apparatus followed, particularly in the nature of the selection of the intermediate stage transformers and the oscillator and antenna coupler units. It was recognized that while it might be possible to easily design a coil for the set, it would mean more to the builder to have a unit that was already on the market. The All-American Toroid transformer type, T-2, proved the most suitable of all tried.

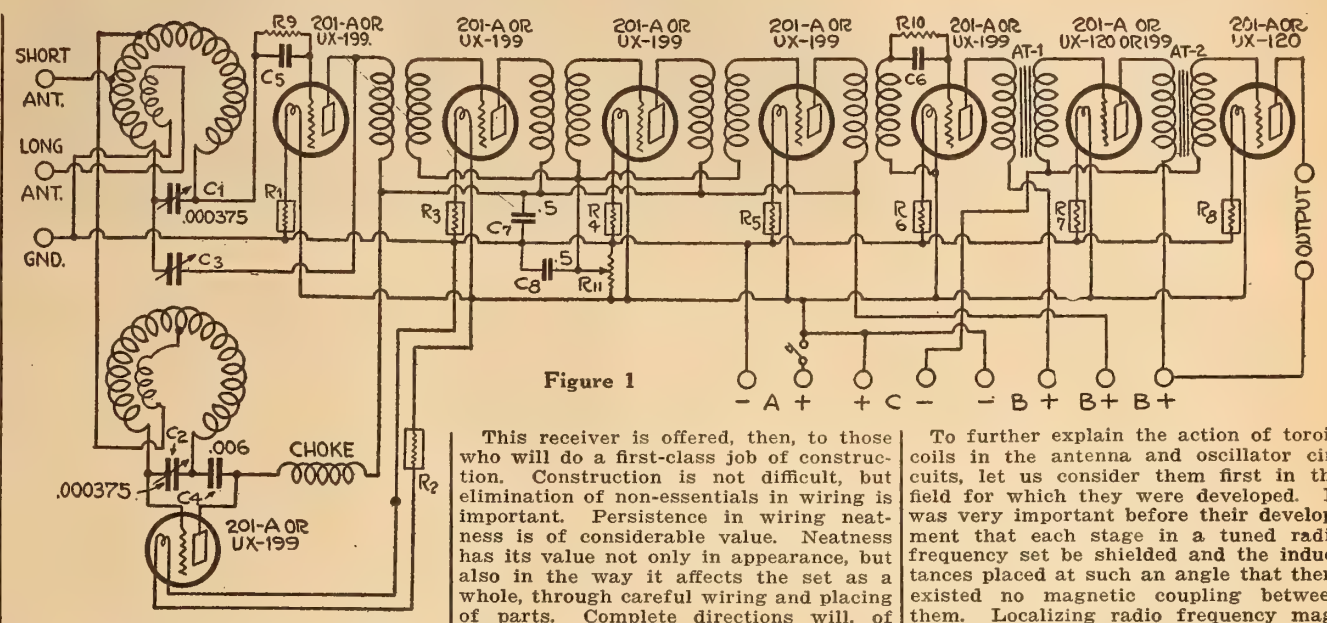

Figure 1

super-heterodyne utilizing the unusual toroid advantages in a generally satisfactory manner; the scheme being to produce a set of real quality. Nothing cheap has been substituted that might in any way interfere with quality of reproduction, nor sensitivity and selectivity. It

This receiver is offered, then, to those who will do a first-class job of construction. Construction is not difficult, but elimination of non-essentials in wiring is important. Persistence in wiring neatness is of considerable value. Neatness has its value not only in appearance, but also in the way it affects the set as a whole, through careful wiring and placing of parts. Complete directions will, of course, be given.

The wiring diagram of the Super-Torodyne is that shown in figure 1. It will be noticed that the circuit is fairly standard, except that regeneration is used with an outside aerial. The term "outside aerial" is used in its general sense, and only to distinguish it from a loop. It may consist of a wire strung around the room. Regeneration is obtained in the antenna coupler in much the same way that it is obtained in a loop in many super-heterodyne circuits. The antenna and oscillator couplers are toroid in their construction, as was explained above. It is from these that the set gets its name. As is seen in the list of parts, air core intermediate stage coupling transformers are used, the high frequency response of the Victoreen units giving them a low noise level.

To further explain the action of toroid coils in the antenna and oscillator circuits, let us consider them first in the field for which they were developed. It was very important before their development that each stage in a tuned radio frequency set be shielded and the inductances placed at such an angle that there existed no magnetic coupling between them. Localizing radio frequency magnetic and electrostatic fields was no small job. Local broadcasting stations proved quite disastrous on the action of many receivers. In spite of the theoretical considerations and experiments which led to the set's rejection of signals fed directly into it and at a frequency differing to that for which the receiver was tuned, local stations kept on interfering and spoiling reception. Further consideration of the matter showed that linkages within the fields of each radio frequency transformer and the broadcasting sources resulted in each unit acting as sort of an antenna. The solution to this problem revealed by this discovery, was in toroid coils. These units have no external field —that is, the field at any point caused by a flow of current within the wire of a tor-

This set is not offered in a spirit of education for those in the kindergarten class in Radio. The super-heterodyne circuit is fundamentally the most complex circuit yet devised, aside from certain super-regenerative sets. No particular attempt has been made to produce a "most simple super-heterodyne," or anything of the sort, but rather to produce a may be said in all fairness, however, that stability of operation was recognized as a necessary essential in the finished product, and an effort to overcome the usual disadvantages attendant to stability was seriously made. This effort was quite successful, and is apparent when one studies the circuit and the arrangement of its different units.

Fred W. Stein.

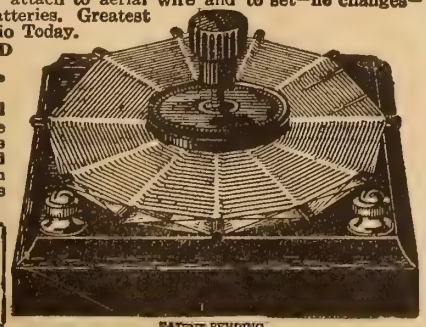
Steinite Low Loss Interference Eliminator

No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.

OVER 300,000 SOLD

Improved Results With Tube or Crystal Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. ***MONEY-BACK GUARANTEE.***



PATENT PENDING

Mirs. Famous 1,500 Mi. Steinite 1-Tube Set, $6; Long Distance Crystal Set, $6; Steinite Crystal 50¢—3 for $1

STEINITE 5-Tube Set—$29.75

FREE Descriptive Literature on request.

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

$1 Postpaid If you are not delighted with results you get your dollar back

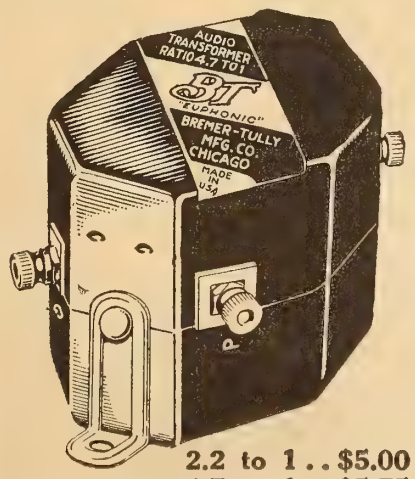
BEST AUDIO TRANSFORMER BUY ON THE MARKET



2.2 to 1 . . $5.00
4.7 to 1 . . $5.75

J. E. Owen, Bureau of Tests and Measurements, University of Oklahoma and Radio Digest Technical writer, says, "I find your apparatus very excellent indeed. To my mind there is no better audio transformer buy on the market at anything near the price than your 2.2 to 1 Euphonic Transformer."

From a New York Pianoforte Instructor

Brooklyn, N. Y., March 10, 1926.

First let me tell you that in the past year I have built seven B-T Nameless Receivers.

Up to the completion of the seventh I was prepared to swear that there was no instrument in the world that could even equal it for selectivity, power and last but not least, tone quality. I say this from a musician's viewpoint.

Then came the Counterphase Six—

I think that you must take a malicious pleasure in springing surprises on competing manufacturers!

I have just completed my third one of these instruments. There is only one instrument that can come near to it in any way—and that is the "Nameless." I am using my personal instrument with a Western Electric Cone and their 25 B Power supply. The resulting reproduction is perfect.

The Counterphase sweeps all before it.

NEW SUPER-TORODYNE

(Continued from page 19)

oid coil is zero, excluding flux leakage and choosing the point outside the unit. Therefore, the use of such coils in the radio frequency stages of a receiver proved quite satisfactory.

Two Antenna Taps

These coils carried over into the super-heterodyne circuit work quite well. Retaining the same characteristics that gave them success in the radio frequency circuits just described, they make in the super-heterodyne circuit for selectivity. Regeneration used with them makes the receiver also quite sensitive and selective. The unit selected used as an ocscillator coupler has an output just sufficient to satisfactorily mix with the incoming signal of the first detector, while two antenna taps are provided for long or short aerials, which is an added advantage.

Buy Units Separately

Just a word might well be said about the intermediate stage and the audio units. The Victoreen intermediate coils are sold in kits, or separately, as desired, and are tuned individually to a frequency for which they were designed. One may feel safe in buying them separately, because they are built to a standard. There is considerable talk by some manufacturers of iron core units against air core units, their contention being that often mismatched transformers are sold and the resulting amplification is therefore quite low. Most certainly it is true that a mismatched set of units will give very poor results. The Victoreen units, however, may be used in full faith that they are well matched, and will stand considerable abuse without becoming detuned. The Victoreen kit should not be bought because the oscillator unit included in the kit is not used in the Super-Torodyne.

HOW SUPER-TORODYNE WILL LOOK

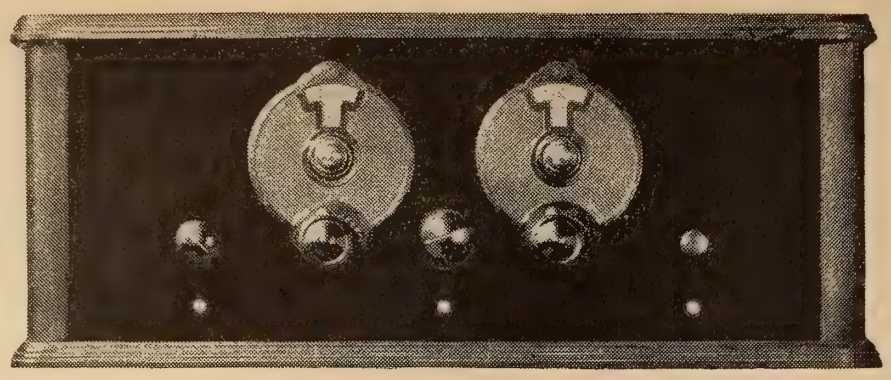

Figure..2

The writer on the Four-Filter Super in his first article recently gave a most excellent defense for the air core transformer and scored heavily against arguments that air core transformers of this type give distortion through elimination of side bands.

Use Quality Parts

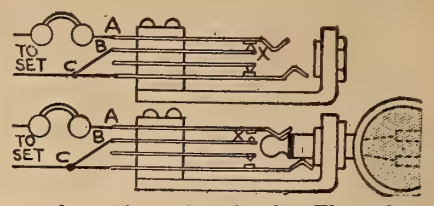
Although the expression "elimination of side bands" has no meaning in the audio stages, the major portion of distortion in most Radio receivers occurs in such stages, such irregularity being generally chargeable to the design of the transformer being such that they favor either the low or high register and thus lack any semblance of uniform amplification over the total broadcast frequency band. There are, however, available a few makes of audio transformers which clearly indicate the result of intensive research, and which produce straight line amplification characteristics which are most desirable.

Prominent among such transformers is the new Jefferson AL2 shield type, its amplification curve at broadcast frequencies from 40 cycles up being such that it is bound to find much favor among those insistent upon quality apparatus. It is to be remembered that any circuit is entirely dependent upon the quality of the parts used, while the arrangement and skill of the constructor follows in their order. Give this Super-Torodyne the benefit of good apparatus and it will prove a most excellent receiver.

(Next issue Professor Owen will start the actual construction of the Super-Torodyne by describing the panel layout, drilling and assembly instructions. Buy the specified parts and be prepared—Editor's Note.)

Connecting Phones in Series

The modern Radio experimenter often finds it desirable to connect another pair of phones in series with those that he is already using, but does not wish to take the time and trouble to disconnect the first set of phones in order to connect the



second set into the circuit. There is a very easy and simple way that this can be accomplished and the only material that is needed is an ordinary double circuit jack and plug.

In the great salt mine at Kalicz, Czecho-Slovakia, a receiving set and loud speaker have been installed in the deepest gallery of the workings, and the men are thus able to listen in to Vienna, Prague and other stations while working nearly a mile under the earth surface.

WDAE ON BUILT ISLAND

(Continued from page 5)

to do it regularly on a mere 250 watts! If you want to know who is the king of Davis Islands you'll find a monogram of a "D." and a "T." on a coronet of coils, tubes and crossed wires.

R. H. Megargle

The programs broadcast nightly from the Davis Islands Country club will rank with the finest on the air. Isham Jones and his famous Chicago orchestra playing their regular dance program at the Country club are broadcast each night. All dance lovers and most phonograph and Radio fans of America have heard this great orchestra, declared by musical authorities to be the greatest dance orchestra in the world. Isham Jones was brought to WDAE from the Kit Kat club, London, England, where he played a long engagement and his was acknowledged the favorite dance orchestra of the Prince of Wales.

Besides broadcasting orchestra and studio programs of exceptional merit, WDAE is teaching its listeners how to swim, how to play golf and how to dance by Radio. Miss Helen Wainright, champion woman swimmer of the world, is teaching a regular course in swimming every Wednesday night from 8:30 to 9 o'clock to students who hear her from the air.

On Thursday evenings, at the same hour, Miss Dorothy Mason, former dancing partner of Vernon Castle and instructor of dancing at Cornell university, takes the microphone to broadcast a weekly lesson in dancing.

On Friday night all the golf enthusiasts "tune in" on WDAE to hear Johnny Farrell, golf professional, at the Davis Islands Country club and runner-up in the national open golf tournament last year, broadcast his weekly golf instruction. Farrell, who recently beat Bobby Cruickshank for the Florida open golf championship, is making a big hit with the northern golfers who often are snowbound and unable to play their favorite game.

Ralph H. Megargle, director of Radio for the Tampa Times and Robert H. Nolan, one of the best known announcers in Florida, are handling the administration work and doing the announcing. Nolan, formerly with WGBU, Fulford-by-the-Sea, is also an entertainer of ability and features many programs with song and instrumental numbers. He announces as "B. N."

Megargle, who announces as "Tod," is well known and popular throughout the North as well as South because of his "sunshine state" announcements and stories. He is a former newspaper writer and has written many articles on Radio subjects.

Isham Jones and his orchestra will broadcast each night from WDAE until May 15. The programs start at 9 o'clock and continue until 2 a. m. On Sundays a special two hour concert, starting at 7:30 and continuing until 9:30, is broadcast.

WDAE operates on a wave length of 273 meters.

WBAP SUNFLOWER GIRL

(Continued from page 4)

life the night she sang to thousands in the Coliseum at Fort Worth, the occasion being the opening of the Fat Stock Show and Rodeo; this program was also broadcast. Mingled with the thunderous applause was the characteristic whoops and calls of the cowboys and cowgirls—many of them world champions.

The little Sunflower Girl is still wondering what's it all about, this Radio business, that can take a singer and make her popular in such a short time. Although she has refused good offers to go on the stage, yet she is glad she has been the means of adding to the enjoyment of others. Of the future, she says little; but some day when deams come true, she hopes to sing personally to the many inmates of Uncle Sam's hospitals, who have been so generous in their letters.

With the risk of telling a secret, will whisper that recent negotiations have been made whereby the little singer whose career has been so spectacular, is to journey to New York to sing for records.

We only wish that the folks who write in and ask to be told "something about the Sunflower Girl" could have seen her as we saw her; there in the delightful drawing-room of her temporary home, eager and unaffected and sincere; singing and playing for the sheer love of it and enthusiastic in the happiness it was bringing to others.

How to Stop Blooping and Man-Made Static

Part IX—Trouble Shooting Apparatus

By The Technical Staff

IN MAKING tests to locate sources of interference, as was shown in last week's article, one must approach the subject with an unprejudiced mind as to the source of the interference, and before concluding that the interference is caused by any given sourse, it is well to consider all possible conditions in which the interference may have originated from some other unknown cause. Investigating interference is a very fascinating detective game and one would sometimes suppose that the source of the interference had a sense of humor and was trying to evade detection in a manner similar to that of the most clever criminal.

As a major portion of interference is caused from leakages incident to transmission lines and their associated apparatus, there also exists disrupting surges from apparatus which are not defective.

In such cases where the electrical apparatus appears to be in good electrical condition it is often possible to supply some means of preventing electrical surges from getting out to the power line where they would radiate and cause interference.

Condenser Prevents Surges Traveling

Such electrical surges have the property of passing through condensers more readily than through inductances. The methods employed in preventing electrical surges which cause Radio interference, is to provide a path to ground in the form of a condenser. In order to make these filters effective, it is advisable to introduce between the line and the source of the disturbance a trap which will make the passage of the surge more difficult. This trap preferably takes the form of a choke coil consisting of a number of turns of wire of sufficient size to carry the required current without overheating.

Choke Coil Construction

A type of choke recommended for cases where the current is less than three amperes is constructed according to figure 16. It consists of 100 turns of number 18 double cotton covered copper wire comprising a single layer, wound on a fiber tube 3 inches in diameter, ⅛ inch thick. Leads are soldered to each end and made from number 14 flexible rubber insulated braid covered copper wire, making one turn around the tube then through a hole in the tube and extending through the inside of the tube a length of one foot.

All burrs should be carefully removed from the hole in the fiber tube so as not to cut the insulation. End rings or fillers are mounted at the end of the winding to build the coil form up to the same diameter as the outside diameter of the winding. These may be made of tape or a suitable size of fiber tube. The whole coil is then covered with five layers of Empire cloth and taped with friction tape and painted with an insulating varnish. Mounting lugs made of fiber can then be attached to each end of the coil. The finished coil should be mounted on a board covered with asbestos ⅛ inch thick and the leads soldered and thoroughly taped according to standard wiring practice.

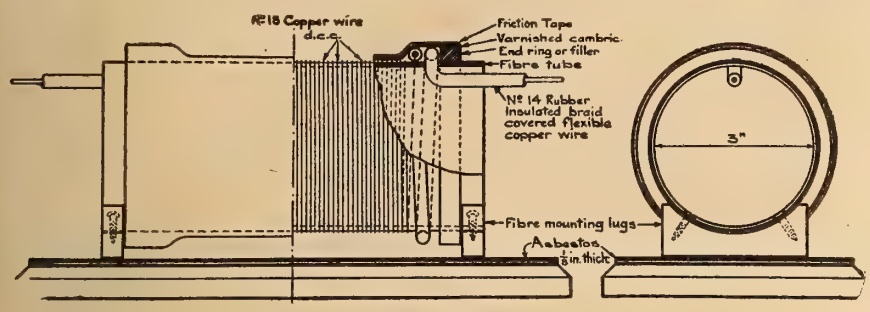

Figure 16

Mounting Condensers

Condensers which will stand a test voltage of 1,000 volts direct current may be connected across an alternating current or direct current circuit of 250 volts or less. On circuits which are protected by fuses of not more than 15 amperes capacity, no additional fuse is required for the condenser. On circuits protected by fuses of greater than 15 amperes capacity, a separate cut-out base and small fuse (of approved type) not exceeding 15 amperes, must be installed between the condenser and each ungrounded power wire. Where condensers are to be placed on wooden surfaces, they should be mounted on pads of asbestos at least ⅛ inch thick, and such pads should be sufficiently large to extend beyond the clamps used for holding the condenser in place.

Where condensers are to be used on 550-volt circuits, two condensers of the approved type must be connected in series between the lines, and the common point grounded. In such installations the condensers are to be protected by 600-volt fuses of not greater than 10 amperes

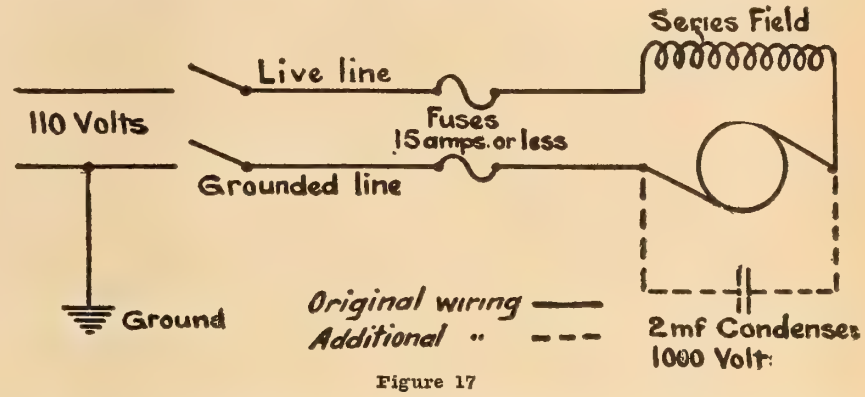

Figure 17

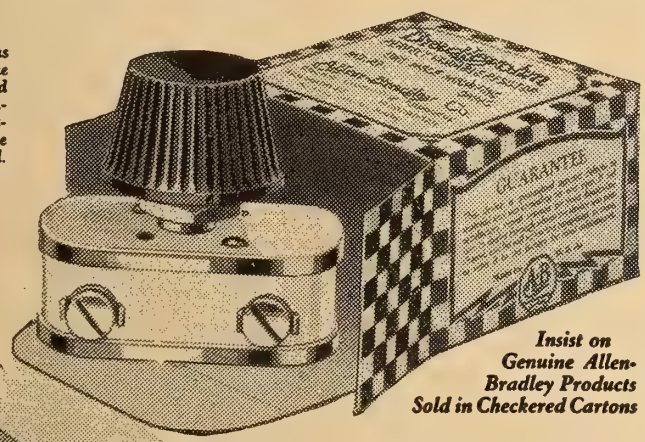
(Continued on next page)

The Bradleyohm is used as standard equipment on the Acme B-Power Supply and most other B-Battery eliminators provided with voltage control. Silent voltage control is thereby assured.



Insist on Genuine Allen-Bradley Products Sold in Checkered Cartons

How to Get Extra Voltage Taps from Your B-Eliminator

MANY radio receivers are provided with several B-Battery terminals for detector, amplifier and radio frequency tubes. To provide the extra voltage taps from B-battery eliminators, such as the Acme B-Power Supply unit, is a simple matter. The diagram below shows the method of connecting the necessary Bradleyohms and condensers.

A Bradleyohm No. 10 for the 67-volt connection and a Bradleyohm No. 5 for the 90-volt connection provide marvelously smooth control over a wide range for these terminals. The condensers may be larger if desired, especially when used with audio-frequency taps. The standard Bradleyohm in the eliminator gives sufficient range for the detector plate voltage. Your dealer can supply you with Bradleyohms and condensers. Try these connections tonight and improve your receiving set.

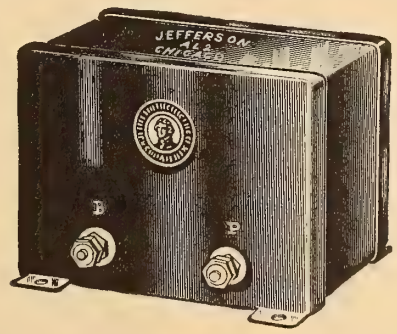
Prof. Owen *Specifies*

JEFFERSON

A L Sealed Transformers



Prof. J. E. Owen of the Oklahoma University, after exhaustive research has selected Jefferson A L Sealed Audio Frequency Transformer for his new Super-Heterodyne circuit as described in this issue of Radio Digest. The A L Transformer was developed by Jefferson Radio Engineers after months of exhaustive experiments, the outcome of which allows us to offer to the radio public a transformer of a nicety of balance which comes from sufficient winding and large enough core and which gives an even amplification at low frequency and prevents resonant peaks at the higher frequencies. This transformer shows practically a straight line curve from 30 cycles for the low notes up to 10,000 cycles for the high notes.

A L Sealed Transformers Can Be Used with New Power Tubes

The A L Sealed transformer is one of the few which can be used with power tubes because it is heavily insulated throughout. This heavy insulation also causes less resistance between the primary and the core eliminating the danger of electrolytic action which is the cause of most open circuits.

A L Transformer Sealed

The Jefferson A L Sealed transformer is built into a metal case which makes it impervious to outside influences such as moisture which is liable to collect on the cord and windings if the transformer is used in damp places or humid climates so often found in summer homes and cottages. The extra large core permits the current to flow readily from tube to transformer preventing distortion. The A L Sealed transformer has not only been approved and tested by Prof. Owen but by most radio laboratories of this country. It is the last word in radio transformers manufactured. Ratio 2 to 1. Price **$6.00.**

For sale by all dealers. If your dealer does not carry the A L Transformer do not be satisfied with a substitute but write direct to manufacturer.

Specialists in Electrical Precision Equipment

HELP STOP BLOOPING

(Continued from page 21)

capacity in each live line. If the condensers are to be connected to two-phase or three-phase circuits of not greater than 600 volts, one condenser may be connected from each live line to ground and installed with fuses as stated above.

As these condensers contain wax, they should not be placed where they may be subjected to excessive heat. Condensers when connected to a circuit as stated above have no objectionable effect on the circuit, or the operation of any electrical associated apparatus.

Condensers of the Tobe Deutschmann or similar type of 1 mfd., 1,000 volts direct current, are suitable for installing in metal boxes as described above.

In many cases it is possible to make slight changes in the connections of the electrical apparatus causing the surge, in order to use some existing apparatus such as a choke coil and thus prevent the necessity of adding additional chokes to the system.

A series commutator motor, causing a surge of sparking at the brushes, may have its leads reversed to reduce the Radio interference. Where one wire is grounded, Radio interference from such a motor is often reduced by reversing the leads supplying the motor, so that the brushes are connected to the ground side of the line and the field coil is connected to the live side of the line. In this case, the field coil is used as a choke. It may also be necessary to place a condenser of one or two microfarads capacity across the brushes. See figure 17.

In cases where neither side of the line is grounded, a choke may be inserted on the line connected directly to one of the brushes, while the field coil may act as a choke in the other line. In such a case it is recommended to use two 2-microfarad condensers in series with the ground at the middle point according to the diagram, figure 18.

Where it is not convenient to make connections with the brushes of a motor, the condenser may be placed across the line as near the motor as possible, and a choke coil inserted in the live line, when necessary. Instructions for the installation of these units were given above. The live side of a low voltage lighting circuit may be determined by means of a test lamp connected from ground, first to one wire and then to the other. The lamp will light when connected from the live line to ground.

Battery Chargers and Sign Flashers

A battery charger of the vibrator type may be prevented from causing interference by connecting a condenser of ½ microfarad capacity across the vibrating contacts. It is useless to put condensers across the mains serving battery chargers, but it is essential to make use of the choke consisting of the wire and coil within the battery charger, to prevent the surge from getting out on the line.

Flashing electric signs may usually be prevented from causing interference by connecting condensers from ½ to 2 microfarads capacity across the contacts of the circuit breaker. As the Radio interference from such sources depends upon the conditions of the installation, it is necessary to make a few experiments, as suggested in our previous issue, in each case, in order to reduce the interference most effectively.

Sometimes the interference from such a sign is caused by sparking at the commutator of the motor which drives the flasher. This may readily be determined by the nature of the sound in the Radio receiver and can be remedied with the method described for dealing with interference from commutator motors.

Internal combustion engine ignition systems may cause Radio interference, but this is usually of a very local nature. Such, however, may be considerably reduced by making the leads from the magneto or spark coil to the engine as short as possible and running them in a grounded shield such as metal conduit or lead covered cable. The frame of the engine, magneto, and all shields, should be thoroughly grounded.

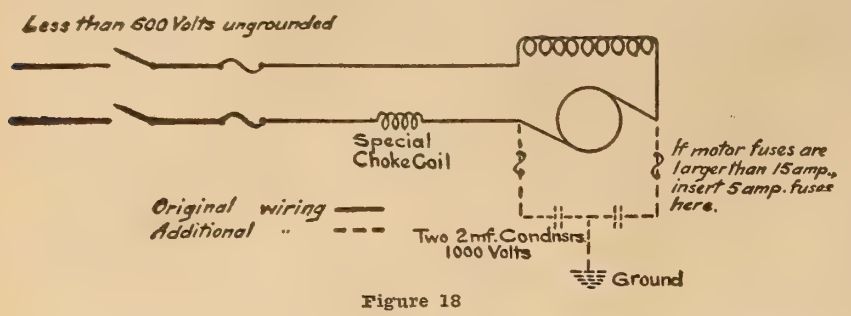

Figure 18

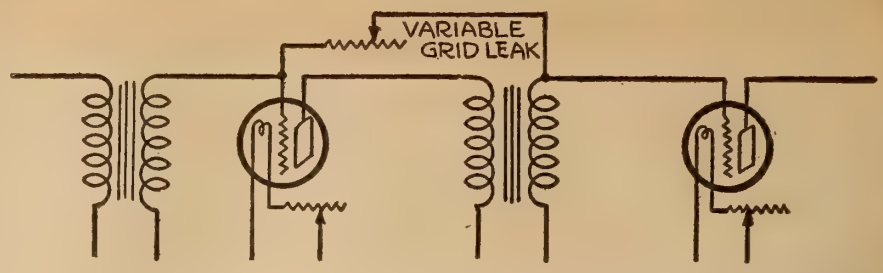
(In next week's article, the construction of a portable receiver suitable for locating interference will be described and suggestions for its use will be given. The devise should prove valuable to Radio clubs and organizations who are making efforts to elminate sources of interference.—Editor's note.)

KINK TO LESSEN SPEAKER NOISES



If you are troubled with various unwanted noises, try out this simple little experiment. In the accompanying sketch I show where an ordinary variable grid leak is connected between the grids of the last and preceding audio frequency tubes in order to control various kinds of distortion. I have found this arrangement most satisfactory. The resistance should be set at its lowest value and then increased very slightly. If howling should occur, the secondary leads of one or both transformers should be changed over.—Joseph H. Stevenson, Oak Station, Pa.

AN ESTABLISHED MANUFACTURER WISHES TO INCREASE HIS SALES FORCE

and will consider applications for district Managers in New York State, Long Island, Connecticut, New Jersey, Pennsylvania. Intends to open branches in 20 towns. Under our plan of operation, we furnish the Radio Receiving sets and equipment, and make it possible for the applicant to start in business right away and make at least $2,500 per year income.

Radiophone Broadcasting Stations

Corrected Every Week—Part IV

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

NOTE.—The fourth part of the schedule list appears below. Part five appears next week.

Photogravures of Your Favorite Artists

GALLERY OF RADIO STARS

SUITABLE FOR FRAMING OR PLACING IN YOUR ALBUM

BY special arrangement, Radio Digest is able to offer our readers an opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

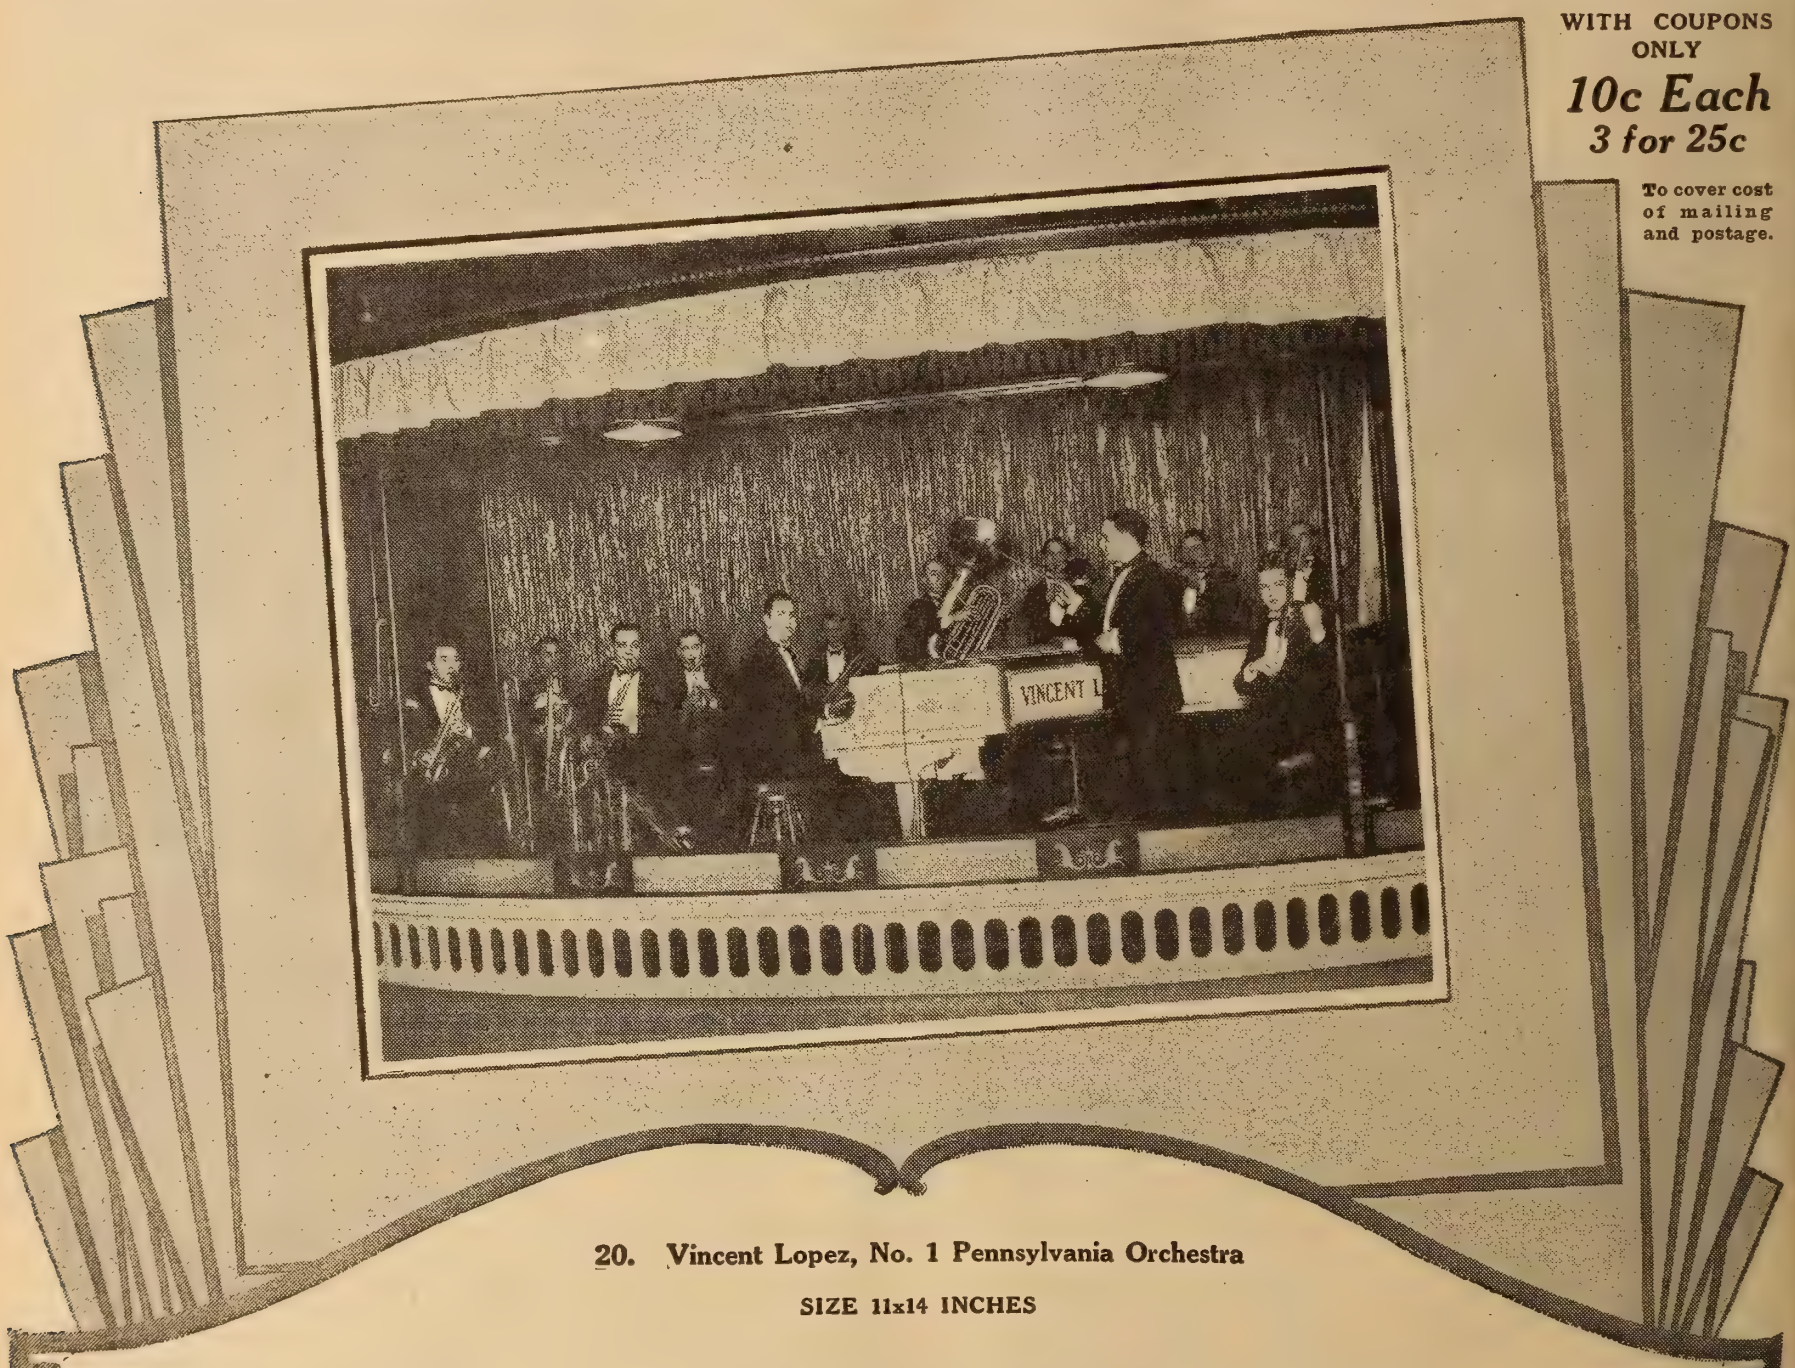
All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each issue in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutive numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

WITH COUPONS ONLY

10c Each

3 for 25c

To cover cost of mailing and postage.



20. Vincent Lopez, No. 1 Pennsylvania Orchestra

SIZE 11x14 INCHES

Select Your Favorites from the Gallery of Radio Stars

ONLY SEVENTY-EIGHT NAMES IN CUP RACE!

LISTENERS HAVE WIDE SELECTION IN 1926 AWARD

Who Will Be World's Champion Announcer This Year? Three Cups on Prize List

Seventy-eight favorite announcers, two of whom have voluntarily withdrawn, have been nominated by admiring listeners to participate in the third annual Radio Digest Gold Cup Award for the world's most popular announcer. The two withdrawn on their own initiative, are George Hay and Graham McNamee, winners of the 1924 and 1925 cups. They wish to establish a precedent, as they announced last issue, of "single terms" for Gold Cup announcers.

The entire list of nominees to date appears below. The number is larger at this period of the competition than ever before. The race is predicted to be one of the keenest contests in the history of the Gold Cup Award.

Who will win? The answer is, the announcer with the greatest support from the invisible audience.

Three Cups for Winners

The complete list of nominees appears below. It contains names of men heard nightly from every section of this country and Canada. Select the one for whom you are going to save ballots and try to elect. If undecided, there will be enough ballots to split your vote among several favorites.

The winner will receive a solid, 14-carat gold cup. The second highest will be given a beautiful silver loving cup, as will likewise the Canadian winner. The next fifteen highest in standing at the close will be rewarded with certificates of honorable mention.

Here they are. Take your choice:

Announcer	Station
Arnoux, G. C.	WGY
Barnett, Stanley	WBAL
Broza, Stanley A.	WCAU
Barnes, Patrick Henry	WHT
Brokenshire, Norman	WJZ
Caldwell, Nate	ex-KMOX

Wall, W. C.	WAPI
Wetzell, Maurice	WOOD

(Graham McNamee and George D. Hay, winners of the two previous Gold Cup Awards, have withdrawn from further participation in the cup awards, hence their names appear only for record in the above list. Do not send ballots marked with votes for either of these two announcers, as the votes will not be credited to anyone, but will be thrown out.—Editor's Note.)

A recent morning devotional service from KLDS, Independence, Mo., brought over a thousand cards and letters from listeners.

WHISPERING PIANIST YELLS AT IMITATORS

FEELS FLATTERED; ALSO "BURNED UP," HE SAYS

Art Gillham Calls Attention to Pioneering Efforts—Wants Listeners to Know Who Is Who

NEW YORK.—Art Gillham, the Whispering Pianist of Radio, arrived in New York recently, and brought with him a grievance that he picked up on his recent tour of the South and the Middle West.

"Imitation may be the sincerest form of flattery," says Mr. Gillham. "But when I go into a town and someone tells me that I am imitating the style of so and so, it just burns me up."

Art Gillham has been entertaining Radio audiences with his intimate, confidential, whispering style, since he discovered long ago, while working from the old Drake hotel station WDAP, Chicago, in December 1922, that it was not necessary to shout into the microphone.

Gillham Tells His History

He was the first artist to whisper his songs in such a low voice that those standing in the studio with him could not hear what was being said. He started on his first tour of stations in May, 1923, and to date has broadcast from 208 different stations.

Lambdin Kay, well-known announcer of Station WSB, the Atlanta Journal, first called Art Gillham "The Whispering Pianist" in an article on February 24, 1924. Since then this billing has been used. Mr. Gillham's style has been so successful that it has given rise to many imitators of his style. One artist, Mr. Gillham claims, has even gone so far as to lift word for word the type of conversation Art uses in his introduction.

Looking Ahead

Romance and the Instinct of a Pair of New York News Whippets leads them into the tangled depths of a Florida jungle where they contend against extreme odds to rescue beauty in distress. This is the story of Big Rabbit by Hugh Fullerton beginning in the next Radio Digest.

Big Double Spread of Pictures Showing Some of the Leading Casts who are presenting the Radio Digest mystery play, "A Step On the Stairs." It will be of interest to note whether or not the faces from these various stations appear as you have pictured them from hearing their voices as play characters. WGY, WOR, WRC, WMAQ, and others will be included. Be sure to see them in the next Radio Digest.

Sharpen Your Pencils and Limber up the Typewriters to write the tenth and concluding chapter that will solve the big mystery of who killed Jeremiah Turner and win part of the $500 prize money offered by Radio Digest. The ninth installment will be published next week. Write the tenth and end the story.

A New Discovery—A New Cause of Interference will be exposed in the next and final "Blooper" article, together with a practical method for controlling it. Get this issue, for it should prove interesting to set owners.

Carnegie Tech Will Offer Six-Week Course in Radio

PITTSBURGH.—As a result of the demand that has been developing during the past few years, a course in Radio communication, it is announced, is included in the plans for the summer session this year at the Carnegie Institute of Technology here. The college will give a six weeks' course from June 28 to August 6.

NEILANS FIND SALLY AND MAKE HER MIKE

MARSHALL Neilan and his wife, Blanche Sweet, were looking for Mike when they sauntered into a well-known Los Angeles ballroom six months ago. They sat watching the swirl of dancers sweep past them. Almost at the same moment their eyes lighted on a frolicksome young miss whose blonde curls bobbed riotously on her vivacious head, whose laughing lips and sparkling eyes made her the center of an admiring circle wherever she moved.

"There's Mike," said both Mr. Neilan and Miss Sweet in the same breath.

And "Mike" she is, although she was christened "Chotsie" by her father, the late Judge T. F. Noonan of the New Jersey supreme court. Chotsie had come to Los Angeles on doctor's orders for her health and had no notion of becoming a motion picture star until she met the Neilans. On the other hand the Neilans had a picture called "Mike" and all it lacked was the "Mike." They had intended Mary Pickford for the part but that fell through. Then they saw Chotsie. Chotsie became "Mike" and as a motion picture star she chose the name of Sally O'Neil. And Sally O'Neil is the seventeen-year-old star of the Metro-Goldwyn-Mayer organization shown on the cover of Radio Digest this week. She broadcasts over KNX, Hollywood.

OLIVER LODGE INVENTS "N" SET

NEWS BRIEFS FROM THE BROADCASTERS

NO AIR TIME LOST BY WPG INSTALLING SUPER SET

Dornberger's Replaces Coon-Sanders Orchestra at KYW—WEAN Has American Legion Program

WPG, municipal station of Atlantic City, N. J., is making an installation of a 5,000-watt superstation without interrupting its broadcasting service. No time on the air will be lost in transferring from the old 500-watt equipment to the new.

* *

"The Phantom Violin," the ghostly old master who ever and anon comes to the WGN, Chicago, studio from the land of the shades, was heard there again last week. His identity is being kept secret, and his program usually includes popular favorites as well as classics.

* *

Charles Dornberger's orchestra has taken the place of Coon-Sanders orchestra at the Congress hotel while the latter group of musicians, known for their broadcasts from KYW, goes on its annual tour.

* *

"Around the Town with WDAF" is a new feature added to the Kansas City Star's schedule Saturday nights from 8 to 10 p. m. Central time. The feature is composed of musical pickups from Kansas City's hotels, theaters and dining rooms.

* *

The Rhode Island American Legion official program will be given on Thursday night, April 22, at 7:30 p. m. Eastern time over Station WEAN, Shepard Stores, Providence, R. I. Music and addresses by National Vice Commander R. B. Littlefield, Department Commander J. P. Hartigan and National Executive Committeeman B. W. Wall, will be featured.

* *

How to plant flowers and shrubs about your home this spring is told by WOC, Davenport, every Wednesday evening at 9:00 and Friday at 7:30 p. m. Central time.

* *

Coy, shy Irene Downing, above, is a much applauded pianist and organist who delights the Crosley WLW audience with her ability. Her artistry is a regular feature of the Cincinnati superpower station.

The feature will continue throughout April.

* *

KTNT, the Calliaphone station at Muscatine, Ia., has inaugurated a correspondence club for lonesome men and women of all ages. Excerpts from the letters are read over the air nightly at 9:30 p. m. Central time.

WCAU Entertains British Guiana

PHILADELPHIA.—Georgetown, Demerara, British Guiana, reports successful reception of WCAU, Philadelphia. Besides hearing the Philadelphia station, the listener heard WMBF, Miami, Fla., and relayed WMBF's program to several friends through the Georgetown telephone exchange.

BACH, 91 YEARS OLD, IS HONORED BY WSOE

MILWAUKEE. — When Christopher Bach, Milwaukee's own composer, wrote his three operas and twenty overtures, little did he realize that the time would come when he would sit at the fireplace in his own home and hear selections coming over the air and dedicated to himself on his birthday.

WSOE, the School of Engineering station, here, recently gave a special program in commemoration of the ninety-first birthday of this famous composer. The program featured the music written by Mr. Bach.

A feature of the program was the cello selections by Hugo Bach, a son of the composer, while many of the Bach overtures were played by Pestalozzi's string quartet. Al Nitz, musical director of WSOE, and Katherine Kies Hardtke, pianist, also participated.

A tribute to the composer was paid by F. A. Vaughn, manager of the station, while telegrams from many parts of the country were received congratulating Mr. Bach on his birthday.

FAMOUS ENGLISHMAN CLAIMS NEW RECEIVER CANNOT BLOOP

Device Is Product of Three Years' Laboratory Experiments—Does Not Rely on Tuned Aerial —Circuit Details Are Kept Secret

By A. C. Blackall

LONDON, Eng.—A problem which has completely baffled Radio experts the world over for years past—how to do away with the howler or "blooper"—has been completely solved by Sir Oliver Lodge, the world-famous physicist and Radio pioneer.

Sir Oliver's epoch-making discovery will ensure perfect reception without aerial tuning, and will thus avoid the use of regeneration. It will not add to the cost of new sets, but will mean the alteration of existing receivers.

Sir Oliver has been working on his great invention in secret for nearly three years in his laboratory at Egham, Surrey. Briefly, his discovery consists of a set which cannot be made to bloop.

Eliminates Tuning He Invented

The change by which this result has been brought about is a comparatively small one, but it is not a change that can easily be incorporated in existing receivers, as these sets are relying on a tuned aerial and must howl when there is too much regeneration.

Sir Oliver, who introduced tuning to the world, and thus made Radio communication possible without chaos, has now taken it away again. By dispensing altogether with the tuned aerial he has abolished blooping.

When Sir Oliver filed papers on his new invention he found, as so often happens, that another man had been working along almost precisely the same lines—a Mr. Melinski. He approached Sir Oliver, and the two are now working as partners, with the interesting result that Mr. Melinski has evolved a supplementary patent of great value.

Invention Will Cheapen Receivers

Sir Oliver's great discovery is known as the "N" circuit. The first set made under the new principle is still in course of perfection. All tests have been made on a one tube set.

The invention may not be capable of application to crystal sets. On a one tube set only one control—that of the tuning system—is required. The "effect" which replaces reaction is controlled automatically.

As regeneration, coupled with grid rectification involves a royalty of $3 per tube in England, the elimination of regeneration will lead to cheaper receivers, as the other device can be dispensed with.

The "N" circuit is simple and capable of construction by any fan.

Sir Oliver's definite claim for the invention is that it eliminates regeneration control and makes blooping impossible, but at the same time retains the feedback effect, so that the detector tube works with maximum efficiency.

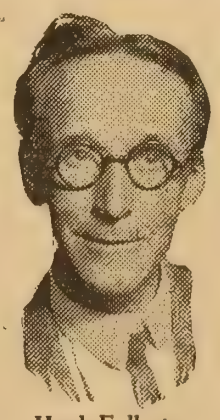
The many tests that have taken place leave no room for doubt that the device for which everybody is in search has been found. The users of the new set must be prepared to make very delicate adjustment, and this may be rather trying.

Sir Oliver states that he will shortly make known the results of his work.

MUZIO'S SOPRANO VOICE IS LIKED

Claudio Muzio is one soprano listeners can tune in without fear. They have heard her many times over the air, the most recent occasion being her appearance over the WEAF chain in an Atwater Kent hour. Her chief work is that of leading soprano for the Chicago Civic Opera company.

It won't be long now, until Lorraine Allen, above, is graduated from the University of Arkansas, for she's a senior. Her talent at the piano of KUOA, Fayetteville, Ark., has earned for her the title of "Queen of the Ivories."



Hugh Fullerton

Hugh Fullerton WRITES "Big Rabbit" FOR RADIO DIGEST

THE Big Rabbit ???????

Hugh Fullerton, famous author, sports expert and magazine writer hits a new and broader stride in a brand new love story with a powerful romantic theme which will begin in next week's Radio Digest.

It's a story of the South, but quite different in treatment than anything ever written before of this land of romance. The Big Rabbit deals with negro fanatical superstition, bringing out tragedy and comedy by turns.

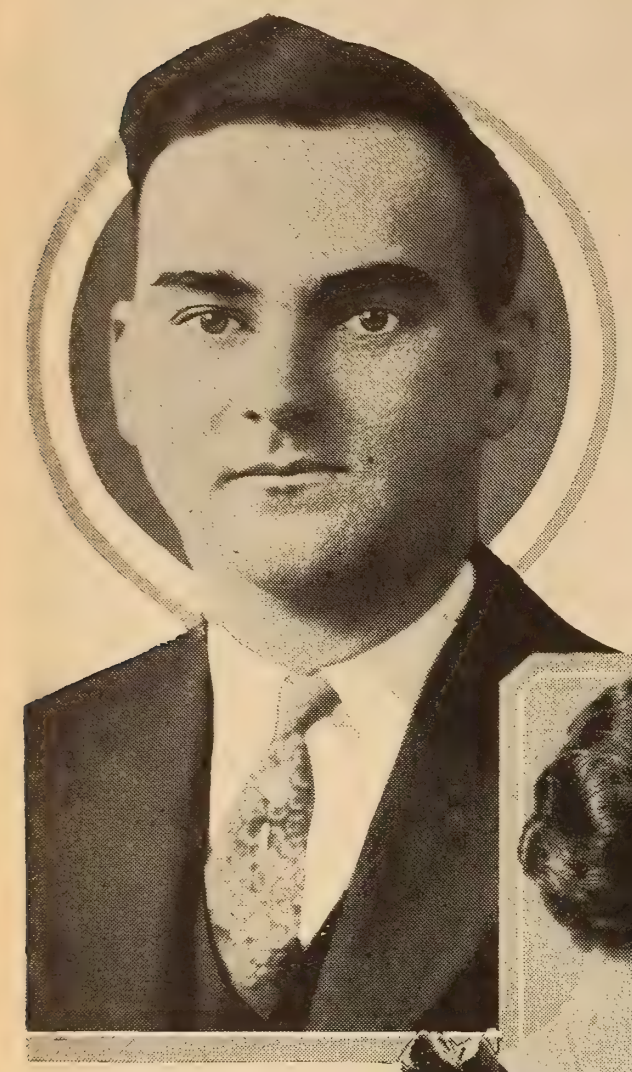
Fullerton shows he understands emotions that rise higher than the shouts of the bleachers. He shows that a New York news hound has the same instincts in a maze of alleys or a Florida jungle and can stick to a trail that seems hopelessly baffling. And with love waiting there as an added incentive——

Imagine the thrills. There's a leap and a jump on every page, with the life of a beautiful Georgia peach in the balance.

Yes, you'll agree that Hugh Fullerton has a place in the purely fiction field when you read this story which will be found only in Radio Digest. Do not miss the opening chapters in the next issue, April 24.

"Welcome to Pensacola," WCOA

"Wonderful City of Advantages" Sends Mayor and City Treasurer to Washington When Other Appeals for Wave Allotment Fail. Public Servant Likes Job—Labors for Love.



"We'll see about that," said Mayor Bayliss (above) as he started for Washington for a wave length. That's why you are able now to hear Anita O. Villar (right) sing over WCOA.

By HAROLD P. BROWN

MR. JOHN E. FRENKEL of Pensacola, Florida, is a public servant who likes his job so well he isn't satisfied with an ordinary day's work. He officiates as city treasurer and city clerk and after office hours conducts the municipal broadcasting station, WCOA, on his own time.

Don McLellan, city editor of the Pensacola News, says he has been trying to catch Mr. Frenkel at a moment of leisure for the past three months and hasn't succeeded yet. The busy man dashes away from his grapefruit and cereal to be at the city hall when the doors open. He buries his nose in the ledgers until noon, then sends out for coffee and sandwiches and between sips and bites, answers questions from a line of waiting citizens, snatching moments here and there to fill out marriage licenses for blushing applicants.

With Pensacola caught on the crest of the Florida boom, there is no end of work keeping up the city records and making official note of the big real estate deals and new subdivision openings. Pensacola is one of the big cities of the state and has been doing its full share to keep the west coast on an even keel with the east coast.

Along in autumn of last year, it was discovered that Pensacola had no voice in the air realms. This was at once considered a matter for grave concern. The city fathers pondered over the matter and sent for literature on broadcasting apparatus. All was set for the purchase of a station in October, when it was found that Secretary Hoover had no available wave lengths to allot. The city commissioners were staggered for the moment, but they did not give up.

The story is well told by Celia Myrover Robinson's magazine, Florida On the Gulf, as follows:

"So Mayor J. Harvey Bayliss and City Clerk John E. Frenkel made a trip to Atlanta, and there met W. Van Nostrand, Jr., supervisor of Radio for the southeastern district, who accompanied them to Washington, where the Florida representatives, Senator Duncan U. Fletcher and Congressman J. H. Smithwick helped them to get in conference with the powers that be. Permission was granted to the city of Pensacola then to install WCOA—one of the finest broadcasting stations in the United States, which three times a week will tell the world about Pensacola, "Wonderful City of Advantages." The magazine itself thrills with the ardor of youth and at the same time breathes a dignity worthy of the oldest city in the United States and continues:

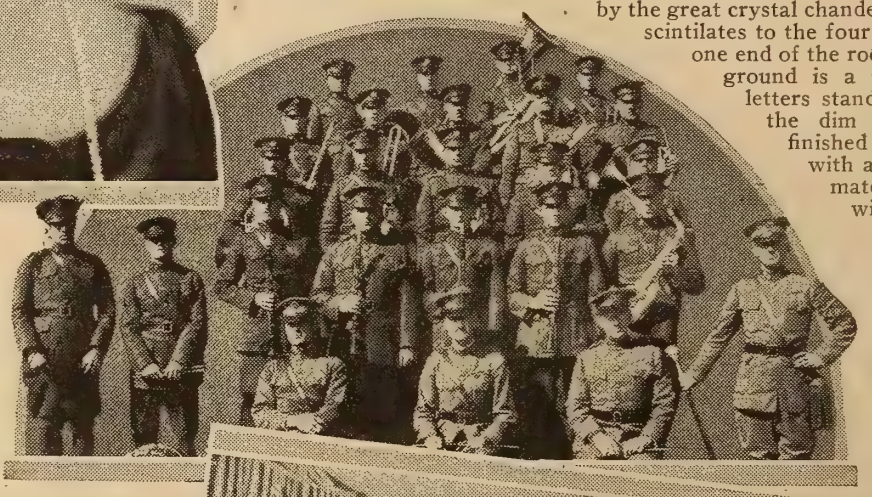
"MONDAYS, Wednesdays and Fridays, if you will listen, you will hear Pensacola calling . . . to tell the world of this wonderful city of opportunities—a city with the largest naval air training school in the world, the only modern fortifications on the Gulf coast, old and historic forts, the purest water in the United States, the biggest red snapper business in the world and the best port in the South.

"It will tell about the advantages of Escambia county, which has had the greatest increase in farms during the past few years of any county in Florida; where one man cleared $2,100 in Satsuma oranges on two and one-half acres of land last fall; where anything in the world may be grown; where the rainfall is plentiful and summer or winter life is a joy."

WCOA took the air during the early part of last February, on a 222 meter wave length. It is well equipped with the very latest improvements and makes the most of its 500 watts power.

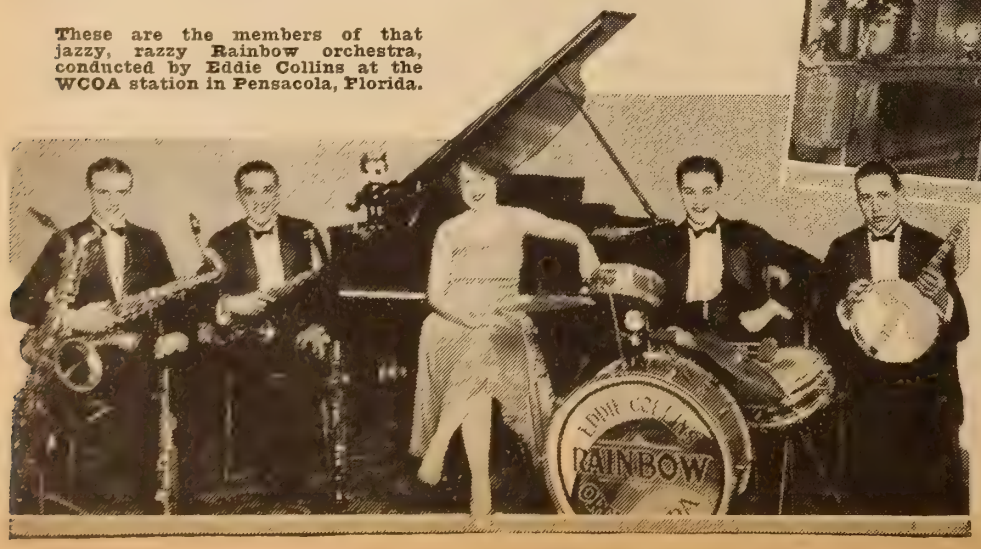
Mr. Frenkel volunteered as public servant to sponsor the station as a city institution. He not only assumed responsibility for its physical well being, but he took charge of the programs. Having a good voice himself, he has not neglected the musical phase of the broadcasting. Others than Mr. Frenkel have taken local pride in their station and volunteered cooperation with talent so that the entertainments have been diversified and universally interesting with never a dull program since the opening.

The studio has been carefully constructed with an eye to the artistic as well as the acoustic. The draperies are of a light gray corduroy velvet, plaited and decorated with fringe and tassels. The ceiling is finished in the style of Louis XVI. This is emphasized by the great crystal chandelier, five tiers deep, which scintilates to the four corners of the room. At one end of the room against the gray background is a plaque with the WCOA letters standing out in clear relief in the dim light. The furniture is finished in burnt-orange and blue with a deep floss rug of blue to match. The piano is a Baldwin Artist Grand.



At left are members of 13th Coast Artillery band heard over WCOA. Below is a corner of studio as it appeared on opening night. In lower corner John E. Frenkel, public servant.

These are the members of that jazzy, razzy Rainbow orchestra, conducted by Eddie Collins at the WCOA station in Pensacola, Florida.



One of the best known musical features of the WCOA station is the 13th Coast Artillery band from Fort Barrancas. It goes on the air from WCOA twice each month. Then, among the regulars, comes Eddie Collins and his Rainbow orchestra. Miss Anita O. Villar is one of the staff artists who has endeared her voice to a very large audience of listeners. (*Continued on page 20*)

WOAW Radiates Brotherhood

OMAHA Station Reaches Out Friendly Hand to All Listeners and Brings Them Together in Air Fraternity. Rev. R. R. Brown Has Radio Congregation Embracing 500,000 Members.

FEW broadcasting stations in the United States are so located that they may be heard regularly from coast to coast. One of these stations, however, is WOAW of Omaha. Even through the heat resistor months the WOAW programs are reported back from both coasts. Thus the fundamental purpose of the establishment of the station is achieved.

Be it known that WOAW is the official mouthpiece of the great faternal order, Woodmen of the World, and is located on that fraternity's skyscraper building in the heart of Omaha.

"Nothing has changed so much in the last few years as the social life of the people," said President William A. Fraser of Texas, as he sat in the WOAW studio revising a speech he had prepared for broadcasting. He is one of those unusual big men who seem to spring up characteristically from the Texas soil. And he has been affectionately titled by his fellow workers "Big Bill Fraser," which seems to please him better than the title of president.

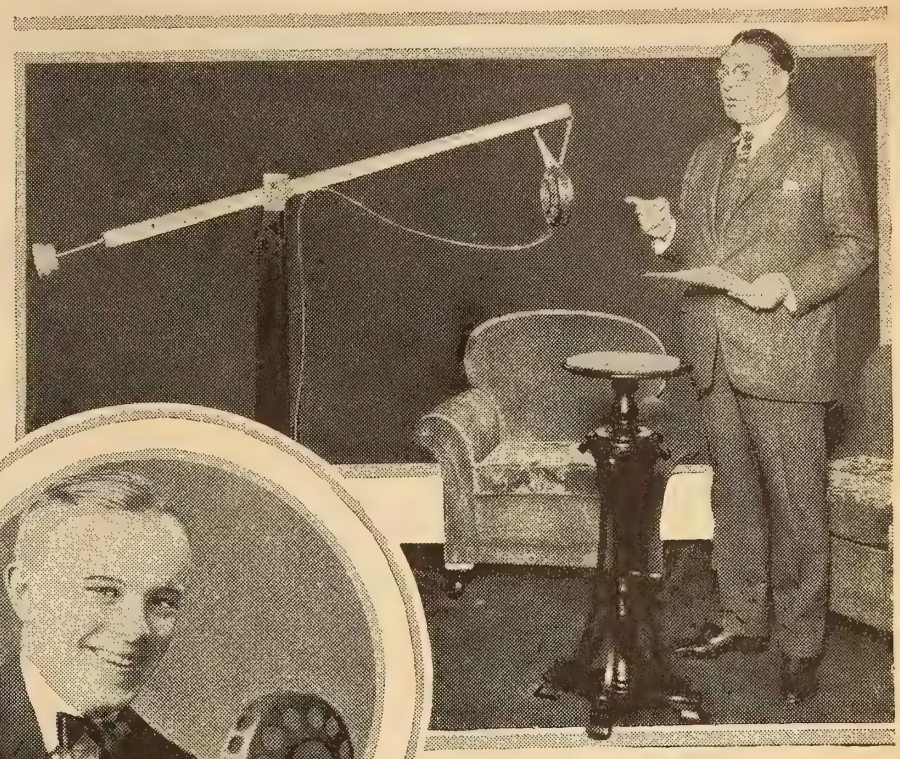
"With our daughters and sisters growing up to become business women," continued Big Bill, "and with the multiplicity of evening attractions including the automobile, movies, supper clubs and dinner dances taking up the hours of leisure, the home lives have been greatly altered. The kitchenette and the family hotel have taken the places of millions of family homes. The old-time neighborliness and community life seemed to be disappearing.

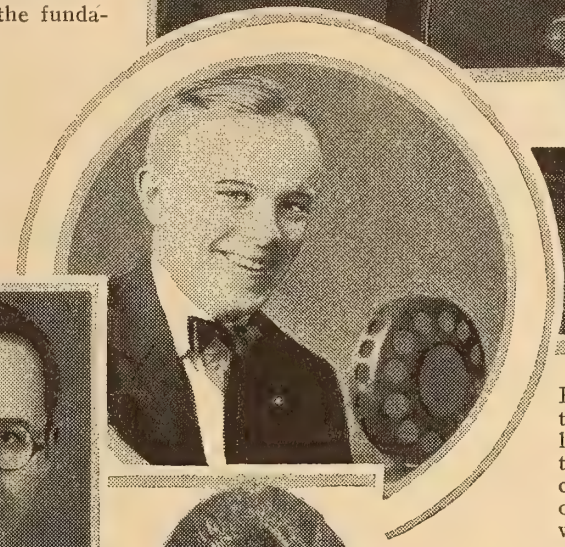
"All this was not conducive to fraternal growth and so we decided we would take our order to the people through the Radio. Through the Radio we find a great uniting force between vast numbers of people. They meet and become acquainted through the medium of the air. They may never actually see each other physically but they hear the voices and they feel a union of interests in many ways. They are experiencing a reawakening of spiritual interest through our religious services. They enjoy the same amusements and have their Radio clubs."

When Donald B. McMillan, the Arctic explorer, was frozen in on his ship the Bowdoin, eleven degrees from the North Pole, about 5,000 miles from Omaha, he sent a Radio message to WOAW saying, "Deeply appreciate your Radio chapel service in behalf of my men shut in near the Pole. Will listen for you again." This was considered one of the very essences of fraternalism through service to fellow men.

Among the feature activities of Radiophone WOAW, are the World Radio Congregation, and the Bible Study Hour. Every Sunday morning, at 9 a. m., Central Standard time, Reverend R. R. Brown, pastor of WOAW's Radio church, conducts a full service program from the studio of WOAW. His listeners are everywhere, of all types, and each of the members of the congregation is presented with a beautiful certificate, engraved, colored, and signed, upon proof of good character and regular Radio receiving of the services. The outstanding fact of the Radio congregation is its interdenominational sect. Reverend Brown is a man selected by Mr. Fraser for his personal integrity and his ability to appear to a varied, cosmopolitan audience. Reverend Brown is one of the most popular preachers in the world. It is impossible to keep account of all the hundreds of gifts which find their way into the studio, from country-fresh eggs to a beautiful new touring car for his trips to rural districts to preach to enthusiastic Radio fans in person.

Mrs. Carl R. Gray conducts the Bible Study hour each Sunday at 6 p. m. She, too, conveys to her listeners, the religious idea. But, not as a preacher, not as a controversialist. Her message is that of the scholar, reflective, calm, interpretative, through research and investigation. Mrs. Gray's lessons are valuable because they bring people back to the original sources, because they go (*Continued on page 20*)

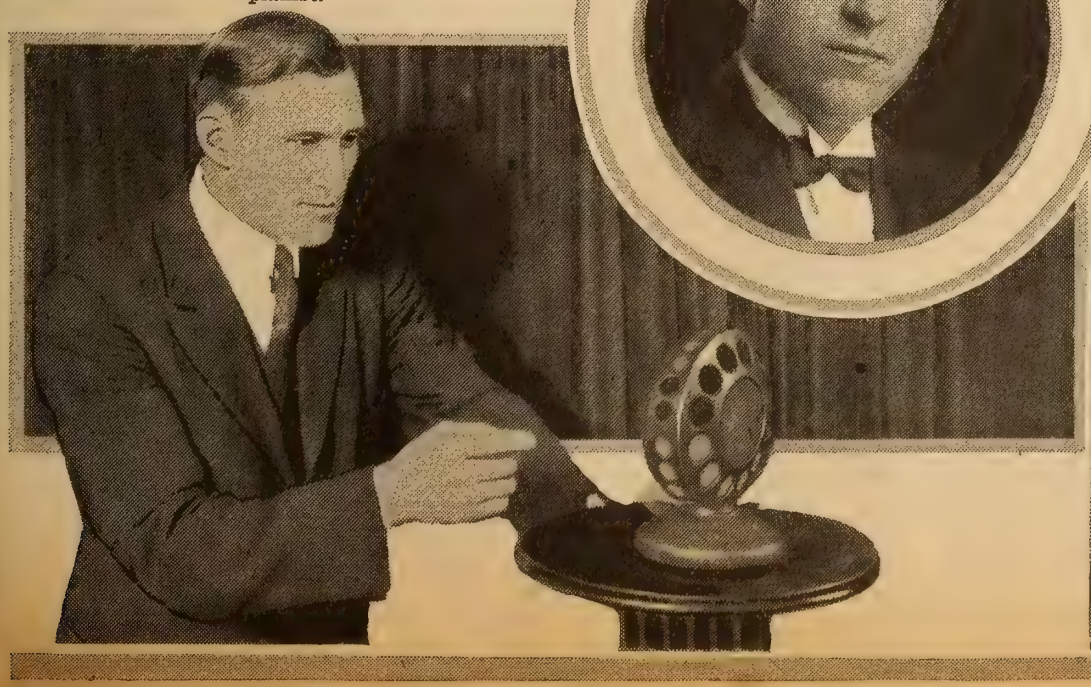




Lester Palmer (right), program and studio director WOAW. Eugene Konecky (below), poet laureate and announcer at this station. Both are known by their initials.

"Big Bill" Fraser, president of Woodmen (top), in speech that was heard from coast to coast. Mrs. Carl R. Gray (left), Bible class leader. Below, home of WOAW.

Rev. R. R. Brown (below) who conducts church and chapel services from the Woodmen Radio station, said to have the largest congregation in the world. Arthur Randall (right) pianist.



MEAT PIES PROVIDE CHEAP, SAVORY DISH

ARE TASTY AND DELICIOUS AND YET ECONOMICAL

Miss Betty Crocker Gives Recipe for Dish That Answers Demands of Diet and Pocketbook

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

ONE reason why meat is such a popular food is because it leaves one with a sure feeling of satisfaction. People who are accustomed to eat considerable meat and are, for some reason or another, deprived of it, are not at all satisfied with other foods. They feel that there is something lacking. There are several reasons for this feeling. First of all, we like the flavor of meat because it is stimulating and appetizing. Furthermore, meat digests more slowly than some other foods. Because of the fact that it remains in the stomach for a longer time, it gives one a comfortable, well fed feeling that is lacking when the diet is made up of foods that do not stay by.

During the war time, we talked a great deal about meat extenders. The idea of a meat extender is to extend or spread the meat flavor so that it flavors other foods and thus satisfies the desire for meat although only a small amount of meat itself is served. Gold Medal meat pie is a good meat extender. It is also a good left over dish in which left over meat may be used. It is an economical dish as it is prepared with a cheap cut of meat and it makes a little bit of meat go a long way.

The mere mention of meat extenders and economical dishes sometimes rather spoils our desire to try those particular dishes. Usually the economical dishes sound uninteresting but that is not always true. Meat pie fills all of these requirements and yet is by no means an uninteresting dish. It is so tasty and delicious that I make it often because I like it and because every one likes to eat it. It is a satisfaction to have a dish you really like to make and serve which will at the same time answer all the demands of the diet and the pocketbook. This is the recipe:

One small onion, 4 stalks celery, 6 tablespoons meat drippings, 2 pounds of beef or veal, a cheap cut, 2 teaspoons salt, ½ teaspoon pepper, 1 cup cooked macaroni (about ½ cup uncooked), 2 cups cooked diced carrots, 2 cups peas, 5 tablespoons Gold Medal flour. A baking powder biscuit dough is made of 2 cups Gold Medal flour, 3 tablespoons shortening, 4 teaspoons baking powder, 1 teaspoon salt, ¾ cup milk.

Method: Dice and brown the onion and celery in 1 tablespoon of meat drippings. Add the meat and sear well. Cover with water. Add salt and pepper and let simmer until tender. Remove meat from liquid and cut in small pieces. Add cooked macroni, carrots and peas. Make a gravy by combining 5 tablespoons of the meat drippings with 5 tablespoons of flour. Mix to a paste and cook well. Add the liquid from the meat and cook 10 minutes. Place the meat and vegetable mixture in a buttered baking dish. Cover with gravy. Make the baking powder biscuit dough, roll out and cut with a biscuit cutter. Place biscuits on top of meat and gravy. Bake 20 minutes in a hot oven, 450°F. This amount will make ten servings.

Some of the fat may be cut from the meat for the drippings, or you may use other meat drippings. If there is very

(Continued on page 17)

WORLD'S GREATEST WOMAN WRITER

At home, Dr. Selma Lagerloef, famous Swedish woman known as the world's foremost woman writer and winner of the Nobel prize, is just the same as any other woman. She is an ardent listener and has several Radio receivers in use at her beautiful home at Vaermland, Sweden.

SHORT WAVES

By Marcella

Ann would know more of her favorite announcer, George Hay of WSM. Is he married? Any family? Or what have you? Speaking from a long acquaintanceship, Ann, I can truthfully say that he is—married. If you are still interested, read on. Family? I think so, but don't know how big. He is a tall, gangling, good-natured philosopher around thirty years old. His hair is dark brown, complexion sallow and his eyes—funny I can't recall the color after having "looked into them wistfully" so often—are greenish-gray, I think. One of the highest tributes I can pay him, exclusive of telling you that he won the Radio Digest Gold Cup Award in 1924, is to say that he is a good newspaper man. He writes as interestingly as he announces, and his little feature stories and sketches always contain that inimitable twang of personality that means George Hay.

* *

Who are "Sam 'n' Henry" ask not less than a score of listeners, who range, I should judge from their letters, all the way from grand old Civil War vets to ultra-modern sheiks and shebas. Marcella knows, 'deed I do, but I'm bound by an awful oath not to give them away. That would spoil the whole act. It's the mystery of their identity that gives you about half the "kick" you get from their programs, and I wouldn't cause you to lose that for the world. No, sirree, especially not after Quin A. Ryan, WGN's smiling director, has threatened to tell the world who I am if I let the "cat out of the bag" about Sam and his "genneman fren." Doan argue wiff de genneman . . . doan argue wiff 'im.

* *

I hereby offer a reward of one sweet cookie to the young or old boy or girl friend who can give me last-minute and definite information concerning the total disappearance of Gene Rouse, ex-WOAW. He is wanted on the air by many good friends, but poor Marcella doesn't know where to begin to start. Come on, Gene, make them quit writing me!

a STEP On the STAIRS

By ROBERT J. CASEY

Radio Dramatization by FRED SMITH

Illustrations by HILMER C. OLSON

Synopsis of Preceding Chapters

IN THE first four episodes of "A Step On the Stairs," which are now available for 25 cents in a special reprint, we find a group of a dozen members of the Turner family in the hunt-room of the old Turner manse. They are nerve-strained and very jumpy as the result of a number of weird incidents connected with the attempted seance whereby Peleg Turner, the last of the house to die, attempts to speak from beyond the grave through a Radio loud speaker and tell them who killed his brother, Jeremiah. Ardwyn, the lawyer, presides. Mary Williams seems to be involved in most of the strange events, and the finger of suspicion is pointed at her by Aunt Helen, a gabby old widow; Cousin William, companion to Aunt Helen; Hazel Stanton, a girl whose relation to the family does not seem entirely clear, and Henry Graves who offers his protection by marriage. His offer is spurned. In the last episode John Carton, apparently Mary's accepted lover, appears in the room after the others have left for refreshments in another part of the house. Mary had fainted when she thought she felt the corpse of Peleg Turner entering the room through the front door, supposed to be barred except for the passage of the dead bodies of Turners going to their final resting place. Ardwyn left to get her a sedative. Hari Singh, the East Indian servant, unexpectedly becomes an ally of Mary when Carton, who seemed to be hiding from arrest on suspicion of the crime, is about to be trapped by other members of the party. The servant lets Carton out a side door.

Before Hari Singh is able to return, the other guests enter the room and demand an explanation of Mary as to the voice that had been heard in the room. Mary evades the questions briefly, but soon Hari Singh calls for help. He is discovered dragging in the body of a man which he said he had found outside the door in the snow. It is Milford Jones, with a fractured skull. He had disappeared earlier during the seance. While suspicions for the various evil happenings are being cast about, FYX starts up. A number is rendered and FYX stands by for the ship's SOS. Suddenly—Peleg Turner's voice comes out of the loud speaker. He curses Jeremiah's murderer whom he says is in the house and will pay the price 'ere dawn. While pandemonium reigns and Tolliver is talking, the beam of an electric flashlight hits him full in the face. Attempts to locate the owner of the light are vain. A human chain is formed to count heads. Instead of eleven people in the room as it should be, there are thirteen! Tolliver hunts matches beneath the table and is engaged in a struggle. He finds them, places them on the table, and suddenly an unknown voice threatens to shoot to kill at the first flicker of a match. The speaker tells all others to remain quiet and they will not be molested. Then the intruders begin tearing up the brick work around the hearth. Aunt Helen declares there is a corpse on the floor at her feet. Finally Mary Williams obtains a revolver, and from a hiding place, guards the front door exit while Hari Singh announces from without that he is guarding the side door. One intruder, seeking escape, is shot by Mary. The front door swings out from the wall, casing and all. The police arrive and throw a beam of light in the room. All are ordered to hold up their hands. The raid leader calls Henry Graves by the name of "Doggy" French, evidently a known criminal.

THE STORY CONTINUES.

CHAPTER FIFTEEN

The Itinerant Corpse

THE bewildered men and women who ranged against the rear wall of the hunt-room with their hands in the air and their glassy eyes turned full into the searchlight would have been hard put to decide whether this place of horrors was more forbidding in the unplumbed shadows or in fearful brightness such as this. Every face was ghostly in the light that fell upon them through the door whence had been carried the bodies of the dead Turners in their century-old parade to the graveyard. Highlights stood out boldly. But back in the corners the fearsome shadows were still undispersed—a little blacker, perhaps, a little more terrifying than before.

Men were moving in the snow beyond the front door—state troopers in uniform, a city policeman or two, and deliberate, squarely carved men in overcoats who looked as if they might be detectives. Inside the room in the twilight at the edge of the glare moved a trooper captain and a lieutenant. Their interest seemed to be centered on two figures in the foreground—Henry Graves and a roughly dressed stranger who stood beside him.

"Has Mr. Everett come yet?" inquired the captain.

"Coming," boomed a voice from the doorway. "What have we got, so far?" A man in civilian clothing but apparently high in authority slipped into the room.

"Hard to say just what we have got," replied the captain. "There's 'Doggy' French out there in front but I can't tell yet just how many of our customers are victims and how many principals."

"Bring the trouble-light in out of the car," suggested Everett. "It's got thirty feet of wire on it—ought to reach easily."

A trooper carried out the order. He laid the wire close to a corner of the doorway and hung the lamp to a corner of the fireplace and turned it on.

"That'll do," observed Everett cheerfully. "Captain, your men will take the posts assigned to them. Ask the two federal men to step in here and we'll close the door. It's too chilly for any comfort."

In a moment, before the wide-eyed spectators could guess how it had been done, the front door had swung shut once more as if to close out its hideous secrets. Two oaken bars lay across it, incontrovertible evidence that it had never been opened. But from somewhere beneath it wound a green wire, the lamp cord that furnished the battery current for the light on the mantlepiece.

"SEARCH the company for weapons, Captain Phelps," directed Everett. And he stood eyeing the crowd critically as this ceremony was in progress.

"No weapons," the captain reported. "I took the pistols from 'Doggy' and his pal right after we broke in here."

"Good," said Everett. "Put the cuffs on them and we'll take an inventory . . . Ladies and gentlemen you may lower your hands but please remain standing for o moment. . . Lieutenant Cass, would you mind looking under the table and seeing what's going on there. . . Something's moving. . . "

"A man," returned the lieutenant. "He's crawling out under his own steam."

"My head is bloody but unbowed," declared the mystery under the table. "Name's Tolliver—or was before I got soaked on the head. Sorry I wasn't up to welcome the gendarmes."

Tolliver straightened himself, clinging to the edge of the table for support.

"Who hit you?" Everett inquired.

"Some prowler in the dark," Tolliver told him. "I don't know just who. But I won't bother to guess now that you've slipped the irons onto Henry Graves. He'll do on any indictment from arson to murder."

"If I had hit you I'd have killed you, you big-mouthed boob," countered Graves energetically.

"That's enough of that, 'Doggy,'" Everett broke in. "And you, Tolliver, who are you?"

"Everybody asks me that," Tolliver observed cheerfully. "I'm Maurice Tolliver. That's all there is to it. I came here like a sap without any alias. I stayed here the same way while everybody in the place went cuckoo. And somebody hit me on the head. . . By the way. . . This any use to you?"

He held out a white packet which Everett seized quickly with a sudden ejaculation.

"Where did you get that?" he demanded.

"Down on the floor where I was asleep. When I came to the boys were digging something out of the fireplace and setting it to one side. Little boxes with hinged tops. I opened one and those packets were inside. . ."

"Well, Mr. Tolliver," Everett said judicially, "That is a packet of cocaine. It completes our evidence. . . And I think you will agree with me it makes it doubly imperative that we find out what has been going on here."

"AS FOR that you'd better ask Mr. Ardwyn, the gentleman over there near the door. He was in charge of these proceedings until Graves or somebody choked him off."

"We may wait a minute or two until Mr. Ardwyn feels more like himself."

Ardwyn stepped forward unsteadily.

"There is no need for delay," he said. "I am attorney for the Turner estate. I was Peleg Turner's counsel during his life. And I called this meeting tonight as I had been directed to do by my client in my last conference with him. I know very few of these people here but I think that all of them—not excluding Henry Graves there—can be identified readily as Mr. Turner's relatives."

Everett nodded.

"I knew in advance that there was to be such a meeting," he said. "I feel as you do that we should be safe in taking for granted the innocence of every man and woman in this room. But we have to make investigations.

"These troopers are here—I am here—under orders of the federal narcotic bureau of Portsmouth. It has been evident to us for some time that a cocaine smuggling ring has maintained a headquarters near this house, if not in it. We were warned that they intended to move their supply tonight and I suspect that they were handicapped by your seance. At any rate their attempt to call off the coast guard with a fake SOS did not succeed. So much for that. What we should like to know now is just how many of your party were in this room when the doors were locked."

"We started as twelve—not including Hari Singh who probably will be found standing guard with a shot gun just outside the hall door. One of our number disappeared and was found out in front with a broken head. That left eleven of us, but when I attempted to count heads in the dark I found thirteen."

"Funny," replied Everett. "One of the thirteen probably was 'Doggy' French's pal 'Jim.' Then, counting 'Doggy' in his role of Henry Graves as you knew him there ought to be eleven of you standing up there. And I can count only nine."

"You might count me as ten," laughed a voice from somewhere behind the federal operative.

"Mary Williams," ejaculated Ardwyn. "I had forgotten her."

"Where is she?" puzzled Everett.

"HERE I am," taunted Mary. "Help me down."

Whereupon Tolliver discovered her for the first time since the light had turned on.

"Why she's up there on the gun rack," he laughed.

"Just where I was when Henry Graves was looking for me," she announced. "Take this pistol, somebody, and help me down."

Henry Graves went white as he looked at her but he made no comment. The troopers lifted the girl from the rack to the floor and Everett, after an admiring glance, went on with his count.

"Even with this lady accounted for we are two short," he said. "We should muster thirteen including the two prisoners, or eleven without them."

"There's a man unconscious here against the wall," reported Captain Phelps. And as if his words had recalled a forgotten experience Aunt Helen Holmes began to gasp.

"It slipped my mind," she gasped. "I didn't tell you in the excitement an' all. But there was a corpse lying right there at my feet while all this fighting was going on. . . That was the thirteenth guest. . . A corpse. . ."

A sudden hush came over the company. The nerve weary guests felt as if the finding of a mere corpse would prove an anticlimax after the terrors of the night. The policemen, well aware of the character of the men they dealt with, knew that sudden death hovered perpetually over houses in which they rested. Captain Cass and Lieutenant Phelps made a hasty search behind chairs and in darkened corners until a sudden half-cry from Ardwyn drew them to the recess in the wall against which he leaned.

"There is the corpse, gentlemen," he said. "Turn it over in the light. . . what?" His calm voice rose to a sudden hysterical shriek. . .

"It can't be! It can't be!" he repeated dazedly.

"This is the body of Peleg Turner!"

"Here I am," taunted Mary. "Help me doun." Whereupon Tolliver discovered her for the first time since the light had been turned on. "Why she's up there on the gun rack," he laughed.

CHAPTER SIXTEEN

The Step

"ARE you sure that's Peleg Turner?" asked Everett.

"There can't be any doubt of it," declared Ardwyn in an awed whisper. "You don't have to take my word for it. Most of these people here would know. And out there in the hallway is Hari Singh, his servant."

"Hari Singh would be the best witness," decided Everett quietly. "He isn't so likely to be hysterical. And John Carton is out there somewhere. Ask him to come in here."

There was a delay of only a moment while an eternity settled on the shoulders of Frederick Ardwyn and bent him forward, suddenly an old man. Presently the doors opened and Hari Singh, shotgun in hand, stepped across the threshold closely followed by John Carton.

"The Sahib Peleg Turner," he gasped incredulously. "And dead. . ."

"Dead? Yes," snapped Everett. "How did you expect to find him? Alive?"

"Who am I to say who have never tried death?" shrugged Hari Singh. "I shall remember always the Sahib Peleg Turner as alive. And death seems so permanent."

"What about it, John?" inquired Everett of young Carton who stood gazing in horrified fixity at the corpse.

"That is undoubtedly my Uncle Peleg," he said tremulously. "We came too late."

"But how does it come that he is here?" pursued Ardwyn. "How could they have brought him here even if they could have had any purpose in doing it?"

"The front door, Mr. Ardwyn," John Carton told him after a plain struggle with his grief. "Peleg Turner came back into this house the same way he went out of it. . . Through the front door."

"But the door was locked."

"YES. . . Locked and barred. I know all that. But it isn't like other doors. One of the Turners was a Tory spy and he built the thing as an emergency exit. I discovered the secret the night after Uncle Jeremiah was killed. The whole frame swings in or out of the wall on a pivot hinge. The locks don't mean anything. The legend should have kept anybody from attempting to tamper with it. And now poor old Uncle Peleg comes back through it."

"Then the ghouls who did this thing must still be here," declared Ardwyn with sudden fire. "Who did it?"

"Do you recognize any of these people, John?" asked Everett.

"Yes, nearly all of them," replied Carton. "You got two of the worst of them when you put the cuffs on Graves and Jim Teufel. The bulk of the others aren't crooks. . . Hypocrites, perhaps, but not crooks."

"This one on the floor," suddenly interrupted Capt. Cass. "I thought it was Gus Marks. But it isn't. This fellow hasn't any beard."

"No," said Carton as he leaned over the prostrate figure. "That's not Gus.

"Gus is upstairs waiting for the doctor or the coroner. Hari Singh hit him with the butt of a shotgun when he broke out through the front door earlier in the evening. His name at this party was Milford Jones."

Capt. Cass turned the face of the unconscious figure toward the light and aroused a chorus of startled comment.

"I know him, too," observed John Carton. "This is my sanctimonious Cousin William Caryl and far be it from me to express the hope that whoever put him out did a good job of it."

Everett suddenly turned from the prostrate William and raised an ear toward the hall door.

"Who's that coming down the stairs now?" he demanded. "Anybody up there besides Gus Marks?"

FOR perhaps the tenth time since the old mantel clock had announced midnight a blanketing silence fell over the room. And once more came the echo of the step on the stairs. . . A creaking indefinable footstep. . . followed as always by the tapping that slowly spelled out the fateful message—SOS.

"There are no stairs in that end of the house," John Carton announced suddenly. "Those sounds originate right here in this room. . . Has anybody bothered to open that old cupboard at the end?"

The eyes of the company suddenly shifted and a trooper leaped across the room to the great walnut armoire that Carton's words seemed to have conjured out of the shadows.

"Stand back everybody while I open the door," commanded the trooper. "No telling what we may find in here." And he drew his pistol as he gingerly turned the key and threw back the front panel on its creaking hinges.

Out onto the floor dropped a reeling gray bundle.

"A man," breathed Mary Williams.

"The man Millis was telling me about," cried Hari Singh. "The man in the gray overcoat who came from the sea."

"If this is another member of the gang we have him," reported the captain. "He seems to be about half smothered."

"He's not a member of the gang, Capt. Cass," replied Everett. "That's Tommy Mitchell of the Portsmouth narcotic squad. . . How did he get in there?"

"I guess I locked him in," confessed Mary Williams in a thin startled voice. "I guess I locked him in."

How did Mary Williams lock Mitchell, a man, in the cupboard and why? How did Peleg Turner's body get into the hunt-room? Who brought it there? The mysterious happenings are approaching a thrilling climax in next week's installment. Don't miss it.

Roy F. Thompson Is Named To Succeed Walter Greevy

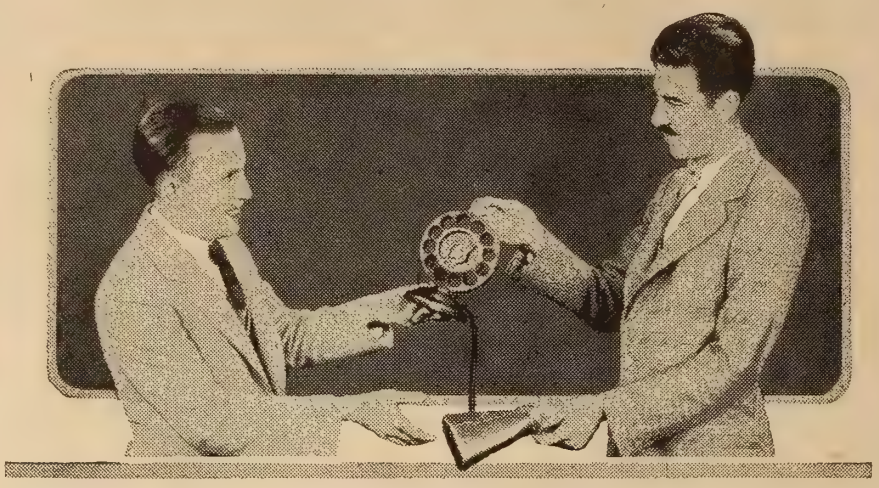
ALTOONA, Pa.—Roy F. Thompson, known to thousands of Radio fans throughout the country as "R. T.," has been named by the directors of the Gable-Tribune Station WFGB, director and general manager of the station as successor to the late Walter S. Greevy. Mr. Greevy was also a director of the National Association of Broadcasters.

Mr. Thompson, prior to his new appointment, was very active in Radio work, not only as chief announcer at the station but he has also appeared on the programs as a vocalist.

Charlie Wellman of KFWB Has New Lingo, Perfected for Microphone Use

Hollywood Announcer Gains Greater Clearness and Is Able to Speak Faster and Remain Distinct Due to His System of Using Only "Mike Words"

CHARLIE Wellman, manager of the Warner Brothers station, KFWB, at Hollywood, is generally conceded to be one of the best and popular announcers in the West. Exceptionally fluent in speech, he is at all times distinctly audible and easily gets rid of 150 words per minute while many others in his line of endeavor struggle with about one-third that number.



Charlie Wellman, left, manager and announcer of KFWB, who has cultivated his "Radio talk," is here swapping his microphone with William Beaudine, famous movie director, for a megaphone.

Mr. Wellman, an enthusiastic and untiring Radio student, does not make any claim to extraordinary culture, but declares his success in announcing is due to a system of his own, the result of keen observation and constant practice.

Everyone acquainted with the rudiments of Radio is aware that certain sounds do not carry as well as others over the air—the soprano voice, for example—also that certain sounds and words are easily and frequently mistaken for others with sometimes laughable and embarrassing results.

Carefully taking these facts into consideration, about one year ago, Mr. Wellman decided to experiment and at last thinks he has the basis for a successful system of announcing for Radio. Like the answer to a conundrum, it is very easy when told, and the plan is so simple it is strange it has never been thought of before.

In speaking before the microphone he uses only three tones of his voice. These three have been selected after long and continual practice as being particularly suited to the mike and of the few tones used that will not blast when spoken, regardless of the volume used. He is also very careful not to employ words that grate or sound harsh over the air.

Called upon frequently for impromptu remarks, as every announcer is, it seemed an almost impossibility at first to arrange his vocabulary so it would stay within these self-imposed rules, but the difficulty was solved by his determination to use in his daily conversation only words that would be suitable should he be talking into the microphone.

When asked a question he would pause deliberately and not answer until he had framed a reply in his mind that was air proof. The result is that when in the studio, no matter what the occasion, by sheer force of habit appropriate words come rolling off his tongue.

In Hollywood he is known as the "Man Who Talks Radio"—and what kind of a language is that?

STATION WDAF SHOWS MUSIC MEMORIES LAG

Less Than Half of Papers Above Fifty Per Cent

KANSAS CITY, Mo.—WDAF, the Kansas City Star's station here, stumbled upon something in a recent program when a music memory contest was presented which developed that almost half of those who wrote in fell below a grade of 50 per cent.

Twelve standard numbers were played by the Radio orchestra. The announcer introduced the selections by number only, inviting listeners to jot down the title, composer and country. Then, if they cared to, they might mail their "examination papers" to the "schoolmarm" at WDAF, who would grade them with a red pencil and return.

$500 in Gold

FOR THE SOLUTION OF

"a Step On the Stairs"

REPRINTS NOW AVAILABLE

SO MANY people are attempting to win part of the $500 in Gold prizes which are being offered for solutions to "A Step On the Stairs," a reprint of the first four installments has been printed and may be had for the nominal charge of twenty-five cents, in coin or stamps, to cover the cost of handling. Address your order to the Mystery Story Editor, care of Radio Digest.

The chosen stations, which are broadcasting "A Step On the Stairs," in Radio play form, are given on page eleven. The days and the hours are listed.

THE PRIZES

The prizes are seventeen in number. First prize is $250; second prize is $100; third to seventeenth prizes inclusive, are $10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story will be published consecutively each week. The first appeared in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unraveling the mystery accurately, will win. The method of preparing the solution—its neatness, legibility, etc.—shall be considered.

RULES OF CONTEST

1. Solutions must be received not later than midnight of Saturday, May 1. The ninth installment of the story will appear in the April 24 issue. The author's intended and final chapter will appear in the May 15 issue, together with the announcement of the winners' names.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon one side of paper.

4. The decision of the judges, to be named later, will be final.

KWKH TURNS PIRATE AND HIJACKS ZENITH

SHREVEPORT JOINS WJAZ ON CANADIAN WAVE

Issues Defy to Department of Commerce After Petition for Increased Power Is Denied

WASHINGTON.—Fire has broken out in a new place among broadcasters who are dissatisfied with the wave length assigned them by the department of commerce and who have taken the law into their own hands and selected an air channel more to their liking.

According to reports to the department of commerce, Station KWKH, owned by the W. K. Henderson Iron Works and Supply company, at Shreveport, La., has followed the example of WJAZ, owned by E. F. McDonald, Jr., and is operating on 329.5 meters, which is assigned exclusively to Canadian stations.

Both Sides Confident

At the present time there is pending in the Chicago courts a suit against Mr. McDonald for violation of the law in operating on 329.5 meters without authority. The case hinges on the right of the department of commerce to assign wave lengths to stations. A decision is expected on the case within a short time. Legal advisers of the department are confident the case will be won by the government. Mr. McDonald expresses himself as equally confident that the government will lose.

Before it decided to take matters into its own hands, KWKH operated on 261 meters, with around fourteen other stations. Dissatisfied with its channel, KWKH officials applied to the department of commerce for permission to increase its power. The request was denied on the ground that, with higher power, KWKH would drown out the other stations on 261 meters. The inevitable result, according to department of commerce offiicals, would have been that the other stations also would have likewise increased their power in an effort to drown out KWKH.

Await Chicago Decision

No action will be taken on the Shreveport case by the department of commerce until a decision is made on the Chicago case. If the department wins in Chicago, it will almost automatically decide the case against the Shreveport station. On the other hand, if the department loses in Chicago, it may attempt to reopen the subject by fighting the case over again in the Louisiana courts.

Chief Radio Supervisor W. D. Terrell takes a philosophical view of the situation.

"If all the bad actors go ahead and operate on 329.5 meters," said he, "It would solve a big problem for us. We could ask the Canadian government to release that wave length and give them another in exchange for it."

To which all the "bad actors" would then shift, no doubt.

Serious as the situation may appear, department of commerce officials believe it will work itself out satisfactorily. In the event of failure to win in the courts, it is believed that congress will take the attitude that additional legislation is absolutely imperative and pass some kind of Radio bill.

Moose Call and Paper Join Hands at WJJD

Reunite Three Old-Timers of WDAP Fame

CHICAGO.—A local newspaper, the Chicago Evening Post, and the Loyal Order of Moose station, WJJD, recently have effected a cooperative connection which brings three old-time Radio figures back together again.

In the old days of Chicago broadcasting, WDAP, Board of Trade station on the Drake hotel, was a popular favorite and one of the then few stations in the city. Jack Nelson was director, Ralph Shugart was announcer and Paul G. Neal was engineer.

Messrs. Nelson and Shugart became director-announcer and engineer, respectively, of the Moose Station WJJD, when it was built. Mr. Neal recently left Station WGN, formerly WDAP, to become technical editor of the weekly Post Radio section.

So with the newspaper and WJJD joining hands, the three men are once more associated in their work.

Testing Radio Torpedoes

PARIS.—Secret experiments are being made at present in France of an invention by which it is claimed that the flight of air torpedoes can be controlled by Radio.

High Lights of the Air

THE TABLOID operetta scheduled by the WGN production company for Saturday evening is Friml's famous musical comedy "The Red Mill." The curtain rises at 8:30 p. m. Central time. Before the microphone will be gathered June Lacey, soprano; Kathleen Ryan, contralto; Frederick Wood, Gilbert Ford, tenors; Bryce Talbot, baritone; and Mark Love, director and bass. In the background will be the WGN studio ensemble.

"Babbit" and "Mainstreet" are two books which have become associated with midwest American life. The author of these famous novels will talk and answer questions at WHB, Sunday night. Another interesting event of the evening is the Radio debut of the Baltimore Symphony orchestra at WBAL. The concert features national prize-winning compositions of Baltimore composers.

Madame Valentina Tumanskaya, a Russian prima donna teaching music in Memphis, has arranged a classical program to be given Monday evening at WMC. This musicale will be welcomed by fans who enjoyed Madame Tumanskaya's singing several weeks ago. Monday is a legal holiday in Massachusetts because on this date 151 years ago Paul Revere made his significant ride. WTIC will celebrate Patriotic Day with national music.

Humor mingles with pathos in the famous balcony scene of Cyrano de Bergerac. On Tuesday evening at 9:30 p. m. Central time Carol Lynn and Dewight Hensen will give this scene at WIP.

A dulcimer made in England in 1784 will be presented during the Wednesday program of WOS, Jefferson City. Miles Carpenter to whom this quaint old-fashioned instrument belongs plays it with skill.

Gaelic music will be presented at KDKA this week during the Thursday half-hour with famous composers. The KDKA Little symphony orchestra will play this interesting folk music under the direction of Victor Saudek.

See Florida from a new angle Friday. Follow the flights of Lieutenant George Pond across this state and learn if possible before buying which parts of Florida are the best for investment. He talks at WEBJ.

WGN TO GIVE OPERETTA "RED MILL"

"a Step On the Stairs"

Broadcast as a Play

EPISODE EIGHT—THE SETTING

EPISODE SIX continues in the high-beamed hunt-room, the room that has been the scene of strange and mysterious crimes, of the Turner manse. The guests who had gathered there to hear a message from Peleg Turner, have waited patiently until Tolliver returns from the Radio station to report that murderous deeds have been afoot there, too. Just as he displays a letter he has stolen at the station, Mary Williams seemingly faints, throwing out her hand and upsetting the candle. In the resultant darkness the letter has disappeared. Mary Williams and Ardwyn stay alone in the room to await the return of a stranger. He returns, in the dark, and the guests come in the room just in time to find Ardwyn unconscious with a flesh wound on his head and Miss Williams fainted—holding part of Peleg Turner's funeral clothes. The two are revived, and all but Mary leave the room. Then John Carton reappears to Mary and asks her to believe in him. He narrowly escapes the return of the other people and is assisted in escaping by Hari Singh, who then shortly returns from the outside with the unconscious form of Milford Jones. The seance is resumed with the unbelievable result that Peleg Turner's voice comes over the Radio. He curses the murderer of his brother. He says the murderer is now in the house, but shall pay in full ere dawn. Pandemonium reigns. The beam of a flashlight hits Tolliver. Attempts to locate the owner of the light are in vain. A human chain is formed to count heads. Instead of eleven as there should be, thirteen people are found in the darkened room. Tolliver seeks matches but is engaged in a struggle. An unknown voice threatens to shoot to kill at the first flicker of a match. The intruders begin tearing up the bricks around the hearth. Aunt Helen cries there is a corpse at her feet. Mary Williams obtains a gun and, concealed, guards the front door exit while Hari Singh, without, guards the side door. One intruder, as they all seek escape, is shot by Mary. The front door suddenly opens, casing and all and the place is raided by police and state troopers. The raid leader calls Henry Graves by the name of "Doggy" French, evidently a known criminal. The eighth episode opens.

THE CAST

Frederick Ardwyn.....Peleg Turner's lawyer
Mary Williams.....A youthful guest
Hari Singh.....Hindu servant of Peleg Turner
Captain Phelps and Lieutenant Cass.....State troopers
Henry Graves alias "Doggy" French.....A mysterious man Mary had known formerly
Maurice Tolliver.....A youth and relative
Mr. Everett.....Chief of Portsmouth narcotic squad
John Carton.....Nephew of Peleg Turner

Beau Brummels of the Air might be the title of the quartet below. They are the Moline Plowboys who are making a fine reputation for themselves by their singing every Thursday evening at WOC, Davenport. To the left is the musical director of KSAI, Grace Raine. To the right is Kathleen Ryan, contralto of WGN. Miss Ryan will sing in the "Red Mill" Saturday.
Ryan Photo by Drake Studio.

KHJ, Los Angeles, Calif. (405.2m-740kc), 8-10 p. m., Tower studio de luxe program.

KJR, Seattle, Wash. (384.4m-780kc), 7-8:30 p. m., Lundquist-Lilly quartet, old-time songs; 8:30-10, Post Intelligencer studio program.

KLX, Oakland, Calif. (508.2m-590kc), 8-9:45 p. m., Western Auto Supply company; 9:45-10:30, Athens Athletic club orchestra.

KMTR, Hollywood, Calif. (238m-1260kc), 8-10 p. m., KMTR concert orchestra.

KNX, Hollywood, Calif. (336.9m-890kc), 6:30-7 p. m., Atwater Kent concert orchestra; 7-8, popular song program; 8-9, Charlie Melson and his Playboys; 9-10, Ordel of Optimistic Donuts; 10-11, fights, blow by blow, Hollywood American Legion stadium; 11-12, Ray West's Cocoanut Grove dance orchestra.

KOAC, Corvallis, Ore. (280.2m-1070kc), 7:20 p. m., Arthur R. Kirkham, tenor; 8:15-9:15, music.

KPO, San Francisco, Calif. (428.3m-700kc), 6:30-7 p. m., States restaurant orchestra; 8-9, Edith Caubu, pianist; 9-10, Palace hotel dance orchestra; 10-11, States restaurant orchestra.

KTAB, Oakland, Calif. (239.9m-1250kc), 8-10 p. m., Breuners.

KWSC, Pullman, Wash. (348.6m-860kc), 7:30-9 p. m., Phi Epsilon steel quartet; Gladys Anderson, violinist.

KFKX, Hastings, Nebr. (288.3m-1040kc), 9 p. m., Lutheran church.

KFMX, Northfield, Minn. (336.9m-890kc), 10-11 p. m., organist.

KMA, Shenandoah, Ia. (252m-1190kc), 6-7 p. m., Howdo-you-do, Boys Grady and Doc, Aunti Blossom; 9-11, musical program, orchestra music.

KMOX, St. Louis, Mo. (280.2m-1070kc), 6 p. m., Arthur Utt, organist; 6:20, organ recital, Mrs. Jacques Landree; 7, orchestra; Leonard Phillips, baritone; 8, music-lovers' hour; 9, trio; 10, dance music.

KOIL, Council Bluffs, Iowa (277.6m-1080kc), 6:05 p. m., Jack and Jill; 6:30, Randall's Royal Fontenelle orchestra; 7:30, Marie Salisbury, violinist; Kathryn Skinner, cellist; 8:30, Dresher Brothers entertainers; 11, Hotsy Totsy hour.

KSD, St. Louis, Mo. (545.1m-550kc), 7 p. m., program; 7:30, Eugene Enzinger, baritone; Mrs. Frank Habig, pianist; 8-10, WEAF.

KTHS, Hot Springs National Park, Ark. (374.8m-800kc), 9-9:30 p. m., Lawson Reid, organist; 9:30-10, opera selections, New Arlington Hotel Grand ensemble; 10-11, College Ramblers orchestra.

KYW, Chicago, Ill. (535.4m-560kc), 6-6:15 p. m., KDKA; 6:30-7, Congress hotel; 9-10, Federal Masters artists; 10, revue.

WAMD, Minneapolis, Minn. (243.8m-1230kc), 7:05 p. m., Hartman Twins, Frank and Ernest; 7:15, Minneapolis public school hour; 11, Skyrocket frolic.

WADC, Akron, Ohio (285.5m-1160kc), 6:30 p. m., Hotel Portage quintet; 8, studio program; 10, India Owl's.

WBAP, Fort Worth, Tex. (475.9m-630kc), 6-6:30 p. m., Texas hotel orchestra; 7:30-8:30, Texas Christian university; 9:30-11, Samuel L. Ball school; 11-12, Panther Hawaiian trio.

WBBM, Chicago, Ill. (225.4m-1330kc), 8-10 p. m., Two Jays, Corinne Jordan; Alemite orchestra.

WCCO, Minneapolis-St. Paul, Minn. (416.4m-720kc), 6:15 p. m., dinner concert, Dick Long's Nankin cafe orchestra; 8, Watkins family party; 9, WEAF; 10:05, Dick Long's Nankin cafe dance orchestra.

WDAF, Kansas City, Mo. (365.6m-820kc), 8-9:30 p. m., Missouri Pacific Boosters club; 11:45-1 a. m., Nighthawk frolic; Ted Weems' Victor Recording orchestra; Billy Adair's orchestra; Ted Meyn, organist.

WEBH, Chicago, Ill. (370.2m-810kc), 7-8 p. m., Oriole orchestra; Pauline Sachs, soprano; Eleanor Kaplan, violinist; 9-9:15, news; 9:15-10, Jack Sieberg, pianist; Jack Simons; 11-12:30 a. m., Oriole orchestra.

WENR, Chicago, Ill. (265.3m-1130kc), 6-7 p. m., Rauland lyric trio; 8-9, evening hour; 9-10, All-American Pioneers; 12-2 a. m., All-American Pioneers.

WFAA, Dallas, Tex. (475.9m-630kc), 6:30-7:30 p. m., Shaw-Smith orchestra; 8:30-9:30, Southland Life Insurance company, symphonic music.

WLIB, Chicago, Ill. (302.8m-990kc), 7:30-8 p. m., musical program; 11-11:20, Correll and Gosden; 11:30-12:30 a. m., ensemble, dance music, harmony duos.

WLS, Chicago, Ill. (344.6m-870kc), 7:15 p. m., College Inn orchestra; 7:30, Ralph Emerson, organist; 8:30, Women's symphony of Chicago; 9, Kathleen March Strain, contralto; Marie Kettering, pianist; 9:30, Women's symphony of Chicago; 10-11, popular music.

WMAQ, Chicago, Ill. (447.5m-670kc), 6-7 p. m., Women's World's fair; 8-10, Women's World's fair.

WMBB, Chicago, Ill. (249.9m-1200kc), 7-8 p. m., Trianon duo; Rosaline Wallach, violinist; Arvid L. Anderson, baritone; 9-11, Trianon orchestra; Woodlawn theater orchestra; WMBB male trio; Joe Warner; Norman Hart, baritone; Andy Anderson, tenor.

WMC, Memphis, Tenn. (499.7m-600kc), 8:30 p. m., Cooper's Hawaiians; 11, Bob Miller's orchestra.

WOAI, San Antonio, Tex. (394.5m-760kc), 8:30 p. m., San Antonio College of Music.

WOAW, Omaha, Nebr. (526m-570kc), 6:20 p. m., Francis Potter's banjo orchestra; 6:50, Gilbert Jaffy, violinist; Nat Young, pianist; 9, Puritan program; 10:30, Frank Hodek and his Nightingale orchestra.

WOC, Davenport, Iowa (483.6m-620kc), 7:30-8 p. m., Earl Ferris Nursery trio; 8-9, L. E. Schroeder, baritone; Morris Lundahl, organist; 9-9:30, WEAF; 10:30, "A Step On the Stairs."

WOK, Chicago, Ill. (217.3m-1380kc), 10-1:30 a. m., Tearney's Town club orchestra; Pershing Palace orchestra; Capitol theater program; program.

WOOD, Grand Rapids, Mich. (241.8m-1240kc), 9:15-10 p. m., classical concert; Clarence Roth, violinist; Howard Gillesby, xylophonist; Marian Lypps, soprano; Dora Waters, pianist; Claire Travis, trombonist; Leona Skory, violinist; Jane Jennings, soprano; Jack Zaremba, baritone; 10-11, classical program; 11-12, Regent Roof Radio frolic, Bill Dallavo and his orchestra.

WORD, Batavia, Ill. (275.1m-1090kc), 7 p. m., North Shore line; 9, program.

WOS, Jefferson City, Mo. (440.9m-680kc), 8:20 p. m., Commercial club, Mountain Grove; 10, Vee Latty and band.

WQJ, Chicago, Ill. (447.5m-670kc), 7-8 p. m., Rainbo Gardens orchestra; 10-1 a. m., Skylarks; Eleanor Terry; Hawaiian trio; 1-2, Ginger hour.

WRR, Dallas, Tex. (245.8m-1230kc), 6-7 p. m., Jack Gardner's orchestra; 8-9; Dr. James A. Wood and mixed quartet; 11-12, frolic.

WSB, Atlanta, Ga. (428.3m-700kc), 8 p. m., First Baptist church choir; 10:45, entertainment.

WSBT, South Bend, Ind. (275.1m-1090kc), 7:15 p. m., orchestra, concert.

WSM, Nashville, Tenn. (282.8m-1060kc), 6:30 p. m., concert, Francis Craig's orchestra; 8, pianists; 10, pupils, Miss Sloan and Mrs. Schmitz, Ward-Belmont college.

Elmer Tidmarsh Plays for WGY

SCHENECTADY, N. Y.—A weekly Sunday afternoon feature of the program of WGY is an organ recital by Elmer Tidmarsh, director of music of Union college. These programs are played on the organ of the new memorial chapel at the college in Schenectady. The Sunday afternoon concerts are broadcast at 4:30 p. m. Eastern time, and will be continued until June 1.

CKNC, Toronto, Raises Power

TORONTO, Ont.—CKNC, station of the Canadian National Carbon company here, has again increased its power, this time to 750 watts. A type 1-B Northern Electric transmitter has just been installed. CKNC believes it will now be heard better throughout the United States.

Put Indian Sign on Radio Words

LONDON.—In all the studios of the British Broadcasting company notices have been posted up requesting artists in all their transmissions to refer to "listeners" and not to "listeners in," and to say "broadcast" and not "broadcasted."

DX RADIO BETTER AT 600 MILES THAN 300

STARTLING REVELATION IS MADE BY WGY SURVEY

General Electric Engineers Find Fading Cuts Close-by Signals—See Weather as Factor

SCHENECTADY.—Radio signals are better 600 miles from a broadcast transmitter than they are 300 miles, according to engineers of the Radio department of the General Electric company, under whose supervision an exhaustive investigation of Radio wave propagation is now being made.

For several weeks past, thousands of listeners have been cooperating with the General Electric company by reporting on reception of signals on broadcast bands. These cooperative tests are still under way and the conclusions are only such as suggest themselves from the preliminary reports. The engineers do not claim that the conclusions are absolute and caution that more exhaustive investigation may reveal some facts not yet apparent.

Why Station Is Better at 600 Miles

In observing the variation of signal strength, it was found that the strength of the signal drops off rapidly during the first 300 miles from the station and that contrary to what might be expected, the signal strength actually increases and is apparently a little stronger at 600 miles than at 300 miles. Beyond the 600-mile point, the strength decreases again slowly to the limit of the range of the station. These distances are not definite values; they are averages from a large number of reception reports.

A study of the zones in which fading occurs shows that it is worst at about 200 to 500 miles from the station, and this zone, from 200 to 500 miles, is the territory in which there is the greatest percentage of "rapid fading" reports. Broadcast service is better at 600 than 300 miles from a station because fading is less and the signal strength is slightly greater.

These distances vary slightly with the power of the transmitter. Rapid fading is not often observed, however, and in this respect the regular broadcast waves seem to be different from the short waves. The reports indicate that the date of fading increases steadily as the wave length grows shorter.

May Predict Radio Reception

The main objective of the investigation in cooperation with widely scattered, volunteer assistants, is to answer the question: what is the relation between weather and Radio reception, or do weather conditions influence Radio? Variations of signal strength, static and fading are all bugaboos of the listeners and an effort is being made to relate these irregularities to changes in barometric pressure and temperature.

If definite relationships between Radio reception and weather conditions can be established, it will be possible to predict receiving conditions in any part of the country as reliably as it is now possible to forecast weather conditions.

Thus far investigations by General Electric engineers indicate that the connection between barometric pressure and temperature with Radio conditions is not definite, or if it is definite, that it is so complex that it is not yet understood. Temperature seems to have no effect on the signals themselves, although it is known that in summer there is an increase in static.

The study so far shows that the barometer makes little difference when both transmitter and receiver are at the same pressure. When transmission is from a high to a low pressure area, transmission is best at short and long distances, but at medium distances of about 600 miles, it is best from an area of low pressure to an area of high pressure. The phenomena is apparently related to the distribution of storm areas over the country and requires a great deal more study.

COP OF SMOKY CITY TWEETS SYMPHONY

PITTSBURGH, Pa.—Conductor Saudek of the KDKA Little Symphony orchestra started something when he gave a whistle of surpassing musical tones to a traffic policeman whose corner is near the conductor's studio. The idea is spreading. Conductor Saudek has had numerous inquiries since he made a musical cornerman out of the policeman near his studio.

George Junkin at KMOX

ST. LOUIS.—George Junkin, "he of the smiling voice," who has been heard for recent weeks from Station WSWS, S. W. Straus & Co., Chicago, has been selected as the new announcer at Station KMOX, "The Voice of St. Louis."

Marconi Recovers From Operation

LONDON.—Senatore Guglielmo Marconi is recovering from a minor operation here. It was feared that he was suffering from appendicitis but an operation proved this not to be the case. As soon as he is fit to travel, the "Radio wizard" will go to Naples to join his yacht.

Will Tell Balloon Race Over Mikes

Stations Along Route of Flyers Will Keep Listeners Informed on Progress of Racers

HOT SPRINGS, Ark.—G. C. Arnoux, director-announcer for Station KTHS, the New Arlington hotel at Hot Springs National Park, here, has been appointed as a member of the meterological and aerological committee for the Little Rock Air meet association in connection with the staging of the 1926 National Elimination Balloon races to be held in that city April 29 and 30, according to an announcement by the association.

Radio will play a big part in the holding of the balloon races this year, according to the preliminary plans which include an elaborate system of Radio information on wind and weather to be sent out by representative broadcasting stations throughout the section of the country likely to be traversed by the racers. Selection of the stations to participate will be announced shortly. A picked group of powerful stations will take part.

In addition, plans are being worked out to broadcast a Radio picture of the entire race meet direct from the field, through Station KTHS. Speeches by famous figures in air development and national leaders who will attend will form a part of this program.

33 PAT BARNES OF WHT
Size 11x14 inches

Photogravures of Your Favorite Artists

GALLERY OF RADIO STARS

By special arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost. Below is only a partial list of the photogravures now included in the Gallery of Radio stars. Complete list in April 10 issue.

16 Leo Fitzpatrick, "Merry Old Chief," WJR
17 Henry Field, 1925 Gold Cup runner-up
18 Al Carney, organ favorite at WHT
20 Vincent Lopez, No. 1 Pennsylvania orchestra
21 E. L. Tyson, pleasing voice at WWJ
23 Art Gillham, "The Whispering Pianist"
24 Paul Greene, announcer at WSAI, "bridge voice"
25 Harry Ehrhart, "Dream Daddy" at WLIT
26 Correll and Gosden of "Kinky Kids Parade" fame, at WEBH and other stations.
27 Norman Brokenshire, popular at WRC, WJZ

COUPON NO. 17

This coupon entitles the holder to one photogravure selected from the Radio Digest Gallery of Radio Stars when accompanied by ten cents to pay the cost of mailing and postage. Three consecutively numbered coupons entitle the holder to three photogravures when accompanied by 25 cents. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

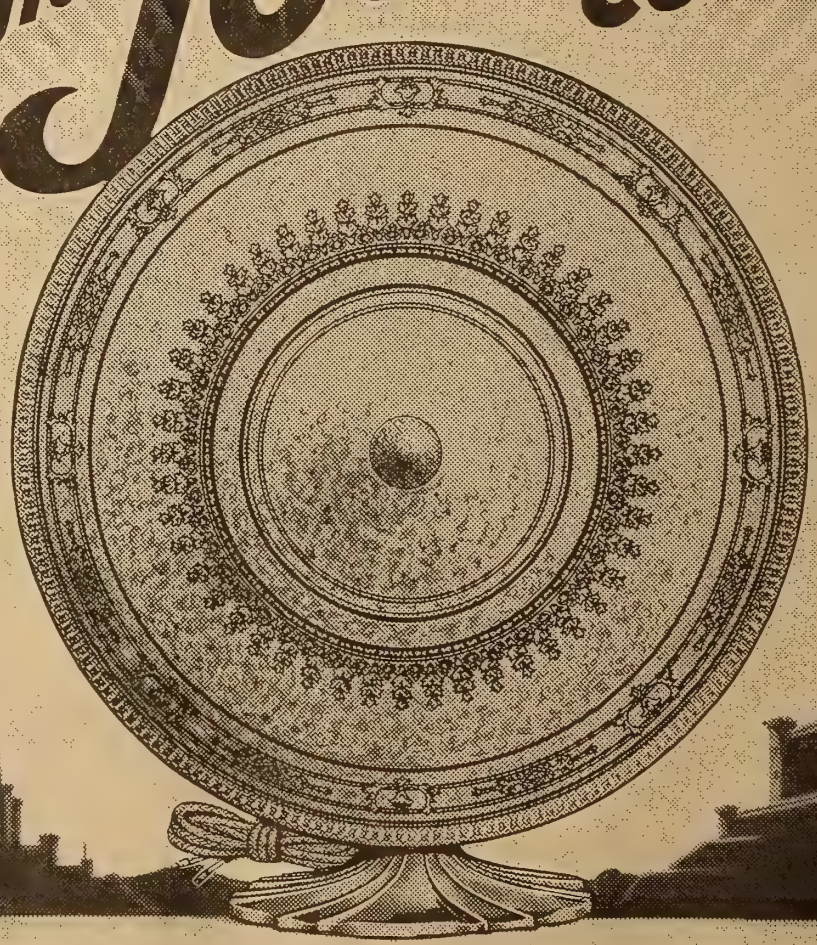
The dawn of a new day in Radio Speakers

The Tower CONE



THE most beautiful Cone in America! With those mechanical niceties that insure finer tone and volume, this Tower Speaker virtually revolutionizes present day conceptions. The double-drive unit, the acoustically perfect non-warping Cone, the eight connections from unit to Cone, the free-edge construction—these basic features establish Tower Supremacy.

Price $9.50

On Sale by Good Dealers from Coast to Coast

SHORT WAVES
By Marcella

(Continued from page 6)

Here's your answer, Jeanne, about N. Dean Cole, WHO's director-announcer. "Why, you're not old at all!" That's what you would say—if true to type—when you met "Old King Cole" in WHO's studio. Thousands have exclaimed the same, for they seem to associate King Cole as being a merry OLD soul, in accordance with the famous nursery rhyme. He is merry but not older than the light-hearted side of thirty. He's tall and slender and has blonde hair, rather than being wide of girth and bald, as my Mother Goose book depicts his namesake. He has blue eyes—ah, pools of limpid blue—and causes many a feminine heart to become unduly agitated. His clear, pleasant and vibrant voice is too well known to need description here. Besides having celebrated his second anniversary at the WHO mike on April 1 when WHO likewise marked its second birthday, N. Dean Cole supervised the building of the station. He is a versatile chap and knows all about the technical do-dads and thingmagigs around a broadcasting station. Nine years of experience in the telephone business and a two-year stretch at stringing wires and setting up instruments for the signal corps during the late disagreement with Germany, support his technical knowledge. His value is enhanced again by his talented baritone voice, for on many emergency occasions he has stepped to "Mike" and sung a baritone solo to fill in the minutes until delayed artists arrived.

* *

Who was it wanted to locate Val McLaughlin, ex-WOC Sandman and later at WOAW? "Jayhawker" was one, I remember. Here's good news for you. Tune in Val via WLS, Chicago, where she is doing a turn twice each week. I believe she is scheduled for Tuesday and Friday evenings. Understand she is doing some studying here to further her ambition and has taken up the two-a-week broadcast just to fill in her leisure time.

* *

Now for a brief repetition notice of Ford and Glenn, the WLS Lullaby Boys. Several months ago I told all about them, but so many new readers have requested that I repeat and sketch the pair, that I must be pardoned for so doing. To begin with the usual shock: yes, they are both married, and each has a boy. And each boy is about eight years old. Both Ford and Glenn drive cars. In fact, motoring is the chief hobby of both members of the team. How did they team together? Edgar Bill, jovial WLS director, is the guilty party. He knew both boys and thought they would make a good Radio team. When the two met in the WLS studio, the joke was on Mr. Bill, for the meeting was a reunion. They had known one another some years before in St. Louis. Ford Rush was born in New Orleans, age 32; weight, 175 pounds; height, 6 feet. Glenn Rowell was born in Pontiac, Ill., where he says they feed 'em corn—hence his girth. He's 5 feet 8 inches tall, 28 years old, 218 pounds heavy, and still likes pie and cake.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

MEAT PIES CHEAP DISH

(Continued from page 6)

much fat on the meat, it may be necessary to remove some of the melted fat before you make the gravy. Remember that if there is more fat than flour in the gravy it will be greasy.

The directions for cooking the meat read, "Let simmer until tender." Do not allow the meat to boil. Remember that meat should cook slowly at a low temperature if you would have it tender and juicy.

It is better to cut either the biscuit or pastry crust into small pieces rather than to place a solid crust over the whole pie. If you use one whole crust, be sure to cut holes into it to allow the steam to escape. I prefer individual biscuit because it not only bakes better, but it also makes a pie that looks better and is more easily served.

Other vegetables may be used in this recipe than those I have suggested. If you happen to have a few left over string beans they may be used in place of either the peas or carrots. Diced turnip is sometimes used, but be sure it is not too strong in flavor. Small cubes of potatoes or tiny potato balls may be added but many people prefer to serve the potatoes separately with the meat pie. Tomatoes may be added to the pie, but be careful that you do not add tomatoes to every meat dish you make because that makes them all taste more or less alike.

You may use different vegetables at different times; for instance, one day use celery and tomatoes, another day, turnips, and peas, and still another day combine carrots and string beans, or potatoes, celery and peas. Onion is good with any of the combinations. If you do not serve the meat pie very often and find that your family like it as it is, then I would serve it just that way and not tinker with it. You know there is such a thing as too much variety. When you find a recipe that you can make well and that everyone likes, you had better stick to it just as it is.

That Music Copyright Question

WITH the senate and the house committees both carefully considering legislation to amend the copyright law to give Radio broadcasting a "square deal," it seems that perhaps the music problem will be settled this year once for all. One thing is sure: if the senate committee recommends that the Dill-Vestal bill be passed by the senate, the house will also fall in line, and the president, Mr. Coolidge, will sign the bill without question.

What makes us so sure about this? Well, William P. Butler, senator from Massachusetts, is chairman of the senate patent committee which is, or was as this issue went to press, holding hearings on the proposed copyright law amendment. Mr. Butler, we shall explain, is a time-tried and true friend of Mr. Coolidge. In fact, Mr. Coolidge learned most of his political tricks from Senator Butler. The president admits it himself.

So, being a close friend and adviser of the president, it is not unlikely that Mr. Butler will only need to give his stamp of approval to the proposed legislation in order to make it law. We should end this editorial here. It has no immediate purpose except to indicate signs of optimism to the broadcasters and interests desirous of getting relief from the varying fee demands of the American Society of Composers, Authors and Publishers.

At one time, very early in the controversy between the music society and the broadcasters, we claimed that broadcasting stations were operated not for profit and therefore made nothing from the music broadcasts. In such a status we could see—then—but one perspective: that the music should be free to Radio broadcasters. It soon became evident, however, that practically every firm engaged in broadcasting was so engaged for the benefit of indirect advertising, an asset which could be charged against the station expenditures.

Courts in many districts soon upheld the decision that broadcasters were not operating without compensation for their efforts.

We then changed our position and said that the American Society did have some equity in its arguments. Every composer was entitled to remuneration for his works broadcast. If a station did not wish to pay the American Society the fees it asked, it did not have to broadcast American Society music. There was and is other available. If enough stations had stood together and flatly refused to broadcast American Society music, the society's fees would have been tremendously reduced.

The trouble was that the broadcasters, vying with one another for public recognition and appreciation, were too weak to stand together. But the American Society stuck together nobly and "stuck" the broadcasters.

There is the whole story in a nutshell. The whole affair is nothing but a controversy between the music producers and the music users. Where the public fits into the picture it is difficult to say, inasmuch as the American public does not have to pay for broadcast programs—at least, not directly. As a controversy, it was about as necessary to the swaddling infant Radio as cutting teeth is to the human baby.

Claims, counterclaims and charges have been made that the American Society is a trust, that the publisher members are thieves and crooks, and many other nasty things. We do not agree nor disagree. It remains for such charges to be proved before they carry weight. Why doesn't some well-financed broadcaster take the American Society before the federal trade commission and disband it? We have long expected such a procedure to be announced.

Maybe the copyright legislation will solve the problem. But we have an idea that the American Society will not like the new law—that is, if it becomes a law, Senator Butler recommending it. Then it will remain for the supreme court to decide the Dill-Vestal copyright law's constitutionality.

Perhaps that will be the end? Perhaps.

RADIO INDI-GEST

Rajah in a Low Back Chair

At evening—at ease, in a low back chair,
Secluded from family, resigned from care,
Untroubled by dour and deep meditation,
I find combined in recreation,
Pleasure and repose.

There in the dusk beyond the lamp's gleam,
In a corner of twilight—there to dream.
My hands on the Radio's glistening dials,
My eyes half closed, across the miles
Music at my touch.

A rajah in "make believe" then am I,
In regalia beneath the flaunting sky.
My tents are raised on the desert sand,
Around me in silence my Arab band,
While serenaders sing.

What rajah of old had more to amuse,
Had more for his pleasure from which to choose?
What rajah, or emp'ror, or king may hear
Song of siren, and wisdom of seer,
As I, in a low back chair?

THOS. L. WILLIAMS

Go to the Head of the Class

Dear Indi: Leo Butts, a six-year-old boy at our school here in Burwell, Nebraska, was asked to spell Omaha and he spelled it W-O-A-W. I am twelve years old.

L. J. GARRISON

And to keep any little boys or girls from having to stand in the corner with the fool's cap, we will say that W-E-A-R spells rubber; W-H-O, insurance; W-O-O-D, furniture; W-O-R-D, church.

"A FLOP ON THE STAIRS"

by THE THIRD TROMBONE PLAYER

Episode 3—The Phantom Killer

Synopsis—Sebastian Kreske, a retailer of reasonably priced Radio parts is being threatened by the trust. He can't raise his prices as he sells his goods in stores which sell nothing over one dime in price. What to do? Now read the rest of the story to Grandma.

KID DIRKUN, fearless copy boy, gracefully injecting 10 grains of heroin, fixed his limpid orbes on the five and dime magnate saying, "I have it, Mr. Kreske."

"Wass iss id," asked Kreske in his best Oxford accent.

Our hero was about to outline the plan when a woman's scream rent the midnight air.

A dull thud followed. The millionaire had fallen to the floor. It took but a glance to see that he was dead.

(Really now, this is getting beyond the limits of a joke. Even the Chicago police would not like it. Extra copies for sale at your druggists.)

(TO BE CONTINUED)

Johnny's Map

Johnny Jenkins drew a map
And laid it on his teacher's lap;
A map of dear old U. S. A.,
The towns all marked the latest way.
Said his teacher: "Tell me why
You've put the letter K F I
In California? K S D
Up in Missouri? K Q P
In Oregon? It puzzles me!"
And Johnny answered: "You would know
If you but owned a Radio."

INDI

News of the Week

Condensed

BY DIELECTRIC

Several obstacles prevented my successfully tuning Station KFKX, Hastings, Nebr., until the other evening, when the familiar voice of their announcer introduced listeners to a special musical program. It was nearly all interesting, though the work of a pianist made the most impression with a program of music of general appeal. Perhaps this station's audience prefers to know in what company it sits; at any rate, the announcer took pains—and time—to make clear that certain individuals in scattered locations were at their sets listening in to the features. None of the names were instructive to me and the numbers were, so that bit of information was superfluous.

We still face such a paucity of orchestra entertainment that visiting ships are called on to supply the lack by some of our broadcasters. Station WIP, Philadelphia, took advantage of the Leviathan's orchestra to fill one feature on an evening's program. The selections were uniformly choice and well rendered, having as an additional feature, soloists with much to recommend them for return engagements.

In the young American artists series of concerts from Station WLS, Chicago, we had the good fortune to hear a contralto with a voice of very good quality and training and to hear her sing compositions by American composers. One of MacDowell's gems was given with more than ordinary ability and makes one wish to hear this artist sing "The West Wind Croons in the Cedar Trees," by the same composer.

Another of those pleasing organ recitals from Station WHO, Des Moines, broadcast from the Capitol theater, was of a sort to encourage listeners to come back for more. That French woman composer, Cecile Chaminade, has left us some works of real beauty which comparatively few musicians today present to their audiences. It was a pleasure to listen to an adaption for organ of one of the best of these and to note the organist's appreciation of its content.

Whether you would go to the theater and cannot, or frankly prefer to attend by the proxy of Radio, matters not with the possibilities presented by Station WBAP, Fort Worth, Texas, to enjoy diversified entertainment. The theater artists' concerts arranged by this station and frequently broadcast are attractive features. Tune in some evening and permit yourself to relax while listening to what is offered.

Station WQJ, you know how they accent "Chi-caw-go," included in a recent program the singing of some sentimental numbers by a tenor thoroughly versed in their style and a soprano, but a few minutes off a vaudeville stage. This was interspersed with the reliable sax in solo capacity. The whole was calculated to take any listener out of the dumps.

Those failing to tune in Station WSB, Atlanta, before the commencement of a well-planned program by the Rialto theater orchestra missed a very interesting and enlightening musical arrangement. It was introduced as the evolution of America: a musical history, beginning with the beating of the Indian tom-tom in a selection representing all of the weird and barbaric musical feeling of the early aborigines. Later we were treated to one of their romantic melodies—more romantic than melodic. The whole conception is something to merit our support, for America is truly forging to the fore in matters musical.

Super-Torodyne: An Improved 8-Tube Super

Part II—Front and Top Sub Panel Assembly

By J. E. Owen, Univ. of Okla.

IN THE first article of this series, the compactness of the Super-Torodyne was pointed out as a desirable feature, a point of relative superiority over many super-heterodynes. The writers of the articles on the Grand Prix and the DX-Seven Super-Heterodyne each brought out in a very favorable way the compactness of their supers—both of these sets being on the same size panel as that of the Super-Torodyne. The Super-Torodyne, however, has at least one unit not contained in either of the others; the antenna coupler. To provide this same feature it is taken for granted, then, that each of the others would require more space. Constructional details for the Super-Torodyne must be very carefully followed if real superior super-heterodyne results are to be expected.

The cabinet for housing the Super-Torodyne must take a panel 7 x 18 inches. It must have a depth of at least 8½ inches, measuring from the back of the front panel. There should be no grooves holding the front panel at the top or bottom—that is, there must be a full 7 inches available for apparatus.

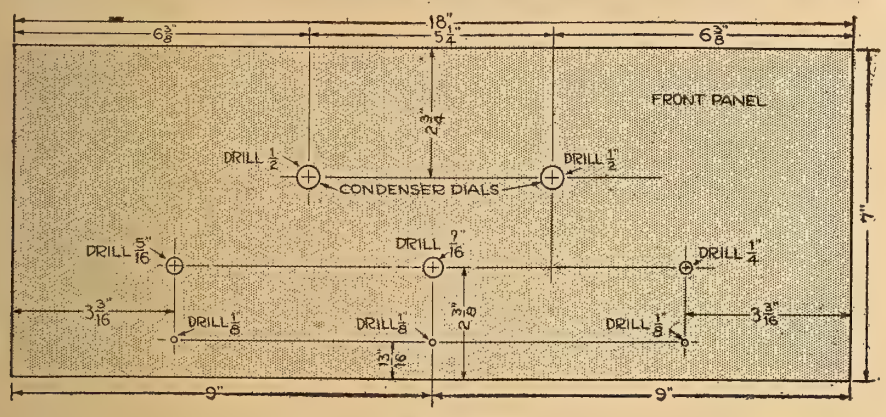

Figure 3

Formica was specified for the front panel and the binding post strip, also for the sub panel because it is so readily drilled.

All views will be considered as taken from the front of the set and from the dial side of the front panel, unless otherwise specified. It will be noticed that figure 4 gives the exact arrangement of the apparatus used above and beneath the sub panel. There are holes used in wiring that are not shown here, but these will be taken up in time, being purposely omitted in this article to avoid confusion. Figures 3 and 4 enable one to visualize the set complete. This makes drilling and assembly much easier and reduces the possibility of mistakes. There is, in this way, no difficulty in identifying the holes that are drilled.

Few Modifications

There are a few modifications of some of the parts that must be made before the set can be assembled and wired. Two slight modifications of the toroid coils are necessary, but as these are more in the nature of wiring, they will be left until the next article. The one of interest and importance here is the alteration of the mounting brackets. Sufficient detail for carrying this out is given in figure 5. Each bracket is cut into four parts. These are marked A, B, C, and D, in figure 5. Parts C and D may be junked. Part A is used for sub panel mounting, and Part B is used for mounting the binding post strip over the Victoreen transformers. For cutting these brackets, use any saw that will cut metal. In case such a saw is not available, some sort of a chisel may be used, although it may be necessary to file down rough edges and corners afterwards.

Follow the directions and dimensions of figure 6 for details of the binding post strip which is mounted over the Victoreen transformers with sections B that are obtained from cutting the brackets. The binding posts are placed on the strip in the following order: Ant; Ant; Gnd; A Bat −; A Bat +; C Bat +; C Bat −; B Bat −; B Bat +; B Bat +; B Bat +; Speaker; Speaker.

How to Make Brackets

While the assembly of all apparatus beneath the sub panel will be taken up in the next article, it is necessary to mount the sub panel on the brackets in order to go ahead with the assembly above the sub panel. The two holes 13/16 inches from the bottom and 3 3/8 inches from the end are for the sub panel brackets. Two ½-inch spacers are necessary, which may be cut from ¼-inch pipe. Cut two sections ½ inch in length and file the ends smooth and square. Run the screws through these after they have been put through the holes in the front panel. The mounting brackets are then put on and are held away from the front panel ½ inch. This arrangement is important in order that the load will be more evenly distributed on the sub panel and upon the supporting brackets. Countersink the heads of the machine screws holding the brackets to the sub panel.

A comparison of figures 3 and 4 give considerable detail about the arrangement of the apparatus and, incidentally, the relations of the parts in the circuit. At the left, we have in front the two All-American T-2 transformers. In placing

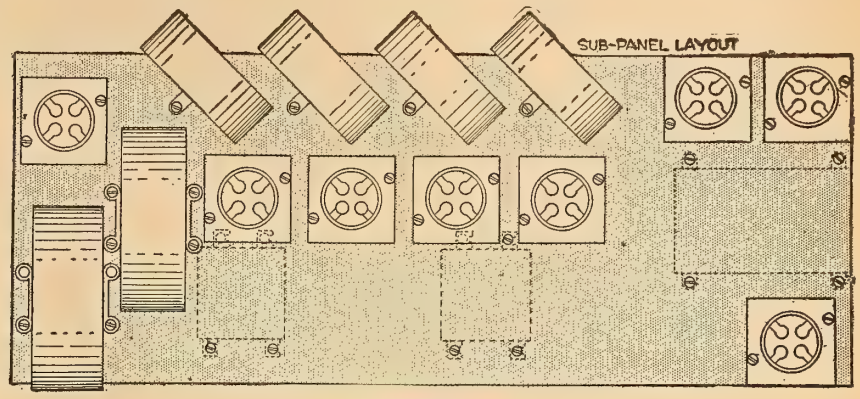

Figure 4

these on the sub panel, the secondary leads go to the right—that is, the side with the three binding posts is to the left. Both units are mounted in this way. Just back of these is located tube socket No. 1. This is the first detector. In the central section underneath the sub panel we have in front the two Tobe Deutschmann 1-mfd. condensers. These may be seen just below the Hammarlund variable condensers in figure 3. Just back of these are tube sockets Nos. 2, 3, 4, and 5. Nos. 2, 3, and 5 are the intermediate frequency amplification sockets, while No. 4 is the oscillator tube socket. Just back of these are the Victoreen intermediate stage transformers. These are placed at an angle of approximately 45° as shown. This angle is not at all critical, but may be roughly obtained by folding a square of paper along one of its diagonals. At the right, we have the second or audio detector and the two stages of audio frequency amplification, numbered 6, 7 and 8.

Unusual Mounting

The two Jefferson audio transformers are mounted in an unusual way. To understand how this is done, turn one of them upside down with the plate and grid binding posts to the right. Then place the other upon it in an upright position, also with its plate and grid binding posts to the right. The mounting flanges or ears will then be next to each other. Four stove bolts are run down through the holes in these flanges and through the

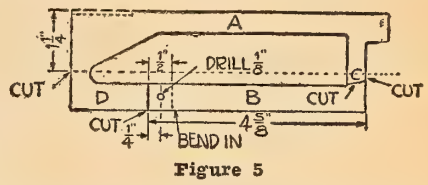

Figure 5

sub panel. Three and one-quarter inch stove bolts will be required. It will be necessary to ream out the holes slightly in the flanges on the transformers in order for them to accommodate the stove bolts. This double-decking method of mounting the audio transformers is used because it saves space.

In mounting the tube sockets, the filament connections are placed toward the

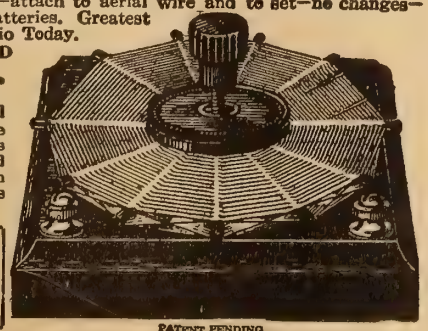
Steinite Low Loss Interference Eliminator

No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.

OVER 300,000 SOLD



Improved Results With Tube or Crystal Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. ***MONEY-BACK GUARANTEE.***

Mfrs. Famous 1,500 Mi. Steinite 1-Tube Set, $6; Long Distance Crystal Set, $6; Steinite Crystal 50—3 for $1

STEINITE 5-Tube Set—$29.75

FREE Descriptive Literature on request.

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

PATENT PENDING.

$1 Postpaid If you are not delighted with results you get your dollar back

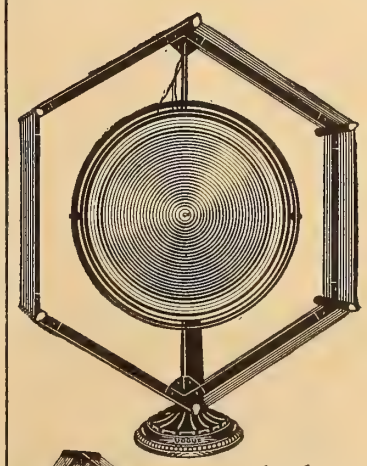
STEINITE LABORATORIES, 161 Radio Bldg., ATCHISON, KANSAS

FREE TRIAL FOR TEN DAYS



LET us prove to you that the VOGUE UNIVERSAL CONE LOOP can greatly increase the efficiency of your Set without any risk on your part—if you don't like it, send it back.

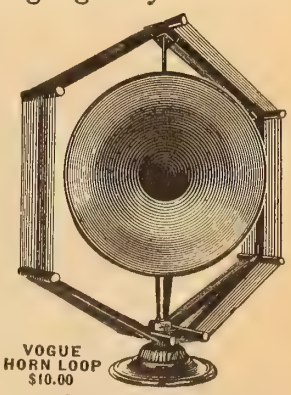
The Universal Cone Loop has both horizontal and vertical action. Your reception is clear—interfering stations are cut out entirely.

Aim the Loop the same as you would a gun—the truer your aim, the better your reception. Static can be reduced to a minimum, signal strength greatly in creased—the best LOOP made for fine tuning. A $30.00 standard made Cone Speaker is used.

Doesn't take up any more space than the regular horn speaker—can't tip or fall—adjustable to every conceivable angle. If your Set isn't designed to work with an inside Loop, ask us how to change it over.

UNIVERSAL CONE LOOP $37.50

Vogue Horn Loop Fits any regular Horn Speaker—can be installed in a few seconds. No adjustments necessary—makes two units into one—fits snug around base of horn. 110 feet of 68 strand No. 36 silk covered wire used.



VOGUE HORN LOOP $10.00

10 Days Free Trial This offer is for a limited time only. Send check or money order. If you aren't more than satisfied, return to us in ten days, and we will refund the full amount—provided, of course, the merchandise is received by us in good condition.

Richard T. Davis Incorporated

5255 BROADWAY CHICAGO

SUPER-TORODYNE BINDING POSTS

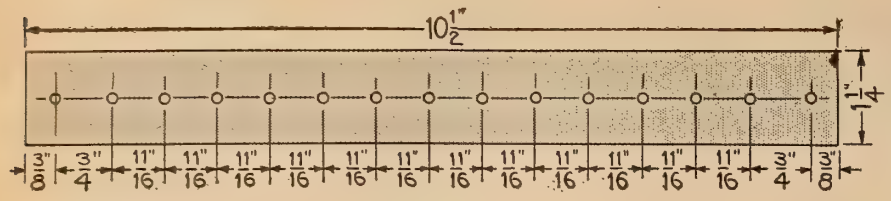


Figure 6

NEW SUPER-TORODYNE

(Continued from page 19)

front except in the case of tube sockets Nos. 4 and 8. These have the grid and plate connections toward the front, with the filament connections, toward the back. Tube socket No. 6 is for the audio detector and should be a Bremer-Tully Silent Socket as specified in the list of parts.

Functions of Controls

Considering the parts on the front panel, and comparing figure 1 of the first article with figure 3, the control at the left is seen to be the first detector regeneration control. It should be mounted with the stator insulating support to the right, remembering that the view is still from the dial side of the front panel. The next control, the National Velvet Vernier dial, is for one of the Hammarlund .000375 mfd. slf. condensers, which tunes the antenna circuit. The next control is the Victoreen 400-ohm potentiometer. This is followed by the National dial, controlling the oscillator condenser. This condenser tunes the local oscillator circuit and is connected to the toroid coil at the right. Both of the Hammarlund slf. condensers should be mounted in a vertical plane as is shown in figure 3. Two 1/16-inch holes are to be drilled in the front panel for the purpose of anchoring each of the National dials. Complete directions for doing this are furnished with the dials. Single-hole mountings for the condensers should be used because some slight adjustments in the position of the condenser are necessary after the set is assembled. The control at the extreme right is the Benjamin battery switch.

(Next week Professor Owen will continue with the assembly of the Super-Torodyne and will take up the wiring of the receiver. As accuracy is the keynote of this construction, it may be well to wait before proceeding.—Editor's note.)

PENSACOLA WELCOMES

(Continued from page 4)

"But it's great to live in Pensacola," says Mr. Frenkel to his Radio audience. "No city in the world compares in historical interest and romantic tradition. It is the oldest city in the United States. Our records show that it was founded four years before St. Augustine, more often spoken of as the oldest city on the continent. It has lived under the regime of five flags, Spanish, French, British, Confederate and the Stars and Stripes—Old Glory.

"Pensacola has an eminent social atmosphere, a prestige unsurpassed by any other city in the country. The climate is perfectly enjoyable to citizens from the North, throughout the whole year. It has lakes and hills and trees and old roads, providing scenic beauty and charming tours for motorists."

It's a labor of love, folks, and if you ever have heard the breezy enthusiasm in the voice John E. Frenkel over WCOA, Pensacola, Florida, the Wonderful City of Advantages, you know it.

WOAW AIDS FRIENDSHIP

(Continued from page 5)

deeper than mere fundamentalism or modernism in religious belief.

The fraternal message is thus given wide scope from WOAW through its amplification of the religious services. Religion and human felicity, human moral growth, go hand in hand; hence, the strong support to the church rendered by the executives of the Woodmen of the World. It has been found that Radio does not conflict with church going, but rather, tends to revive it, to return to the fold many who had been lost lambs.

More than twenty persons compose the staff and its attaches of WOAW. Their sole duties are confined to arranging programs, Radiocasting them, handling fan mail, etc. Three announcers, two operators, a studio hostess, publicity director, program director, four stenographers, five typists, a business manager, 'phone girls, make up this staff.

Lester Palmer is program director and announcer. He is a talented pianist and composer of several popular songs recently published, "Lonesome Moon," and "Truly I Do." He edits the WOAW Radio bulletin, a bimonthly journal which contains programs two weeks in advance, as well as descriptive stories and photographs of artists who are on the programs. Ten thousand copies of this bulletin are mailed each month to newspapers, public institutions, and Radio artists. Mr. Palmer is a student of law, and the youngest Shriner in Nebraska.

Eugene Konecky is featured as WOAW's poet laureate and announcer. He was the first official poet laureate connected with a Radio station. He is well-known in the Middle West as author of "Trail O' Spring," a volume of poems.

Gus Swanson, announcer, is a very versatile chap, and in the 35 years since his first announcement he has had a varied career. He has had six years' experience in the selling and advertising game, and is at present engaged as a salesman in the printing and publishing line. His musical and commercial career have adapted him perfectly for Radio work, giving him poise and confidence in his microphone work. He is quick witted, congenial and well versed in music and other arts which combined with his ability to entertain and his excellent voice makes him an ideal announcer.

The bedtime stories for the kiddies, are handled by Grace Sorenson, author of juvenile stories, poems and plays and editor of a nationally-known children's publication.

Among the special features are Arthur Hays, organist of the World theater, offering organ recitals at 11 o'clock each Saturday; the Rialto Midnite Alarm, a Tuesday fun fest; Hodek's Nightingale orchestra of the Roseland Garden in a midnight frolic each Thursday. The presentation of stock market reports are made daily from WOAW in behalf of the thousands of agriculturists throughout the Middle West. The periods of Radiocast of market reports are as follows: 8:15 a. m.; 8:55 a. m.; 10:30 a. m.; 12:30 p. m.; 1:45 p. m., and 4 p. m. Among the leading orchestras who entertain WOAW listeners are Gilbert Jaffy's Symphonic; Randall's Royal; Herb Feierman's Omadala, and Frank Hodek and his Nightingales.

All WOAW programs are varied, planned to appeal to a diversity of tastes. Orchestras, vocalists of popular, jazz and classic schools, instrumental soloists, dramas, sports talks, love advice, educational courses, etc., are on the programs at all times. You can't please all the people all the time, but the Woodmen of the World, through WOAW, is pleasing all the people part of the time, and putting across a dignified, significant message of fraternalism and religious worship at the same time.

DO YOU KNOW WHERE THESE PEOPLE LIVE?

TWO contributors to Radio Digest have checks awaiting them if they may be located. Letters bearing their addresses have been returned. The two men are Allan Murphy, of Paducah, Ky., and Marvin Shreffler, of Kankakee, Ill. Friends knowing their proper addresses will please correspond with the Technical Editor, Radio Digest, 510 N. Dearborn St., Chicago.

The Zurich, Switzerland, station, which up till now used but 500 watts power, has been increased to 5,000 watts. The installation is already provided.

Radio Club Notes

Thanks, Mr. Fernald, (whose home town is Baltimore, Md.) Now that others will read of the fine personal work you are doing, many of our Radio club members no doubt will follow suit. Which is but another way of introducing a listener whose interest in Radio is such that he addressed letters to some fifty of his neighbors upon the subject of "Blooping" and offered to help them "keep the air clean."

* *

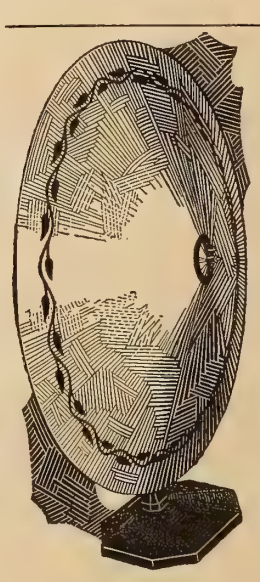
Arthur C. Zellner, Radio editor of the Janesville (Wis.) Daily Gazette, opined that a few might join if he suggested a Radio club, not realizing that most of Janesville's Radio population would come to his party. But they did and the SRO sign went up early in the evening. High spots were the talks given by Mr. D. J. Marcus and Thomas Hefferan, while the blue ribbon was voted to the Wisconsin Light and Power company, when the manager, Mr. W. R. Schmedley, mentioned that his company stood ready to stand back of any move which would make for better Radio reception, and to prove it said, "We will replace, at our own expense, any apparatus in our plant that is found to be the source of interference."

* *

Out where the West begins—Cheney, Washington, to be exact, is the headquarters for a live Radio club. Leon Swank is president and Thomas Smith, secretary-treasurer. Just to be sure that they would get started off on the right foot, James S. Lane of the normal school faculty has the pledge of the club members that they will attend a regular course of instruction, which Mr. Lane will conduct. If you know Radio help your club as Mr. Lane is doing.

* *

Sylvania Radio club of Allentown (Pa.) is so ambitious they have gotten out a new and complete Radio call book with an information encyclopedia compiled by, for, and of average Radio listeners. Other clubs desiring more information on this subject can write to Joseph E. Yeager, 1236 Gordon street, that city.



Make Your Own Cone Loud Speaker —and *Save* $25.00

(All Parts Supplied)

Why pay $35 or more for a cone loud speaker when you can easily assemble a splendid super-sensitive one at home with the complete parts we send you—and save $25?

We include a special complete cone unit, blue print and simplified directions for assembling. You can easily set up this wonderful speaker in a few interesting hours. Large size, stands eighteen inches high, complete in every detail. Not only unmatched for beauty, but reproduces the finest sound of music or voice with faultless accuracy. Yet the cost is amazingly low—only $10—for the most approved form of speaker known. You make this big saving because we save the cost of assembling and packing and you save all jobbers' and dealers' profits.

Send No Money

Simply send name and address and the complete outfit will be sent you by return mail. When postman brings package, deposit with him only $10.00 in full payment. If you aren't more than delighted—if you're not absolutely convinced that you have a cone speaker equally as fine as any $35 cone sold—simply return the parts within ten days and your money will be instantly refunded. Never before has a better radio bargain been offered. You would pay at least $35 for a cone speaker of equal quality anywhere. Act at once. Write NOW!

How to Stop Blooping and Man-Made Static

Part X—Receiver for Locating Interference

By The Technical Staff

IT IS obvious that no intelligent attempt toward the elimination of interference can obtain until a study is made in order to determine its character, as well as its location. Very often such a survey will point the way in which the offending media may be most easily remedied.

To illustrate this point, the writer desires to mention a particularly difficult case which he was called upon to assist in eliminating, as an example of peculiarities which are, at times, almost ridiculous once the offending medium is discovered. The case in mind had to do with an alternating current hum which insisted upon appearing upon a given evening each week, but was absent at all other times, the noise being so loud and continuous that it was quite impossible to operate the receiver. So far as was possible, without employing a loop directional test, both the receiver and its wiring, including the antenna and lead in, were not at fault. The immediate neighborhood did not reveal any devices which could be blamed for any such noise of this character. It was evident that the unusual was taking place, but how and from what source of supply was an entirely different story.

In near desperation, an inspection of the house wiring was decided upon. Upon entering the kitchen, which was adjacent to the room in which the receiver was located, the first object to greet the writer's eyes was the wife of the home busily engaged with her weekly ironing. Turning off the electric iron proved conclusively that we had found the cause of the trouble, it being apparent that, as it was very close to the receiver and only separated by a partition, in operation it was influencing the inductances of the receiver.

While many types of circuits which will operate from a loop may be designed and constructed in portable form, as an assistance to those who may not have a suitable circuit, this article describes a type of receiver that has proven very satisfactory in locating interference. Two illustrations are shown, one of the circuit, the other of the completed receiver. It should be understood that in following the circuit, it is not essential that it be mounted as shown in the completed receiver, this photo merely being offered as but one of many arrangements which may be constructed, and possibly more elaborate than would be desired by many.

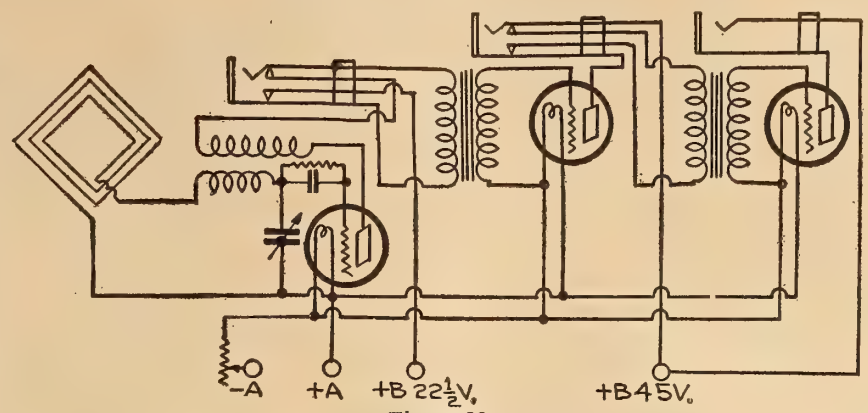

Figure 19

The specifications for a receiver following the diagram shown are as follows:

The loop is pancake wound, the outside turn 22 inches square, the total turns to be 14, spaced ⅜-inch apart. The plate coil consists of 50 turns of number 26 dcc., wound upon a 3½-inch tube of Formica. The grid coil is composed of 40 turns of number 26 dcc., wire wound on a 3-inch tube. The tuning condenser should have a maximum capacity of .0005 mfd. and be of the straight line frequency type if possible, although a straight line wave length type will work reasonably well. It is highly desirable that a noninductive variable grid leak with clips for the mounting of a .00025 mfd. fixed condenser be used with this circuit, as at times extreme sensitivity is required for the operation of the detector. Such cases require a leak which may be varied from ¼ to 10 megohms in order to secure best detector operation.

As the three tubes are controlled from one rheostat, the resistance value required will vary in accordance with the type of tubes used, while possibly the best practice would be that of using one whose resistance would be sufficient to control all ordinary types of tubes, thus eliminating the necessity of changing the rheostat in the event of one desiring to change from "A" type tubes to 199's.

Your attention is called to the wiring arrangement of the first jack which varies from the usual method in that it is connected in such a manner as to provide audio amplification when it is desired to use auxiliary apparatus in connection with current variations or audio frequency only.

The question will arise as to whether it is desirable to shield this or other types of receivers which are to be used for the location of interference, and, at first thought, such a practice would seem advisable. It however is apparent that as the loop must of necessity be exposed it would be quite nonessential to shield the receiver, while in many instances interference caused through, or by, some extreme leak is quite readily picked up and located without having to resort to the use of the loop.

In constructing this or other receivers for this purpose, the same construction rules that direct the building of a high-class receiver for broadcast reception should be followed. Grid leaks should be run as direct and short as possible. Plate leads should be at right angles to the grid leads, if possible, and well apart from them. The by-passing of both the A and B batteries should have one's consideration, while the cabling of all low potential wires adds materially to the all around efficiency of the completed receiver.

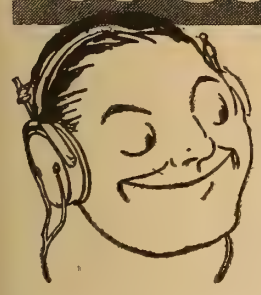
As the receiver in question is to be of a portable type, sponge rubber should be used underneath the socket mounts or sockets which are designed to compensate for the mechanical vibrations incident to the use of the receiver.

The assistance of such members of Radio clubs as will earnestly try to locate sources of interference and report them to the individual in charge of all interference activities, is strongly urged. Much assistance will be required, and of a character which will studiously avoid the personal element which is so disastrous to successful progress.

In the experimental group of broadcast listeners, the habit of tinkering with the receiver is all too common. Imaginary troubles pop up and usually at a time when signal strength fails for a day or so. The listener is often prone to blame his set, while generally the fault is chargeable to atmospherics. This is evi-

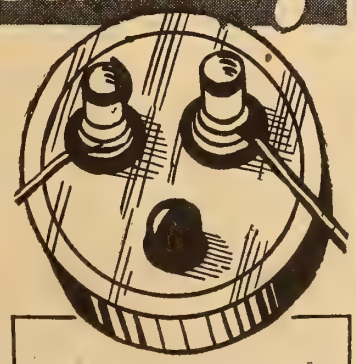
(Continued on next page)

No More Static!



NEWEST, most startling invention eliminates static under all weather conditions. No loss of volume. Everything comes in clear and strong. No more exasperating buzzes, squeaks, and howls.

Start to enjoy the pleasure of your radio. Install a Static Eliminator and you can forget all about static forever. And not only that. You will increase the selectivity of your set—you will be able to tune out other stations easier, sharpen signals, remove noises, lessen interference, and prevent re-radiation. Over a half million Static Eliminators in use now. Thousands being sold daily. You will be enthusiastic too when you hook it up to your set and hear the amazing difference.



STATIC Eliminator fits all makes of radio sets. A child can hook it up in half a minute. Lasts a lifetime.

The Static Eliminator is sturdily made to give many years of perfect service. A simple, but effective device that hooks up to any make of set in 30 seconds. Complete, easy to follow directions included with every Eliminator. You will be amazed at the immediate improvement in your results. Mail coupon for your Eliminator now.

Amazing Low Price

$1.00 Postpaid

This wonderful new invention sells for only $1.00. Users say it's easily worth ten times this price because it produces such a wonderful improvement in receiving power and clearness of all radio sets.

Satisfaction Guaranteed

You will be delighted with the results of this remarkable instrument. That's why we guarantee absolute satisfaction. Money back if Static Eliminator is returned within 5 days. Don't be without it another day. Begin at once to know the real joy of receiving all stations without interference. Mail this coupon with a dollar bill—TO-DAY!

"MARVELOUS!" Users Write

"I find your Static Eliminator to be the most wonderful addition to a radio set in all my experience. It sure does the work."—J. J. Aldrich, 172 N. 4th St., Columbus, Ohio.

"Am surprised at the wonderful results I am obtaining. I am now receiving stations with clearness that is truly remarkable."—Thos. C. Smith, 2582 Parve Ave., New York.

"Your Static Eliminator is a great help. It gives me a wide receiving range. Last night in less than one hour, I had about 15 different stations."—R. D. Smith, Box 365, Clermont, Forida.

"I like the Eliminator fine. I wouldn't sell it if I couldn't get another."—Burt W. Thompson, Homer, Mich.

Year after Year leading builders of fine sets use more Thordarsons than all competitive makes of transformers combined—proof they are best!

THORDARSON ELECTRIC MFG. CO., CHICAGO

JEFFERSON

A L Sealed Transformer

Specified by

Dr. Owen

Dr. Owen of Oklahoma University has selected the Jefferson A L Sealed Transformer for his new Torodyne circuit, described in Radio Digest.

Here are his reasons for choosing this superior transformer: (1), Nicety of balance, giving even amplification at low frequencies, and preventing resonant peaks at the higher frequencies. (2), Tests show a practically straight line curve from 30 cycles for the low notes up to 10,000 for the high. (3), Heavy insulation throughout, lowering resistance between the primary and core.

Can Be Used with Power Tubes

(4), Can be used with the new power tubes. (5), This transformer is SEALED IN A METAL CASE, insuring protection against moisture and other outside influences.

Ratio: 2 to 1; price $6. Sold by leading dealers. If your dealer does not have Jefferson A L Transformers in stock, do not be satisfied with a substitute, but write us direct.

Jefferson Electric Mfg. Co.

HELP STOP BLOOPING

(Continued from page 21)

denced by the poor signal strengths which have been an outstanding feature of Radio this season, and particularly so during the recent international tests.

While tinkering is to be discouraged, it is equally important that definite causes of interference should be corrected without delay. Once such interference and its source is located, the presentation of the facts to those owning the offending apparatus, should be given in a manner which will not offend, and with a spirit denoting a sincere desire to be helpful.

Human nature runs pretty true to form the world over. Rubbing one's feathers the wrong way will never bring about the desired cooperation, while diplomacy coupled with sincerity and fairness will usually accomplish the desired result.

(In the next and final "BLOOP" article, the technical staff will describe a newly discovered cause of interference and prescribe for it. You may be causing a disturbance and not know it.—Editor's note.)

The Reader's View

A Moral Obligation

Replying to R. F. Sperling's letter. He says he would like to know more about our way of doing away with local interference. He is right about the license fee of one dollar going toward the elimination of such things as power noises, leaky transformers, ship to shore communication on broadcast waves and similar troubles, but one thing that we are troubled with is the "nut" with the regenerative set who advances his regeneration to the point where he makes life tough for the other fellows.

The government is absolutely helpless in this case. There is no law against bringing one's set to the point of oscillation, it is just a moral obligation. When bloopers realize they can get better reception just below the point of oscillation, this will be a better town to live in.

The marine and fisheries department of Canada issues licenses and the law is that one must have a license before erecting an antenna, under penalty of confiscation of the receiving set. This seems rather hard on the amateur, ignorant of the conditions, doesn't it? So far in this city we have not had any noticeable improvement in reception but, of course, the noises the inspectors did leave us are impossible to control without "canning" the man who listens with his set boiling over.—E.H.T., Saint John, N. B.

Played to Death

Many of our readers seem to prefer popular music over the Radio, but I must say that I can hardly agree with them. No sooner does a really pretty or catchy tune come out, than the Radio stations begin to literally play it to death. When I first heard "All Alone" I liked the song very much. Then I began to hear it over the Radio every night from every station in the country, and after hearing it about fifty times from as many stations, I felt that I never wanted to hear the song again as long as I lived.

Is it any wonder then, that these songs very soon cease to be popular and the public clamors for something "new"? I think Radio broadcasting is a dandy means of destroying the popularity of any song.—H.K.M., Alva, Okla.

He Likes Us

Thank you, Radio Digest. For four years I have been waiting for some magazine to come out with the truth as to what kind of receivers radiate. And you include the super and the tuned R. F. and the dear old neut. Now we are getting down to business and perhaps there will be results. While other Radio publications confine their anti-blooper remarks to the so-called regenerative set, Radio Digest hits the whole family of bloopers. More power to you and may you not lose any subscribers or advertisers.—H. W., Wakefield, Nebr.

For the Good of Radio

Please allow me room in your paper to express my opinion concerning the overcrowded and general "mussed up" condition of the wave channels from 280 meters on down. I think something should be done to bring about some relief of the situation. As it is now, the lower half of the dials are practically useless, except a few stations that can be received clear and without interference from other stations near the same wave length. This situation is a serious matter and needs Mr. Hoover's immediate attention.—W.B.S., Austin Texas.

Justifies WJAZ Piracy

I have been somewhat interested to read of the federal suit against WJAZ for pirating wave lengths, I feel that WJAZ is perfectly justified in "Piracy," if you wish to call it that. The Radio commission has given them such a small assignment of time as compared to other stations that you can't blame them for turning pirates. Here's hoping that Mr. McDonald of WJAZ wins out. Compliments to E. F. McD.—F. A. P., Nestoria, Mich.

Short waves travel farther than long waves and require less power to cover the same distance than the longer waves do.

A storage battery is good for several years or more, depending on its careful maintenance.

CLASSIFIED ADVERTISEMENTS

Classified advertisements in Radio Digest produce results. Have you a receiving set to sell? Do you want to buy a Radio? A classified advertisement in this column will sell your set.

Rates are twenty cents a word for each insertions, ten per cent for six insertions, fifteen per cent for twelve insertions, twenty per cent for twenty-four insertions. Name and address to be included at above rate. Cash should accompany order. Minimum of ten words.

Objectionable and misleading advertisements not accepted. Forms close three weeks prior to date of publication, which is Saturday.

A&B Battery Charger ONLY $2

SATISFACTION GUARANTEED

Charges any type of storage A or B battery, using a few cents worth of ordinary house current. Works perfectly on either alternating or direct current. Cannot injure battery and lasts for years. May be used as a trickle charger. Complete directions enclosed — anyone can operate. No expensive "extras" to buy.

Why pay $10.00 to $18.00 for a charger when you can get this splendid GUARANTEED R. B. Charger by mailing us two dollars (bills, money order, check or stamps) plus 10c in stamps or coin to pay mailing costs. Charger will be sent postpaid. If you are not satisfied, return within five days and we will refund your money. Order at once—TODAY.

R. B. Specialty Company
308 East Third, Dept. 343, Cincinnati, Ohio

Nightingale

6-tube Set with Integral Loud Speaker **$75**

A wonderful, sharp tuning set of beautiful tone, made complete in our own factory. Five tube assembly suffices for most stations, but volume can be tripled by using 6 tube terminal. No wasteful neutralizing condensers but perfect balance of parts. *See Nightingale dealer or write to*

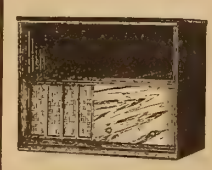
THE GUTHRIE CO., GRAFTON, OHIO
Makers of the famous Songbird Line

Radio Bargain Hunters

***This Cabinet* $3.45 7x21**

with built in speaker

also carried in 7x24—7x26



Finished in hand rubbed Adam brown mahogany. Lower part of the cabinet contains the loud speaker horn. The end of the loud speaker is covered with a silk screen which adds richness to the entire cabinet. A clip suitable for attaching a loud speaker unit is included. No unit included.

Panel Size	Price
7x21	$3.45
7x24	3.95
7x26	4.95

Values to $14.00

We purchase for cash, bankrupt and surplus stocks from manufactures and jobbers throughout the country. By selling entirely for cash, we are able to offer guaranteed quality radio apparatus at hitherto unheard of, low prices. We do not have everything in radio, but if we have it, you can save money.

Send for the Bass Bargain Bulletin and save money on your radio needs.

A. H. BASS & CO.
744 N. Clark St., Dept. 16, Chicago, Ill.

NICHROME GENUINE WIRE

Easy Now to Make and Repair Electrical Appliances

Highest grade resistance wire needed in all electrical appliance building and repair; Absolutely guaranteed up to 660 watts, 110-12-Volts, 6 Amps.

CZF, Chihuahua City, Mexico. 310m-967kc. 250 meters. Announcer, C. A. Nieto. Slogan, "United by Radio." Tues, 8-9:30 pm. Mountain.

XDA, Mexico City, Mexico. Variable wave. 4,000 watts. Government station. Slogan, "Radio Chapultepec." Mexican.

Excerpts from Telegrams:

"Tested your RFL-60 within two blocks of local 500-watt broadcasting station, using twenty-five foot wire on floor for aerial. We picked up stations all over the country and when local station came in tuned it out and picked up WSAI at 319 meters. The local station is 270 meters. This is the only set ever tested under these conditions that would tune this station out at any point on dials."—Decatur, Ill.

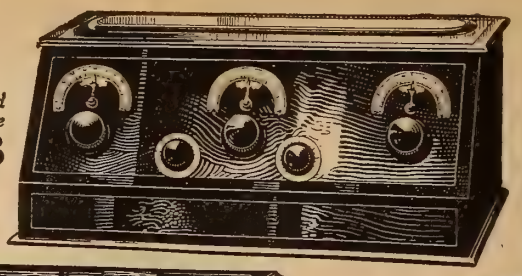
"We tested one of your new RFL-60 sets here in our building using an antenna about 75 feet long and directly under and parallel with our transmitting aerial. The exceptional selectivity of the Crosley receiver permitted us to tune out our station WTAX, just as easily as we would tune out a Chicago station."—Streator, Illinois.

"An RFL-60 tested in competition with other receivers of much higher price proved its unquestioned superiority. The new Crosley models offer the greatest values on the radio market." — Kansas City, Mo.

"The Model 4-29 is classed with the Trirdyn Model 5-38 bringing in Pacific points with ample volume, using a Musicone. RFL-60 and 75 are very selective. Have separated distant stations on less than one degree on the dial. Have logged Mexico City and Pacific Coast Stations with plenty of volume."—Miami, Fla.

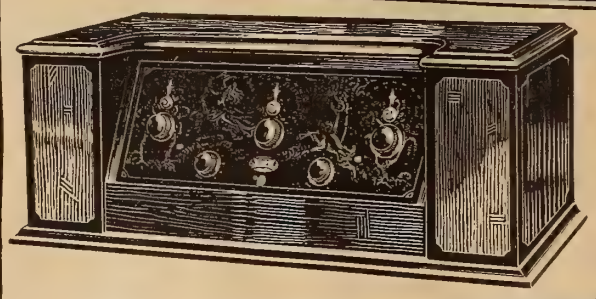
"The RFL sets outstripped much higher priced outfits. These sets bring in Canadian, Cuban and Mexican stations as easily as those on nearby states."—Glasgow, Ky.

What's the idea of keeping a fellow up all night foolin' around with that darned little 4-29?
I've been in the radio game for seven years and was beginning to believe that there wasn't a set in the world that would keep me up late but when that little 4-29 started to pull in Houston, Texas and with such extreme volume I sat up and took notice.
I got California station with unbelievable volume last night. KFI came in so loud that it could be heard over a block on a Musicone speaker. I've gotten over one hundred and twenty-five stations in only three nights. — Spring Valley, Ill.

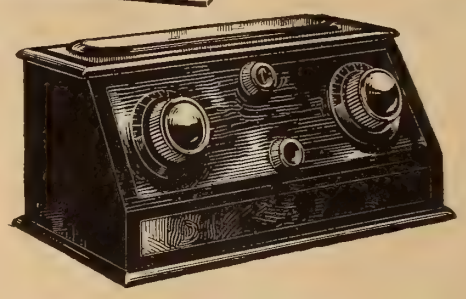


The Crosley 5-tube—5-38
All the volume, selectivity and purity of tone available in the best 5-tube set—plus the Crescendon . . $38

The Crosley 5-tube—RFL-60
A set of marvelous performance and beautified by the artistic decorative panel $60



The Crosley 5-tube—RFL-75
Simplicity and speed in tuning, fidelity of tone and decorative beauty, enhanced by the art panel $75



The Crosley 4-tube—4-29
in which the Crescendon is equal to one or more additional tubes of tuned radio frequency amplification . . $29

Prices slightly higher west of the Rockies

By Expressed Opinion of Fans The Greatest Radio Values Ever Offered!

Real performance! Amazing sensitivity and selectivity! Marvelous tonal qualities—inspiring volume. And surpassing beauty!

Read, in the column at the left, the enthusiastic comments of a few of the many radio fans who have *voluntarily* written or wired us their praise.

True radio values—at astonishingly low prices. Hear a Crosley Concert at your nearby Crosley dealer's.

No. 5 OFFICIAL BALLOT

Announcers' Contest

RADIO DIGEST THIRD ANNUAL GOLD CUP AWARD

GOLD CUP AWARD Editor, Radio Digest,
510 North Dearborn Street, Chicago, Ill.

Please credit this ballot to:

.....of Station.....
(Announcer's Name) (Call Letters)

Signed.....

Address.....

City..... State.....

1-21-26

The ballots, which appear weekly at the left top of this page, are numbered consecutively. They will appear every issue until the close of the contest. Each of these ballots will count for one vote when sent in separately.

But when held until you have four consecutively numbered ballots, and sent in at one time to Radio Digest, a bonus of eight votes, or a total of twelve votes, will be allowed the candidate for whom you are voting.

The larger the number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes, or a total of twenty-eight votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. And for a complete series of ballots, including one from each issue from March 27 to and including the last, which will appear in the September 1 issue, a bonus of fifty votes will be allowed.

Send in nominations or ballots to the GOLD CUP AWARD EDITOR, Radio Digest, 510 North Dearborn street, Chicago.

COATS WITHDRAWS FROM CUP CONTEST

CANADIAN SATISFIED WITH 1925 SILVER TROPHY

One Hundred and Seventeen Announcers Nominated for Annual Radio Digest Gold Cup Award

Canada too joins the "single term" league for announcer's cup winners. D. R. P. Coats, who was presented with a beautiful silver loving cup last year in token of his being highest in the final standing among Canadian announcers in the Radio Digest Gold Cup Award, upon reading that George Hay and Graham McNamee would compete no longer in the awards, sent the following telegram to Radio Digest:

"Following the lead of McNamee and Hay, I withdraw from the Canadian cup contest. One cup is enough for anybody and my intention is to nominate and boost for Miss Lillian Shaw of CKY, Winnipeg, the finest little Radio announcer in the dominion."

Of course that does not bar Mr. Coats from being awarded the solid, 14-carat gold cup for first place among all nominees, and the Gold Cup Award Editor would not like to have this popular Canadian to prevent himself so from having the honor of being the man to bring the gold cup to Canada for the first time in the history of the award.

Standing Appears Next Issue

A record-breaking figure of thirty-nine nominations was made since last issue. At that time the total was seventy-eight. The total now rests at 117, two of which candidates have withdrawn from the gold cup race and one of whom has asked that the Canadian cup go elsewhere this year.

At this time the Gold Cup Award Editor wishes to make several corrections in the list which was published last issue. Director-announcer G. C. Arnoux, of KTHS, Hot Springs, Ark., was listed as of Station WGY, through a typographical error.

Also, Gene Rouse and Gus Swanson were both listed as of Station WOAW, whereas neither are now associated with the Woodmen of the World broadcaster and should have been listed as ex-WOAW.

Watch for the next issue of Radio Digest which will contain the present standing of the leaders! Many votes are being cast, and a large influx has been caused by readers sending in the first four consecutive ballots and getting the bonus of eight votes, or a total count of twelve for their favorite voice. The complete bonus plan is explained below.

New Names in Race

Following is the list of thirty-nine new candidates entered in the third annual Gold Cup Award since last issue:

Atlin, H. W.	ex-KDKA	Nelson, Jack	WJJD
Bebiert, Frank	KHQ	Old King Tut	WSB
Calmean, Miss Ormiah	KMA	Pete, Petroleum	KFDM
Chappell, Ernest E.	WFBL	Pierce, Jennings	KGO
Coats, D.R.P. (out)	CKY	Reeves, Lewis	WJZ
Combs, Robert H.	CKNC	Reilly, J. A.	WJAR
Corbett, V. W.	KFXF	Rodgers, F. G.	KDKA
Cummings, J. G.	WOAI	Ryan, Frank	WBZ
Ebrhart, Harry	WLIT	Sargent, Jean	WHT
Garland, Charlie	WBBM	Salisbury, Kenneth	WMAK
Grandlund, N. T.	WHN	Shaw, Lillian	CKY
Hager, Kolin D.	WGY	Steffan, Karl	WJAG
Hooper, Bert	CKCH	Stewart, Roy	WABC
Ives, D. H.	WHAS	Stenger, John H.	WBAX
Johnson, Walter	WTIC	Snyder, Reed	WOC
Kaufman, L. L.	KDKA	Vandersloot, John	WFI
Kyne, A. S.	KMMJ	Wellman, Charlie	KFWB
Lopez, Vincent	WEAF	Weyman, Jerry	WCAE
Milholland, Howard	KGO	Wright, G. A.	CNRV
Miller, Chester H.	WEAN		

If your favorite announcer's name is not in the list above or did not appear last issue, just send in his name as a candidate and get him into the running. Then SAVE your ballots for him. Don't miss a SINGLE ballot, for when these are turned in to Radio Digest in a group of CONSECUTIVE numbers, a pleasing and worth while bonus of extra votes is allowed the announcer for whom you are voting.

POLE IN ONTARIO CITY PICKS UP RADIO MUSIC

Reproduces KDKA and Stumps Puzzled Engineers

PORT ARTHUR, Ont.—A "Radio Pole" on Simpson street in Fort William from which, it is claimed, strains of music, and the announcement that it was emanating from Station KDKA at Pittsburgh, may be heard, presents a phenomenon that is puzzling electrical men at the Head-of-the-Lakes.

Persons assert that while standing at the foot of the pole they have heard the music and announcements clearly on different occasions. The pole is situated in the business section of the city. It carries a network of wires to and from a step-down transformer. What's the solution? Write your own ticket!

TERRELL HAS TOUGH DEBATE WITH MEAT

PROMISES WAVE TO STOCK RAISERS IF PRICE DROPS

Chief Radio Supervisor Counts and Finds Merely 500 Firms Waiting Chance to Broadcast

WASHINGTON, D. C.—Chief Radio Supervisor W. D. Terrell has a hard time of it attempting to explain to disappointed applicants why they cannot have a wave length or increase their power. Quite often he is told that his refusal means a hardship for some particular section of the country.

Recently an applicant from the Middle West wanted Mr. Terrell to grant a wave length for a high power station to disseminate market information to stock raisers. The licensing of the station would have resulted in increased interference. Mr. Terrell was told that with the new station the meat consumers of the country would benefit from a better distribution of cattle shipments.

Terrell Wants Cheaper Meat

"It doesn't make any difference how many wave lengths you get, we're going to have to pay the same price for meat," retorted Mr. Terrell. "If you'll prove that we can get good meat at a cheaper price if you have this new station, the people of this country will see that you get it."

In connection with the continued applications which are being received by the supervisor for new licenses for the erection of broadcasting stations, he announces that there are now 500 applications on file in the department. In addition to these applications the department also has almost 50 applications for the increase in power of existing stations.

Looking Ahead

A Tiger in a Rabbit's Skin—the most thrilling story Hugh Fullerton ever told and the name of it is BIG RABBIT. Opening chapters in this issue. A beautiful girl, love mad youth and a thrilling dash to the rescue. All exclusively told in Radio Digest. Miss Tonneson's note, next week.

You'll Be Surprised When You Get Next Week's Issue of Radio Digest and read the final episode of "A Step On the Stairs." We would like to give you a hint as to the real murderer, but that might make it too easy for the amateur sleuths who are sending in their solutions for the $500 prize money Radio Digest is to award for the best answers.

Pictures of Radio Digest Mystery Play Players from WOR, Newark; WNAC, Boston; WRC, Washington; WGY, Schenectady; WMAQ, Chicago; WOC, Davenport; WHO, Des Moines; WOAW, Omaha; KOA, Denver and KGO, Oakland; will appear in the next Radio Digest.

One of the Most Interesting Pioneers of Radio Broadcasting is K. M. Turner of Los Angeles, father of the hollow carbon granule used in all microphones and patriarch of Radio Station KMTR, a "high-brow station" of the Pacific. In our next issue.

All the Dough Used In an Up-and-Going Broadcasting Station isn't kneaded exclusively for the up-keep and that's when they have Mrs. Dickey mixing it for pies, cakes and other interesting delicacies at WLS, Chicago. Home listeners will be given a treat in Mrs. Dickey's story.

Underground and Horizontal Aerials is the subject of a new series by the Technical Editor which will start next issue and will contain many suggestions that will be of interest to the experimenter.

Spring Cleaning—How to Get the Most Out of Your Radio receiver during the summer will be told in a series starting soon. The articles will enable the average fan to fix the little mishaps and ills as they occur.

Broadcaster Briefs

Listen for KFVN, the "Royal Penn" station at Fairmont, Minn,, during the last few nights of April or the first of May. Special tests, with prizes, will be conducted between 11 p. m. and 1 a. m. Central time. The wave length is 227 meters and the power, 50 watts.

* *

Breaking its customary morning silence, KFI is now on the air with three morning exercise classes, "Early and Energetic" at 7:00, "Pep" at 7:30 and the "Lazybones" at 8 o'clock. Following the Lazybones class is a cheer-up talk for convalescents and others who are unable to take any kind of physical exercise.

* *

WLS, Sears Roebuck Argricultural Foundation station of Chicago, celebrated its second birthday Saturday, April 10, with a special dinner party and dance at the Hotel Sherman. Friends and artists who have contributed to the upbuilding of WLS were present.

* *

Another Chicago station to have a recent birthday was WMBB, Trianon ballroom, whose first year end was marked April 15. Director J. B. Lampe kept the 250-meter wave band full of diversified program bits for six hours of continuous broadcasting.

* *

One of the most unusual gifts ever received at WHT, Chicago, recently arrived in the form of a popular song, "Pat and Al," written by Adalia Due of Racine, Wis. The song is dedicated to Pat Barnes, director of WHT, and Al Carney, station organist, whom she terms "the peerless pair." Musicians agree that the song has merit.

TWIN CITIES GIRL TOOK OPPORTUNITY

NO, THIS week's cover girl does not come from Hollywood. Surprised, aren't you? She is Twins—that is, she is a Twin Cities girl and may be heard regularly over the Gold Medal broadcasting station, WCCO, Minneapolis and St. Paul. Her name is Miss Jean Eatinger.

She started in playing piano accompaniments for the other artists. Then came one of those inevitable blanks in the program when someone simply had to sing. "Eventually, why not now?" quoted Mr. Bellows, looking quizzically at Miss Eatinger. So Jean let her fingers wander over the keys and leaned toward the microphone, just scared enough to let one of those catchy little trembles come into her voice.

Jean Eatinger is only 18, but she is a regular blues singer and pianist at WCCO now.

STATIONS ASK FOR MUSIC RELIEF

HOOVER SPEAKS BUT PERHAPS TOO MUCH

WJAZ CHIEF SAYS HERB IS UNFAIR, WRONG, ETC.

E. F. McDonald, Jr., Reads Law to Commerce Secretary and Cites Him for Chaos Responsibility

CHICAGO.—Contradiction of a recent press statement of Secretary of Commerce Hoover by E. F. McDonald, Jr., of this city, who calls Mr. Hoover's statement "absolutely incorrect," is the latest development of the United States versus Station WJAZ controversy which has been going on since the Zenith broadcaster took the law into its own hands and commandeered the wave length of 329.5 meters.

"My attention has been directed," said Commander McDonald, "to an Associated Press dispatch from Washington quoting the Honorable Herbert Hoover, secretary of Commerce, in which Mr. Hoover says 'the future of Radio broadcasting on the American continent depends upon the outcome of the government test suit against the Zenith Radio corporation, and that a decision against the government will make $600,000,000 worth of Radio receiving sets useless.'

Asserts Hoover Is Unfair

"The secretary of commerce had his opportunity," the well-known Radio manufacturer continued, "to present the facts and argue this case before Judge Wilkerson when the case was on trial, and I believe that this attempt to retry the case in the newspapers before the decision is rendered, is eminently unfair to the public.

"In addition, Mr. Hoover's apparent attempt as a representative of the executive department of the government to influence public opinion in a pending federal court case, is reprehensible and establishes an extremely dangerous precedent.

"This statement attributed to Mr. Hoover is absolutely incorrect, and Mr. Hoover, or at least his attorneys, know that it is not correct. The only effect of the decision in this case will be the determining of the right of the secretary of commerce to place restrictions as to wave lengths on a certain limited class of broadcasting stations.

Quotes Law for Hoover

"Regulation No. 15, of the Radio communication laws, as enacted by congress in 1912, reads as follows:

" 'Fifteenth. No private or commercial station not engaged in the transaction of bona fide commercial business by Radio communication or in experimentation in connection with the development and manufacture of Radio apparatus for commercial purposes shall use a transmitting wave length exceeding two hundred meters, or a transformer input exceeding one kilowatt, except by special authority of the secretary of commerce contained in the license of the station.'

"The only question raised in the test case here in Chicago," Mr. McDonald said, "is whether or not the secretary of commerce has the right to arbitrarily assign wave lengths and hours of operation to stations engaged in one of the two above described classes. The Zenith Radio corporation comes within the latter class. The great majority of stations are not in either class, and no broadcaster, other than those engaged in the two special classes described by congress can operate on a wave length in excess of 200 meters, without special authority from the department of commerce. No one has ever claimed otherwise, and the secretary's power in that respect is not being questioned in the Zenith case.

Lashes Secretary for Chaos

"I am surprised to read Mr. Hoover's statement to the effect that the present division of wave lengths is a voluntary one. This is directly opposite to the position taken by him, through his attorneys, at the hearing of the government case in Chicago. He then distinctly contended that he had absolute power to allocate wave lengths as to all broadcasting stations. The Zenith Radio corporation did not dispute his authority to do so, except in the case of broadcasting stations coming within the two limited classes above described by congress. The language of the Radio act of 1912, establishes these two classes definitely and is clear and unambiguous.

"Regardless of the decision in this case in Chicago, there will be no chaos as a result. If conditions do become more chaotic than they are at the present time, it will be because of Mr. Hoover's inequitable administration of the law. In conclusion I wish to say that the Zenith Radio corporation is opposed to vesting in any individual, the sole and arbitrary power to administer the rights of broadcasting stations. This authority should be vested in an impartial commission and I sincerely hope that legislation will be passed to accomplish this."

MORTICIANS HEGIRA TO DARKEST AFRICA

DENVER.—Dr. Henry Rimmer, evangelist, scientist and author, who recently defended fundamentalism in a stirring evolution debate over Station KOA here, will head an anti-evolution expedition into dark Africa next year. Twenty-five scientists and explorers will make the trip. Embalmed bodies of gorillas will be brought back for anatomical comparison with the human body.

IMPORTANT NOTICE TO OUR READERS

YOUR loyal support has made Radio Digest the leading Radio Magazine in the world, enjoying the largest circulation in its history. Over two hundred and twenty-five thousand copies of this issue were printed. Hitting this high mark it is only fitting that we acknowledge the debt of gratitude to you and the thousands of other readers who have made this possible.

Our consuming ambition has always been to give our readers the maximum service. At all times it has been our ideal to serve the Radio set owner in every possible way. We have tried to make Radio Digest invaluable to the broadcast listener—"The Eyes of the Radio Set." Our slogan is "Bigger and Better."

In comformity with this policy we announce, effective with (your next issue) May first issue, Radio Digest will be published twice each month, on the first and the fifteenth. The single copy price will be fifteen cents.

The size of the magazine will be increased to thirty-two big full pages. Advance programs will start with the date of issue and run until the date of the next issue. This will give a half month's advance illustrated programs in each number. Programs will be supplemented with the usual Digest features and news in addition to the very best fiction obtainable from noted American writers. In all, the new Radio Digest will be a big buy for fifteen cents, twice-a-month.

Heretofore you news stand readers have been paying $5.20 a year for the weekly Radio Digest. With the new plan you will pay only $3.60, making a saving to you of $1.60 a year for a better magazine.

Keep in mind that Radio Digest in the future will be out the first and the fifteenth of each month. You can buy it on the news stands the day preceding the date of issue, viz, the last day of the month preceding and the fourteenth.

To Those Who Receive Radio Digest by Mail:

To each one of our large family of mail subscribers we extend our hearty thanks. Your copy is mailed as each issue comes from the press and this regularity helps us very much in solving the many perplexing problems of the publishing business. To give you the very best, we are changing the frequency of issue.

Your next issue will be out May first and will be the first number of our new schedule. This issue will carry the advance Radio Programs from May first to fourteenth inclusive. No break in your programs, as each issue will carry the programs until the next issue. Your copies will be mailed for you to receive them at least one day before the programs begin.

All subscriptions will be extended. You will receive the same number of issues for which you have subscribed. All subscriptions now on file are based on fifty-two issues for one year and you will receive that number of issues on your annual subscription. The same ratio will apply if your present subscription is for a shorter period than a year. Accordingly your subscription will expire at a later date than that shown on the mailing stencil.

Effective May first, the regular subscription rate will be $3.00 a year.

E. C. RAYNER,
Publisher, Radio Digest

Mike Stars to Convene

NEW YORK.—The first national convention of Radio artists and celebrities, at which will be present men and women whose voices are known to millions of Americans, will be held September 13-18 in New York city, it was recently announced by G. Clayton Irwin, Jr., general manager of the Radio World's Fair, who is making arrangements for the gathering.

Radio Shortens Sickness

LONDON, England.—It has now been definitely established that in those hospitals which have been equipped with Radio receivers here, the average length of each patient's confinement has been reduced by nearly two days.

PETITION CONGRESS TO MAKE AMERICAN SOCIETY FIX FEES

Broadcasters Make Plea to Congressional Committee Holding Hearing on Dill-Vestal Copyright Law Amendment Bill—Troubles Aired

WASHINGTON, D. C.—Charges of monopoly against the American Society of Composers, Authors and Publishers were the order of the day when proponents of the Dill-Vestal Radio copyright bill appeared before the joint congressional committee on patents of which Senator Butler, of Massachusetts, is chairman. Following the appearance of those in favor of the bill, the hearings were adjourned to a later date at which time the opponents of the bill were to be heard.

Those appearing before the committee in favor of the bill included Paul B. Klugh, of the National Assocation of Broadcasters, and Judge H. Tuttle, counsel for the association; Powel Crosley, Jr., Radio manufacturer of Cincinnati; John Sheppard of Boston, Station WNAC; Elisha Hansen and William S. Hedges, for the American Newspaper Publishers association, and W. E. Harkness, assistant vice president of the American Telephone and Telegraph company in charge of Radio activities.

Bloom Apparently Pro-A. S. C. A. P.

The hearings were punctuated by remarks and interrogations by Representative Sol Bloom, of New York, at one time a music publisher, now a member of the house committee on patents, who was apparently an advocate of the American Society. Senator Butler had considerable difficulty during the course of the hearings in keeping Bloom from asking too many questions.

Mr. Klugh, on behalf of the broadcasters in his opening remarks told the committee that the bill represents at least one method of settling the copyright differences which have existed for several years between the broadcasters and the society. He said that his association is open minded and will accept any bill that is reasonably drawn to give at least some protection to the broadcasters of the country. He stressed the point that the broadcasters are perfectly willing to pay a reasonable amount for the use of music.

Varying Fees Are Shown

Mr. Harkness, on behalf of the telephone company pointed out the importance of Radio to the American public, an audience of approximately 25,000,000 people, and gave the following table for fees paid last year:

For stations of 500 watts, fees ran from $100 to $2,500 a year; with a cost of from 12c to $1.60 per hour.

For stations of 1,000 watts power, fees ran from $200 to $1,000 per year; with a cost of from 12c to 69c per hour.

For stations of 1,500 watts power, fees were from $500 to $3,000 per year; with a cost of from 33c to $1.92 per hour.

For stations of 5,000 watts power, fees were from $300 to $2,500 per year, with a cost of from 23c to $1.16 per hour.

The broadcasters of the country, Judge Tuttle told the committee, are willing and anxious to pay for the use of copyrighted music, but they want equality, stability and fairness.

Judge Tuttle Asks Fairness

He disclosed during his talk that the broadcasters and the society at one time recently nearly reached an agreement, whereby the society was to get $1,000,000 for three years out of Radio. The broadcasters, he said, were willing to pay this amount, but they wanted a three year contract while the society insisted on only a one year agreement. This would mean, he contended, that at the end of the one year the society would hold them up for more money.

Judge Tuttle took up in some detail, during the course of his argument, the outstanding features of the bill and particularly called attention to the fact that it offers practically a blank check to congress for it to fill in with what rates it considers reasonable. He told the committee that the broadcasters do not favor all of the sections of the bill as introduced, but they feel that the bill can very easily be made the basis of satisfactory legislation. In closing his remarks Judge Tuttle made a plea to the committee for some kind of relief from the intolerable music situation which exists at the present time.

BIG RABBIT

by Hugh Fullerton

THE FOLK TALES of the American negro vary in different sections of the country; because the slaves sold in those sections brought their tribal legends with them. Through all of the nine different tribes, however, one finds tales of animals and birds, snakes and alligators.

The negroes of southern Georgia and Florida are unlike those of other sections; a strange mixture of races. Many of these were Zulus; men of huge strength, giants among the blacks. Among them are the wildest, the strongest and most powerful, the ones who have borne the brunt of developing the pine and the turpentine of the swamp country.

Their traditions are more closely allied to those of the tribes from which they sprang than are those of the blacks who have lived in contact with the whites. The great zootheistic characters in their tales and traditions are the rabbit and the terrapin; animals their forefathers worshiped in Africa.

It is not strange that, among these blacks, oppressed ever since their forebears were captured like wild beasts and sold into slavery, there are those who claim to be chiefs. This king complex is found frequently among those blacks who have failed to keep pace with the general advance of the race in the United States. It is of these unknown peoples and their mysterious half-remembered gods that the background of this tale is formed.

CHAPTER I

Two News Hounds at Bay

DICK BORTON sat on a trunk, hugging his knees; his crown of black curly hair tousled; a cheerful, idiotic grin on his face. Borton has the most maddening grin of anyone in the world. And expressive—why, if he were deaf and dumb, he could talk in grins. The one thing I hate about Borton is that he always grins when a normally constituted man wants to swear and throw things.

"Cheer up, Wen," he said, chucking his chin with his kneecaps as he rocked back and forth and drummed on the side of the trunk with his heels. "We won't have to carry our trunks. The express company will hold them until we get there even if we have to walk."

"Get where?" I exploded, firing a shoe to the floor instead of at his grinning face as I was tempted to do. "Isn't it bad enough to be bilked out of a month's pay and left stranded a thousand miles or so from New York without having a laughing jackass of a partner pretending to think it is funny?"

"Is his 'ittle feelin's hurted? Is him mad at his 'ittle playmate?" Borton taunted as I slammed apparel around the room, kicked shoes across the bed and raged at our luck, more particularly at Borton.

"Oh, chase the glooms, Wen," he resumed in a more serious mood. "You know all the success folks say you must keep smiling no matter what happens and that adversity is the finest university in the world."

"Yes, and I wish they had to attend it," I snorted.

"IT ISN'T so bad," Borton laughed; "there always is a job for a good newspaper man on some paper. We might try Cincinnati, or Pittsburgh, or some fresh field. We don't have to go to New York. We are not cubs."

I laughed in spite of my aggravation. The situation certainly was trying on the temper. Dick Borton and I were not, as he had just remarked, cubs, but we had fallen into the position too frequently occupied by fledgling newspaper men. We were broke and out of jobs.

"No, we are not cubs," I retorted, my sense of humor coming to the rescue; "we are a fine pair of experienced journalists! We fell for a fake that would not have landed the easiest mark on Broadway. Dick, the next thing you and I know, we will be trying to guess which shell the little pea is under. I wish some of the gang could see us now!"

Dicky grinned more under my sarcasm. He and I had been chums for five years; in fact, ever since we had come to New York from widely separated parts of the country to "break in" and had met day after day while making the rounds of the newspaper offices. We had been among the few who had hung on, fighting for an opening in the face of the monotonous reiteration of, "Nothing doing," from a dozen city editors. We had come to know each other; and, when our funds ran low, we had doubled up in a hall bedroom, continuing the grim battle for a foothold. Borton, tall, handsome, always grinning, was first to land. He fed me for two months until I slipped into a minor job on the World. In half a year Borton was one of the fixtures, a star reporter, who could command position and a good salary anywhere. He had a marvelous knack of winning confidence and treating a story with that deft sympathy which reveals the master hand even in the coldest of newspaper recitals. His acquaintance was wide, and his popularity wider. My success was less brilliant but I had plodded along, rising steadily in salary until after five years of progress we had both become as near fixtures as newspaper men ever are.

THE craving for change had tempted us. Borton was a Southerner and we often had talked of venturing South; he, because of his love for the land of his birth; I, because I had never been there. We had received offers of large salaries, responsible positions and a chance for part ownership if we would join some ambitious politico-financial climbers who were striving to launch a new morning paper in Atlanta. The promoters, seeking experienced newspaper men, found Borton who maneuvered me into a position to get an offer. We had been in Atlanta a little over a month, working hard to make the new paper a success; and so busy, so interested, and so flush (for us) with money that since the first week we had not tried to draw any of the promised money. We knew, of course, that time was required to get the business end of a newspaper into smooth running order, and we paid little attention to the passing of salary days.

The preceding day I had heard of a disturbing rumor that the financier whose name was used as the backer of the enterprise had withdrawn his support. Borton and I had made a hasty effort to collect and had been put off until the following day. That day was the one on which Borton sat on the trunk and grinned. The promoter had disappeared. The sheriff was in charge. Borton and I were in Atlanta with less than twenty dollars cash, and the rent for our rooms was unpaid.

"Let's go to one of the other offices and get work until we raise enough cash to get back to the big pile of bricks," I suggested.

"See here, Wen, that isn't fair," grinned Borton. "There were four kids on the paper. We can get jobs, but if we do, they won't, and they need them worse than we do."

"Let's wire some of the fellows."

"And put the whole gang wise? Never."

"Well," I said sulkily, "what do you propose to do?"

"Escape from here the first thing," he laughed. "My native land has lost its charm."

"But how?"

"Something will turn up. It always does."

His careless prediction was fulfilled almost before the words were uttered. There was a knock on the door.

"Come in," called Borton cheerily. A young man entered, bowed rather stiffly and inquired:

"Which of you gentlemen is Mr. Wendell Phillips Lindsay?"

"I am," I replied as Borton grinned devilishly at the use of the name which my parents had chosen when they fondly believed I would become a great minister.

"If you are at liberty," the young man continued quietly, "Mr. Philip Kincaid desires to see you. I have his car below to take you to him at once if you are not engaged."

"Who the deuce is Mr. Philip Kincaid?" I inquired, rather rudely but from natural curiosity.

"Mr. Kincaid," the young man responded, his identity a bit ruffled by my ignorance, "is president of the Ninth Trust company, and one of the wealthiest and most influential men in the city."

"He's the fellow we played up as the Morgan of Georgia, Wen," prompted Borton, whose memory for names and newspaper features was better than mine.

"WELL," I laughed, "I didn't write it, so he can't blame me."

"Better trot along," urged Borton, "he may want to give you a railroad or two. You might hint to him," he added mischievously, "that, while not financially embarrassed, we might use a little additional capital in our business."

"I'm with you, Mr.—" I hesitated.

"I'm Mr. Kincaid's secretary, Hargreave," the young man prompted.

A few minutes later we were whirling down Peachtree street toward the business section in the banker's automobile.

"What does he want?" I inquired as we slowed down at a crossing.

"I cannot say. He told me to find you, and, asking your pardon, it was a task. I had begun to fear you had already left the city."

Arriving at the bank entrance, I was escorted through the big marble-lined banking room into the mahogany-furnished office, detained there a few moments, then ushered into the private office of the president, reflecting as I entered that I had never before in all my newspaper experience made such good time in reaching a bank official. A small man, wearing handsome but much wrinkled black clothes sat at the big flat-topped desk. He looked up as I entered.

"Lindsay?" he inquired with rising inflection.

"Mr. Lindsay," I corrected stiffly.

"Humph! Sit down."

He finished signing some papers, shoved his chair back and, sliding low in it, held the tips of his fingers together, and asked:

"Newspaper man?"

"Yes."

"Out of work?"

"Yes."

"Want a job?"

"Yes."

"You the man who climbed seven stories up a fire escape, broke a window, and beat the police to the scene of that Stanage murder in New York?"

"Yes," I replied, astonished. "That was years ago, when I was a cub. How did you know?"

"Been looking you up for three days," He jerked out. "Able to keep your mouth shut?"

"'Never betray a confidence' is the first law of the newspaper man."

"Get where?" I exploded, firing a shoe on the floor instead of at his grinning face as I was tempted to do.

"Don't like newspaper men," he snapped.

"I don't like bankers either," I shot back at him.

"Neither of us much to blame," he chuckled, not in the least offended. For the first time I began to warm toward him. He sat silent, drumming on his blotter pad with a pencil, evidently thinking quickly.

"LINDSAY," he said finally with a quick gesture of a man accustomed to deciding weighty matters, "I'm going to hire you. The matter is important. I've had you looked up. You seem all right. The main thing is to keep your mouth shut. It's a case I don't dare trust to a detective agency. There might be a leak and we can't afford that. I don't like reporters but, damme, I respect them. I'm going to trust you entirely in this matter."

He lapsed into silence and appeared to be thinking of the best way to begin

"You'll need help," he went on after a moment's thought. "Pick your own man, one you can trust. Don't spare any expense. Send to me for all the money you need and account for it afterwards; but remember one thing, don't come near me or let anyone know you are employed by me. If you do, I'll deny knowing you."

"I can settle the matter of help now," I responded, ignoring his insinuation. "Dick Borton, my chum, is with me. We are both out of work due to the suspension of our paper, and were getting ready to leave for New York when your messenger came. Barton's the man."

"Can you trust him?"

"Better than I can myself. You may depend on him. He's the best reporter in New York . . ."

"Can he keep his mouth shut?" he snapped, cutting short my praise of my chum.

"Yes."

"Get him," he ordered tersely. Then, after a moment of silence, he continued, "Lindsay, this is a big job. It may mean the fate of a couple of railroads and some small corporations. It may mean a heavy blow to this bank. I don't mind those things; but it means the fortune of a girl who is to me as a daughter. You appreciate the importance of the work I am trusting to you."

"I APPRECIATE it. I will do my best, and I promise the same for Borton," I answered, greatly impressed by the sudden flash of human feeling on the part of that flinty, hard appearing little man.

"Then," he said, "it is agreed."

"What is the work, sir?"

For an instant Mr. Kincaid made no response to my inquiry. He sat drumming with his pencil and looking toward the window absorbed in deep thought. Suddenly he turned to me and replied:

"I want you to find Major Lucien Gaskill."

CHAPTER II

Major Gaskill's Gout

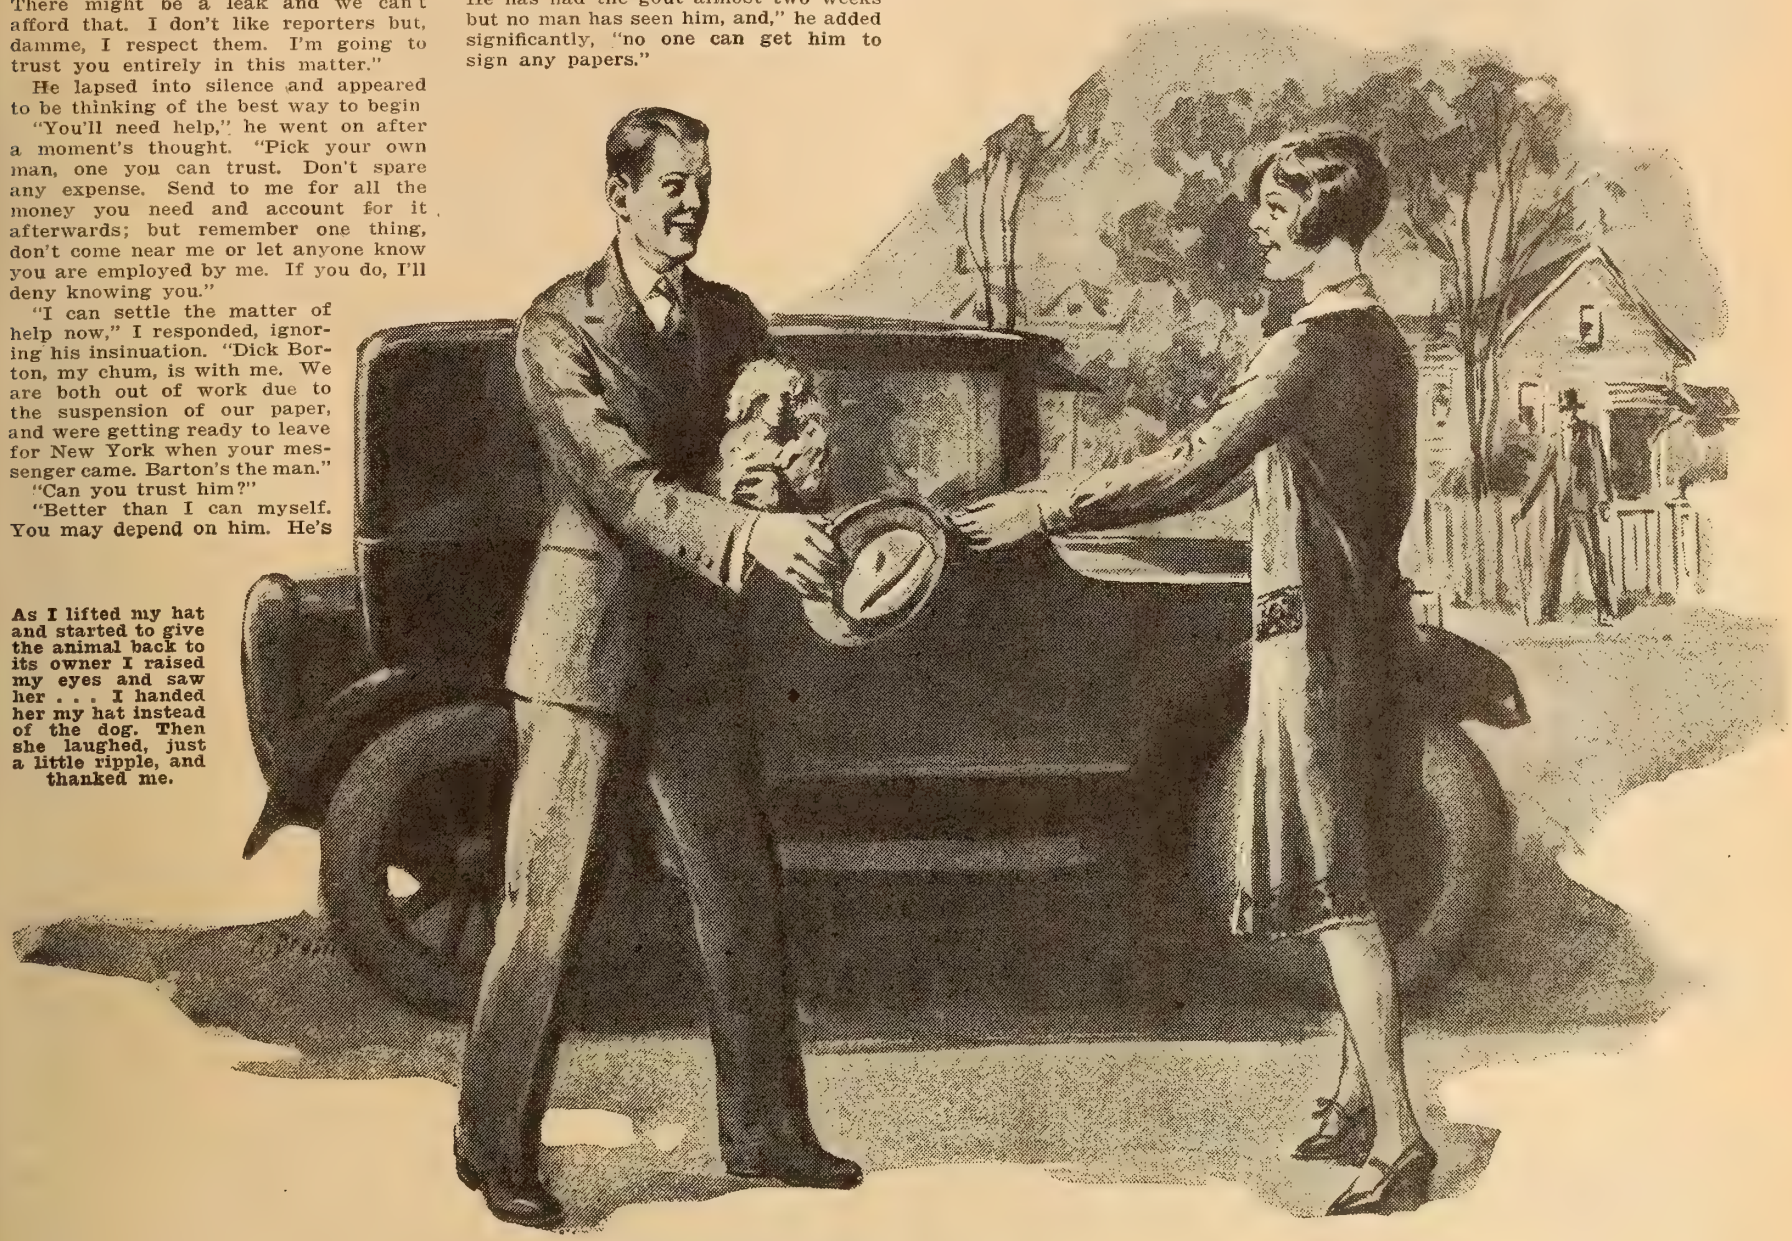
I LAUGHED.

"Why don't you call him by phone yourself?" I asked.

Mr. Kincaid frowned, but did not appear surprised at my behavior. The idea of being employed and of hiring one of the cleverest newspaper men in the country to assist me in finding a man known almost to everyone in Atlanta, whose tall figure and bristling white mustache made him one of the easiest of men to recognize, who was a power in politics and a figure in finance, whose war record was a tradition, and whose mansion was a landmark, amused and rather vexed me. The serious frown on the face of the little banker and the incessant tapping of his pencil sobered me.

"Do you mean," I stammered, apologetically, "do you mean to say that Major Gaskill has disappeared?"

"Lindsay," responded the banker, leaning forward and lowering his voice, "I said this was serious. If you call up Major Gaskill's home, or go there, you will be informed that he is confined to his room by an attack of gout. He has had the gout almost two weeks but no man has seen him, and," he added significantly, "no one can get him to sign any papers."



As I lifted my hat and started to give the animal back to its owner I raised my eyes and saw her . . . I handed her my hat instead of the dog. Then she laughed, just a little ripple, and thanked me.

"He is hiding in his own home?" I suggested.

"He isn't there at all; hasn't been there," snapped Mr. Kincaid, plainly irritated. "There is a mystery back of this and I want it solved. There are papers waiting to be signed. There are stocks and bonds to be turned over to secure margins. If they are not signed and delivered, fortunes will be swept away. If Gaskill recovers from his gout, all is well; if not—" A gesture, eloquent with despair, completed the sentence. It was plain the banker was both worried and alarmed.

"This is not the first time. It is the fourth time the same thing has happened. Each time Gaskill has disappeared he has been in deep financial difficulties. To my knowledge he has been plunging in stocks for six years, perhaps more. He is not the rich man he is supposed to be, and back of all this mystery is the source of his income. Four years ago he became involved deeply. I felt it my duty to protect companies in which we were interested. I called on him to straighten out the accounts. The amount involved was something over $50,000. He was indignant, declared he would settle immediately. The next day he disappeared; attack of gout. Three weeks later he stamped into this room, settled all accounts, and redeemed the stocks we had taken as security."

The little man frowned worriedly, and tapped nervously on the blotter.

"I WILL not try to conceal the fact that I'm partly to blame," he continued after some time. "The man had great influence over me. He's magnetic. I was not warned by experience. I was so relieved to escape the first time that I permitted him to involve the companies deeper than ever. I was criminally negligent in allowing him to use the funds of his ward, Miss Roberta Lee Tonneson. He and I are the trustees. He was in deep before I knew it and I protected the estate with my own money.

"Two years ago he smashed again. The amount was nearly $100,000. He plunged and it was gone before I woke up. I called on him to settle. He had another attack of gout; nearly a month that time. Then he came in and settled. I decided to watch him. He wasn't gambling so far as I could discover. A year ago he plunged again, deeper than either of the other times. He owed the bank and the estate over $100,000 this time. He got it so quickly I couldn't stop him. I protected his margins, escaping with as light a loss as possible. I pushed him to explain and settle. Another attack of gout; three weeks. Then he paid again in full.

"You'd think I would have been warned. I'm not a careless man but Major Gaskill had me hypnotized. I thought he'd reformed. About a month ago he dived again. I had no hint of it until he had involved the companies and the Tonneson estate almost a quarter of a million. Market turned against him Wiped out in two days on some of the stocks. I'm margining a lot of others to save what I can. I sent for Gaskill. He promised restitution at once. Another attack of gout. That was two weeks ago yesterday. I can't find a trace of him. The matter is pressing. I am carrying a lot of his crazy speculations trying to protect his ward. If he could be found to sign releases and close out, the loss would be covered by $60,000. I'd pay it to get out. He has pledged bonds of the Tonneson estate and I have to hang on to recover them. If he isn't found—" Again the half-despairing, eloquent gesture completed the sentence.

"You understand what it means to me?" he demanded sharply after a short silence; "I'll tell you. I never speculate, either with my own or the bank's funds; but I've done things to protect the Tonneson estate that I would never do to save myself."

He leaned forward over the table and almost glared at me as he said:

"If the crash comes, Lindsay, I'll be the thief and Gaskill the martyr. His reputation and standing are unassailable. He is the most popular man in Atlanta. No one loves a banker. You see how it stands. Are you ready to try it?"

THERE was an almost pathetic appeal in his last words and the feeling of aversion which at first I had felt passed away as I caught a glimpse of the human soul of the banker hidden under the veneer of hardness that constant association with money had laid upon him. I rose and extended my hand.

"I'm with you. You may count on me and my partner, Borton, to do our best."

"Thank you," he said, again dropping the mask of hardness. "You newspaper fellows are odd, quixotic. I trust you even if I don't like you."

"Possibly you can give some facts that will help me to start," I suggested. "Has Major Gaskill any private source of income which he could realize upon quickly?"

"None," the little banker replied thoughtfully. "There are three sawmills in the South belonging to the Tonneson estate. There are shares of the Timber Belt railroad. Stock never paid. He put that up as collateral. He owns the old Gaskill place in Lowndes county, Alabama. Run down and leased to colored tenants. He hasn't sold the Tonneson mills and timber lands. He hasn't sold the Gaskill plantation. He couldn't realize ten thousand on the rest. He spends about $15,000 a year on his living. His income, as far as I can learn, is less than $2,000. He draws about $4,000 a year, charged to Miss Tonneson's living and dress expenses."

"Where then can he raise fifty to a hundred thousand dollars in a few weeks?"

MR. KINCAID frowned and appeared worried. "Lindsay," he answered, "I've puzzled over it for weeks. Thought he was borrowing; he hasn't even tried it. Credit is good. Never has asked favors of his friends. Unless he has a gold mine hidden or is robbing trains I don't see where he has any source. The last time he settled I traced the money. Didn't press it hard. Afraid to rouse curiosity and suspicion. He deposited in four New York banks. Four different brokers made the deposits for him. He checked against them. The money deposited in New York was in checks paid to Gaskill by A. King, chiefly. Half a dozen other

(Continued on page 16)

Hark! The Voice of St. Louis!

RADIO Station KMOX Called One of Five Leading Broadcasters of America. Represents Sixteen Large Business Houses and Speaks for Wide Area Known as "Forty-ninth State."

By HAROLD P. BROWN

IN MAKING a trip through Missouri not long ago I called on Mr. Joseph McAuliff, managing editor of the Globe-Democrat and he pointed out to me the wonderful future of this "Forty-ninth State," served by the Voice of St. Louis. Uncle Sam has, within the past few years, completed many miles of levees that have reclaimed hundreds of thousands of acres from the Mississippi overflow. I stopped at Cape Girardeau and Carruthersville, and saw prodigious crops from cotton and peanuts to corn and potatoes, all producing great wealth that finds its way to the metropolis.

Some of these are the thoughts that come to mind when the DX listener tunes in KMOX, the Voice of St. Louis.

The station still is young although it is rather an old story now how Tom Convey, the managing director, brought it into being. He had a conviction that there should be a truly representative Radio broadcasting station with the sinews and blood of the thriving city in its composite. To speak with the Voice of St. Louis it must have the authority of those who do speak with the voice of St. Louis. He went about visiting the large business concerns and hammered this truth home to the big manufacturers and bankers.

He convinced them that he was right and welded sixteen of these firms into a unit to finance the institution in a way that they would not be ashamed to hear its voice on the air, speaking as the voice of the city. The enthusiasm, once the ball started rolling, was unbounded. It was hoped to have the station on the air in time to say "Merry Christmas," this last season.

Then came the old brick, that pernicious stumbling block over which many a hopeful young Radio station has stubbed its baby toe. There was no wave length. But Tom Convey had put in too many heart-breaking hours surmounting other difficulties to be overwhelmed at this obstacle. He found a powerful ally in Collin B. Kennedy, head of the Collin B. Kennedy Radio corporation of St. Louis. Together they journeyed down to Washington and stormed the ramparts of the secretary of commerce. Just what was said or done I do not know, only this, that they came marching home again victorious with a sure 'nuff wave length buckled up in their luggage and St. Louis got its voice.

The intended Christmas present to the people of St. Louis of a voice on the air was a trifle belated but none the less welcome when it did sing forth with a clarion call from the studio on the Hotel Mayfair.

(*Continued on page 21*)

Rosita Forbes (above) relating some of her experiences through the KMOX microphone. She is an explorer and African lion hunter. Mrs. Frank Howard (right) mezzo-soprano, and Mrs. Mildred L. Kincaid (in circle), contralto. Both are regular entertainers who help vocalize St. Louis.

AS THE uses of Radio grow and expand, our interests grow and expand with them. We no longer are satisfied with the passing song and the chatter of the hour. There is a powerful fascination in bringing in the distant stations. They stir our thoughts. We like to imagine ourselves in the places where the voices originate. We dream of the city and wonder about it and the environment of the peoples who live there.

This is a healthy couriosity. We are learning something. Our ears are open to the voices of these citizens. We enjoy the pride they feel in their communities and of the fine things their cities have done. It seems like unrealities becoming real. We always knew they were there, even if we had not traveled, and now we are almost like being there ourselves, right in the presence of the people who are broadcasting in the studio—and it isn't so far away after all.

Many people who never have seen the Mississippi river have heard the Voice of St. Louis, which is the Radio Station KMOX. To the people of the South it is a voice from the North, and from the North it is the voice of the South. This is equally true from the East and the West. But especially is it the voice of that vast area described by the St. Louis Globe-Democrat as the "Forty-ninth State." The Globe-Democrat is affiliated with the KMOX station. The territory defined as the "Forty-ninth State" is embraced in a circular boundary drawn at a radius of about 150 miles from St. Louis.

Below are the famous Kimmel Kiddies who represent the children's Voice of St. Louis. The youngest is four and the oldest fifteen. They all sing collectively and individually. Some of them play musical instruments.

"Yes," returned Peleg Turner slowly. "I know that. But she did not commit that murder. I did it myself!"

CHAPTER SEVENTEEN

The Man in the Gray Coat

OPERATIVE Mitchell seemed little the worse for a two-hour incarceration in the cupboard. He was weakened a ltle and perspiring generously. But as he got up, shaky-kneed, from the floor and supported himself against the end of the table, his eyes appraised his surroundings with professional thoroughness.

"How did you get in there?" inquired Everett when the man had loosened his collar and slipped out of his heavy overcoat.

"Had to hide, Mr. Everett," Mitchell replied. "I ran into a storm on Pelican bay and so I didn't get over here as soon as I had expected. I got in through the front door—Carton told me how the trick latch worked—and I thought I'd have a clear field for investigation before they moved the party into this room. But they came in on me unexpectedly and I dived into the cupboard. The next thing I knew the door was locked and I was in a box. I didn't have room even to get out of my overcoat. All I could do was lift my feet up and down and tap out SOS."

"Did you hear all that went on in this room tonight?"

"I heard plenty of shrieking and screaming and cursing, if that's what you mean. Once I heard a pistol shot. But for a ring-side seat, my place at the party wasn't very good. I couldn't catch the plot of the piece at all. After I'd been sweated there for an hour or so I kind of lost interest anyway. If I hadn't been locked in I'd have quit the spirit tapping business and tried to kick out the panel. As it was I didn't know what might happen to me so I concluded I'd better stick tight for the finish."

During all his recital Mary Williams flushed a little and cast down her eyes. Attention taken from her as the detective was speaking came back to her suddenly as he finished.

"And you locked him in, young woman," Everett commented. "And just why did you do that?"

"I suppose it was impulse," the girl answered readily. "Just before dinner time I was standing near the cupboard and I saw the door open just a crack and close again. I caught just a fleeting glimpse of a gray overcoat and I remembered what Henry Millis, the caretaker, had said to Hari Singh about the man in the gray coat who came from the sea. It seemed to me that any man who had reason for hiding in a cupboard in this house had reason to stay there. So I slipped up and turned the key."

"YOU realize, of course, that you have wittingly or unwittingly obstructed a federal officer in the discharge of his duty?"

"I can't see that I have. If his duty was to hide himself in a cupboard I have helped him by insuring that he stayed right on the job."

"This is nothing to joke about, Miss Williams. You may have had the best of reasons for locking the cupboard door. But the circumstances are certainly suspicious. If you thought that this man had no right to be in this room why did you not tell Mr. Ardwyn of what you had done?"

"Some woman was working with these scoundrels all night," declared Aunt Helen Holmes with the air of a star witness. "If you should happen to ask me, all that row about her keepin' Henry Graves from gettin' out of this room has the look of a fallin' out among birds of a feather."

"You may have a chance to give your evidence a little later," stated Everett, with cold politeness. "I have asked Miss Williams a question."

"Well," said Mary Williams, "I'll tell you the truth. I didn't trust anybody in this house and that included Frederick Ardwyn. I thought his seance was going to be an elaborate hippodrome to cover up something. And so at first I decided to play my own hand alone. Later when I began to have some confidence in Mr. Ardwyn he had lost confidence in me . . . and so. . . Well, I just played the hand out."

"Well, lady," observed Mitchell, "another half hour and I'd have played my hand out, too. Next time you get set on childish pranks, lock me in a telephone booth where it's roomy and pleasant. . . But tell me, where do you fit in this picture, anyway?"

"I am Mary Williams, distantly related to the Turners, and a guest in this house."

"It seems to me I've heard your voice oftener here tonight than anybody else's." Mitchell's air of levity had dropped from him and he was manifestly suspicious. "I agree with Mrs. Holmes that some woman was active—too active—in this room whenever these crooks started to work. I heard Ardwyn swear that a woman chewed his wrist just about the time somebody got away with the evidence that somebody else had just brought back from the broadcasting station where the fight occurred.

"There were two other women in the room at the time—even admitting for the sake of argument that Mr. Ardwyn might not have made a mistake in the dark.

"IT'S been my hunch since I got into this case that there would be a skirt in it somewhere. . . Generally is in hop cases. . . And I'll say without trying to get any prizes for telling what's wrong with this picture that for a distant relative and guest in a home you sure took a lot on yourself tonight."

"What do you mean?"

"Well, of course, as I say, I was cooped up in the cupboard and I couldn't see much. But I could hear a lot and it occurs to me that when anything was going on you were always looking for the double barreled alibi."

"Just what I said from the very first," broke in Aunt Helen Holmes approvingly. "My husband, dead and gone these twenty years, always said that explanations was the weakness of the guilty."

"I have called your attention to the fact that there were two other women in this room," Mary Williams reminded the detective without paying any attention to the innuendo of Aunt Helen. "We may exclude Aunt Helen, who is the picture of righteousness. But before I am turned over to the inquisition I should like to suggest that you give a thought to the third lady—Miss Stanton. How she obtained an invitation to this seance I do not know. But I do know that she has no right to be here as a member of the family. I have seen her in Portsmouth. I have followed her here under suspicious circumstances, and I should think her story might be interesting."

Everett grinned.

"Miss Stanton," he said, "You have heard Miss Williams' accusation — or should I say implication? What have you to say about it?"

"I can say nothing that you do not know already, Mr. Everett," the red-haired girl replied. "But Miss Williams makes it plain that there are some things which should be said just to clear up the situation and save her from useless worry. Miss Williams, I shall admit that I am not a relative of the Turners—and I have every reason to thank heaven for it. I shall admit that I came here tonight under false pretenses, and further that I gained experiences that I had not bargained for.

"I am Hazel Stanton of the federal department of justice and I demand the arrest of Miss Mary Williams for the murder of Jeremiah Turner!"

CHAPTER EIGHTEEN

Back from the Grave

FOR a time there was silence. Mary Williams' face went white and she passed a drooping hand across her eyes. It seemed that she was going to faint and Ardwyn, Capt. Cass and Tolliver rushed forward to support her. But her weakness was only momentary. As if with great effort of will, she controlled herself and faced her accuser.

"I wish I had known of this before," she said. "But of course I had no hint—no warning."

"You flatter me, Miss Williams," Hazel Stanton told her. "I had not hoped that any little work would survive your critical eye."

"You have been charming at it, Miss Stanton," Mary Williams answered. "In every detail of poise, intelligence, and social comportment—the perfect policeman."

If Hazel Stanton caught a hint of irony in the compliment she gave no sign.

"Of course it didn't take so much intelligence to follow you through this," she said. "You are a pretty shrewd girl but you lack technique. . . And now, most probably, you'll never get a chance to acquire one. . . You left a wide trail."

"It grieves me to hear you say so."

"Oh don't be downhearted. Even the best of them slip up occasionally and I must say that your plan to put a smoke screen around me had the real professional touch. The only trouble with it, dearie, was that you should have tried to pin the crime on a detective. To get over your accusation against me you had to admit that you were in this neighborhood on the night of the murder. And that clinched the case."

"You are wonderful," breathed Mary Williams. "Thank heaven for trial by jury."

"And so it's all over and we can go home now," murmured Aunt Helen Holmes. "My poor dear husband, dead and gone these twenty years, always used to say that murder would out. He said it just that way. He said: 'Mark what I tell you, Nellie, murder will out.' And I for one am certainly glad that all these mysteries and shocks are over. . ."

She interrupted her dissertation with a sudden shriek and fell back all atremble into the arms of Tolliver.

"WHAT'S the row?" demanded Everett a bit unnerved.

"The dead man," screamed Aunt Helen. "Peleg Turner. . . Look at him. . . He's opening his eyes."

"She's right," declared Captain Cass. "The corpse's eyes are opening."

"Well I'll be doggoned," commented Tolliver.

"His hand moved," reported Everett, who had leaned over the crumpled body. . . . "And his heart is beating. . . He's not dead at all."

A hollow, spine-chilling groan came from the blue lips of Peleg Turner and then slowly the "dead" man sat up.

"You're not dead?" inquired Aunt Helen as if Peleg's disregard for the great convention of death was something that might never be forgiven. "You're not really dead?"

"No, Helen," replied Peleg, with another groan. "I'm not dead, although I feel as if I had been pretty close to it."

Everett assisted him to a chair.

"You understand, Mr. Turner, that these strangers here are federal officers," he said. "I think it is obvious that there should be some explanation of all this."

"I shall be glad to explain, sir," returned old Peleg with dignity. "It was to find some explanation that I played dead. It was for the same reason that I took a chance and came back to the house tonight."

"You didn't bring your brother Jeremiah with you, did you?" asked Everett.

"Jeremiah Turner is dead," said the old sea captain quietly. "I doubt the good taste in joking about it."

"Every man to his own idea," countered Everett. "Others of us might criticize the taste shown in a hoax that put twelve men and women in a night of terror and caused officers of the law to risk their lives on sea and on land."

"I SHALL apologize for the hoax while explaining it. As for the fright my guests have received in my house, most of it was unforeseen. Before I went away I wrote and mailed to Frederick Ardwyn the memorandum which he read

TIME MAY BE SAVED IF WORK IS PLANNED

MANY WOMEN ARE TIED TO THEIR WORK TOO MUCH

Betty Crocker Gives Secrets of Making Housework a Pleasure—Organization Means Success

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

HOW often we hear a woman say, "I should like to serve on that committee, or take that course in child study, or read certain books, but I simply can't." Many women seem to find themselves tied down to the details of housekeeping to such an extent that they cannot find time for other interests.

It is unnecessary for me to dwell upon the disadvantages of keeping house all day, every day. The woman who is merely a housekeeper and not a homemaker in the biggest sense of the word is not doing her duty to her family.

Three meals a day and the everlasting dishes occupy entirely too large a proportion of the day in some homes. Perhaps I can give you a few suggestions for shortening that time.

Have you ever studied the arrangement of your kitchen to discover whether or not the stove, table, cupboard, and sink are in the best possible location? A pretty white kitchen with all the utensils carefully put away out of sight is indeed a nice looking room, but it is not my idea of a workshop.

Why not have the utensile you use most often within reach?

Brushes, knives, spoons, egg beaters, etc., should hang so close to your table or cabinet that you can reach them without taking an extra step. If you must walk across the room and open a drawer every time you want a knife or cup or spoon, no wonder it takes all day to prepare the meals.

Very often it is possible to save time by cooking enough of a certain food for two meals at once. However, this is not a good method unless you have the meals planned in advance. If all the meals for a week are planned together you can save both time and money and also have more variety in your diet. For example, it is easy to cook carrots for two meals if you know that you can use the left overs tomorrow or the day after.

In fact, I often cook an extra amount of several vegetables, and then at the end of two or three days have a vegetable dinner of the left overs. Naturally, the amount cooked in advance varies with the time of the year. In hot weather, such a plan would not be possible.

Preparing Stock Foods Ahead

I like to make salad dressing, grind bread crumbs, and do all such odd jobs on one particular morning during the week, usually on baking day. If these things are ready it saves many minutes during the preparation of a meal.

(Continued on page 17)

WOMAN ANNOUNCES FEATURES AT WTIC

Miss Beatrice Bangs, above, has introduced the various women's features of the Monday and Friday programs at Station WTIC, Hartford, Conn.

WGN Offers Women Advice On Making Homes Beautiful

CHICAGO.—For a period of nearly two years; women listeners of WGN have come to Walter Murray for his advice on interior decoration and home furnishing. Mr. Murray, who is the decorative adviser to a well-known Chicago furniture house, has furnished information to thousands of listeners who come to him for advice in planning the interior of their home. He is heard each Wednesday and Friday morning, between 11 and 11:30 a. m., during WGN's Home Management period.

Cooking Recipes Broadcast Every Thursday Afternoon

CINCINNATI.—Mrs. Judith Anderson, popular culinary expert, broadcasts cooking recipes every Wednesday afternoon at three-thirty, through the Crosley WLW station. This feature is through the courtesy of the B. H. Kroger Grocery & Baking company.

SHORT WAVES

By Marcella

Helen and Margaret of St. Louis want to know what records Correll and Gosden, the "Radio Maniacs" of WLIB and WGN, have made, if any. Yes, they have just recently been recorded by Victor. The release is just out. On one side is, "Let's Talk About My Sweetie," and on the other, "All I Want Is You." As you have asked, Helen and Margaret, I have "did" my "darndest." You're welcome.

* *

My, my, how people will ask about this "Sam 'n' Henry" team, also from the aforementioned stations. "Are they honest-to-goodness negroes?" "Do you know them?" "Have you ever seen them?" "Who are they?" Replying to the curious, I will answer the questions in the order given: (1) Maybe yes, maybe no; (2) Yes, personally; (3) Yes sir and ma'am; (4) Who wants to know? And besides I have promised Quin Ryan not to tell a soul. Like the solution of "A Step On the Stairs," it must remain a mystery for the present. But here's a tip—both wear neckies and shoes.

* *

Mrs. E. A., you have probably read about the "Sunflower Girl" of WBAP in the April 10 issue of this publication. If not, you certainly want to do so. For the time being she is on a vacation at her home in Kansas City, but I don't believe she is on the air there. You will hear her soon again at WBAP, with the Hired Hand, her "uncle," announcing. I understand she is to return there ere spring is over. So you all down in Texas like Ford and Glenn, but can't here them well enough? I'll have to drop them a hint to get closer to "mike."

* *

All right Pearl, V. M. and L. B., Jack Todd, your favorite tenor, who sings for KMA, the May Seed and Nursery company station at Shenandoah, Ia., is "just a young fellow," single and very fond of the ladies. Has blue eyes, brown hair, stands

WOMEN'S PROGRAMS INDEX

Saturday April 24

Eastern	Central	Mountain	Pacific
9:30 a. m.	8:30 a. m.	7:30 a. m.	6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.

11	10	9	8

WEAO (293.9m-1020kc) Housekeepers' half hour.
WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.

12 n	11	10	9

WGN (302.8m-990kc), Household hints.
WQJ (447.5m-670kc), Home Economics program; "Cold Meat Salads," E. Ransom.

12:30 p. m.	11:30	10:30	9:30

WGN (302.8m-990kc), Discussion of fashions.

12:35	11:35	10:35	9:35

KYW (535.4m-560kc), Table talk.

1	12 n.	11	10

KGW (491.5m-610kc), Household helps, shopping guide.
KMA (252m-1190kc), Domestic science topics.

1:20	12:20 p.m.	11:20	10:20

WGBF (236.1m-1270kc), Garden talk.

5	4	3 p. m.	2 p. m.

KMOX (280.2m-1190kc), Housewives' hour.

Monday, April 26

Eastern	Central	Mountain	Pacific
9:30 a. m.	8:30 a. m.	7:30 a. m.	6:30 a. m.

WWJ (352.7m-850kc), Tonight's dinner.

9:45	8:45	7:45	6:45

WTAG (268m-1120kc), Marjorie Woodman, nurse.

10	9	8	7

WHT (399.8m-750kc) Women's club, Jean Sargent.

10:45	9:45	8:45	7:45

WCCO (416.4m-720kc), "How Shall We Announce the Engagement?" Betty Crocker. WDAF (365.6m-880kc), WHT (399.8m-750kc), WJAR (305.9m-980kc), Home service talk, Betty Crocker.

10:50	9:50	8:50	7:50

WMC (499.7m-600kc), Home economics discussion, Miss Kitty.

11	10	9	8

WEAO (293.9m-1020kc), Housekeepers' half hour.
WEAR (389.4m-770kc), Home service talk.
WGN (302.8m-990kc), Household hints.
WQJ (447.5m-670kc), Home economics program. "Tropical Plants that Yield Medicine," Maud Jacobs. "The Psychology of Children," Donald Abel.
WSWS (275.8m-1090kc), Style shop.

11:30	10:30	9:30	8:30

WEBH (370.2m-810kc), Fashion and household talks.
WTJC (475.9m-630kc), Housewife's forum.

11:35	10:35	9:35	8:35

KYW (535.4m-560kc), Table talk.

1 p. m	12 n.	11	10

WSOE (245.8m-1220kc), Ladies' hour.

1:20	12:20 p. m.	11:20	10:20

WGBF (236.1m-1270kc), Garden talk.

2:30	1:30	12:30 p. m.	11:30

KFNF (263m-1140kc), Mothers' hour.
WGY (379.5m-790kc), Cooking lesson, Jessie Lane.

High Lights of the Air

OLD NEWSPAPERS and interviews with old-time fight fans furnish Quin Ryan of WGN, Chicago, with the material for the famous prize fights he is reviving Saturday nights. This Saturday he will describe the Corbett-Fitzsimmons clash as though it were happening and blow by blow coming to him over the telephone.

The Sweethearts of the Air, the MacDowell Sisters are appearing at WFAA Sunday night with their usual popular repertoire of Hawaiian music. The Arkansas Traveler special train will be ready for passengers this same night at KTHS.

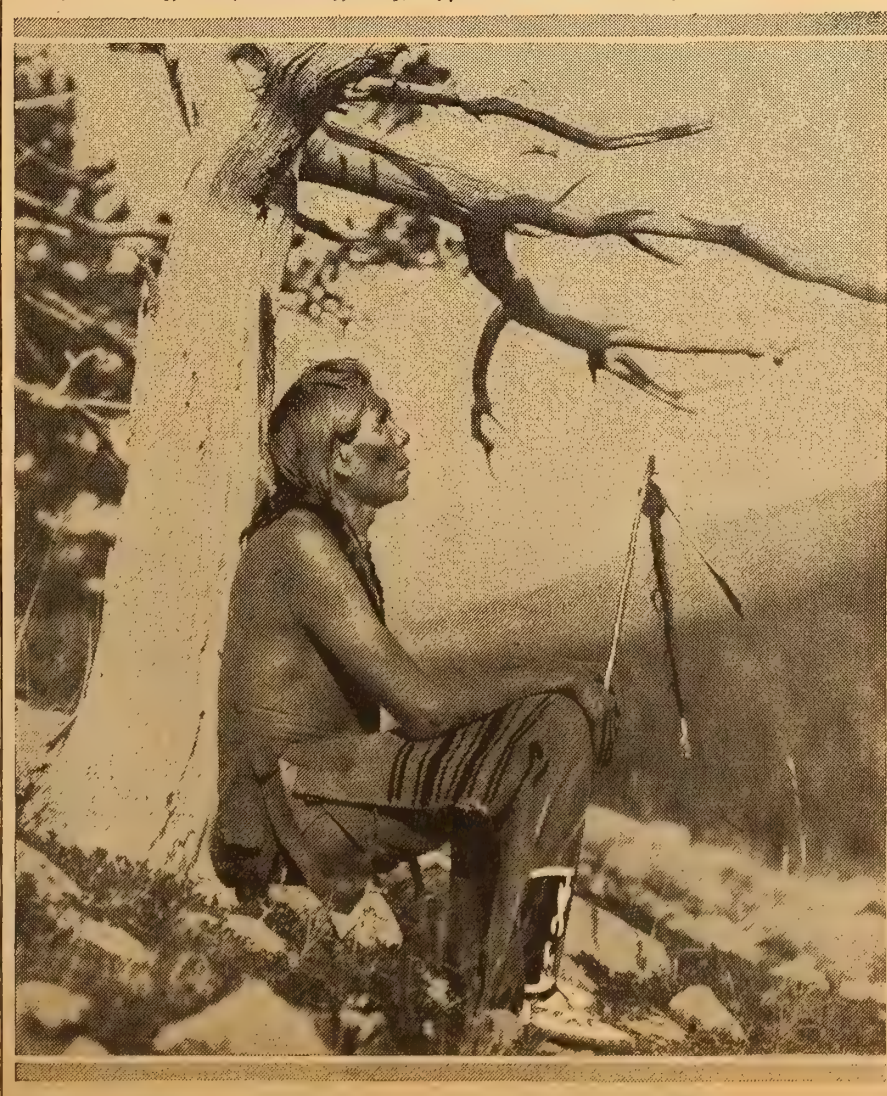
A Chicago songster who was well liked in her home city has migrated to KPRC, Houston, Tex. Ruth Patterson, soprano, will be the feature of the Monday program of this station.

"The Casino Gardens" whose action takes place against the background of jazz music and whose characters are members of an orchestra is the dramatic feature Tuesday of WGBS, New York. Kenyon Nicholson is the author of the piece and also the principal actor. The Radio world will hear three famous instruments this same evening over the microphone of WIP, when the Schmidt quartet members of the Philadelphia orchestra play. The first violin and the violoncello heard were made by the famous Stradivarius and are valued at something like $50,000. The viola was made in 1650, and is valued at $8,000.

An hour of unusual music may be enjoyed by fans tuning in WSAI Wednesday night, when the Cincinnati Accordion club meets at this station. WLS, Chicago, will present a picture production, "The Story of Mozart." The musical history of this pathetic young composer will be given by the WLS trio.

Spanish war veterans are meeting at WCCO Thursday, to put on a program of music reminiscent of this war period. At WGY "A Night in the Country Store" with the Corn Huskers orchestra will amuse the fan.

An authoritative portrayal of the American Indian in story and song is the Friday feature of Denver music week which is being celebrated at KOA. This novel offering is being conducted by Harold A. Loring, and assisted by Chief Lone Eagle, below.



Chants of battle, love songs, hymns to the gods of rain and sunshine will be given by Chief Lone Eagle during an Indian program at KOA, Denver, Friday, April 30. He is shown above looking across the Rocky Mountains toward the land of the setting sun.

Sunday, April 25

"a Step On the Stairs"

Broadcast as a Play

EPISODE NINE—THE SETTING

THE scene continues in the high-beamed hunt-room. The state troopers, led by Chief Everett of the Portsmouth Narcotic squad, have broken in and taken charge of the situation. Henry Graves is made known in his double role of "Doggy" French, a notorious underworld character. Tolliver emerges from beneath the table with a packet of cocaine which he, when in a stupor, found where the strangers were digging in the hearth. Mary Williams is discovered to have been hidden up on the gun rack where she guarded the exits of the room. The prisoners are counted and inventoried with the result that the body of Peleg Turner is found in a recess of the wall of the room. John Carton explains the secret of the locked, but unlocked, awful front door. The SOS tapping is heard again and discovered to originate from a cupboard in the room. When unlocked, Tommy Mitchell, of the Portsmouth Narcotic squad, reels out, half smothered. Mary Williams admits she locked him in—and the ninth episode opens.

THE CAST

Tommy Mitchell.....Member of Portsmouth Narcotic Squad
Mr. Everett.....Chief of Portsmouth Narcotic Squad
Mary Williams.....A youthful guest
Aunt Helen Holmes.....Relative of Peleg Turner
Hazel Stanton.....A young lady
Maurice Tolliver.....A youth and relative
Captain Cass.....A state trooper
Peleg Turner.....A dead man resurrected

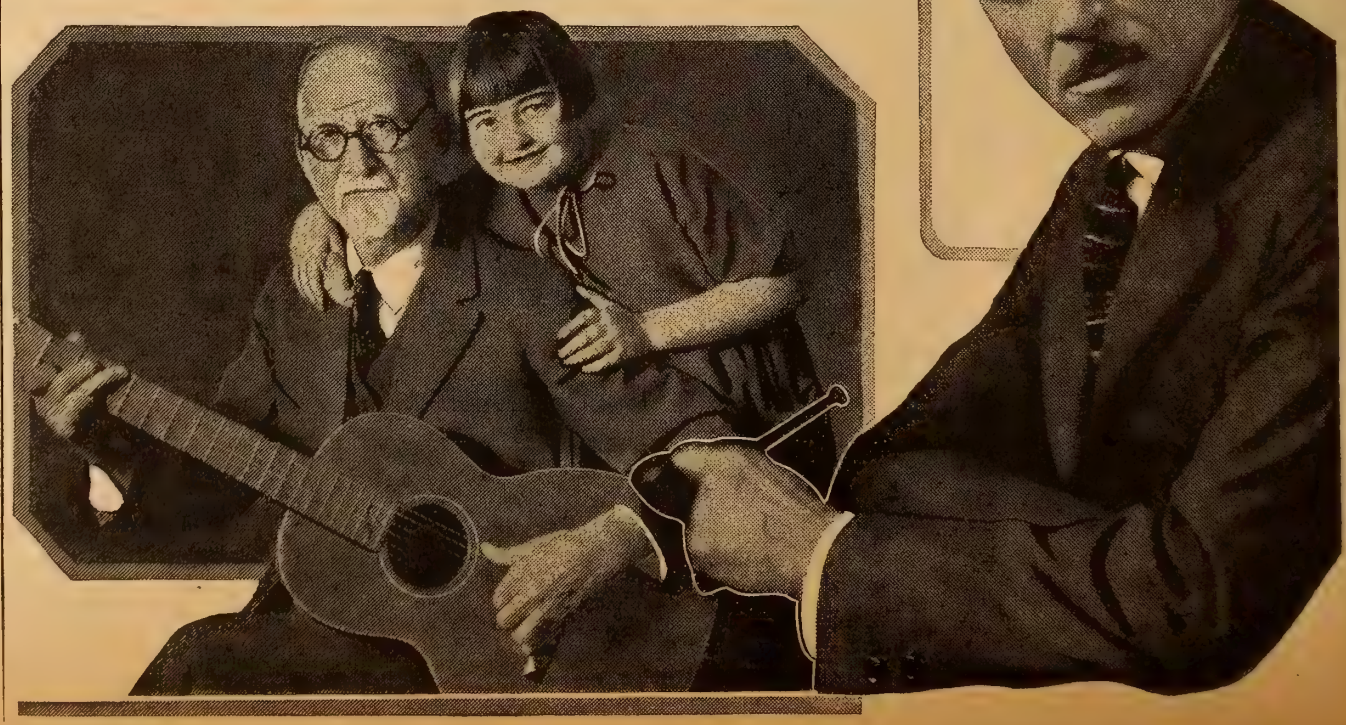
WOC, Davenport, Iowa (483.6m-620kc). Ninth episode at 10:30 p. m. Central time, Friday, April 23.

WOR, Newark, N. J. (405.2m-740kc). Ninth episode at 10:30 p. m. Eastern time, Saturday, April 24.

WRC, Washington, D. C. (468.5m-640kc). Eighth episode at 8:15 p. m. Eastern time, Friday, April 23. Ninth episode same time, April 30.

KTHS, Hot Springs National Park, Ark. (374.8m-800kc). Schedule to be announced over air.

Here is a peppy team popular with the audience of KMA, Shenandoah. J. P. Nye, only 78, assisted by his granddaughter, Mary F. Nye, plays ballads on his guitar. E. J. Reed, right, is shown here in the character of Frederick Ardwyn, attorney and close friend of the late Peleg Turner. Mr. Reed plays this role at KOA, Denver.



CHICAGO SONGSTER STAR OF KPRC

Leone Faust, left, is the leading lady of the players of WAMD, Minneapolis. She is shown here in the costume of Hagar. The group below sounds anything but nonchalant over the microphone of WTAM. The Dixie Banjo trio is one of the best known Cleveland organizations.

Sunday, April 25

First M. E. church; 9-10:30, Puget Sound Savings and Loan association orchestra.

KNX, Hollywood, Calif. (336.9m-890kc), 6:30-7 p. m., Unitarian church service; 8-9, service, First Presbyterian church of Hollywood; 9-10:30, classical program.

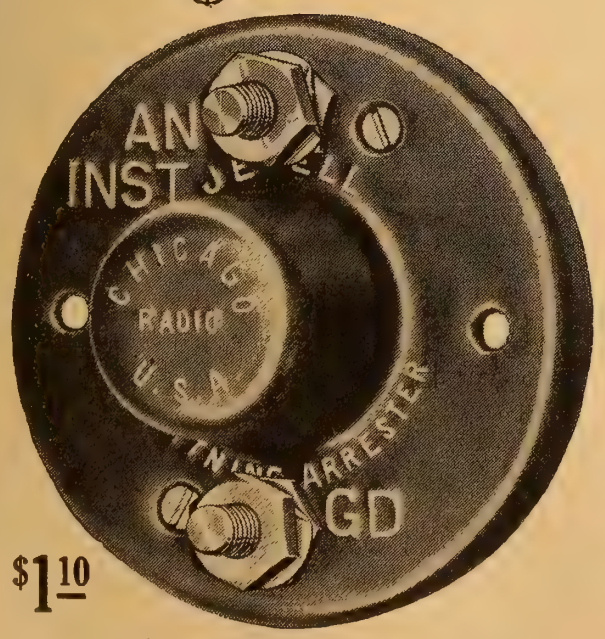
JEWELL



$1.10

Jewell Lightning Arrester

APPROVED
by UNDERWRITERS
for INDOOR and OUTDOOR INSTALLATIONS

Don't take any chances. Comply with National Board of Fire Underwriter's code which calls for installation of a lightning arrester with all outdoor antennas.

JEWELL ELECTRICAL INSTRUMENT CO.
1650 Walnut St., Chicago
"26 Years Making Good Instruments"

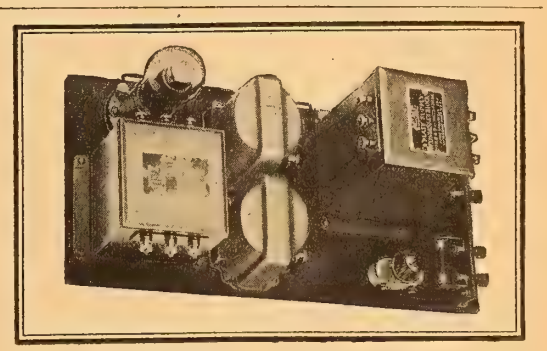
Contents of
Acme B-Eliminator Kit

Wiring Diagrams with complete instructions

Baseboard
1 Acme B-4—Transformer
2 Acme B-2—Henry Chokes
1 Acme Condenser Block
1 Bradleyohm
1 Raytheon Tube and Socket Wire

Price $39.50

Photo below of factory-made Acme B-Eliminator Type E-1—110 Volts, 60 cycle. Price $50.00



Acme B-Eliminator, assembled from kit

Price $50.00

You can easily make this Acme B-Eliminator yourself

The new Acme B-Eliminator Kit contains complete instructions and all the parts

GET one of the new Acme B-Eliminator Kits—take it home and lay out the full size diagrams on the table in front of you. It only takes a few minutes to fasten the parts to the baseboard and connect them up. All the parts are there and the baseboard, too, and easily-followed instructions that explain each step. It's as easy as rolling off a log. You fellows who have tinkered with radio will do it in less time than it would take to tell about it.

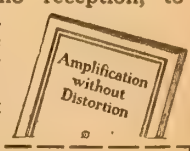
Then you'll have an Acme B-Eliminator and save the difference between the cost of the Kit and a factory-built Acme B-Eliminator.

Advantages of the Acme B-Eliminator

You get better quality and more distance, more volume, and NO HUM and NO DISTORTION. You can be sure of that. Also the Acme B-Eliminator maintains its voltage at all times and you get voltages up to 180 volts which prevents any chance of over-loading. It will supply sets using up to 10 tubes. You get a permanent unfailing "B" supply.

Send coupon for both booklet and circular

Send 10c for our booklet, "Amplification without Distortion," which will tell you some things about improving the quality of your radio reception, together with special free circular on the B-Eliminator Kit, or ask us to mail the free circular. Check the coupon.



ACME
~ for amplification

ACME APPARATUS CO.,
Dept. N-15, Cambridge, Mass.

$500 in Gold!!!

FOR THE SOLUTION OF

"A STEP ON THE STAIRS"

Send Your Conclusion Today

The Author's Solution Appears Next Issue

YOU have read the next to the last installment of "A Step On the Stairs." Now write the solution. Tie the mysterious threads together in a logical conclusion and send your work to the Mystery Story Editor. Prizes totaling $500 in gold await the best solutions.

You need not have writing experience to do this. Patience and imagination, aided by a careful reading of the past installments, are the important qualifications. Don't hesitate. Do it tonight. You may win a tidy sum which will help defray your summer vacation expenses.

THE PRIZES

The prizes are seventeen in number. First prize is $250; second prize is $100; third to seventeenth prizes inclusive, are $10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story have been published consecutively each issue. The first appeared in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unraveling the mystery accurately, will win. The method of preparing the solution—its neatness, legibility, etc.—shall be considered.

RULES OF CONTEST

1. Solutions must be received not later than midnight of Saturday, May 1. The ninth installment of the story appears in this issue. The author's intended and final chapter will appear next issue, and the announcement of the winners' names will be made in the May 15 issue of Radio Digest.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon one side of paper.

4. The decision of the judges will be final.

"A STEP ON THE STAIRS"

(Continued from page 7)

here tonight. As I said over the Radio, I hoped by collecting together the persons whom I suspected of having had a hand in the murder of my brother, I might produce a situation which would lead the killer to betray his hand. I had tapped the land line to Station FYX and hoped to get my message onto the air in the lull between the time when they turn on their power and the time when the Portsmouth studio concert begins. But in the woods I ran into Teufel coming up from the bay. I suppose he was on his way here to warn his fellow crooks that the federal government was about to make a raid and that he mistook me for one of the narcotic squad. I had to make a run for it through the station and Teufel took a shot or two at me. He wounded an engineer."

"You dropped a letter as you went out through the battery shed."

"Yes—what of it?"

"Why should anyone wish to steal that letter?"

"I don't know, I'm sure. There was nothing in it. Of course it was written by John Carton in his own handwriting and it is possible. . . I am merely making the suggestion. . . That someone might have taken it to shield John."

"How do we know there was nothing of importance in that letter?"

"I can vouch for that," said Mary Williams. "Here is the letter." And as she spoke she drew it from beneath her waist and gravely handed it to Everett. The federal investigator gave her a quick look but returned without comment to his questioning of Peleg Turner.

"What did you do after the shooting?" he inquired.

"I came here," Peleg answered. "I hoped to get through this room somehow into some other part of the house. Teufel had given me a flesh wound and it was bleeding too much for comfort. But the crowd had been too much stirred up. I had to go out suddenly and I left my shoes behind me. Then I stole in again when I was half frozen and ran into somebody in the dark. After that I went back to the place where I had tapped the telephone line of Station FYX and sent my message as I had planned to do."

"YOU realize, of course, that you have laid yourself open to grave suspicion of having been accessory to the crimes of the cocaine smugglers who made your house their headquarters?"

"Yes. I am free to confess that. Perhaps I have acted foolishly. But the circumstances were peculiar. When trouble came to my house I did not know which way to turn. As you know I have followed the sea. I was seldom in Pelican bay and that is why I turned over the house to my brother Jeremiah. I expected to be gone a long time—probably five years. . ."

"Why did you come back ahead of schedule?"

"Hari Singh got a message to me at Port Said. He had just come back to the service of the family after a long absence and he said that there were things going on around Pelican Bay that I ought to have a look at. So I came home."

"Whom do you suspect of having killed your brother?"

"I have no reason to suspect anyone."

"You probably were conscious enough to hear the accusations made against Mary Williams. You know that we have evidence—her own confession—that she was in or near this house on the night when the shot was fired. You know that she stands charged with murder?"

"Yes," returned Peleg Turner slowly. "I know that. But she did not commit that murder. I did it myself!"

But after all, DID Peleg commit the murder? He says so, yet he contradicts his former statement in which he gives his reasons for assembling the dozen people in his hunt room. Just why did Hari Singh call Peleg back from Port Said, and what does the Hindu know that we do not? Send in your solution by May 1.

"BIG RABBIT"

(Continued from page 5)

names on the paper. No one knows who the men were.

"Then Gaskill probably goes to New York when he disappears."

"I don't know. Might have been. Part was in checks against Atlanta, Charleston, Jacksonville, and Mobile banks. The only person we have been able to locate was Solomon Trimble. Previous to Gaskill's disappearance, Si Trimble, A. King, and Solomon Trimble appear—on paper. They also appear, as names, when he settles."

"I gather none of them has deposited in any Atlanta banks since Major Gaskill disappeared this time."

"No, but I know who, what and where Trimble is."

"Who is he?"

"You'll see him. He's the yellow buck nigger who guards Gaskill's house during his attacks of gout. He isn't there at any other times."

"You didn't connect Trimble with Major Gaskill previously?"

"No, not until we traced the securities."

"You think, then, Major Gaskill makes the deposits in the names of negroes or others to prevent tracing the funds?"

"Yes," snapped the little man rather sharply. "Now you know as much as I do. I'll explain why I chose you as the man to help me. Do you remember that two weeks ago last Tuesday you pulled a little white dog from under an automobile and returned it to a young woman?"

I stared at the little banker in astonishment. He must have observed the effect of his question, as he said "Humph" with much meaning.

DID I remember? From the moment I had mumbled a few incoherent words and handed the yipping little beast to its owner, the memory of the girl had obsessed me. I had been consciously or unconsciously looking for her in the shopping throngs every afternoon. I had found myself watching every automobile that passed, hoping to catch a glimpse of her. But how did Kincaid know?

I had been hurrying along the street when I heard a woman give a little scream. I saw the white puppy run in front of a slowly moving car. I jumped into the street, grabbed the ugly little beast, and stepped back to the sidewalk. As I lifted my hat and started to give the animal back to its owner, I raised my eyes and saw her. I stood staring at her. I am certain my lower jaw dropped. I handed her my hat instead of the dog. Then she laughed, just a little ripple, and thanked me. I managed to mumble some reply. I stood until she entered the waiting machine, then walked three blocks before I remembered to put on my hat. From that moment I had been dreaming of her both asleep and awake.

There isn't any use attempting to describe her. She was the daintiest, prettiest little piece of work in the world. She was gowned all in black, of some soft material that fitted her lithe, slender form closely. A small black toque surmounted the heavy mass of dark hair which framed the most exquisite face I ever had seen. Had I forgotten her?

"Humph!" repeated Mr. Kincaid, rousing me from my bewildered reverie. "Humph, I see you haven't forgotten."

"No, sir," I stammered, feeling my face flush under the close scrutiny of the banker. "I, ah, recall the incident."

"Humph!" repeated Kincaid more significantly as he watched my confusion. "Well, Lindsay, that was a lucky dog for us. It gave you the job, and it will give you some start in this case."

"How?" I inquired, astonished.

"THE dog belonged to Miss Tonneson, Major Gaskill's ward," he replied. My heart gave a great leap of hope. I knew who she was. I would see her again.

"She has been looking for you ever since," the little man continued, smiling grimly. "It will give you an excuse to get into the house and talk with her. I'm afraid she isn't permitted to leave the house or to communicate with anyone because of, we shall say, the Major's gout. I've tried to talk to her on the phone without success."

"But," I protested, "I can't go to the young lady and tell her I've come to be thanked for an act that didn't amount to anything anyhow."

"Young man," snorted Mr. Kincaid, leaning forward and shaking his finger at me, "this is no time to let foolish pride interfere. You're working for me. Also, you're working for that girl. Don't forget it may mean her fortune. You'll serve her best by doing what I say."

His voice had become harsh and stern, the voice of a man accustomed to dealing determinedly with men and matters.

"I'll go," I said hastily, and as I arose Mr. Kincaid smiled a little wryly.

"Don't let her turn your head," he ordered. "She's the worst little flirt in Atlanta. Don't let her make you forget what you're to do. Cash this as you go out. Don't make any reports of progress. The only report I want is that you've found him. Good day."

CHAPTER III

In the Mansion of Mystery

FIVE minutes later I was rushing up Peachtree street with a thousand dollars in bills of handy denominations stowed into four different pockets. I was eager to attack the maze of mystery which had been unfolded to me by Mr. Kincaid. I cooled down somewhat after astounding the shoppers for five blocks by my reckless career along the sidewalk. Realizing that I had been bumping my way through the throng, heedless of others, and leaving a wake of angry, spluttering people who resented my method of progress, I walked more sedately, trying to revolve and fix in my mind the incidents of the odd case, and to outline some plan of action. Determining first of all to consult Borton, I looked at my watch, and, finding it was a few minutes past three, I caught a car and hastened to our apartments. Borton had completed the packing of his trunk and was propped up in bed reading an agricultural department report on the boll weevil. Borton always was farming even at the corner of Forty-second street and Broadway. I tossed a package containing $500 to him.

"That's your share of the retainer," I remarked carelessly.

"Did you give him gas or merely shoot him?" inquired Dick as he counted the bills.

I laughed, and, sitting on the edge of the bed summarized the facts of the case as briefly as possible. Before I had talked two minutes, Borton had tossed the boll weevil report on the floor and was sitting up. His quiet nods of appreciation showed that he was deeply interested, and that he was rapidly assimilating the facts. It was not until I had completed the array of facts and he had shaken his mop of unmanageable hair back from his forehead, that he spoke.

"I'm in, Wen," he said soberly. "It looks bigger than I thought. Every angle of it makes it look worse. We oughtn't to lose a minute. You telephone the Major's house right away. Whoever answers the phone, you must say that you are the man who saved Miss Tonneson's pup and that you understand she desires to see you. Say you'll be up at four o'clock. She will not answer the phone herself but that is all the better."

"I feel like a mucker for doing it," I grumbled.

"Meantime," he went on, "I'm going to slope up that way and get a look at that darky. I have an idea I'll come to the back door about the time you get in the front."

I HAD seen Borton in pursuit of big newspaper stories. Once on the trail he is indefatigable. He started to unpack his trunk in great haste, throwing things over the room like a dog digging for a woodchuck. Finally he emerged from the tumbled mass of garments holding his day-off suit; so he called the disreputable clothing he wore on his infrequent holidays tramping in the country.

A voice, decidedly strong in negro accent, although the stilted words showed some education, responded to my call.

"May I speak to Miss Tonneson?" I inquired.

"Who is this addressing me?" asked the voice, loftily.

"I do not know that Miss Tonneson knows my name," I responded suavely, although stung by the insolence of the tone. "Tell her, please, that the man who was so fortunate as to rescue her dog has been informed she wishes to see him and will call at four o'clock if it is convenient to her."

"Miss Bob will see you," the man responded without even the pretense of consulting her wishes. "She has been desiring to mek yoh acquaintance."

"Although it was but a trivial thing I did, still I shall be delighted to receive the thanks of so charming a young lady," I answered, purposely burlesquing the rather florid style of some young Southerners. "Please inform her Mr. Wyeth will call," I added, taking the first name that flashed into my mind.

"I shall infohm her, Mr. Wyeth," the voice returned.

"And to whom am I indebted for this favor?" I inquired, again with purposely exaggerated politeness.

"Mr. Trimble, at yoh service," he responded, verifying my suspicions.

"Well and cleverly done, old man," laughed Borton as I hung up the receiver. "You ought to make your home down here. You hit our line of con talk exactly."

"It was that man Trimble talking," I responded, rather heatedly. "I found out this much: That he is fresh and about half educated. At times he speaks well and uses high sounding words, but he forgets and drops back into dialect. He's feeling his oats for some reason and it is evident that he is guarding Miss Tonneson. He didn't even ask her whether she'd see me or not."

"Now, Wennie," cautioned Borton with his most exasperating tone and grin, "don't fuss yourself up because there's a skirt in it. You stay here and doll up for just thirty minutes. I'm going to trot out and get a look at Trimble. I'll send a taxi here at ten minutes to four."

I CONFESS that I spent more time arraying myself for that call than I have in many years for any occasion. My wardrobe seemed ridiculously shabby. I appropriated Dick's best scarf and pin, and later he libelously claimed that I used his best shirt to polish my shoes. I would have taken his afternoon long clothes, relics of more prosperous days, but Dick's safety from invasion in that line of wardrobe lay in the fact that he is about five inches taller than I am and several inches broader.

At length I was satisfied. I transferred my newly acquired wealth to my pockets and fretted for ten minutes waiting for the taxi. I was as nervous and excited as a debutante at her introduction to society. The thought of seeing the girl whose face had mingled with my dreams and of talking with her upset me entirely. It was something of a relief to hear the motor whirring at the door and to find myself spinning up Peachtree toward the mansion of Major Gaskill.

The cab rolled up to the door of a pretentious brick and stone mansion set far back from the beautiful boulevard in a smooth, well-groomed lawn. As I ascended the flight of stone steps leading to the colonial porch, the wide front doors opened and I saw before me perhaps the most magnificent physical animal I had ever beheld. Even before he spoke I knew it was Trimble. He was six feet two or three inches tall, and his lithe movements reminded me of a black panther. He was

(Continued on page 20)

AN EVENING AT HOME WITH THE LISTENER IN
IN CENTRAL TIME

SHORT WAVES
By Marcella

(Continued from page 8)

5 feet, 3 inches tall, weighs 115 pounds, and is a cartoonist for the Chicago Pennant company during his spare time. His home is Shenandoah. Write him a letter, as he "would be glad to take up correspondence," and perhaps he'll draw you your pictures.

* *

E. Y. and Mrs. C. H. B., I regret to inform you that Mr. Friedlander, "The Voice of the Air," for the Northside Realty company broadcasting through Station WBBM, Chicago, is off the air. He jokingly asserted that State's Attorney Robert E. Crowe and Charles V. Barrett, of the Cook County board of review, were sitting in a cabaret from which he was announcing. Inasmuch as neither of these men was there, as was broadcast, but both are politically prominent and had reputations at stake, Mr. Friedlander was arrested. No "slander" law for broadcasting stations is on the statute books and so he was arranged for disorderly conduct and fined. His attorney appealed, but in the meantime the Northside Realty company decided to discontinue broadcasting. Therefore, summing it all up, I'm afraid you won't hear "The Voice of the Air" for some time, at least not over WBBM.

* *

In a heart-breaking answer to my many sisters of the fair sex who have asked about Francis Craig, whose orchestra at WSM has been drowned in letter applause, I must confess that he is married—and as he says, "to the sweetest girl in Tennessee." He answers to this: Height 5 feet 10 inches, age 25, but you'd be surprised, weight about 150 pounds, soulful brown eyes, romantic black hair, directs his own orchestra and swings a mean baton. Also, he's one of the hottest blues piano players in the Tennessee hills, and even the mountains shake every time he hits the keys. And come to think of it, he's the descendant of a Scotch baronet. I don't know how direct. Anyway, he records on Columbia records, which is an achievement the elder Baron Craig can't boast of.

* *

I am indebted greatly to a well-known Radio announcer, who wishes me to keep his name a secret, for the following information regarding Mac Ohman, which is authentic. Mac, the sartorial treat of Radio, has sung his way into the hearts of thousands of listeners from practically every station in the Middle West. Mac (and f'evvens sake don't call him "Max") is of Scotch descent, but never uses "it," and for the greater part of his 26 years, has lived in Omaha, Nebr., where he was educated and, at the time he entered Radio, he was launched in the insurance business. He finally deserted insurance for songland and is now one of Chicago's favorites. Mac is not related to Phil Ohman, of which he says, "Is just too bad for me!" Mac is a treat to the eye as he propels his five foot seven into the studio, pulling his gay, yellow-spatted feet after him. Effervescing youth and ambition, he is always going elsewhere or coming back, and to hold conversation with him, one has to catch him in a corner. At present he is all enthusiastic over his latest song composition, "Maytime and You," which shortly will be released.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

PLANNING SAVES TIME

(Continued from page 8)

Time may be saved by changing the method of preparation of the food so as to save utensils and work. Drop biscuit or emergency biscuit which can be made up more quickly than rolled biscuit is a good example. It takes less time to drop the biscuits than to roll and cut them, and you do not have the board and rolling pin to wash.

If you have a hot oven, many vegetables may be heated with butter or cream in the oven, where they do not require as much attention as if they were heated on top of the stove. Furthermore, they can be left in the oven until the last minute and so be piping hot to serve.

Breakfast is usually a hurried meal, but may be prepared with greater ease if careful plans are made the night before. If the cereal is partially cooked the night before, it is not only more thoroughly cooked but time is saved in the morning.

We are all interested in making dishwashing easier. That is one job that any housekeeper would be glad to eliminate entirely. Have you learned that it is much easier to scrape and sort the dishes and place them in piles near the dish pan? If the dishes are well scraped and perhaps even rinsed, the time required for washing is lessened considerably.

It seems unnecessary to tell you that you would save a lot of time and work if you watch the food that is cooking, so that it does not burn or cook down dry in the pans. Such carelessness not only wastes food, but is poor housekeeping because you have to spend so much time scouring and scraping the burned utensils.

Any plan which serves as a short cut for the family of two may be useless in a family of twelve and vice versa. Likewise, one woman's plan for making work easier may make it more difficult for her neighbor. Each homemaker must work out her own individual problems.

Announcing Is Disappearing

MORE than half of the mail received by the editor from readers consists in complaints that so-and-so isn't announcing their station sufficiently; that last night the program rolled on merrily for forty-five minutes before the identity of the broadcaster was made known. With such letters to form the basis for an editorial, it might seem logical that we should get behind the "lax" stations and prod their announcers with a few suggestions.

But we shall not.

In the majority of cases reported by listeners, the stations complained of were broadcasting continuity presentations whose illusions would have been severely and damagingly ruined had the call letters or other identifying phrases been broken in ever so often. We like these presentations when they are good. They are very entertaining when well planned, and one does not feel like shifting the dials around, once a good continuity program has been found.

So why announce the station every fifteen minutes or so?

Old-fashioned ideas regarding what constitutes a high quality broadcast program and modern thought in this direction do not coincide. The method of building programs has been and still is undergoing a great revolution. The shout for variety, variety and more variety, which was heard so often during the first several years of broadcasting, is being replaced by the call for better and bigger continuity presentations.

The complaining letters from fans, we feel, will gradually taper off to none as these listeners learn to like and appreciate a good continuity program. Of course, the presentation will probably not make itself felt so strongly among the lower power and less important broadcasters. It will be too costly for such stations to handle.

These stations, then will continue to announce every fifteen minutes or so, and thus satisfy, perhaps, the announcement fans who twist the dials from zero to one hundred unceasingly in the effort to hear some voice say, "This is Station BLAH, at Umptyumpty."

Announcing is disappearing from the select wave bands, and the invisible audience might well develop and change its tastes along with the rapid progress of the continuity presentation.

Slandering Over the Microphone

WBBM, Chicago station, much of whose time was leased to the North Side Realty company, recently made the headlines. The North Side Realty company announcer, in a cabaret where music was being picked up, unwisely told his listeners that State's Attorney Robert E. Crowe and Charles Barrett, co-workers in politics, were sitting at a front table in the cabaret.

Mr. Crowe was listening in at home to WBBM, heard the charges, caused a raid to be made on the cabaret and arrested the announcer. The state's attorney objected to the Radio slander and punished it. The Stewart-Warner company as a result has cancelled its sublease to the North Side Realty company.

It does not pay to make a mistake or a lie over the microphone.

Roumania's Radio Troubles

HOW would American fans like to live in Roumania under existing conditions? Truly the hand of officialdom has pressed very hard upon the listener in that country. A bill has been put before the Roumanian parliament which prescribes that listeners must not only apply in person for a receiving license, but in addition to this they must also bring with them their baptismal certificate.

Further, this has to be accompanied by a reference from some responsible religious leader who shall certify to the good moral character of the applicant. The licenses are issued for one year only, and the costs of several inspectors' visits will have to be met before the apparatus may be touched. It is reported that broadcasting is not doing any too well.

RADIO INDI-GEST

Like Father—Like Son

"Son, I'd hate to think you're lying—
Didn't think my boy would lie!
But I don't think you got Cuba—
Look me right straight in the eye!
Tell me, now, did you get Cuba?
Are you sure 'twas Cuba, son?
Or did you just say it was Cuba—
When it was some other one?

"Oh, you didn't hear him say so?
But you're pretty sure at that?
Son, our set won't get that distance—
You're just talking through your hat!
You exaggerate a whole lot!
Cut it out, son—cut it out!
Never say things 'till you're dead sure
You know what you're talkin' 'bout!"

AT THE OFFICE NEXT DAY:

"Well, Ed, we got Cuba last night!
—On that little set we've got!
Heard them plain as you could want to—
Say, their music sure was hot! . . ."

CHARLES ALLEN BRANHAM

How He Could Sing

I Listened to his sweet voice . . . . over the Radio . . . . Oh Boy how I fell for him . . . . No one can ever know . . . . Each time his voice . . . . Came over the air . . . . I'd tune in just to catch . . . . The accents of his soulful tones . . . . I had hoped to make a match . . . . But I have learned my lesson . . . . I saw him one bright day . . . . I gazed upon his features . . . . And, well . . . . He HAS got a lovely voice.

HAPPY

Franque's Filosofee

It's a Wise Station That Knows Its Own Wave Length.

Alma Mater

Here's to you—Old Indi, and the Drummer and George,
Also The Third Trombone,
And the Night Herd too, and the rest of your crew
That through the ether roam.
The stuff that you give us has pep and a kick—
It's He-Man stuff with a wow.
But by the shades of St. Pat, and the likes of all that,
Watenell are we coming to now?
With "Short Wave Marcella" and all of her bunk
And Betty giving the rule
For flap jacks real flat and as black as your hat
Ye Gods . . . Is it cooking school?

OLD KING TUTT

Cause and Effect

Dear Indi: Please include Lot's wife in the Famous Fans club, because her "impulse" led her to be "detected" and "transformed."

"A FLOP ON THE STAIRS"

by THE THIRD TROMBONE PLAYER

Final Episode—The Fatal Leap

Synopsis—Albert Hoskins, a Radio dealer who made a million dollars through modest claims for his sets, has just paid the state of Wisconsin corporation tax and is wandering penniless down the railroad tracks. Be brave, go ahead.

HARK! What was that?

The scream of a woman in deadly fear wafted to Albert's ears. He rushed to the depot from whence the scream had come and looked in the window.

A Radio set was to be seen . . . . And again that scream . . . . It came from the loud speaker.

Merely the howl from some darn regenerative set. Only that and nothing more. And this was what caused all the trouble related to in the previous installments of this stirring serial.

Moral: Don't cause your set to howl. Then I won't write any serials any more.

Bedtime Rhymes

Twinkle, twinkle, little wave,
How I wish you would behave.
In the open where you are,
You WILL carry squeaks that jar.

JEAN McMICHAEL

Let's Hash This Over

Dear Indi: Last week Betty Crocker said that Meat Pie was an uninteresting dish. Who ever heard of a mystery containing an element of chance being uninteresting?

SHOBIE

Yeh, but what if you haven't got a chance?

Sailor Beware

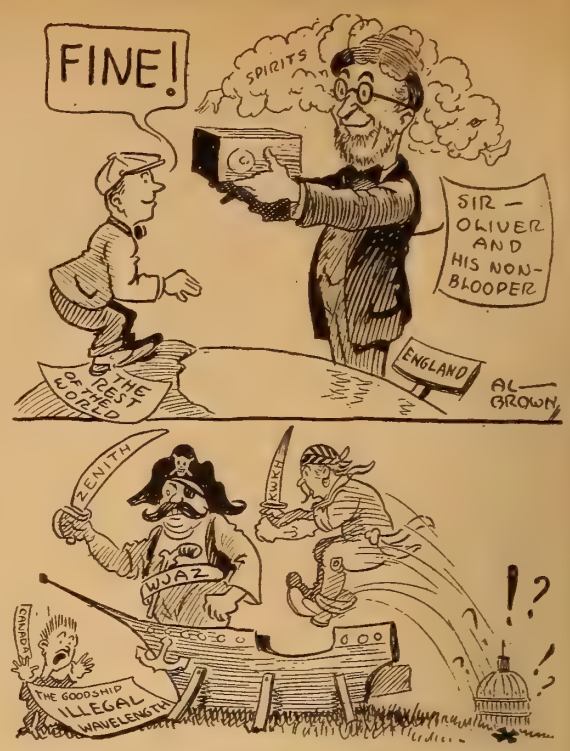
Dear Indi: I have recently purchased a tract of the Land of Youth, in common parlance, Florida, and would like to have you give me a recipe for an under-water aerial.

JAZBO

Sneak over and swipe a piece of the Atlantic cable and use this lengthwise. On both ends, equidistant from the center and each other, fasten two periscopes parallel to the ground wire. Even with this arrangement some of your programs may be drowned out, but the guy that sold you the land should convince you it is all right.

INDI

News of the Week



Condensed

BY DIELECTRIC

It is rather an imposing spectacle to view several hundred or a thousand singers on an auditorium stage, and thrilling to listen to their combined efforts. Broadcasting an oratorio robs us of the "sight" though not of its musical value. The oratorio of "The Messiah" was presented through Station WDAF, Kansas City, leaving those in the Radio audience impressed with having heard a sacred composition ably sung by choirs of balanced voices. Other oratorios might well be sung.

From the broadcasting studio of the New Arlington hotel in Hot Springs, Ark., come some of the most pleasing dance programs. That listened to recently was rendered by orchestra men under the spell of their own playing, who seemed to enjoy every minute of their work. Dr. Spaeth is said to have expressed a conviction that jazz would serve as the nucleus of real American folk music. Maybe so. Most are agreed that it will not continue in its present barbaric form at least. The program referred to was not of the extreme character.

Station WTAM, Cleveland, offered to its listeners recently a group of light opera selections which carried us back some twenty years to find they had not died musically at all—merely the public looks for something new all the time. The choruses were of a robust temperament, entering into their singing with zeal as though the numbers were quite up-to-date. Equally enjoyable was the singing of the soloists selected for the occasion. Not all that is old is trivial.

The appearance simultaneously of two American artists on the Atwater Kent program series had much to do with impressing your reviewer with the character of talent developed in the United States. Helen Stanley divided an excellent concert with Richard Bonelli and the diction of each was notably good. Miss Stanley showed her versatility, mature artistry and flexible voice to advantage in the songs chosen, while Mr. Bonelli's rich baritone shown to equal advantage in operatic or concert numbers.

Station KDKA, Pittsburgh, and a Teaberry chewing gum concert. This particular one was well above the average gum singing. For instance, the basso sang numbers calling for a range of voice that took him to fathoming the depths, while at the same time demanding intelligent expression to insure interest. A quartet's singing of "Now the Day Is Over" verified the announcement of each of the four being members of church choirs. A varied style of composition was evident throughout their work.

No doubt there were many in the Radio audience tuned to Station KOA, Denver, who enjoyed the Mikado male quartet in a concert of old numbers. They opened their part of the program with that familiar song, "Old Black Joe," but with an arrangement of it far more acceptable than ordinarily heard. Other numbers were given with equal attraction. If the four voices were not well harmonized, it is unlikely that feature detracted much—or at all—from the concert.

Station WGN, Chicago, is responsible for the broadcasting of a very good presentation of Gaul's "Holy Grail" by a choir in which the male voices shown to better advantage. It is a work entailing the singing of sustained passages, which is not always successfully accomplished, and the fact of their doing this well deserves special mention. In addition, I wish to pay a compliment to the quality of voice and its control by the contralto soloist of the choir. A distinct feature.

Super-Torodyne: An Improved 8-Tube Super

Part III—Below Sub Panel Assembly and Wiring

By J. E. Owen, Univ. of Okla.

IT IS rather easy to understand why Formica was also chosen for the sub panel, when one goes over the complete wiring directions and notes there is much apparatus for it to support. It is impossible to cover all the wiring in this article, but all except that which is associated with the Victoreen intermediates and binding post panel, will be given.

CORRECTION

In the first article on the construction of the Super-Torodyne, the Jefferson audio transformers were listed through error as Type AL 2 Shielded. The listing should have read: Type AL Sealed.

Each Amperite will be numbered according to the tube with which it is electrically associated. That is, Amperite No. 1 controls the filament current of the tube in socket No. 1 (see figure 7). The mounting directions for the Amperites will be given with the view from the front panel and from the top. The left mounting screw of tube socket No. 1 extends through the sub panel far enough to go through the mounting hole of Amperite No. 1, a tap then holding the Amperite in place. All Amperites except No. 2 are turned crosswise of the sub panel, that is, pointing towards the back and front. No. 2 is turned almost lengthwise of the sub panel, as is seen from figure 7. Each of the Amperites are held in place by the

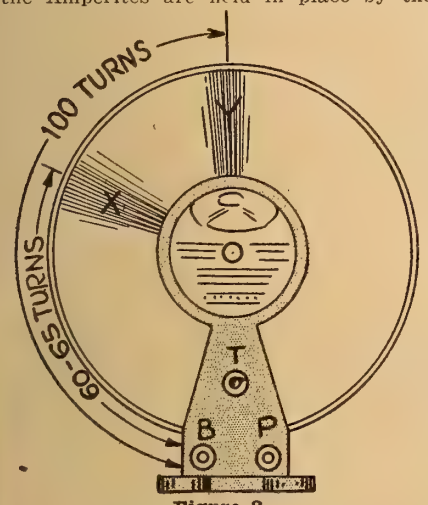


Figure 8

left mounting screws of their respective sockets except No. 7, it being held in place by the right mounting screw.

The grid condenser of the first detector is held in position by a machine screw that passes through the sub panel. The hole for this screw must be drilled through the round opening in the center of the tube socket No. 1. A similar hole drilled through the opening in the center of socket No. 3 allows a machine screw to hold in place the Bremer-Tully radio frequency choke, as may be seen in figure 7.

Have Condensers Clear

Single hole mounting was specified in the second article for the large Hammarlund condensers. Turn the dials to zero; that is, open the condensers to a minimum capacity and note whether or not the rotors of these condensers clear the sub panel. Just below the potentiometer there is a hole in the front panel. A small brass angle fastened to the front panel at the hole on the inside and below the sub panel provides a means of adjusting the position of the sub panel in order that the condenser rotors will clear throughout their entire range. Drill a hole in the sub panel for a means of fastening the sub panel to the angle. It may be necessary to bend the angle slightly in order to get the right position of the sub panel (figure 7). When the condensers are turned to a position of minimum capacity, the rotors may touch one of the Tobe condensers. If this happens, the condenser frame may be rotated in order to clear the Tobe condenser at all positions of the plates.

We are now ready to begin the wiring. Remove the Victoreen transformers, the binding post strip with its brackets, and the second, or oscillator toroid coil. The wiring diagram of figure 2, April 10 issue, will be followed, assuming the use of UX120 tubes in both audio stages. It is necessary to modify the wiring of the audio amplifier somewhat if a UX199 tube is to be used in the first audio stage. A UX120, however, enables the set to give remarkably pure tones at almost excessive volumes, and without excessive B battery consumption. The first part of

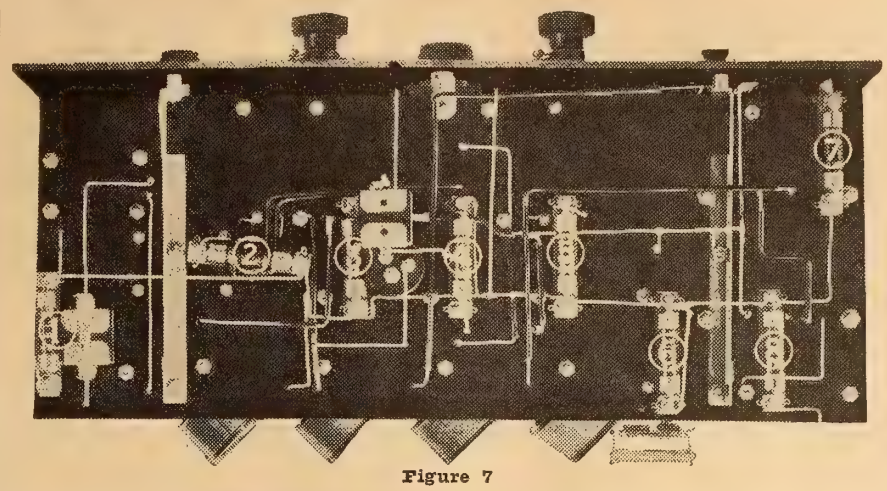

Figure 7

the circuit to be wired is the negative filament leads.

First operation: Run a wire from the front of Amperite No. 1 to the right of Amperite No. 2, then to the back of Amperite No. 3, and to the back of Amperite No. 5 (passing under the cartridge of Amperite No. 4), then to the front of Amperite No. 8 and to the back of Amperite No. 7.

Second: Run a wire from the front of Amperite No. 4 to the negative filament bus wire and solder it. Third: Run a wire from the back of Amperite No. 6 and solder to the negative filament bus. This connects the negative filament bus to each of the Amperites.

Fourth: Run a wire from the back of Amperite No. 1 around the end of the sub panel to the negative post on socket No. 1. Fifth: Drill a hole between the two connection screws on the left Tobe fixed condenser, running a wire from the left of Amperite No. 2 through this hole to the negative post on socket No. 2. Sixth: Drill a hole to the right of the front of Amperite No. 3, running a wire from the front of Amperite No. 3 up through this hole to the negative post on socket No. 3. Seventh: Drill through the sub panel just back of Amperite No. 4, running a wire from the back of this Amperite up through and to the positive post on socket No. 4. Notice that the positive post on socket No. 4 is used for the negative post.

Eighth: Drill a hole to the right of the front of Amperite No. 5 and run a wire from the front of Amperite No. 5 to the negative post on socket No. 5. Ninth: Drill just to the right and at the front of Amperite No. 6. Be careful that the drill does not strike the socket or the Jefferson transformer. Run a wire from the front of Amperite No. 6 through this hole to the negative filament post on socket No. 6. Tenth: A wire may now be connected between the back of Amperite No. 8 with the negative post on socket No. 8, and another from the front of Amperite No. 7 to the post marked positive on socket No. 7.

Positive Filament Circuit

We will now wire the positive portion of the filament circuit. Eleven: Drill to the right of left sub panel bracket and about 1½ inches to the right of the positive post on socket No. 1. Run a piece of wire approximately 19 inches in length, through this hole, and fasten to the positive post on socket No. 1. Bend this wire, or positive bus, in such a manner that it extends to the right under the sub panel. Slip over this wire a 3 or 4-inch piece of spaghetti. Bend the bus toward the front at a point from the left end about even with the right mounting screw of socket No. 2.

Twelve: Drill a hole in the sub panel in front of the positive post on socket No. 3. Just below this point, bend the positive bus to the right and slip on a 1¼-inch length of spaghetti. Now run a short wire down through this hole and solder it to the positive bus. The other end goes to the positive post on socket No. 2. The point that this wire is soldered to is between the two pieces of spaghetti.

Thirteen: Just in front of the positive post on socket No. 3, drill another hole. Run a wire through this connecting the positive post on socket No. 3 with the positive bus. Slip on this bus a 2-inch piece of spaghetti. This positive bus runs under the cartridges of Amperites Nos. 3, 4, and 5.

Fourteen: Drill a hole just back of the negative post on socket No. 4. Run a wire from the negative post on socket No. 4 through this hole just drilled. Place a 1½-inch piece of spaghetti over it and solder the end to the positive bus. Fifteen: Drill a hole to the right of the positive post of socket No. 5, running a wire from this post through the hole, soldering to the positive bus. Sixteen: Drill a hole in front of the positive post on socket No. 6, between the socket and the Jefferson transformers. Run a wire from the positive post on socket No. 8 to the corresponding post on socket No. 6, then down through this hole toward the front and up between the front and sub panel, connecting it to the negative post on socket No. 7. Now cut the positive bus off to a suitable length and solder it to the wire we have just connected to the filament posts of sockets Nos. 6, 7, and 8.

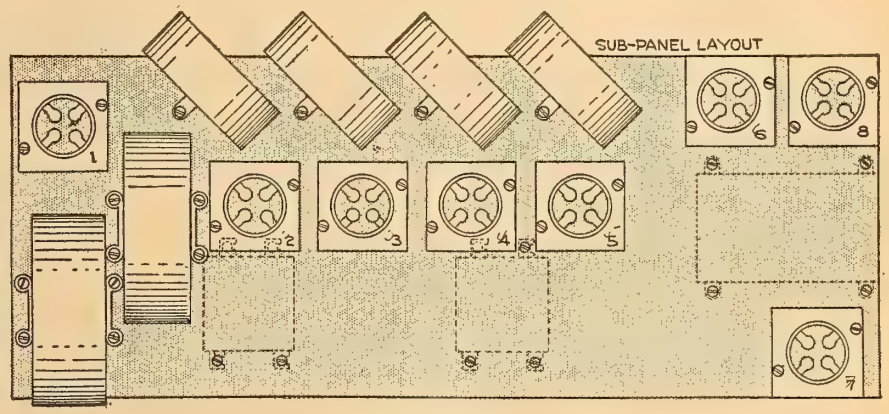

Figure 9

This completes the filament circuits for all tubes.

Use Washers or Taps

Seventeen: Under the sub panel run a wire from the screw, connecting the right terminal of the Tobe fixed condenser under the right Hammarlund condenser, to the negative bus about 2 inches back of it. Similarly, run a wire covered with spaghetti from the left terminal of the Tobe condenser under the cartridge of Amperite No. 2 and solder to the negative bus. Incidentally, the screws giving a connection to the terminals of the Tobe condensers should have washers or a tap between the sub panel and the terminals on the condensers in order that there will be no strain on the condenser terminals when the screw is tightened.

Eighteen: Drill a hole through the sub panel just back of the +B binding post on the left toroid coil. Run a wire from this binding post through the hole and down to the negative bus and solder.

On the frame of the Hammarlund condenser that is on the left, there are two holes that are intended for base mounting. Through the hole to the front, run a ¾-inch machine screw. Using this as a connection to the rotor, run a wire from it down to the rotor connection on the midget condenser, and then bend it toward the back, connecting it to the binding post marked F on the left toroid. Nineteen: To the right of the post marked G on the left toroid, drill a hole through the sub panel. Run a wire from the front of the fixed grid condenser, mounted just under socket No. 1, straight toward the front, then bend it toward the right and bring it up through this hole just drilled. It must now connect with the terminal marked G on the left toroid and then, bending to the right, with the stator connection on the left Hammarlund condenser. Neither of these wires should interfere with the turning of the rotor of the midget condenser. Twenty: Drill a hole back of socket No. 1 and bring through it a wire connecting the other terminal of the grid condenser with the post on socket No. 1 marked G.

Twenty-one: Drill a hole to the right of the post on the left toroid marked F. Bring a wire through this from the stator on the midget condenser. Drill a hole to the right of the post marked P on socket No. 1 and bring the wire up through this hole. Cut it off about 1 inch above the sub panel. The connection here will be made later.

Place Second Toroid

We may now place the second toroid on the sub panel. Twenty-two: On the first, or left toroid, and on its left side, select a wire at the point denoted in figure 8 by X.

(Continued on next page)

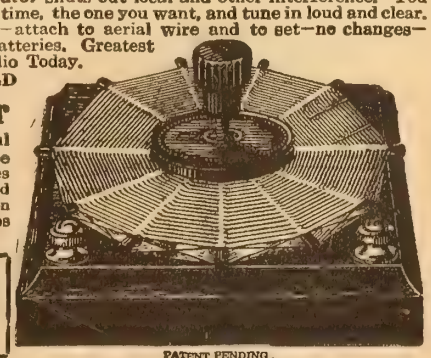
Fred W. Stein.

Steinite Low Loss Interference Eliminator

No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.

OVER 300,000 SOLD



Improved Results With Tube or Crystal Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. ***MONEY-BACK GUARANTEE.***

Mfrs. Famous 1,500 Mi. Steinite 1-Tube Set, $6; Long Distance Crystal Set, $6; Steinite Crystal 50¢—3 for $1

STEINITE 5-Tube Set—$29.75

FREE Descriptive Literature on request.

PATENT PENDING.

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

$1 Postpaid If you are not delighted with results you get your dollar back

STEINITE LABORATORIES, 161 Radio Bldg., ATCHISON, KANSAS

WOAW AIDS FRIENDSHIP

(Continued from page 5)

This view of figure 8 is seen when one of the toroid coils is viewed from the left end of the receiver. From this wire scrape the insulation, in order that we may later solder to it. Rosin core solder, or its equivalent, must be used. Twenty-three: Run a wire from the P post on the right toroid coil straight to the left and then bend it up to the wire on the toroid coil we have just scraped. Solder it here. The second toroid coil must be tapped at the point marked Y in figure 8. Twenty-four: Solder a wire at this point and run it down to the post marked B+ on this toroid. Drill a hole to the left of this post and run a wire from it through the hole and solder to the negative lead just below it.

Twenty-five: Drill two holes to the right of the posts on the second toroid such that they will pass just back of Amperite No. 2. Drill two more holes close together just in front of Amperite No. 4, running an insulated wire from the second toroid post marked F to the rotor of the second .000375 condenser, and, similarly, one from the post marked G to the stator of this condenser, these two wires passing through the holes just drilled. A connection is made to the rotor here just as it was to the rotor of the other condenser, except it is made to the rear base mounting hole in place of the one near the front.

Twenty-six: Drill a hole to the left of Amperite No. 4, about even with the mounting screw, and run a wire from the post marked P on socket No. 4 through this hole to one of the screws on the Bremer-Tully choke. Slightly ream one of the holes in the mounting or soldering flanges of the .006 Dubilier condenser and place it on the screw before the wire from the plate of socket No. 4 is put in place. Now tighten the tap on the screw, using a very thin tap instead of the one furnished with the choke. Cut back part of the spaghetti on the wire that goes from G on the second toroid to the stator of the second .000375 condenser, and solder a wire here and to the free end of the .006 condenser. If the taps that are furnished with the choke are used, they will not clear the bottom of the cabinet, but there will be no danger if thin taps are used and the connecting screws cut off close to the taps.

Remove the screw from the second condenser that holds the pigtail support, or stake, in position, and discard the washer. In its place attach a wire that runs down to the post marked G on socket No. 4. Tighten the screw, taking care that the pigtail is not injured or bent.

Two wires are run between the front panel and the sub panel from the two resistance terminals of the potentiometer to the negative and positive filament leads, respectively. Twenty-seven: Drill a hole beneath the binding post marked P on the lower Jefferson transformer. Run a wire from this post through this hole and under the cartridge of Amperite No. 8, then to the right mounting screw of socket No. 6. At the top of this mounting screw, a wire is run to the post marked P on this same socket (No. 6). A hole is drilled to the left of the hole just previously drilled, and one is also drilled just back of the post marked G on socket No. 7.

A wire with a 4-inch piece of spaghetti on it is now run through these holes connecting the posts marked F on both Jefferson transformers. The wire from the post G on the lower transformer goes to the one marked G on socket No. 7. The wire from the post P on the upper transformer goes to the post P on socket No. 7. The wire from the post G on the upper transformer goes to the post G on socket No. 8.

(In his next and concluding article on the construction of the Super-Torodyne, Professor Owen will complete the wiring and assembly details and will include instructions for operating.—Editor's Note.)

"BIG RABBIT"

(Continued from page 16)

not black; he was not the yellow of the common cross-bred negro of the South. His skin had that fuzzy, satiny blackness that gives one an idea rather of the Malay or East Indian than of the negro. He had a certain dignity of carriage and of expression, mingled with the insolence of the "fresh" negro. I had seen the type of insolent negro in northern cities, but never before in Atlanta.

"Mr. Wyeth?" he asked. It was fortunate he did, for as he spoke it flashed through my mind that I had forgotten the name I had chosen.

"Yes," I responded. "Is Miss Tonneson expecting me?"

"She will see you in a moment," he replied, ushering me into the wide hallway which ran entirely through the center of the great house, the stairway rising at the rear in a long single flight.

"You are Trimble, with whom I was speaking?" I inquired.

"MR. TRIMBLE," he corrected calmly, with such a steady look that I felt myself become uncomfortably hot and angry. I knew that such a retort from a negro to a southern man could mean only open defiance and an assertion of equality. Yet, I was determined not to arouse his antagonism.

"Pardon," I said as carelessly as possible. "I mistook you for one of the servants."

"I am Major Gaskill's companion and confidential man," he answered quietly. "Unfortunately, the Major is ill and cannot make you welcome to his home in person."

"I heard downtown he was suffering from gout," I replied with studied indifference, although I knew merely from his tone that he lied in both statements. "Please present my respects to him and assure him that I hope to have the pleasure of seeing him fully recovered within a brief period."

"Major Gaskill will be charmed to make your acquaintance, I'm certain," he responded, evidently flattered at being spoken to as an equal. He turned as he spoke, at the slight rustle of a gown and announced: "Miss Tonneson."

I looked up and beheld a picture which will always remain in the gallery of my memory. The girl, small, slender, exquisite, was just starting down the long flight of stairs, her hand resting lightly on the slender balustrade.

The narrow, oblong window at the head of the stairs, lighted by the rays of the lowering sun, framed her more perfectly than any artist could have done. She was wearing a soft gown of moth gray which clung to her perfect form as she descended so gracefully that she scarcely seemed to be walking. Her wondrous hair was simply dressed. She came eagerly down the last few steps as gracefully and naturally as a child runs. Her face was alight with expectancy and although she was not smiling her eyes seemed overflowing with a smile of welcome. I stood in awkward anticipation, waiting for her to speak, and it was like a blow to me when the negro, with a note in his voice that angered me, although I could not tell why, repeated "Miss Tonneson, Mr. Wyeth."

"I am glad you have come," she said simply, looking at me steadily. "I have wanted to see you to thank you for saving Gambetta."

I laughed, striving to murmur something depreciatory, and to express surprise at the name she gave the dog.

"IT MAY seem a huge name for such a small doggie," she rippled on, her voice thrilling me. "He has a big, brave spirit for such a little body, so I called him Gambetta. It was so brave of you to risk yourself to save him."

The negro stood a short distance away. His presence irritated me and I felt that he was a bar to conversation.

"Come into the library," the girl continued. "Uncle is so sick, and his room is just over the drawing room. Gout must be a ter-ri-ble thing. He cannot bear the slightest sound. I have even had my piano moved to the other side of the house. It is so terrible and they haven't even permitted me to see him for more than a week."

There seemed to be a faint hint of double meaning in the tone of her final sentence. I glanced at the negro as she rippled on, her soft southern notes too soft to be defined as the mildest dialect, and I could have sworn that a look of relief flitted across his face as the girl voiced her belief that her guardian was in the house.

"I am compelled to receive my callers here while Uncle is sick," she went on as she led me into the big, book-lined library, beamed and panelled in dark polished red gum, and lighted from high windows. "It is a dismal old place. I always hated it, even when I was a little girl and papa brought me to this house."

She closed the door leading into the hallway as she spoke, and I felt relieved at the summary manner in which the negro had been eliminated.

"Sit here, please," she directed, indicating a chair at the table. "The chair is more comfortable. I want to thank you again. It was so noble, so brave of you."

I noticed with some surprise that Miss Tonneson had raised her voice, and in an instant, as I washed her, I saw that she was doing it for a definite purpose. I gaped at her amazed. Her manner had changed to one of decision and energy. Still talking in a rather high tone, repeating again and again vapid words of thanks for my action in saving her pet, she ran softly around the big table, and while talking she was writing hurriedly on a tablet of paper. With a meaning glance she indicated a similar tablet and a pencil on the table near the chair she had directed me to occupy.

"It was so good of you to come and give me the opportunity to pay you my thanks," she continued, still writing as rapidly as possible, tearing off the sheets and passing them across to me as she finished. Chattering, laughing and piling praise and flattery upon me, she acted the dual role perfectly.

"Talk commonplace." I read on the first slip she passed me. "Write your replies. He's listening. Keep talking and write."

I glanced across at the beautiful face and saw the anxious, harassed look, and vowed mentally to shield and protect her from the perils that seemed to threaten her.

"It is strange we have never met before, Miss Tonneson," I said, going to her aid in manufacturing conversation. "I shall give thanks to the doggie forever for risking his little life to bring us together."

"I have always lived in Atlanta," she responded, still scribbling. "Ever since I was a baby this has been my home. Major Gaskill has been so kind to me and has taken such good care of me that I call him uncle, although he really is not related to me." There was malice in the slight accents by which she deceived the eavesdropper while enlightening me. "Is this your home, Mr. Wyeth?"

"Yes, I have lived here all my life, except when I was away at school." I said while I wrote:

"Name is not Wyeth. It is Lindsay Mr. Kincaid sent me. I'm to find Major Gaskill."

"Where did you attend college, Mr. Wyeth? I'm so interested in college men," she said as she passed me the slip of paper on which she had written:

"I'M WATCHED every minute. Major Gaskill is not in the house, but Trimble believes I accept his story of the gout. He went away nearly two weeks ago. Trimble is holding me practically a prisoner. I have tried to reach

Gets Everything But Noise!

Read this convincing letter from a man who has "listened and marveled":

"76 Dantest, Montreal, Can.

Kane Antennae Co.,
Gentlemen: I am using a Freed-Eisemann NR 5 Neutrodyne, and there is no comparison in the present reception of the set with the Kane Antennae as with the old 75 feet single wire. **It has eliminated all power induction and cuts out static, oscillating sets,** and stations are coming in 100% closer and clearer than before. People are inquiring every day about this outfit and many of them are going on the roof to copy it.
JOS. RICHARD."

Improves Reception 60%

Entirely eliminates all power noises such as leaky transformers, generators, motor hums, Delco Plants, etc. Cuts static and regeneration howls and squeals in two. Proves statements of leading Radio Engineers that fully 75% of so-called "summer static" is nothing more than electric power interferences. Dr. Gehrig of Oakland, Cal., says it improves his reception fully 60 percent. Do away forever with disagreeable noises.

$1.00 *Brings BLUE PRINT Complete Working Drawings* and full instructions for erecting this wonderful Antennae. Just send $1.00 (a check will do. Stamps not accepted). A limited number available. Send TODAY.

The New Radio Book HOW TO -

Operate Sets
Construct Parts
Improve Reception
Understand Radio
Assemble Circuits

The greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest, it supplies the demand for a book covering every phase of Radio. Starts at the beginning with simple explanation of Radio reception, with technical explanations of the different parts and leads right on to the more advanced instruction. A complete handbook serving as a ready reference in the Radio field. It gives suggestions on parts and sets which will prove to be a money saver. Blue prints and diagrams are essentially an important part of this book. Special chapter is devoted on "How to Operate," which gives detailed information on the operation of many well known sets.

A general information is vital to the knowledge of anyone interested in Radio. It gives a complete list of all broadcasting stations with a colored map showing their location. The workshop kinks will save you time and money. Now is the time to take advantage of this exceptional offer. **Mail coupon today!**

RADIO DIGEST,
510 N. Dearborn Street,
Chicago, Illinois.

Enclosed find $5.00 for one year's subscription to Radio Digest. The new Radio Book, "Radio Receivers," will be mailed FREE, postage prepaid. This offer only good on subscriptions sent directly to this office, not through agents or agencies.

How to Stop Blooping and Man-Made Static

Part XI—Battery Charger Interference

By The Technical Staff

IT IS obvious that when seeking the cause of interference, the first essential should be that of ascertaining the condition of the receiver which is noting the interference, and its accessories. In many instances not only minor defects within the receiver but electrical devices within the home are the creators of noises which may send one to the four corners of the winds in search, only to return exhausted and to locate the trouble within the confines of one's abode. Within the receiving set, probably the most consistent creator of scratching noises which at times entirely obliterate reception, is the partial or total shorting of the variable condensers used for tuning.

It should be remembered that dust collects within the receiver. While, in general, such collection does not create any adverse condition, yet when this dust collection adheres to the plates of a condenser sufficiently to bridge the gap between the stator and rotor plates, the result will surely be a scratching noise as the condenser plates are rotated. At times the accumulation may be so great as to create a short circuit, causing the receiver to become inoperative at given points of dial rotation.

It is therefore timely advice in suggesting that a periodical inspection of condensers, and a dust cleaning of the total interior of all Radio receivers be placed upon our schedule of "Things I Must Do Today."

Another source of local interference (that which occurs within the home), which is not known to but possibly a few, and to them, the remedy is not apparent, is that caused by the use of battery chargers employing rectifying bulbs. Having like interests at heart, the Kodel Radio corporation instituted a series of most exhaustive tests in an attempt to discover, if possible, the phenomena which caused sudden surges or bursts of static. Their findings are of such general interest that we are repeating their report in part, for the benefit and help it offers not only to the individual but to Radio clubs as an assistance in their club work.

"Radio interference has been the subject of laboratory experiments in hundreds of laboratories throughout the country during the fall and winter months when Radio fans experienced more interference than ever before. This was apparent in a high degree during the recent international test week, when all American stations were off the air and still fans experienced the same interference as before. Engineers in our laboratory have been experimenting for months, this laboratory being located at our factory, where a great many battery chargers are constantly being tested.

"Throughout the tests, bursts of static constantly interrupted reception and after exhaustive search the theory was advanced that such static bursts were produced artificially, and evidently being created by the rectifying tubes used in the chargers. This unusual theory was slow in meeting acceptance and it was not until a multiple of tests had been made that sufficient evidence was accumulated to support the theory. In making these tests, considerable astonishment followed the discovery that the rectifying bulbs as used in the bulb type chargers were producing pronounced static charges at apparently regular intervals and creating an intermittent interference which affected the test sets used for the experiments.

Indict Bulb Type Chargers

"Continued experimentation proved that all types of rectifying tubes as used in the bulb type battery chargers, transmitters, eliminators and power units, expelled a series of frequent crashes of artificially produced charges. The findings naturally caused our engineers to be firm in their belief that the number of rectifying tubes in use throughout the country in bulb type battery chargers, transmitters, battery eliminators and power units are sufficient to create an artificial static of sufficient volume to prove an annoyance to those owning Radio receivers.

"The theory—and it remains but a theory for further experimentation—has not progressed to the stage whereby a positive answer to the problem can be given, both as to the creative cause and its quantitative effect. However, the theory defined in the light of past research is that the electrons within the rectifying tube, through friction, generate a sufficient power which cannot be dissipated until such force is accumulated that it breaks down the resistance barrier and explodes. This causes the artificial crashes of static, or something so similar in effect that the ear cannot distinguish the difference. Following each discharge, the electrons again begin to build up to the breaking point, and it is this continued 'spill' which wrecks havoc with one's ears. One might liken the cause and effect as identical with the loading and 'spilling' of a condenser.

Simple Test for Home

"In order that a simple test may be carried on in the home, in an attempt to hear the effect of artificial static as above described, a small wire may be stretched from the antenna post of a sensitive receiver, still leaving the antenna connected. This wire should reach to within a few inches of the bulb, and the bulb should be in operation. You may then turn on the receiver and listen, either with head phones or a loud speaker, the loud speaker being preferable, and you will hear at almost regular intervals the static bursts.

"Before determining the actual cause of the annoyance, our engineers sought and discovered a solution to the problem, which is not only simple of application, but entirely operative. The method thus employed was that of shielding the rectifying tube and grounding the shield to earth. Such an arrangement in effect causes the earth ground to act as one element or plate of a condenser, the opposed or remaining plate being the tube and its content, the ground plate acting as a by-pass to earth for the static discharge influence created. It is of further interest that with an arrangement such as noted above, the tendency is to drain the charges naturally and prior to such time as they would build up to a point wherein a crash would occur with the break down or 'spill,' preventing noise.

"It is anticipated that special processes will be available with which the exterior of the bulbs may be coated with silver, which in turn may be grounded and thereby materially assist, through correcting this now inferred trouble with bulb rectifyers, in adding our assistance toward interference elimination."

Vibrating rectifiers which show a spark when in operation as the contact is made or broken, constitute another source of annoyance, which is equally entitled to consideration and rectification. The remedy in such cases is obviously that of so adjusting the swing of the breaker as to eliminate any tendency for it to spark, and to replace contact points which have become worn or pitted.

In order that each may do their part toward assisting the composite listener enjoying an evening of non-interference entertainment, battery charging should preferably be done during the day when, quite likely, the least number of listeners would be effected from interfering surges or defective vibrator contacts.

KMOX IS VOICE OF CITY

(Continued from page 6)

Recently "Smiling" George Junkin, announcer of the WSWS Radio station in Chicago, has been signed up to the KMOX staff. George has been around some and knows all the announcers in the United States by their first names, so it is said (but not by George). If you want to know what "Smiling" George thinks about his new job we submit a quote from an interview in the Globe-Democrat.

"I consider KMOX one of the five leading broadcasters in America," he said. "Its financial condition, management, personnel, equipment, facilities and program material place it easily within this group. It has all that is necessary to build into a popular presentation of programs on the air. The chief idea of a broadcast station should be to work up a continuity in its presentations, and KMOX has the proper facilities to do this. The orchestra, carefully selected so that every individual is an artist on the instrument he plays, is the essential background which can not only play symphonies, but light music as well."

And that is what "Smiling" George Junkin says.

The pictures herewith do not begin to represent the variety of talent and entertainers. There have been many celebrities including Rosita Forbes, famous explorer; John Phillip Sousa, Arturo Mondragon and others. Even talented children are heard, as the Kimmel Kiddie Frolicsters.

The Voice of St. Louis is heartily recommended to Radio audiences, America over, as a voice well worth listening to.

Billy Spear's travelogues on "What to See in America" which are given every Wednesday evening on the Stewart-Warner Touring Bureau program through WBBM, are proving one of the most popular features at that station. Billy takes the entire studio staff on a Radio tour, by automobile, mixing humor, music and little travel novelties with an interesting view of the city visited.

The sweeping popularity of the new Crosley 4 and 5-tube sets continues unabated and evenly distributed between all four models, because each represents the utmost in radio at its particular price . . . or anywhere near that price! $29 . . $38 . . $60 . . $75—without accessories.

"BIG RABBIT"

(Continued from page 20)

Mr. Kincaid, but I am listened to every time I talk over the phone and guarded when I go out. I am beginning to be afraid."

"I am a Columbia man," I replied to her verbal question. "Were you ever in New York?"

"Do you know where Gaskill went?" I wrote.

"No, I have never been in New York. I'd dearly love to see the city. Uncle has promised me I shall go sometime. Perhaps we may go when he recovers from his gout."

"No," she replied on paper. "Trimble came. It had happened before so I listened. They talked of some place south.

Trimble grew suspicious of me and has been keeping me here. Says Major Gaskill ordered him to keep me in the house during his illness."

"I hope to have the pleasure of showing New York to you sometime," I managed to say by controlling my voice with an effort.

"Is there anyone you can trust in the house?" I wrote. "Can you send a note? I'll watch and see no harm comes to you."

"Of course," she said, speaking easily, not a note of her voice betraying her anxiety. "But I would love to travel, to see the world. I have been to so few places."

"Trust mammy Hannah," she scribbled. "Give me the address; I'll send her with a note if I need help."

OUR conversation had become a trifle disconnected as we continued to exchange notes rapidly; but it passed with the eavesdropper whose suspicions, if he had any, were lulled as we both heard his soft footsteps retreating toward the rear of the house at the sound of an altercation at the kitchen door.

"Shall I notify the police and take you from here?" I whispered quickly when certain the negro would not overhear.

"I can't; I won't have it," she answered hurriedly and anxiously. "I'm not molested, only watched every minute. I could not bear the notoriety. I'll send if I need you. I've been in terror for two days for fear Trimble might attempt to kidnap me."

"Has he any help in the house?" I whispered.

"Yes, Tillie, my colored maid, is his helper. She does everything he wishes, even to spying on me. He has great power over the negroes; they call him King Solomon; or rather he calls himself that."

"Why don't you retreat to Mr. Kincaid's house?" I urged. "He is very anxious."

"Because I am afraid that if I show Trimble that I understand, he would resort to anything, even killing, to stop me. I must pretend to be ignorant. If I get a chance, I shall go to Mr. Kincaid and claim his protection."

"Why not go out with me when I go?" I whispered eagerly. Her warning finger notified me the negro had returned to the door.

"I must find the culprit and let him thank you in person for saving his life," she said, almost in a gay tone. She tripped to the door and threw it open, and as she did so the sound of retreating footsteps was plain.

"Trimble," she called clearly. "Trimble, bring Gambetta here. I want to have him thank Mr. Wyeth."

It was consummate acting, and I gloated inwardly at the act of the girl in imperiously commanding the negro who, as we both knew, probably controlled her destiny for the time. Trimble, scowling darkly, came with the fluffy white dog. We caressed and petted him as Miss Tonneson held him close in her arms, calling him "naughty doggie" and making him bark to thank his rescuer.

Within me a struggle was going on. The desire to make a sudden attack upon the giant negro and give the girl a way to freedom almost overmastered me. I realized it was foolish, that our fears might be purely imaginary, that my errand was to find Major Gaskill.

"You must come again to see Gambetta and me," she said as we clasped hands at parting. "Come when Uncle is better. I hope you will see him soon." A gentle pressure of the hand gave double meaning to the last statement.

Trimble opened the door for me. His eyes were dark with humiliated pride at being treated as a servant before me, to whom he had boasted of being Gaskill's confidential man. I feared the girl had angered him. As I went down the broad steps, my brain whirling with mingled emotions, I heard the heavy bolts shot and a wild longing to turn and drag the girl from the house of mystery seized me.

Who was Trimble? What evil portends? Follow the exciting developments that befall Miss Tonneson, Wen and Dick in the next installment in Radio Digest.

A series of interesting lectures on popular astronomy are being broadcast Thursday nights, at 7:45 p. m. Central time, from Station KLDS, Independence, Mo. Dr. R. R. Fleet, of William Jewell college, who received his doctor's degree at Heidelburg, gives the talks.

Here and There with the Radio Clubs

Alphabetically, the Wilmington Radio club, Wilmington, N. C., is some distance behind the A's. But with one jump and a brand new idea it tops this week's column. Quoting Herbert Ford, secretary: "If you wish to send an applause telegram to a station, it won't cost any more if you have the wire signed with the name of your club." The above is but another angle of publicity for your city and your club.

* *

Broadcast listeners and their organizations throughout the United States are urged by Herbert A. Luckey of the Broadcast Listeners Association of Indianapolis, Ind., to send immediate telegrams to James A. Watson, chairman of the senate committee on interstate commerce, protesting his opposition to the passage of the White Radio bill.

* *

Lansing, Mich., has "cut in" by calling their anti-bloop organization, the Lansing Radio Listeners league. "Just to give you an idea as to how far we are going toward cleaning up interference," writes L. C. Reed of the executive committee, "we intend to hire an expert Radio man, equip a car with special detection apparatus, and clean up. We don't know it all and will be grateful for helpful letters."

* *

"To be or not to be" was one of the chief subjects before the Ithaca (N. Y.) Radio association recently in connection with superpower station WJZ at Bound Brook, N. J. New Jersey interests have been endeavoring to have that station eliminated, but the Ithaca listeners are all for it and have so told Secretary Hoover in a resolution. This club of live wires, which is headed by Prof. W. C. Ballard, is also getting up a questionnaire to be filled out by all listeners in the territory, relative to reception conditions and interference, which is expected to prove of much value.

* *

We hear from Pittsburgh this week also. There has been formed in that city the Radio Listeners' Association of America with headquarters at room 419 in the Bessemer building. J. A. Simpson is president with an advisory board of which R. L. Border is chairman. It is the purpose of this organization "to primarily promote the interest of the listener and coordinate the work of the manufacturers, the broadcasters and others who enter into the problems of the listener." Every fan knows that reception during the past season has been very poor. Those interested in becoming members should send a post card to Mr. Simpson and will receive an application blank.

* *

The Executive Radio Council of the Second District, Inc., is an entirely non-commercial organization composed of representatives from thirteen amateur Radio clubs in and around New York city. It was formed late in 1920 by several prominent Radio experimenters who saw the possibilities of such a body for the protection, guidance and self-regulation of the several thousand metropolitan Radio amateurs. The president of the council is Capt. George T. Droste and the business manager is Robert T. Morris.

* *

Remember clubs, give the power companies a fair break. Be sure the trouble is the company's before lodging a complaint or going to the city council.

* *

Frank R. Sodaro, Portsmouth, Ohio, is organizing an "I Won't Bloop Club" and putting it over. He will appreciate hearing from clubs that can furnish him with copies of their by-laws. Frank is 104% for non-interference and we hope someone will offer him assistance.

Rev. Harry Sanders, a famous English naturalist, declares that the ant was the first Radio operator. When in difficulties it sends out an S. O. S. on its antennae, and other ants, picking up the message, go to their comrade's assistance.

CLASSIFIED ADVERTISEMENTS

Classified advertisements in Radio Digest produce results. Have you a receiving set to sell? Do you want to buy a Radio? A classified advertisement in this column will sell your set.

Rates are twenty cents a word for each insertions, ten per cent for six insertions, fifteen per cent for twelve insertions, twenty per cent for twenty-four insertions. Name and address to be included at above rate. Cash should accompany order. Minimum of ten words.

Objectionable and misleading advertisements not accepted. Forms close three weeks prior to date of publication, which is Saturday.

BLUE PRINTS

Super using J. K. Long wave Air core transformers and standard parts. Eight tube set with entirely new principle of hetrodyne reception Tone, Selectivity and distant Loop reception. We suggest best parts and can furnish same. Blue prints and instructions, 50 cents. Davisco, 30-A Euclid Arcade, Cleveland, Ohio.

NO MORE BATTERIES—Build "A" and "B" eliminator—operates any set on AC or DC, no hum, satisfaction guaranteed. Complete plans, $2. Engineers' Service Company, Suite 203—15 Park Row, New York.

RADIO

Five tube Radio only $22.50. Seminole Radio, 427 East 16th St., New York.

600 MILE RADIO—$2.95. No tubes nor battery needed. Always ready. Fully guaranteed. 200,000 sold. No grinding. A real Radio. Sent postpaid. Order from this advertisement. Crystal Radio Co., Wichita, Kans.

MISCELLANEOUS

50,000 addresses of consumers that answered a radio ad. for a medium priced set all received since Jan. 1st, this year. We address your envelopes. The F. W. Mead Publising Co., Middletown, N. Y.

Super-Het, Ryan's Simplest Possible 7-Tube Set. Complete instructions, actual size template. How to make a loop. All for 50 cents. Book Dept., Radio Digest, 510 North Dearborn Street, Chicago.

Photos of Your Favorite Radio Stars. Ten cents and coupon appearing on another page of this issue will entitle you to one of the photos from Radio Digest gallery of stars. Radio Digest, 510 North Dearborn Street, Chicago.

WJAZ IS ACQUITTED OF 'PIRACY' CHARGE

COURT FINDS THAT ZENITH ACTS WITHIN THE LAW

Case Shows Inadequacy of 1912 Regulations—Encourages Advocates of Communications Commission

CHICAGO.—The "pirates" of the air have been vindicated. WJAZ can choose any wave length it desires and broadcast at any time it wishes, according to the recent decision of Federal Judge James J. Wilkerson who holds that the Zenith broadcaster is not guilty of a criminal act, and that the actions of the station are within the limitations of the law as it now exists.

The United States government, and specifically the department of commerce, which sought to punish WJAZ and its owners for taking the wave length of 329.5 meters without permission from the commerce department, is the loser of the test suit. The government cannot appeal the decision of one of its own judges.

The 1912 Radio law, the only congressional act by which Radio stations can be regulated, will therefore allow all Radio manufacturers who maintain some experimental work, and all Radio communication companies (which would mean essentially the R.C.A.) to pick their waves and hours, and the department of commerce can do nothing.

Broadcasting Stability Not Threatened

But broadcasters other than those which fall within the classes outlined, must stay on their assigned waves and schedules of operation. KWKH, the Shreveport, La., station, which has been reported to have adopted tactics similar to WJAZ, will no doubt be liable to punishment and confiscation of equipment.

The 1912 Radio law is old and peculiar, however, and many loopholes are left by the fourteen years of Radio progress which have passed by congress without that body realizing it. Perhaps KWKH—and others who decide to try their luck—may succeed unharmed. The next few weeks will tell.

Secretary Hoover Hit by "Brick"

The decision will not, it is believed, cause many stations to shift their wave lengths to ones more favorable, but it most assuredly will point the immediate need of modern and equitable legislation to congress, in whose hands now three different Radio law amendment bills are pending.

Many well-informed leaders and observers of the situation feel that the decision can be interpreted as a "brick" cast at Secretary of Commerce Herbert Hoover's management of the broadcasting privilege. Advocates of an independent government commission of communications, with power to regulate Radio, and in which the department of commerce would be vested with no powers, herald the decision as encouraging.

It is hoped that the White bill, with a poorly defined commission, will be put on the table, and the Borah bill, a much more carefully drawn law providing an excellent commission form of Radio control, be passed as soon as possible.

The Borah bill has just recently been introduced in the senate.

SENATOR BORAH GIVES RADIO BILL TO SENATE

Total Now Three for Legislators to Consider

WASHINGTON, D. C.—Senator Borah, of Idaho, has introduced an entirely new Radio bill in the upper house, which provides for the appointment of a national Radio commission which would take the entire administration out of the hands of the department of commerce.

He goes into the minutest detail as to what the commission is to do, and provides for the appointment of three members by the president of the United States at a salary of $10,000 a year. The bill has been referred to the senate committee on interstate commerce, where the Dill and White Radio bills are now pending. The introduction of this bill is rather an indication that no action will be taken at the present session of congress on Radio administration.

Farthest North Broadcaster Is Found at Bethel, Alaska

SEATTLE, Wash.—The farthest north broadcasting station is being operated at Bethel on the Kuskokwim river, Alaska. Paul Estle, the owner, gives news bulletins on the air twice a week. A low power is used, but this will be increased soon according to plans.

Looking Ahead

"Mrs. Polybank's Medal," Is an Epic of a Mother's Heroism in the far North. A splash, the baby's face disappeared beneath the waves of the freezing water. But Mrs. Polybank was calm. While the others were stunned with horror, she stepped over the rail, fully dressed——. It's in that big Mid-May Radio Digest, out Friday May 14, and it's a true story with a Radio ending.

Smitty's Ether Busters, Mickey Russell and the Ironing Club stand out as unique features in Port Huron's popular station, WAFD. Port Huron is right on the knuckle of the thumb of the big mitten peninsula. These broadcasters have their own ideas of entertaining Radio listeners. See the next Radio Digest.

It Started With a Special Program by the American Legion in Oklahoma City over KFJF. Ex-service men for hundreds of miles around, their friends and relatives sent in an avalanche of applause letters. And out of that grew the American Legion Radio Post No. 300. See story and pictures in Radio Digest, out May 14.

Hugh Fullerton Never Did a Better Thing Than "Big Rabbit," for which Radio Digest has the exclusive serial rights. With this issue you behold the unhappy Roberta whisked away from her Atlanta home. Wen and Dick are in hot pursuit, but will they find her? The next installment will enthrall you.

Spring Cleaning, How to Get the Most Out of Your Receiver, is the subject of a new series which starts with antennas and how to install them. This series is written exclusively for the man "who doesn't know it all."

Underground and Horizontal Antennae Series has the experimenters on their toes. Send in your name, if you want to help. A new bag of tricks will be given in the second article.

COVER GIRL LIVES IN CITY OF ROSES

PORTLAND, Oregon, is famous as the "City of Roses." The parkways and lawns are radiant with America's most glorious flower. And perhaps that is why Miss Gladys Johnson, the young lady on the Radio Digest cover, finds it so congenial to make her home there.

She is a staff artist at KGW, the Oregonian broadcasting station, and may be heard daily over the air as soloist and in the ensembles. Besides being an accomplished musician, Miss Johnson has starred in several motion picture plays and is quite well-known in vaudeville and symphony concerts.

GOLD CUP STANDING DIVULGES LEADERS

GIVES NAMES OF SIXTEEN ANNOUNCERS NEAR TOP

Interest High in 1926 Radio Digest Gold Cup Award—Twenty-Three New Candidates

They're off! The barrier is up and the 140 entrees have swung into the race that holds as stakes the third annual Gold Cup Award and the title of the World's Most Popular Announcer. The race got off to a good start with the entrees well bunched and their riders evidently jockeying for positions that will bring them safely around the first turn and well out in front.

Anyway, this is what is causing all the excitement. Here is the first hint at the relative standings of the announcers entered in the Radio Digest contest to decide by a direct fan vote who is the most popular Radio announcer. From inquiries received, the supporters of their favorite announcers are anxious to know how their candidates are getting along in the contest.

Although the deluge of votes has kept the Gold Cup Award Editor from twiddling his thumbs during the past several weeks, the number of votes received is small in comparison to the ballot that will be cast. So the standing given this issue cannot be indicative of the finish. Most of the fans are saving their ballots for the bonus votes granted when a group is turned in at one time.

Sixteen Leaders

This issue the sixteen announcers who have the largest number of votes have been arranged in four groups to prevent any one from being influenced to vote for the leader. Here they are:

First group: Pat Barnes, WHT; Norman Brokenshire, WJZ; Earl E. May, KMA; Hired Hand, WBAP.

Second group: Robert W. Griffin, WHO; Henry Field, KFNF; G. C. Arnoux, KTHS; Clyde Randall, WSMB.

Third group: Phillips Carlin, WEAF; Milton Cross, WJZ; Jerry Sullivan, WQJ; E. L. Tyson, WWJ.

Fourth group: Lambdin Kay, WSB; Louis John Johnen, WLW; Leslie Joy, WEAF; Edward B. Husing, WRC.

But then you never can tell. Who knows? Next issue there may be some new names in the list of the first sixteen and, incidentally, some of this issue's leaders deposed. A great many things can happen when people start to vote. And just now they are voting quite recklessly for their favorite announcers.

New Names Swell List

Last issue there were 117 announcers entered in the contest for the Gold Cup, but still they come. Since that time, twenty-three more announcers have each impressed listeners as being the greatest announcer in the world. Of course, they can't all be the greatest announcer. But there is going to be one announcer gain that title at the end of the contest. He may be one of the 117 previously nominated, one of this issue's list, or he may not yet be nominated. If your favorite announcer has been nominated, get behind him and help bring him one of the highest honors in Radio. If he has not yet been named, name him and boost for him. The twenty-three new candidates, whose nominations were received since last issue are as follows:

Atkinson, Wm. L., WCAO
Church, A. B., KLDS
Connelly, "Dud", WBRC
Darling, C. Walter, CFCF
Dirlam, Curtis, KFYR
Eades, Arthur F., WEEI
Gaylord, Chester, WTAG
Greene, Paul, WSAI
Hall, Robert, WKAF
Haupt, James, WEAF
Heiny, Capt. Jack, WOS
Henlein, John, KFYR
Hohenstein, Rev. H., KFUO
Hughes, Jim, KDKA
Morrison, Claire, KPO
Nealson, T. V., WQAN
"Night Watchman", The WAMD
Pierce, Jennings, KGO
Ross, Geo. F., WRC
Snouffer, Roy, WAIU
Thorwald, John, WRR
Wilkins, Bob, WTIC
Willington, Arthur, KYW

How to Win Cup for Your Choice

Don't miss a single ballot, for when these are turned in to Radio Digest in a group of consecutive numbers, extra bonus votes are allowed the candidate voted for.

The ballots, top of this page, numbered consecutively, will appear in each issue of the Radio Digest until the close of the contest.

Each of these ballots will count for one vote when sent in separately. You can hold these ballots until you have four that are consecutively numbered and when they are sent in, a bonus of eight votes will be granted.

The larger the number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. And for a complete series of ballots, including one from each issue from March 27 to September 1, a bonus of fifty votes will be allowed.

TO GREET ROTARIANS OF WORLD

2XBR, PORTABLE, TO TOUR AROUND GLOBE

PRIZE FOR AMATEUR WHO HAS BEST LOG OF TRIP

Motor Transmitter, "Betty Warner," Will Start May 4 from Hollywood on Trip Over World

LOS ANGELES.—When the "Betty Warner," 250-watt mobile broadcasting station of Warner Brothers motion picture studios, sticks its nose out onto the broad level highway that leads from Hollywood to San Francisco on May 4, there will have begun the first lap of a very remarkable trip the itinerary of which will not only include the United States but foreign countries as well. 6XBR is the official call of this short wave portable station, but it will be known as the Betty Warner, so christened because the birthday of the daughter of Harry Warner, president of the motion picture producing firm of Warner Brothers, comes on the day when the start of the trip will be made.

The trip of the Betty Warner in the United States is with the full sanction and cooperation of the department of commerce. The present itinerary includes the following cities: Santa Barbara, San Francisco, Oakland, Portland, Seattle, Spokane, Walla Walla, Boise, Salt Lake, Denver, Hastings, Lincoln, Omaha, Kansas City, Decatur, Chicago, Indianapolis, Columbus (Ohio), Cleveland, Youngstown, Pittsburgh, Washington, Philadelphia and New York.

Thence to Europe and Orient

At the conclusion of the American tour the station will be shipped overseas, and if suitable arrangements can be made with the Radio governing bodies of England, Germany, France, Spain and Italy, 6XBR will make tests in those countries, thence to the Orient, Australia, the Phillipines, Hawaiian Islands and back home to Hollywood.

6XBR, probably one of the best equipped portable short wave stations in the world, will carry three men on this tour. The station itself is mounted on a motor coach chassis, is of 250-watt power and can be set up to broadcast on its assigned wave length of 108 meters in exactly 20 minutes. A description of the set appeared in Radio Digest a short time back.

Amateurs to Aid Tour

The movement of 6XBR, through the cooperation of the American Radio Relay League, will be governed entirely by Frank Murphey, chief electrical engineer of Warner Brothers, who will remain at Hollywood. Each night from 11 to 11:30 p. m. Pacific time, a report will be forwarded to Mr. Murphey by the operators on the coach using a 40-meter wave length. Instructions will in turn be given by Murphey on the same wave length, which, of course, will be in the regular Continental code. The latter will be transmitted between 11:30 p. m. and 12 midnight Pacific time, each night

To stimulate interest in the tour of 6XBR, Warner Brothers have announced a contest in connection with the trip and an award of $1,000, open to all amateurs, will be presented to the operator who furnishes the most complete and accurate log of conversations between 6XBR and Mr. Murphey at KFWB during the international jaunt.

Couzens Advocates One Communications Body

Michigan Senator Criticizes White Bill Commission

WASHINGTON, D. C.—The creation of a commission on communications, which would take over the regulation of Radio, telephones and telegraph, is sought in a bill which will be introduced in the near future by Senator James Couzens, of Michigan.

Senator Couzens does not believe that the secretary of commerce or any other one man should have control of the regulation of broadcasting. He thinks that ultimately a communications commission will be necessary, and he is in favor of its immediate creation.

"I am not in favor of the commission proposed in the White bill," said the Michigan senator. "I think it is a makeshift proposition. Nor do I favor placing Radio with the interstate commerce commission. That body already has its hands full with the railroads.

HOT DOG! THAT'S A MEAN NUMBER

With one fuzzy ear cocked for jazz, Rekcod wags an enthusiastic applause if the syncopation suits her canine fancy. WLS claims this winner of a blue ribbon at the last Chicago dog show as its youngest fan. Next to listening to broadcast jazz music, Rekcod, who is nine months old, enjoys telephoning and can recognize the voice of her playmate, little June Docker of Oak Park, Ill. Radio seems to fascinate the wire-haired fox terrier.

Six Lines Carry Telephone Requests to Station KFOA

SEATTLE, Wash.—A probable solution to the handling of numbers of request and thank you calls is announced by Station KFOA here. A special six-line telephone switchboard has been installed in the station. With this new equipment the station will be fitted to handle city requests with speed and dispatch at the rate of about 400 per hour.

Legion Broadcasts War Songs

SHREVEPORT, La.—Military music popular during the world war, played by the Shrine band of El Karubah Temple, El Karubah fife and drum corps, quartet and other music, will feature the Louisiana Department Legion program to be broadcast from Station KWKH, here, May 6, 8:00 to 10:00 p. m. Central time. A feature of the program will be the rendition of any of the old war tunes requested by veterans.

Five Musicians to Four Homes

CINCINNATI.—Mentor, Kentucky, a town with a population of only 100 people and twenty residences, challenges any other town to produce more musicians, in proportion to population. This challenge was broadcast after a band of twenty-five children came down the Ohio river in a boat and put on a program from WKRC, here, that brought hundreds of letters and telegrams. The average is five children who are musicians to every four residences.

Sure! And It's Good

RADIO DIGEST breaks all records in the big Mid-May special, out Friday, May 14, which has been under preparation for several weeks. Station features, fiction, authentic inside Radio news, technical features and pictures galore.

You'll get a thrill out of "Mrs. Pollyblank's Medal," true story of the far north, a mother's heroism in rescuing her drowning babe from icy waters and how she was rewarded. Little "Mike Alpin" will broadcast a thing or two you never heard before. Ever hear of the Wolverine "Ether Busters"? Wild horse and broncs "ain't in it."

The technical editor takes off his coat, rolls up his sleeves and tells the tinkering set owner how to spring houseclean.

The $500 in awards to the lucky sleuths who doped out the last chapter to "A Step On the Stairs," will be announced.

And don't fail to read the next installment of Hugh Fullerton's romance, "Big Rabbit." You'll cross your fingers every time you see cotton tail.

Remember, the big Mid-May special—ON ALL NEWS STANDS MAY 14.

KTAB AND KOA BOTH TO BLANKET SPHERE

STATIONS BLAZE WAY FOR ROTARY CONVENTION

150,000 Members Will Tune In—International Body Meets in June at Denver

Rotarians far and near, representing more than thirty-five countries, are destined to be serenaded by two broadcasting stations in globe-encircling trials May 21 and 26. The Radio greetings which will permeate the air are in preparation for the international convention of the Rotary organization which will be held early in June at Denver, Colo.

The May 21 program, to be radiated on 240 meters by KTAB, the Post Enquirer station at Oakland, Calif., will begin at 4 a. m. Pacific time. This is equivalent to 10 p. m. May 21 in Australia and New Zealand, and 7 a. m. May 20 in the Eastern time band of the United States. The KTAB program will be more in the nature of civic boosting and will call the attention of members of Rotary, Kiwanis and Lions clubs to the new $10,000,000 harbor project at Oakland.

150,000 Members Will Listen

At Denver, however, KOA will devote the whole night of Wednesday, May 26, to a world girdling attempt in honor of the Rotary international convention to be held in the city in June.

Instructions to stand by already have been sent to 2,500 club organizations comprising 150,000 members living worldwide from Europe and South Africa to South America, Australia and the Orient.

Serving as a backbone to this spectacular dusk-to-daybreak entertainment will be music, including patriotic airs of all nations, to be furnished by the best artists available.

A big feature, it was expected, will be messages of greeting to broadcast listeners from ambassadors and high statesmen representing the principal countries to which the mile-high Rocky mountain station will transmit.

Greetings in Native Tongues

As a means of stimulating additional interest among ethereal enthusiasts, these microphone greetings will be given in the native tongue of the country represented.

Special broadcasts have been planned also for Rotarians at sea, who will be en route to America from all parts of the globe to attend the international convention of the organization, to be held in Denver early in June.

KOA's world blanketing attempt will be launched promptly at 8 p. m. Mountain Standard time, Wednesday evening, May 26, and will be continued without a break until 5 o'clock the next morning.

Records show that KOA without previously undertaking an all-night, long-distance broadcasting attempt, has already spanned both the Pacific and Atlantic oceans, having been heard in the state of Canterbury in New Zealand on the west and Birmingham, almost in the geographical center of England, on the east.

BROADCAST CALL FOR MINISTER OVER WBZ

He Hears and Then Telegraphs His Acceptance

SPRINGFIELD, Mass.—What is believed to have been the first call ever extended by a church to a prospective pastor through the medium of Radio, was made recently over the WBZ microphone when the Chase Memorial Baptist church of Springfield, Mass., broadcast a call to the Rev. E. L. Washburn of Penacook, New Hampshire.

The official board of the church met early in the evening and unanimously voted to call Mr. Washburn and at the same time they expressed the feeling that the call should be made immediately. The aid of Station WBZ, Westinghouse, New England station, was sought and as a result, within less than an hour after the board had passed their vote, the call was broadcast.

Mr. Washburn heard the call and telegraphed his acceptance the same evening.

KTNT Puts up New Towers

MUSCATINE, Iowa.—Two galvanized steel towers are being erected at Calliaphone studio KTNT, here. The towers will be erected with a number of colored flood lights about them to flood them at night.

Their Voices Thrill Millions

These are some of the faces of the players who have thrilled millions in the United States, Mexico, Canada and even more distant points in their presentation of the Radio Digest mystery play, "A Step On the Stairs." Jean Sargent (left) as "Mary Williams," WNAC, Boston, and Bernice Berwin (right), KGO, Oakland, Calif. Top, center, is Wm. M. Sweets, WRC, Washington, D. C.

It was a new thing for the General Electric station, WRC, Washington, D. C., to broadcast Radio drama and a special cast of very exceptional talent was recruited. Applause letters by the thousands confirmed their success. Nola Sanborn (left), violinist, and Gertrude Smallwood, pianist. Madge Tucker (above), director. At the right, a tense moment, when the SOS signals are being heard from Pelican Bay. Seated at table are Jean Farnam Petersen, Maurice Joyce and Madge Tucker. Standing, left to right: Walter L. Teach, Wm. M. Sweets, Edward B. Husing, Martin Scranage and John Davenport Long.

On the other hand, the General Electric station, WGY, at Schenectady, N. Y., has been broadcasting Radio drama almost from the time of its first season on the air and in the lower panel are some of the well-known WGY players. Left to right: Dorothy Vrooman (Aunt Helen), Marietta E. LeTarte (Mary Williams), Ten Eyck Clay, director (Frederick Ardwyn), Witter Cook (Graves), Frank Oliver (Tolliver), and George Markham (Cousin William). Mr. Clay (center) and Miss LaTarte (right). WGY is heard overseas.

A Dead Man's Guests in Play

In the Chicago metropolitan area of approximately 5,000,000 "A Step On the Stairs" was presented by the WMAQ Players of the Chicago Daily News. William Ziegler Nourse, playing "Tolliver," had stepped out of the picture as the above scene was flashed. The others are (from left side of table) Robert Graceland (Henry Graves), David A. Watts (John Carton), Viola Roth (Aunt Helen), Ben Adams (Hari Singh), Florence Bayer (Hazel Stanton), Gloria Chandler (Mary Williams), and Wm. C. Boyden, Jr., (Ardwyn). Mr. Boyden portrait at left and Mr. Nourse at right.

William Ziegler Nourse (above) introduced Radio drama to WMAQ, Chicago, nearly two years ago and has gained a large audience for the WMAQ Players. Mace Blynn (below) is one of the stars of the WOR Players for the great New York City area.

The WOC Players, Davenport, Iowa, were directed by Chas. H. Walsh (above) who took the part of "Lawyer Ardwyn."

Few stations have been favored with a real Hindu to play the part of Hari Singh. At WHO, Des Moines, this character was played by Surendra Mitra of Calcutta, graduate of Iowa State university and well-trained dramatic artist. Other members of the cast in the picture are Katherine Atkins (Mary Williams), Myron Thompson (Tolliver), Wallace Van Oosten (Jones), Arliss J. McKim (Graves), and Margaret Orebaugh (Aunt Helen). Bobby Griffin, assistant announcer at WHO, directs the players.

Lower panel shows WOR Players, Newark. (Detailed story here next week). Portrait: left, Evelyn Lewis (Mary Williams); right, Gertrude Kearney (Aunt Helen). Scene: Miss Kearney, Miss Lewis, Vinton Haworth, Mace Blynn, L. Gordon and Brace Conning, director.

Here's Cheer for June Brides

"Now stir in three eggs," says Ellen Rose (above), talking into the microphone as she advises and works with brides in her kitchen studio.

DON'T Worry About Burning the Biscuits, Ellen Rose Dickey Will Tell Newlyweds All About Making Pies, Cakes, 'Neverything Over WLS, Chicago

By HAROLD P. BROWN

MAY—the first month of the bridal season!

These are the busy and the exciting days for the anxious brides-to-be. There are trousseaus to be made and new home furnishings to be considered. In the offices of the big cities, in the homes—city and country—Betty is getting ready for the big event of her life. Mother is worried and dad is melancholy—daughter, the sunshine of the house, is going away to a new nest.

After the great day, the farewells, the bridal trip and then the advent into the new home—and home duties!

Ah! There's the rub—

What will Betty do then, poor thing, if she hasn't had much experience at baking biscuits, bread, cakes, pies, cooking meats and vegetables?

Well, it won't be as hard as it was when mother was a bride.

Betty will have the advice of some of the most expert home makers in the country right in her parlor every day—blind and deaf, perhaps, but not dumb! No prying eyes, no embarassing questions, just straight talk on what to make and how to make it—right from the Radio receiving set.

PROBABLY one of the best known women to advise housewives over the air is Ellen Rose Dickey of the Sears-Roebuck station, WLS, Chicago. "Ellen Rose," is the name by which she is best known to her listeners. She is a real housewife and a mother, not a mere theorist. She makes and bakes what she preaches and has the resources to make sure she is right before going ahead and broadcasting.

Her "Homemaker's Hour" begins at 9:15 in the morning. Her studio is a well ordered kitchen in the Sears-Roebuck plant where the flour, eggs, milk, seasoning and other ingredients are often stirred, rolled and patted as she turns to the microphone and chats neighborly about it to Mrs. Annabelle Peters of Jasperville, Maine; Mrs. Marion Carter of Boxwood, Virginia; Mrs. Mabel Field of Hastings, Michigan; Mrs. Irving Hill of Tacoma, Washington; Mrs. Catherine Dwyer of Sunmount, New Mexico and a million or so others who tune in for the "Homemakers Hour" at their homes in the areas between those points.

"People sometimes ask me," said Mrs. Dickey to her interviewer, "how a busy housewife can take time out of her early work to listen to a Radio talk at 9:15 in the morning. But it is very apparent that she does. Many not only listen but they make notes and take down the details—especially young brides just learning how to cook and the more experienced housewives who want to find new ways of doing things that they have been doing for years. The thousands of letters prove that they do.

"ONE morning I asked the members of our circle if someone would send me a good recipe for hassenfeffer or any other way for cooking rabbit.

"The deluge of recipes for cooking rabbit almost swamped me. It was simply astounding. I picked out the best of them and made up a special bulletin for cooking rabbit. But the prize contribution came one day in a big bulky package—a poor little bunny all skinned and dressed and ready to be made into hassenfeffer."

During the sausage season she presented her circle of listeners with her favorite sausage recipe. A very, very good recipe, she thought. But regardless of her own opinion there were a thousand or more other women who possessed equally prized recipes and one and all sent them to her, some with samples to match.

So, never you mind, Betty dear, when it comes around time to be thinking of that first dinner—what to do and how to do it. Just dial in 344.6 meters at 9:15 in the morning and Ellen Rose will help you. And if there is anything special you want to know that she doesn't happen to mention, drop her a line in care of Radio Station WLS, Chicago, and she'll either answer you over the air or by mail. It won't be as hard with the Radio as it was when your mother was a girl.

For fifteen years Mrs. Dickey was a "home woman," keeping the hearth for her husband and son, and when circumstances forced her into the business world she capitalized on her knowledge of kitchens and children.

When she talks to the farmer's wives she knows her listeners and their problems from her own personal experiences. Her childhood was spent near Saginaw, Michigan, where her father owned and operated fourteen farms. It was her chief delight to join her father on his trips to these farms where she visited in the homes and was invariably treated to the goodies that the motherly housewives had on their pantry shelves. Many of these families are today her most ardent listeners and she receives frequent invitations to "come for a visit and stay as long as you can."

Lovely pies and exquisite dainties are received by Ellen Rose (left) from the listeners in her Homemaker's Circle. Mrs. Henry Endecavagch (below) of Lemont, Ill., is typical of thousands who are members of this circle conducted by Mrs. Dickey.

"High-brow," and Proud of It

K. M. TURNER, Discoverer of Hollow Carbon Granule for Hearing Devices for Deaf, Applies Invention to Modern Microphone with Surprising Results. Builds Radio Station KMTR and Presents Select Classical Programs.

By G. L. KING

THE afternoon heat of an August day, combining with the steam of the Seine, had wrapped a stifling blanket around the little town of Vincennes, France, driving the shopkeeper back into the cool recesses of his store and the housewife out into the cobbled courtyard where the house cast a shadow that at least gave the impression of coolness.

Apart from the town and near the bank of the stream itself stood an unpainted frame shack, an oddity in a town of stone buildings, in which a middle-aged man, collar off and in shirt sleeves, toiled on slowly in spite of the heat and humidity, too deeply enthralled by the fascination of his work to heed the glaring sun outside and the almost unbearable temperature inside the small room. In one corner stood a small electric furnace and the various workshop appartus of the scientist were scattered about on benches in apparent disorderly array.

The middle-aged man moved even more slowly at his work. Finally, with a glance at the clock, he stepped over and turned off the electric furnace, the absence of whose hiss and sputter seeming only to accentuate the heat of the day. Then an impatient wait until the furnace could be opened and the tiny brick of material taken out. The crust was carefully broken in the center of which was a tablespoon of black pellets, not synthetic diamonds which are usually associated with electric furnaces, each about the size of an ordinary pinhead. These he placed very carefully on a piece of white paper, selecting a half dozen or so to put on a slide under a powerful microscope. The examination under the microscope took only a minute.

THEN the man sat down heavily in the only chair in the place, tilting it back to get an approach to the comfortable angle of the American rocking chair, and rested as only body and mind can rest after a big task is finished. All the afternoon he sat there as the sun slowly crept down to the horizon and the first cool breath of evening came, impervious to the changing temperature, his surroundings, hunger or time, dreaming on and crushing those tiny pills of carbon that had just come from the furnace between thumb and forefinger.

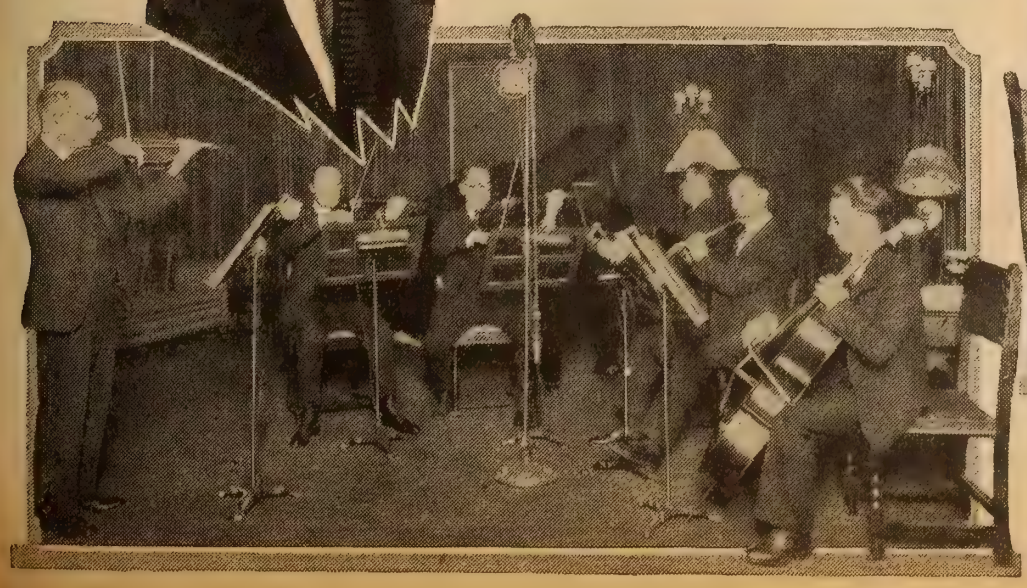
The rather heavy set man was K. M. Turner and on that hot August day in France Radio broadcasting, as we have it today, was made possible. The little black pellets that the furnace had turned out were hollow carbon granules, without which nearly every broadcast station today would be useless, for the carbon pellets are the very heart of the carbon-type microphone so universally used.

But K. M. Turner's thoughts that day did not include the wonder of Radio broadcasting. His interest at that time was in discovering some means to aid the deaf, and the hollow carbon granules meant that the last of his work was done. Upon his return to America the General Acousticon company was formed to manufacture and sell those instruments that have meant so much to the deaf and near deaf, the acousticon. When next you see one of those triangular shaped, flat backed cases upon a person's coat, think of it as a miniature Radio station and the real father of Radio as it is today.

Not only did the discovery of the hollow carbon granule mean a Godsend to the deaf, but the development of the dictograph followed, which has since so spectacularly played its part in crime detection and prevention. Nor did it stop there for the development has gone on and on through a variety of devices, each one of which has meant an additional service to humanity in some form or other. (*Continued on page 13*)

At the top is K. M. Turner, whose careful research made possible the finest sensibility of modern microphone, also head of Turner Radio Corporation. It was Mr. Turner's idea to make KMTR distinctive as "high brow."

"Dad" Carlton King, (left), former motion picture actor and producer, mans the mike at KMTR and supervises the station in general. Below is Loren Powell (left) and his famous KMTR orchestra composed of picked men from Los Angeles Philharmonic orchestra. They are on the air nightly.



But KMTR is not too etherial to afford an hour for the children as may be seen in the above picture. This particular feature is conducted by Miss Georgia Simmons who formerly conducted the Wren's Nest at Atlanta. Above, at the left, is Miss Simmons in negro mammy make-up telling Uncle Remus stories. The other picture shows her as she is. The children in the studio with Miss Simmons help her to present the Children's Hour in a natural and realistic manner.

BIG RABBIT

by Hugh Fullerton

A MONTH had passed without pay checks when the financier supposed to be backing the new Atlanta daily called all bets off and said he was through. Wen Lindsay and Dick Borton, imported for heavy reportorial duties and to give the sheet New York style, found themselves broke and jobless.

"But why worry? Never trouble trouble till trouble troubles you," counseled the alert and optimistic Borton with one of his characteristic grins. "Something always turns up for the wide-awake newspaper man."

No sooner spoken than done. The secretary of one of the leading bankers knocked at the door and announced that his employer would like an interview with Lindsay. The interview ended with $1,000 advance expense money, jobs for both Lindsay and Borton and an assignment to locate Colonel Gaskill, a leading citizen, supposed to be laid up with gout. Lindsay called at the colonel's home where he met Roberta Lee Tonneson, the colonel's ward and with whose fortune the old warrior had been gambling. He also had the opportunity of furthering an acquaintance that began with love at first sight, when he had rescued the girl's dog from beneath a passing automobile. Roberta told him the colonel was mysteriously absent and that she feared a negro servant by the name of Trimble, believed also to wield a strange power over Colonel Gaskill. She promised to send him a note if further developments threatened her safety.

With a heart yearning for the girl and fists itching to smash Trimble he left the house and returned to his chum, Dick Borton.

CHAPTER IV

The Battle in the Sleeper

BORTON lay sprawled over his bed when I returned to our room, a pile of books on the floor, and half a dozen of them scattered across the room as if he had thrown them. He glanced up as I burst into the room and grinned.

"Did it make a hit with the fair damsel?" he inquired lightly.

"It?" I questioned, rather puzzled.

"Yes, the tie," he responded, "it is one few girls are able to resist. I hope she liked it. Is she beautiful, superb, matchless, like all the others of yours have been—for two weeks?"

"Shut up," I flared angrily. "What are you doing? Wasting all this time?"

"Just now," he answered slowly and with his most tantalizing grin, "I am reading up on the negroes of America, their origin, habits, superstitions, and especially trying to trace the tribes from which negroes in certain sections of the South were stolen. How did you make out?"

As briefly as possible I told him everything that had transpired. To my relief he became serious at once.

"It looks worse and worse," he remarked quietly. "I thought as soon as I saw that fresh nigger that it was serious."

"You managed to see him then?"

"Yes, I bought a lot of vegetables, meats and fruit, borrowed a market basket and went to the back door to start an argument with the old negro woman who cooks. I insisted on delivering the things and she said she did the marketing herself and had not ordered them. I kept disputing with her until Trimble came to see what was the matter."

"I heard him go. It helped us talk," I interjected.

"I opened up on him just to draw him out, and he certainly is breeding trouble for himself. The old woman is scared to death of him and made hoodoo marks on the floor while he was talking. Trimble had me puzzled so much so that I went to the library and held up the librarian for all these books.

"Didn't he strike you as an odd type?"

"Yes, both in looks and in actions. He holds himself better than the other negroes, and equal or superior to the whites."

"I THOUGHT I knew the southern negro," said Borton earnestly, "but this one is a new kind to me. He isn't Kaffir; he isn't Guinea; he isn't Hottentot. His ancestors came from one of the central African tribes. Some of them must have crossed either with the Creeks or with the Seminole Indians. He hasn't a drop of white blood in him.

"You see," he went on rapidly, "the negroes caught by the slave hunters were from the coast tribes, mainly, later from the tribes further inland. If the cargo was all from one ship, the chances were they would be sold in one district, so they intermarried and retained many of the tribal peculiarities. You will find a lot of plantations where the owners did not believe in selling their slaves, where the peculiarities of accent, the skin tones, and the traditions still survive. This Trimble is uncommon. I can't quite figure his breeding."

"He calls himself King Solomon and acts as if he thought he was of royal blood," I observed.

"That is common enough," laughed Borton. "Many good looking negro men set up the claim that they descend from African kings, and they often pretend to chieftainship. This one may be the genuine article. He has an unusual bearing. By the way, did you notice any rabbit marks?"

"Rabbit marks?" I asked, starting with surprise. "No— not about the negro; but I saw rabbits everywhere in the Major's house."

"Where? What were they?" demanded Borton, oddly agitated, and leaning forward eagerly.

"I noticed the Major's note paper had a rabbit printed on it, the andirons in the fireplace were rabbits, and the book mark had a rabbit embroidered on it. Besides there is a rabbit's foot, a great big one, in a case on the major's writing table. I thought it was a funny idea."

"I should say it is funny," snorted Borton. "You idiot, didn't you ask the girl about it?"

"What the deuce are you driving at?" I fired back angrily. "Think I pay attention to every fool superstition? It's probably some whim of the Major's like the rabbit foot bringing luck."

"OH LORDY! What's the use?" groaned Borton. "You fellows who never had to live among them think negroes are simple, harmless jokes. Understand this; the rabbit's foot means something to a negro who remembers the traditions of his African forefathers. This affair looks worse the more we go into it. And you were so confoundedly upset by the sight of a pretty girl—O well, what's the use? Let's get down to the Piedmont, get some dinner, and see what we can learn about Gaskill."

We both were rather irritated, but, following our long-established custom, we avoided discussion as we went to dinner. We learned little except that Major Gaskill was a hard drinker at times, and a lavish spender of money when in funds. It was nine o'clock when we returned to our rooms. The landlady was waiting for us with a note.

"Old darky woman left it," she said, "about half an hour ago. She said it was important."

I tore open the note hastily, recognizing the writing I had seen for the first time that afternoon.

"They are taking me away tonight," the message ran. "Trimble found one of the notes we dropped in the library. I heard him and Tillie, my maid, planning to take me somewhere. Please try to stop them. Don't call the police but come quickly. They spoke of taking me south. They do not know I overheard, so mammy Hannah will bring this. Please come quickly.

The signature was a scrawled monogram. Before Borton had time to read the note I was imploring him to hurry, raging at the carelessness we had shown in not being at hand when Mammy Hannah arrived with the summons. The blow had fallen not only unexpectedly but much quicker than we had anticipated.

"Call a taxi," directed Borton, who was preparing for action with quiet haste. "Take fifty or sixty dollars in small bills off that roll of yours and conceal the rest somewhere in your clothes. Keep cool. With you in a second."

He was getting ready as quickly as he would have done if summoned to cover a big newspaper story. I could not help admiring his calm manner, and it did much to help me to recover from my excitement.

"RING up the house first," he ordered, while gathering a few clothes up in a small satchel. "See if they have started. Then get the station and learn train times."

I had already summoned a taxicab and, perspiring with excitement and anxiety, I called the Gaskill mansion time and again, urging the girl at the telephone to continue ringing. No reply came.

"They probably have started. Get the taxi office again."

"Hello," I said when the taxi office at the Piedmont replied to my second call. "Have you sent a cab to Major Gaskill's house?"

"Yes, started half an hour ago," came the quick unsuspecting reply.

"Come on Dick," I yelled. "Don't wait for the station call. They left less than half an hour ago. There's a bunch of trains that leave about ten o'clock. We'll catch them at the station."

Spurred by offers of higher pay, the taxi driver sent the car at reckless speed through the downtown district. He swung around the corner at the Maxwell and drew up at the edge of the tracks at the end of the station. We threw him a bill and together raced almost the length of the station.

"Reporters," we explained breathlessly.

"We must catch them," I said, handing him some money.

Borton already had passed through the gate and was sprinting along the tracks in pursuit of the slowly moving train. I followed at top speed. Luckily for us the railway tracks run at a grade for a few blocks compelling a slow rate of speed. Before the train had begun to gather speed for the dash through the tunnel cut, Borton had swung onto the rear platform of the private car, and held out his hand. I leaped, he grasped me and after a moment's struggle my foot found a hold and an instant later we clung to the steps. Fearing to be brushed off from our precarious footholds we clambered around over the couplings; and a moment later we stood in the observation platform, panting, perspiring, wondering if our presence on the car had been observed. To escape being seen we stood at either side of the door leading into the car. By peering around cautiously we could see the reflection of light but the view of the interior of the car was cut off by a drawing room partition.

"NOTHING to do but go in," panted Borton after we had partially regained breath. He tried the door carefully. It was locked by a spring lock inside but the upper part of the glass portion was lowered and by reaching in Borton managed to shove it down. He pushed the catch and the door opened.

"Come on," he whispered, and led the way cautiously, advancing along the narrow corridor. At the turn we stopped. Toward the front end of the car we could see Trimble standing. With him were the Pullman conductor, the porter, and a brakeman. Evidently they were settling the matter of transportation, for the conductor had his back toward us and was checking the tickets. As he counted the slips of paper I heard him say, "Four."

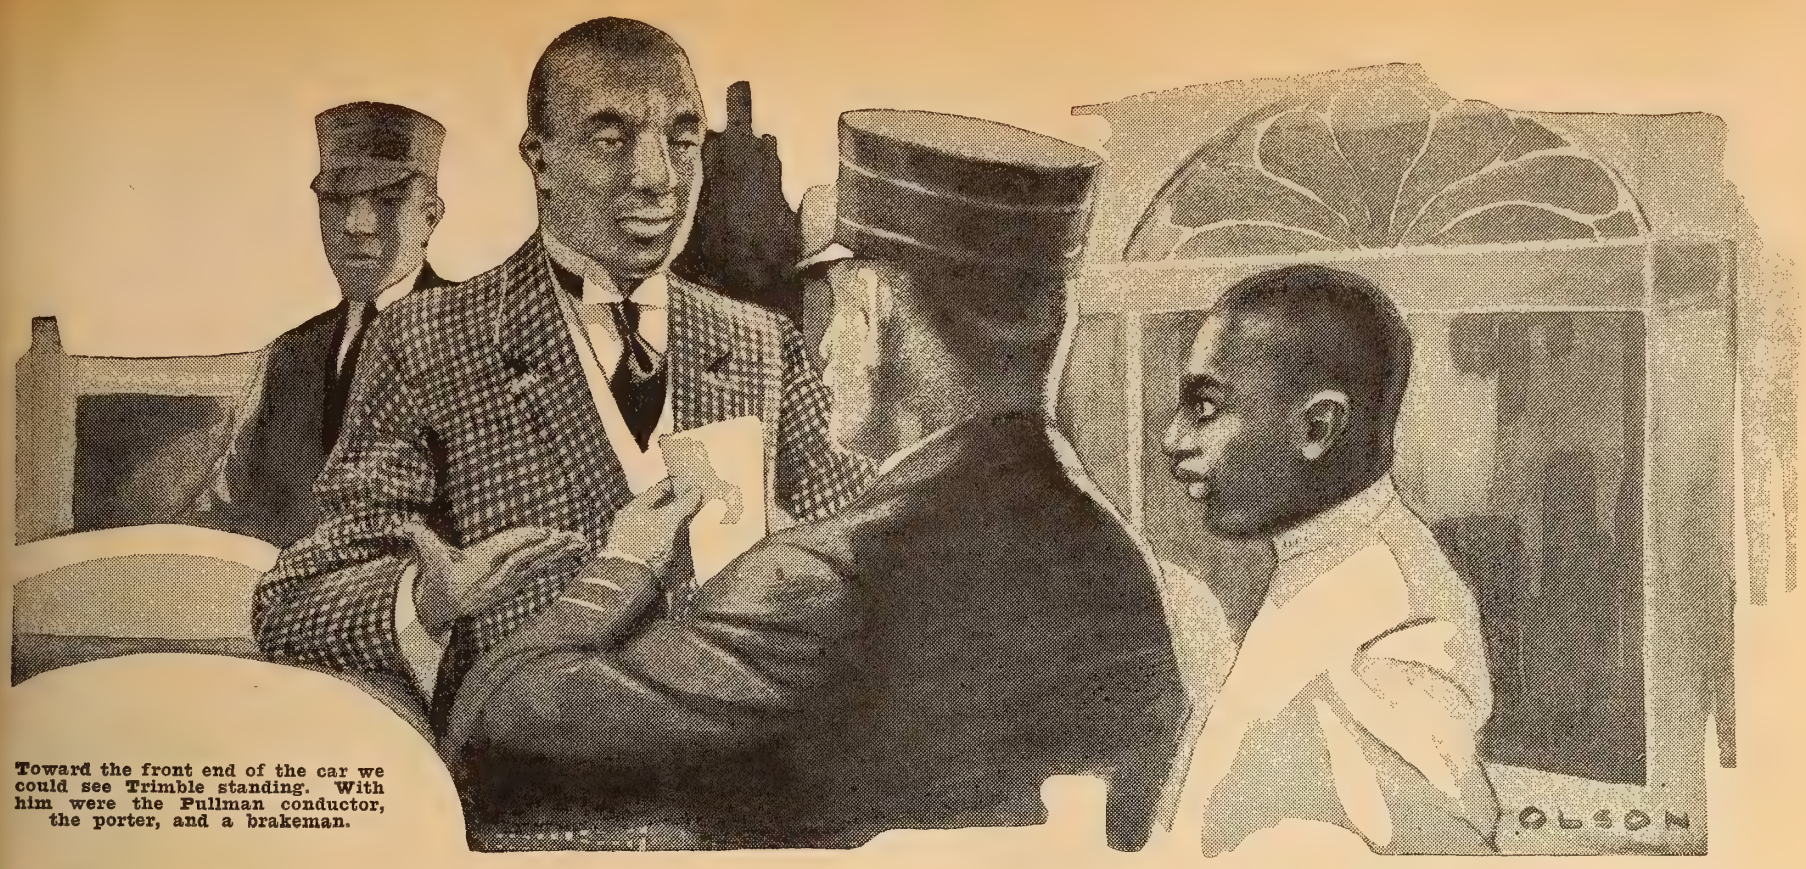
"No good," whispered Borton, drawing his head behind the angle. "We'll have to hide somewhere until the trainmen get out. We can't get past Trimble. If we can reach the trainmen long enough to explain, they'll help us. If they catch us now, they'll take us for tramps and kick us off. Let's hide until the coast is clear."

Borton tried the door of a stateroom cautiously, but found it locked. The next one, fortunately, opened.

"They're not going to use this one," he whispered. "Hide under the berth. Luckily this is an old-style car and the berths are high enough to get under."

"I'll slip into another room and hide there. Take hold of the end of this

"We're in Jacksonville, Florida," he (Dick) announced. "And all my money is gone except what is sewed in the lining of my coat."



Toward the front end of the car we could see Trimble standing. With him were the Pullman conductor, the porter, and a brakeman.

string. When I jerk it you come and come a jumping. I'll signal you as soon as the trainmen get out."

THE door closed quickly and I felt the string tighten. Then, after a minute, it remained motionless and I knew Borton had found his hiding place without being detected. Looking around for a place to conceal myself I doubled up and backed under the berth, letting the folded blankets drop to conceal my hiding place. It seemed hours that I waited there in the darkness expecting the tug on the string. I was alert in every muscle, starting at every noise.

It was hard to restrain myself, and the thought of Miss Tonneson in the power of the insolent negro made me grit my teeth and curse under my breath. I vowed to exact personal vengeance. Once, I thought, I heard sounds in the car, rising above the rumble of the train, now tearing along at full speed. I could catch the murmur of voices once in a while which seemed that a sharp, imperious voice was giving orders, and a softer one, which must have been Trimble's, was answering. My fears were relieved.

The remembrance of the fourth ticket confirmed my belief that Major Gaskill must also be on the train. I was just getting ready to crawl out and investigate for myself, when I tugged at the string, and instead of an answering pull, the string came toward me without resistance.

At that instant the door of the stateroom opened quickly. I could see a pair of feet, shod in patent leather with white spats, and I knew it was Trimble. Not until that instant did I realize at what a disadvantage a man is placed when he hides under a berth. I tried to prepare for a spring, to take the negro unawares in case he discovered my presence, but scarcely could move.

"I thought I heard something in this room," said Trimble.

"No sah," responded the porter from the passageway. "Ah straightened up dat room mahself, jes befo' de train pull out. No one ain't in hyah."

"You said no one was in the other room, too," sneered Trimble.

Like a flash I realized that Borton had been discovered. I struggled to get clear of the berth. Trimble had half stooped, to look under the berth, and my first movement revealed my presence. I made a desperate grab at his feet. One hand gripped his leg. I pulled myself clear, strove to seize both his legs to bring him to the floor, and had almost dragged myself to my knees when a terrific kick on the jaw rolled me, helpless and groggy, on the floor of the car.

"That's the other one," said Trimble angrily to the porter. "How did he get in here? I'll fix this one."

My dazed brain was struggling to regain command of my paralyzed body. I felt a sharp sting in my arm. Dimly I realized that the negro was using a hypodermic needle. I fought blindly to reach him. Then a great weariness overcame me. My body seemed to die.

"That will fix him," I heard the negro say, his voice sounding from afar. He turned me over. A sharp exclamation of surprise broke from him, and a vicious kick that seemed to drive in my ribs followed. The kick half awakened me from the lethargy that deadened my muscles.

"That one was at the house today," I heard him say angrily. "Nigger, am I?" he kicked me cruelly. "Trimble, eh?" He kicked me again.

Then the rattle of the wheels on the fish plates sounded a lullaby and I sank into unconsciousness.

CHAPTER V

Seeking the Rabbit's Tracks

WHEN I regained my senses I was sitting bolt upright on a grassy embankment at the side of a railway track. Before me, more than a mile wide, stretched a magnificent river. A white, beautiful, ocean-going yacht—flying a strange pennant—rode at anchor at the turn of the river above. A long bridge, yellow and spidery, spanned the water and disappeared into the pine woods on the opposite shore.

A ferry boat was chugging its way across to a big amusement park. On one side as far as the eye could reach the curving shore was lined with magnificent houses, the lawns spreading down to the water's edge.

At many of the private docks launches and yachts were waiting. In the other direction a city of towering spires, tall hotels, and magnificent public buildings sloped gently back from the rows of docks along the river's edge. Beyond the city the river turned and widened into a great expanse, upon which large ocean liners and rust-red tramp steamers lay at anchor.

I glanced around, slowly striving to remember what had occurred. A few feet from me was Borton, stretched upon his back, unconscious, although I could have sworn his eternal grin was plastered on his handsome face. With an effort I rallied and crawled to where he was lying. I shook him; but the only effect was the quickening of his deep breathing.

I was weary and aching in every muscle. The places where the negro had kicked me pained until it was an effort for me to move. My head ached and my mouth seemed kiln-dried. I kept shaking and tugging at Borton, calling his name, and after what seemed a long time he opened his eyes. Then he sat up and looked around. Gradually the astonishment on his face gave way, and, looking at me, he grinned. It would have been laughable to anyone in a mood for laughter.

"Where are we?" he asked with the idiotic expression of a half awakened man.

"I don't know," I responded weakly.

We sat and looked at each other foolishly, and finally, as if with an effort, he aroused himself.

"Let's get to the river and wash. The water will help," he suggested.

WE WERE so weak and sick that crawling down the ten-foot embankment to the water's edge was heart-breaking effort. Every muscle of my body protested; but finally we reached the water and plunged our hands and arms into the cool depths. It served to arouse our deadened faculties.

"Salt," commented Borton as he spat out some water. "We've reached the ocean somewhere. How did it happen?"

I told him my final experience, and the encounter with the negro.

"He got me quick," commented Borton, his chin setting with determination. "I left the door open in order to hear the trainmen go out. They quit talking and I stuck my head around the partition to see whether they had left the car. Trimble was right on top of me. He kicked me and I went to sleep. He must have doped me too."

We made the best toilet possible, and feeling much revived, crawled back to the grassy spot to rest.

"We're a fine pair of detectives," said Borton with sarcastic emphasis.

"We are not," I agreed bitterly.

"I wonder," asked Borton after a time, "whether we are good enough at this line of work to find out what city we are in?"

With an effort which left us almost exhausted we climbed up to the embankment, resting every few feet, and finally dragged ourselves onto a bridge over the railway, a bridge congested with traffic, which proved we were on one of the main trade arteries of the city.

"I'm not ordinarily inclined to curiosity," asserted Borton whimsically, "but really, I would like to know what city we are in."

"Ask someone," I suggested wearily.

"Not for me," he replied, grinning painfully. "If I should the man would either think he was being kidded or that we were crazy. He'll either swing for the jaw or call the police. Wait a minute!"

Inspired by a sudden idea he crossed the street, stopped at a news stand and examined the papers, returning slowly and somewhat disturbed in mind.

"We're in Jacksonville, Florida," he announced, frowning. "And all my money is gone excepting what is sewed in the lining of my coat. How is yours?"

I made a hasty inventory and discovered with much relief that the bulk of the money Kincaid had given me was safe.

"MINE's all here, excepting some small bills I put in my trousers pocket. They overlooked the big roll."

"Let's get freshened up and plan the next step," suggested Borton. "At least we are nearer the scene of action than we were in Atlanta, even if we have lost the trail."

We signalled a street car and, in a few minutes, reached the business center of the district. We found a table on the balcony at the Seminole. A pot of coffee, dripped to double strength, revived us and, while eating breakfast, we studied the strange adventures of the preceding twenty-four hours, and made plans for further pursuit of Trimble and the missing girl. "It's a blind search now," said Borton, although from the set of his jaw it was plain he was less discouraged than I was. "We'll have to cast around to find the trail. The best clue we have is that car I found before going to sleep last night," he grinned as he said it, "it was a private car." Major Gaskill heard from Trimble that there was danger of exposure, and the major slipped to Atlanta, used his influence and got the car.

"I heard the conductor say it was the best that could be found at short notice. I'll trace the car. You go to the telegraph office and see if you can learn whether Trimble or Gaskill did any telegraphing. After that go to the water front and find what boats have left. Ask for a boat for Major Gaskill, two girls, and two negro men abroad leaving early today."

"Two negro men?" I asked, surprised.

"Of course. The porter never would dare go back to the job after what happened in his car. Either he is in hiding or has joined Trimble and, I think, from the control Trimble had over him, he is with them helping Trimble."

"Control?" I asked incredulously.

"Yes. Else he would have raised an alarm. Trimble put the cunj on him."

"Put the cunj?" I repeated, puzzled. "Oh, you mean conjured him? You don't believe in that sort of thing really, do you Dick?"

"LISTEN, Wen," he said, leaning forward and speaking so earnestly I almost laughed aloud, "make up your mind not to laugh at that sort of thing. It may sound foolish to us but it is really serious. Just after I crawled into the stateroom Trimble showed the porter something. If you ever heard a terrorized, overawed man it was that porter. He begged and whimpered and said he would obey the sign."

"What sign?" I asked, impressed but stifling a desire to laugh at Borton's seeming belief in negro superstitions.

"I don't know, I wish I did. I only suspect." He seemed worried and anxious, lowered his voice almost to a whisper, glanced around the room, and, leaning over the table toward me, said:

"I think it was the sign of the rabbit."

I laughed aloud. It was ludicrous; so trivial in view of the seriousness of our errand I could not help it The idea of big, handsome Dick Borton, after years in the newspaper game, which is the surest dispeller of anything excepting realities, being overawed by a superstition was too much. In an instant I saw he was hurt and offended.

"Excuse me, Dick, I didn't mean to laugh, but it sounded so funny."

"Funny?" he repeated, shoving his chair back in irritation. "Let's get to work. But if I'm not mistaken, before we get through with this case you will not laugh at rabbit signs."

Unappeased, he stalked stiffly out of the hotel and I limped away to perform my portion of the task. After a brief skirmish around the telegraph office on Bay street, I encountered an old friend, a telegraph operator who had come South for his health and was working at central. I explained to him the seriousness of the situation and, after we had consulted with the superintendent, we violated the rules and I read the messages. Three had passed. One from Trimble signed "King" to Major Gaskill warning him of danger. One from the Major to Trimble, telling him to bring Miss Tonneson to a car that would be waiting; another saying "Ready tonight," signed by Gaskill.

(Continued on page 28)

BROTHERS ARE YOUNG SCHOOL BOY ANNOUNCERS OF WDAF AND KFKU

KANSAS CITY, Mo.—Of course, you've heard of the Patts. You know, Ralph (left) and John (right), the school boy announcers at Station WDAF and KFKU, or you're a stranger on the air lanes of the West. Ralph is assistant announcer for the Kansas City Star broadcaster and John is the assistant director and chief announcer at the Kansas University station. Nice young men, too, and their ages, instead of handicapping them, seem to add the wim, wigor and witality of youth to the programs of the stations.

But here is another distinction. Neither can sing, nor do they toot horns or test the patience of the mike in any way. Just think! Two announcers who know they can't sing, and don't try!

PHOTOS LEAP OCEAN IN TWENTY MINUTES

POSSIBLE TO OPERATE ON COMMERCIAL BASIS

Radio Corporation and British Marconi Company Cooperating in Development of Invention

PLYMOUTH, Eng.—If the expectations of Richard H. Ranger and the Radio Corporation of America are realized, photographs will be transmitted across the Atlantic ocean in twenty minutes time at a cost that will permit it to be done on a commercial basis. Mr. Ranger is an official of the Radio Corporation and is now in England installing the apparatus and equipment, and plans on transmitting photographs the early part of this month.

The British Marconi company are cooperating with the Radio Corporation in the development of the device, which, the inventor claims, transmits pictures five times faster than any method now in use, whether by wireless, Radio or cable. Due to the simplicity of its functioning, the device does not depend upon any artist or draftsman at either end. The reproductions are built up simultaneously by a special synchronating device which completes the pictures as soon as the transmission is finished.

For General Use

According to Mr. Ranger, it is planned to base the rates of transmission on a scale of fifty dollars for twelve square inches. Although it is probable that newspapers will be the largest purchasers of the service, the invention will undoubtedly prove valuable in the sending of signatures and other reproductions needed by private individuals or business organizations.

The invention is based on the reduction of "picture impulses" necessary for reproduction from about 20,000 per square inch to 4,000. This is the main factor in quintupling the speed, efficiency and economy, and making the transmission commercially practical.

The synchronating mechanism is controlled by tuning forks and pendulums pick the light and dark of the picture, analyzes it in terms of impulses and then by an almost instantaneous process builds up the same impulses on the other side. Two recent trials between New York and London and Honolulu and San Francisco, were successful.

AUSTRALIA? EASY! BUILD RYAN SUPER

HEARD Australia yet? Now seems to be the time if you don't mind staying up late or awakening early to tune in. Another reader, F. Bignell, living at Regina, Sask., Canada, reports:

"I have been hearing 3LO, Melbourne; 2BL, Sydney, and 4QG, Brisbane, Australia, nearly every morning for two weeks. The time I listen in is from 3 to 5:30 a. m. Mountain time. I heard 3LO announce on two occasions that a big celebration would take place on Returned Soldiers' Day, April 25, that the parade would take a half hour to pass a given point, and that the services would be held in the exhibition building. I am using your Mr. Ryan's Simplest Possible Super-Het, which I built myself from your directions, and a loop aerial."

Izaak Walton League Will Enjoy "What Price Trout"

GRAND RAPIDS, Mich.—Brrrrrrr! (the alarm clock). "Wake up, John! It's 4 o'clock." (from his wife). "What for?" (this from sleepy Mr. Brown). "It's May 1," rejoins his better half. Yawns and squawks. Business of arranging tackle and hunting for mislaid favorite line.

Thus starts Wood's "What Price Trout," a fishing presentation celebrating the opening of the trout season in Western Michigan. The story of a day's fishing expedition, in the family flivver, up trunk line M54 to one of Michigan's famous trout streams.

The trip starts promptly at 9 p. m. Eastern time on May 3. "What Price Trout" is the ninth Mills-Wetzel presentation from the Furniture Capital station here.

Oklahoma Station Continues Fight in Radio Slander Suit

OKLAHOMA CITY.—The National Radio corporation, operating from Station KFJF here, recently entered a motion in the state district court to set aside a $20,000 default judgment rendered against it in a case in which C. W. Fries, undersheriff of Oklahoma county, charged slander. The action was thrown out once on a demurrer, and counsel for the Radio company said they were not advised that it had been reinstated. They set out that they are prepared to make a defense and would have done so had they known the status of the case.

SHORT WAVES

By Marcella

A great many feminine hearts are a'flutter over Norman Brokenshire, of WJZ. Too many, it seems to me, are curious for me to keep his personal habits a secret any longer. Well, Norman (you see I call him by his first name because he and I are great friends), is a very likeable chap. Born in Murchison, Ont., Canada, about 28 years ago, he grew up more or less like Topsy and migrated to Cambridge, Mass., in early youth. Once he was a mechanical draftsman at Pittsfield, Mass. Then he was a doughboy during the world war. After the armistice he was selling things in New York—an occupation he could gather no love for—and one day he noticed a classified advertisement for a Radio announcer in a newspaper. He made the grade from out of a crowd of 500 replies. For a long time at WJZ, he was transferred to WRC, Washington for nearly a year. Then when the R. C. A. decided to open a superstation at New York to take the place of old WJZ, they called their best announcer, our friend Norman, back to handle the station. And he's still there. He's slightly under six feet tall, weighs about 165 pounds, wears a cute little mustache, and has romantic, curly, dark brown hair. And yes, J. H., Rena and Frances, he is single!

* *

Says Mrs. M. J. E., "Wish you would write a little something about Ellen Rose Dickey of WLS. I like her a great deal and have been looking for a feature writeup of her in your women's section." Your prayer is answered in full. Just turn back to page six and look. We wouldn't do that for everybody, you know, but only our best friends.

* *

More about George Hay? After reading what I told you two issues back, you certainly should know almost everything. Well, the reason he left WLS, if you must know, is perfectly admissable. He likes Tennessee very much, WSM being there, and besides, because he likes to pay income tax, and he would have to pay more in the position WSM offered him, he accepted. What did he do before he became an announcer? He was a newspaperman. His experience in this line was extensive, and he still writes a corking good feature story. Look at my column in the April 17 issue for more details of his looks and life.

* *

Wendell Hall is headin' South. Towns to be made, he tells me, include Charlotte, N. C.; Atlanta, Ga.; Memphis, Tenn.; Dallas and Fort Worth, Texas; Nashville, Tenn.; Hot Springs, Ark.; San Antonio and Houston, Texas; New Orleans, La., and Jacksonville, Fla. His "Little Girl from Chicago" is accompanying him.

* *

Clyde Hager, formerly of WMBB, Chicago, is now out in Hollywood directing the studio destinies of the fourth movie colony to be on the air. KFQZ is the station, operating on 226 meters, or 1330 kilocycles. The studio is located in a sumptiously furnished California bungalow in the heart of the Hollywood residential district. Mr. Hager thinks he has one of the prettiest little studios in the country and is completely sold on palm trees, orange blossoms and Mack Sennett bathing beauties.

TIME SIGNALS WILL AID GOBI EXPLORERS

SPECIAL RECEIVER TAKE TO TUNE IN ON KDKA

Intrepid Desert Expedition Will Depend on Signals for Making Maps and Keeping Location

PITTSBURG, Pa.—When Roy Chapman Andrews and his co-workers from the American Museum of Natural History set out from Peking, China, April 15 on their third Asiatic expedition, the technical staff took care to load their prized Radio equipment on the back of their most trusted camel from the herd of 150 going with them into the unexplored wastes of the Gobi desert.

The scientists, who on returning from their last expedition brought news that they had found eggs ten million years old belonging to the Dinosaur, are setting forth this spring with two principal expectations: They hope to make discoveries even more notable than pre-historic eggs and to keep in touch with Westinghouse Station KDKA, here, whose time signals, they declare, will be of invaluable aid to the topographers in mapping and determining their latitude and longitude.

Time Signals Important to Explorers

Word concerning the expedition's Radio plans is contained in a letter written by J. B. Shackelford of the technical staff to G. Dare Fleck, program director for KDKA.

To what extent the explorers of the desert will rely on KDKA's time signals is emphasized by the scientist who writes that they are carrying a receiving set built especially for long distance reception from this station.

"Music, news from home and other broadcasts will be welcome," he says "but most welcome of all will be the time signals from KDKA."

KDKA has received numerous letters commenting on the value of the time signals, particularly to vessels along the eastern coast and in the Gulf of Mexico. By means of this service Radio aids the mariners in keeping their correct bearings and safeguarding them against accidents along the coast.

Yes, John, the MacDowell sisters, Grace and Edith, still sing at WFAA. Yes, they still make records now and then at Kansas City. When I asked them if they were married or single, they replied by saying "Both." Which evidently means that one of them is and the other isn't, or both are. We think they mean the latter, for they are too interesting to stay single. Jolly, good-natured and pleasing, the two have thousands of Radio friends. As for a description of them, let them tell you:

"You can see by our pictures that we are not 'flappers,' as a great many young men seem to think, according to their letters. However, our Radio audience loves us in spite of it."

All those in favor, say aye.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

a STEP ON the STAIRS

CHAPTER NINETEEN

The Killer

IT CANNOT be said that the late Jeremiah had been a popular figure in the community of Pelican Bay. As resident member of a family that had contributed so much to the history and wealth of Portsmouth and the bay shore he had moved in a rarified atmosphere, known for his ancestral associations rather than for anything that he himself said or did. Few indeed of the dwellers along the bay road or in the estates more closely adjoining beyond the cedars had ever seen Jeremiah at close range until the day when the whole county turned out to pay him honor and witness his departure from the old manse via the front door.

But for all that there was not a man, woman or child in the region who could not have recited every detail of his pedigree, biography and personal habits. The Turners had been a sort of hereditary legend in Pelican Bay for so long that their deeds had been woven into fireside tales and even cradle songs. And the community had felt a personal loss in his tragic removal—a loss for which there was no widespread friendship or great good will to account.

Something of the public attitude on the matter was reflected in the faces of the haggard guests, the state troopers and the secret service operatives as they stared in amazement at Peleg Turner, come back from the grave so opportunely to confess a fratricide.

"YOU killed him?" breathed Everett almost unbelievingly. "You understand what you are saying?"

"I understand perfectly," replied Peleg with little or no show of emotion. "I came home unexpectedly the night before the killing. Afterward I went away and came home again. I shot him through the head over there on the hearth and a jolly good shot it was, too."

"Don't talk like that!" broke in Ardwyn hoarsely. "You don't know what your are saying, Peleg. Mr. Everett, Captain Cass, don't listen to him. The man is crazy."

"No, Ardwyn," Peleg interrupted with a shake of his head. "You are jumping at conclusions again. I am probably the sanest man in this room."

"If he wants to talk, let him," suggested Everett. "We might as well clear this thing up now. Mr. Turner, have you any explanation to make concerning why you killed him? Had you quarrelled with your brother?"

Old Peleg's gray eyes dulled as if with a mist and his voice was choking when he answered.

"No," he said. "We never had a quarrel. I loved Jeremiah. I looked after him since the day our mother died and left him in my care. . . And that is why I have no regrets for what I have done. . ."

Tolliver sniffed angrily.

"The old boy is off his nut," he confided to Hazel Stanton who happened to be nearest him. "Just another of these stories where a lunatic thinks he's conferring a favor on somebody by knocking him off."

"Keep quiet," retorted Hazel impatiently. "This is no affairs of yours."

"It certainly is my affair," replied Tolliver in a hurt tone. "I been in it as deep as anybody else for three hours. . ."

"Hush," commanded Hazel. "There's something more to this."

It was apparent that Everett shared something of Tolliver's view of the case for his next question showed his puzzlement over the discrepancy between Peleg's avowed affection and Peleg's casual confession of murder.

"You loved him so much that you murdered him?" he asked.

Peleg's eyes widened.

"Do you mean. . ." he began. "But you can't mean. . . Why I thought you knew. . . I thought that was why you came here tonight. . . I knew somebody had talked of opening the grave. . . I didn't kill my brother. I killed the man the gang had put in here to take his place after they murdered him. The man on the hearth wasn't Jeremiah. He was a New York gunman. And I didn't murder him. I killed him in self-defense in a fair fight. . . ."

"Well I'll be doggoned," commented Tolliver.

"WE DIDN'T know any of this," said Everett.

"I am sorry gentlemen," apologized Peleg. "My head is a little muddled or I guess I'd have seen how the land lay. . . Well it's easily explained.

"Hari Singh had been away. While he was gone I put Jeremiah in charge of this house and I went away, too. The cruise was to have lasted five years.

"Then Hari Singh came back here to look for a job from Jeremiah and he got hired because the gang thought he was a foreigner who didn't know anything about the neighborhood. But the man who was living in the house and passing himself off as my Brother Jeremiah was not Jeremiah and Hari Singh knew it. There was some resemblance—enough to pass with some pretty close friends when they came to look at him after a .45 bullet had messed up his face, but Hari Singh wasn't fooled. He sent for me and kept his eyes open."

"Do you mean to tell me that anybody could have passed himself off as a Turner in Pelican Bay without being detected instantly?" demanded Everett.

"I'm telling you just that," replied Peleg evenly. "The Turners are the best known people in these parts but it's mostly by hearsay. None of us ever stayed ashore long enough to pick up many friends.

"Anyway this man was passing himself off as Jeremiah Turner and doing a good job of it when I came home. I came in through the front door unexpectedly and he recognized me. He pulled a gun and I killed him."

"But your reported death?"

"All part of the same story. The gunman looked like Jeremiah. Therefore he looked like me. We buried him once as Jeremiah. Then we dug him up, shaved him and buried him a second time as Peleg Turner. It was really John Carton's idea. He had found that he could learn more by keeping out of sight."

"Then," commented Everett, with some disappointment, "We're right back where we started from. Who did kill Jeremiah Turner?"

"I HAD hoped to find out tonight, gentlemen," Peleg replied. "But you know how the evening turned out. The man I killed was an underling. I don't know who killed my brother and I probably never shall."

"Perhaps I can help you out," suggested Mary Williams. "I think I can point out the murderer. . . ."

"I knew she had something to do with it," cried Aunt Helen Holmes. "I could feel it in my bones."

But no one paid attention to her. Everyone was looking at Mary, who had stepped away from the side of her police guard and now stood looking from one to another with half closed eyes.

"Well then who killed him?" snapped Everett.

"I can't tell you his name," said Mary.

"We have no time to waste on guesswork."

"This is no guesswork, Mr. Everett. I know. The man who killed Jeremiah Turner is in this room and you can easily identify him. He is not Mr. Ardwyn, but he has a row of teeth marks on his wrist."

"How do you know that?" questioned Everett.

"Find him," commanded the girl. "Ask your questions afterward."

"Silly business," the secret service man declared. "But we'll see. Ladies and gentlemen, hold out your wrists."

The inspection took only a moment. Ardwyn's bandaged hand was passed and a quick glance about the room showed no similar wound.

"Sorry," Everett reported with mock courtesy. "You had me going for a minute, but everyone here seems to be intact. Have you any other suggestions?"

"Just one more," countered Mary Williams with a triumphant note in her voice. "Look at the man on the floor. I'd advise you to look in a hurry. He's regaining consciousness."

Everett looked.

"You're right," he admitted with a vehemence that showed he had finally been shaken out of his professional calm. "The man's right wrist is bleeding."

"Why that's Cousin William Caryl," moaned Aunt Helen Holmes. "Why all this is preposterous! Cousin William wouldn't kill anybody. He wouldn't hurt a fly. That terrible woman is making all this us to damn an innocent man. She'd do anything, she would. . . Ask him. . . Ask him. . . He's opening his eyes. Ask him. . . "

Everett was raising Caryl's head from the floor.

"What happened to your wrist, Bill?" he asked in a calm wheedling tone.

"The boat got away and she bit me and I spilled the can of ether," muttered Caryl incoherently. "If I could have doped her maybe we could have got away. Peleg Turner won't be back for five years. Peleg Turner is dead."

"Out of his head," diagnosed Everett. "Evidently was going to gas somebody and got it himself."

"My wrist hurts," wailed Caryl, with increasing vigor. "Don't let her get at me now. . . Don't let her. . . Keep that cat away or I'll bump her off like I bumped old Jeremiah . . like I bumped off old Jeremiah. . . Like I bumped off. . ."

CHAPTER TWENTY

A Door Closes

EVERETT arose and turned apologetically to Mary Williams.

"Young woman," he said, "It appears that you were right. And I can't say that I'm particularly proud about the way we've treated you."

"It's nothing," replied Mary Williams. "You worked on what information you could get. My information was better. . . . That was all there was to it."

"Would you mind telling me how you knew William Caryl killed Jeremiah Turner?"

"Not at all. I was here when it happened."

"You saw the murder?"

"No. . . I didn't see it. The thing happened here in this room in the dark. I could only hear what was going on. In the morning there was a new Jeremiah Turner in the place and I saw that I

WHO WILL WIN THE

$500 in Gold

FOR SOLVING

"a Step On the Stairs"

? ? ?

HERE it is—the tenth installment and conclusion to Mr. Casey's thrilling and carefully tangled mystery story. How many of you had an idea that Cousin William Caryl was the arch conspirator? Just how many the Mystery Story Editor does not yet know, but indications taken from the solutions so far submitted by readers, or by listeners to the drama over the air, point to the statement that very few, if any, even suspected that the pious William was supposed to play a very important role.

But watch for next issue—that of May 15—which will be on all news stands by Friday May 14. In it will be announced the winners of the $500 in gold prizes for the best solutions to the story. Each of the principal winning solutions will be criticized by the Mystery Story Editor. It may even be feasible to reprint in whole a few of the best.

By the way, have you begun to read Big Rabbit, by Hugh Fullerton? Mr. Fullerton, whose name came into prominence some years ago when he said he knew 10,000 people—by name—is, like Mr. Casey, a graduate of the daily newspaper office. For years he has been associated with the largest morning daily newspaper in the United States. Knowing himself, he knows newspaper men and is well qualified to write a fiction story about them.

If you haven't read Big Rabbit, turn back to page eight and do it now.

"A STEP ON THE STAIRS"

(Continued from preceding page)

would have difficulties if I went to the village constable at Pelican Bay and told him my story. I thought I'd make sure.

"Before Peleg Turner started on his long cruise I always had the run of this house. Very few people knew about it because as Uncle Peleg had explained, he did not have many intimates. I used to play around here with John Carton when we both were little children. I kept coming over to see Uncle Peleg after John went away to college.

"On the night of the murder I ran over in my car from Portsmouth to ask Uncle Peleg when Johnny was coming home. The door was open so I walked in."

"You did not know then that Peleg Turner had brought his brother here and left on a long cruise?" asked Everett.

"I had heard that he was going on a cruise. He told me so in Portsmouth when he came up to say goodbye. But he had said something about going back to the house for a day or two. There was a chance that he was still at home. . ."

"Did you see Jeremiah Turner?"

"No sir . . . I never saw Jeremiah Turner. . . I walked into the house as I said and I was just about to call out when I heard strange voices in the huntroom.

"Two men were talking. I gathered that they had some sort of a job to do.

" 'John Carton will be home from school tomorrow or next day,' one of them said. 'And if he sees Jeremiah Turner it will be too late then to make any substitution.'

I GOT down on my hands and knees and crawled to the hall door. It was dark in the hunt-room except for a little moonlight coming through that window over there. I saw some sort of a bundle on the floor.

"The second man spoke then. . . I thought his voice was familiar, but he spoke in whispers and I couldn't be sure.

" 'You're sure this Carton kid never saw his uncle Jerry,' he asked. And the first man said, 'Not a chance. Jeremiah was brought back here from India. He's been over there fifteen years.'

" 'Then,' the second man said, 'I guess you'd better solve your problem now.'

" 'What about you?' the first one asked and the second laughed. 'It's your funeral,' he said. 'This is your gang and you can run it to suit yourself. But you didn't hire me to solve any puzzles. Me, I'm getting out of here right now.'

"Then there was a long silence. It puzzled me then. It kept puzzling me until tonight. I know now that the second man went out through the front door. I also know now that he was Milford Jones whose skull was fractured by Hari Singh."

"Where was Jeremiah Turner?"

"I'm getting to that . . . As I said, it was dark and I couldn't make out much of what was going on in the room. It never occurred to me that the bundle on the floor might be Uncle Jeremiah. I had only a vague sensation that something terrible was going to happen and when it did happen it was all so sudden that I couldn't move hand or foot. I just stayed in a daze.

"The first I knew of what was going on was when I heard quick footsteps on the floor and then a dull hammering and snapping sound. It wasn't until the bundle on the floor started to whimper that I realized. . . The man I had heard speaking about his problem was . . . hitting . . . Jeremiah Turner . . . on . . . the head . . . with a poker. . ."

The girl paused as horror brought the scene back to her.

"And that was all of it," she said. "I guess I fainted. The next thing I knew I heard a door slam. I screamed, but it was too late then . . . I was alone in the house except for Uncle Jeremiah and he was dead on the floor there."

"But what gave you your clew to the murderer?"

"A little cough. . . I shall never forget it. The murderer wheezed like a consumptive, while he was at his work. The sound was hardly audible, but it came to me above everything else. . . I knew that some day I should hear that sound again. Tonight I heard it . . . tonight when I was locked in this room with eleven persons I could not trust. I felt that I would go insane . . . I probably was hysterical and not responsible for what I did . . . But just after I had overturned the light and started to steal John Carton's letter I heard that sound in my ear and I caught hold of a hand. . . The first time I got the wrong hand. . . The second time I was more sure of myself and I put the mark where it belonged. . ."

Then without warning the girl went white and pitched forward to the floor beside the murderer.

"She's fainted," said Everett.

"I guess she's got a right to faint if she wants to," observed Tolliver.

"She certainly has," promptly declared Aunt Helen. "She certainly has . . . The dear sweet girl . . . To think of her goin' through all that, an' her just a little slip of a thing like that. . ."

THE guests were gone. John Carton and Mary Williams sat side by side on a divan of Spanish leather while Hari Singh stirred a new fire on the hearth. The pair sat quietly until the soft footed Hindu had departed.

"And so that ends it," said Mary wear-

(Continued on page 28)

Let's Bury the Demon Static

MANY Fans, We Venture to Say, Do Not Know that It Is Perfectly Feasible and Practical to Bury an Antenna, According to the Rules Given Here, and Be Happy All Summer Long

By MILO GURNEY

WITHIN the last few months, several experimenters have taken an unusual interest in the subject of antennas. Such experiments followed the publication by Radio Digest of articles upon underground antennas, by such men as Dr. J. Harris Rogers, George Guyer and Edward T. Jones. The immediate result of these articles was the development of an army of experimenters who installed the types suggested by these men. If the scheme worked it was good, if it didn't, then it was a failure; but out of the maze came the evidence that thousands were interested.

Realizing the problem was one which should be approached with an added thoroughness and that success could only be attained through having a great many experimenters scattered throughout the United States the following plan was devised:

Radio Digest will attempt to supply through its columns at regular intervals all of the information now available upon underground receptors together with other types worthy of trying. In addition, it will suggest constructional ideas for experimentation, together with excerpts from experimenters' reports as received.

Success Depends on Reports

It is obvious that the success to be obtained is entirely dependent upon the number of readers who will assist in making the experiments. This therefore, is an invitation to all who will help, to forward their names and addresses to the Technical Editor. We desire to secure co-workers from every state in the Union, as the study will cover soil, climatic and all conditions which may have a bearing upon the subject.

While these experiments will, in a large measure cover the subject of underground antennas, the primary object will be to limit, so far as possible, the influence of static. Therefore, suggested experiments covering antennas with other locations than underground will be studied.

An intensive effort has been made to collect data upon many types of underground aerials. There are a great many experimenters who have done research along this line and correspondence covering the application of their ideas, together with the results obtained, is likewise solicited in order that it may be passed on to others.

Localities Differ

In order to acquaint those who were unfortunate in not having followed the able articles of the gentlemen mentioned above, a resume of their work will be offered, together with the results obtained in their localities. It must be borne in mind that the results in each instance apply only to the locality of the installation and are likely to vary in other locations according to the moisture content of the earth.

Mr. Guyer's most satisfactory reception was had from an installation following that pictured in figure 1. This consisted of two lengths of No. 14, 7-strand insulated copper wire, each 50 feet long and coiled about 4 feet apart and approximately 4 feet underground. Laying the wire in solenoid or circular form and spacing each turn one above the other with half inch separations, the finished inductance, in Mr. Guyer's locality, left little to be desired. The spacing of the turns was accomplished by filling in with soil as each layer was placed. After completion, the ground was thoroughly soaked in order that a good moisture content might be secured.

We repeat Mr. Guyer's original description of the results he secured from this novel installation, in the belief that many will desire to use it for their first experiment:

Joy to Operate

"Many tests have given me the expected volume and the elimination of the water pipe disturbance and also proved that this last coil works equally well interchangeably with the first on either the antenna, or ground post of the set. I now have a real underground antenna system which is a joy to operate. If you desire similar results be careful to follow instructions in installing your underground system.

"General results are satisfactory beyond my expectations. The volume is splendid. I obtained clear, distinct, resonant and fluidic reception, entirely free from the gaseous, atmospheric conditions led into the set through the usual aerial antenna or loop, but not entirely free, at particular times which you will discover, from those other hindrances and disturbing factors heretofore pointed out.

A Remarkable Reception Record

"All my tryouts in the experiments have been made with my super-heterodyne. It occurred to me that my fine reception might be due, at least in part, to the radio frequency feature of the set, and that a set without such feature might not give such satisfactory results. I borrowed a three tube set—detector and two stages of audio frequency amplification which I had built for another party, with which to give this antenna equipment a tryout. The set used 201A tubes throughout with 90 volts on the plate. I first tested out static conditions through the aerial antenna. Static was overwhelming, rendering reception intolerable. I hooked the set to the underground antenna and turned the tuning dial.

Volume and Clarity

"To my utter astonishment and joyful surprise fluidic music coming from the studio of WSAI at Cincinnati, filled the loud speaker, which was plugged into the last stage, with enough volume to be heard in the third room from the one in which the set was operating. Without moving a dial I plugged the loud speaker into the first stage of amplification. Volume was still great enough to fill the second room from the set. I now plugged the loud speaker into the detector jack. The music came quite pianissimo, but clear and sparkling as a winter solstice night, and could be plainly heard throughout the room in which the set was operating. As I was experimenting I now took off the loud speaker and plugged in the head phones just to see how many distant stations I could tune in, with the detector alone.

"At this sitting I tuned in WLS, WLW, WCBD, WMAQ, KDKA, WREO, WWJ, WCCO, KFI, KHJ, KNX, WGN and KYW. This convinced me that the underground antenna system herein described will work well with any receiving set—provided it is a real receiving set. The distance from the point of operation to the various stations above named will range from 900 to 1,900 miles."

Editor's Note.—Mr. Gurney's second article of this interesting series will reveal an additional experiment in conjunction with Mr. Guyer's underground aerial.

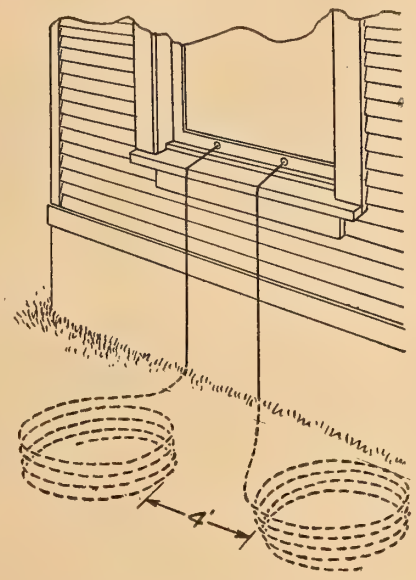

Figure 1. One of the most simple and effective methods of installing an underground antenna is described by Mr. George Geyer and pictured above. One need not dig up the whole yard for this first experiment.

How About You?

HAVE you had experience with an underground aerial? If it was successful what did you learn about it? We wish to gather together all the information possible concerning experiments on the underground aerial for broadcast reception.

We know that the underground antenna system is a great static reducer. However, there are hundreds of variations one may make in the installation of such an antenna. Some of these have proven themselves superior to others—for given localities, climates and types of soil.

If you have experimented with this type of reception, drop Mr. Gurney a note telling all about it.

There are other methods of improving summer Radio. If you, by study or good fortune, have learned of some system or trick to deliver the music better in the warm months, consider yourself also invited to correspond with Mr. Gurney.

—THE EDITOR.

"HIGH-BROW" AND PROUD OF IT

(Continued from page 7)

Naturally early experimenters with voice transmission were quick to see the possibilities of the improved pickup device that the new carbon presented and in 1910, under the direction of Mr. Turner, the operas "Cavalleria Rusticana" and "Pagliacci" were broadcast from the stage of the Metropolitan Opera House. Possibly an audience of 200 experimenters and scientists picked up this broadcast, which clearly demonstrated the improved efficiency of the new microphone over all preceding devices. Today, should the same broadcast privilege be granted a total of 20,000,000 people could hear these famous operas. And while the Metropolitan Opera today refuses to allow its operas to go out on the air, it set a precedent way back in 1910.

Builds Hollywood Station

For the next fifteen years following the broadcasting of these operas, K. M. Turner did not again experiment with Radio transmission, being too deeply engrossed in the manufacture and sale of the acousticon and dictograph. In the spring of 1925, however, then living in Hollywood, California, he decided that Radio had finally emerged from the chrysalis stage and that the time had come when someone should step in and show the way for the Radio station of the future. Several wealthy Los Angeles men were interested in this station that would be different and proceeding slowly, a homemade 50-watt station was put on the air to test the theories of its founders.

It developed immediately there was a large audience ready and anxious to listen to the kind of entertainment KMTR was furnishing, so a 500-watt Western Electric transmitter was installed in the little building on North Wilton Place, Hollywood, and KMTR set out to find its place in the air. After the station was on the air eight months and running smoothly, K. M. Turner stepped out. Nearing 70 years of age, he felt younger men should control this young industry, Radio.

Selects Philharmonic Stars

Briefly, that is the story of KMTR. Those living within reach can tune to 238 meters any evening except Sunday, between the hours of 8 and 10 p. m. Pacific time, with a certainty of hearing first-class concert music played by the KMTR concert orchestra, an organization of first chair men of the Los Angeles Philharmonic orchestra led by Loren Powell, first violin of that famous orchestra. The KMTR concert orchestra plays concert music only, and to enable listeners to know exactly what selections will be played on any one night, detailed programs for one month in advance are mailed to a large audience. The station is non-commercial, that is, does not put on programs for toll and the expense is borne by several well-known Los Angeles business men who do not wish their names mentioned.

Carlton King, or "Dad" King as he is known, is the announcer and studio manager of the station. He fits the part. An actor of considerable experience he was in charge of the Navy club in New York, during the World War and later directed and produced motion pictures for his own company. His popularity with the Radio audience is shown by the success of his Morning Family Circle which goes on the air daily at 9 a. m.

Possibly the biggest feature of KMTR, and undoubtedly the biggest with the children, is the home hour broadcast from 5 to 6 p. m. daily except Saturday and Sunday. The home hour is presided over by Georgia Simmons, or Mammy Simmons as she is known to everyone. A real Southerner from the South, an experienced story teller to the children, her hour at KMTR was a big success from (*Continued on page 28*)

Nice Weather We're Having

WE HAVE been doing an unusual amount of listening of late, chiefly, we believe, because the Radio weather has been so consistently good. So opens many a conversation in which the participants become embroiled in a competition of telling the biggest ones. However, we shall not start such a Radio story contest.

Of course, a spell of good reception is due us, for January, February, and even March, certainly fell very far short of expectations. Perhaps the order has been so far reversed that we may have good listening even through June. Sun spots, the weather, atmospherics and Radio range are peculiar things.

Wonder how you listen in. When we decide to stay home and enjoy a Radio evening, we follow a set procedure. Early in the evening we tune in KDKA first, then WOC. If these two come through loud and clear, with a low static-to-signal ratio, then we are assured we can cruise the country and hear what we desire. Time enough then it is to study the programs.

We find the columns of this publication unusually helpful here. We read the "headliners today" and check those in which we are interested. If not particularly interested in the headliners, we go further and read through the detailed programs to find where and when our best-liked entertainers are broadcasting, or where our favorite type of music, talk or other entertainment is to be found. Then we plan our evening by the clock.

Our receiver has been carefully logged. If, when we set the dials, the station does not come through with volume and good quality, we can only blame nature for some trick to shut the station out. We don't blame the receiver once WOC and KDKA have come through clearly.

We wonder how it was possible for us to get along without a set not so many years ago. We feel a personal interest in artists we have never seen, in cities we have never visited, in topics discussed over the air which would not interest us in print.

Here we are—talking about something foreign to the good Radio weather we began to talk about. But most conversations start with the weather, and we hope the present brand of it continues.

Plant Your Garden Antenna Early

ABOUT this time of the year the wife hands you a spade and tells you to go out and dig up the ground for a garden, pardon us, THE garden—wherein many beautiful examples of the gardener's art are supposed to grow and attempt to live up to the pictures of themselves on the seed packets.

Some of us get a kick out of digging in the garden. Others of us, however, are more inclined to tinker with the Radio set, booh at a baseball game, crawl under and overhaul the flivver, or yell, "Fore," as we swing away at a small white sphere resting on a cone of sand. To the second class mentioned, which includes many in the other classes named, we submit this excellent suggestion to be used for what it is worth, providing of course, your wife insists that you dig that garden.

First read the article in this issue on the subject of underground antennas. Take it from us that they are good. They reduce summer static outbursts to their proper place in the order of things. Radio Digest first discovered that Dr. J. Harris Rogers had produced working underground antenna which would reduce the static ratio and increase the chances of you hearing programs without your ear drums being burst. And Radio Digest is again recommending it to you.

Next take the spade your wife gives you and dig the garden and the hole for the underground antenna. Of course, the third and most logical step is to plant the garden and the antenna. However, we would mark this point of difference:

The garden may not come up to your expectations, but the underground antenna will make up for this deficit by supplying you with good Radio programs all summer long.

RADIO INDI-GEST

Your Presence

Last night my heart was sore oppressed with gloom
And in the quiet of the room
I sat in loneliness and wept.
And as the stealthy silence 'round me crept,
I turned to the Radio to bring me cheer
And to hear the voice I love so dear.
My aching heart was breaking with despair
When lo, I sensed your presence in the air.
I listened for the words you often say,
But you came not to talk, nor long to stay;
I wept no more, and reaching for your hand
Again I felt your magic—the power to understand.
You softly pressed your cheek against my face,
Then quickly left me, drifting into space.
But waking suddenly, my heart was stirred
By a dream more eloquent than any work.

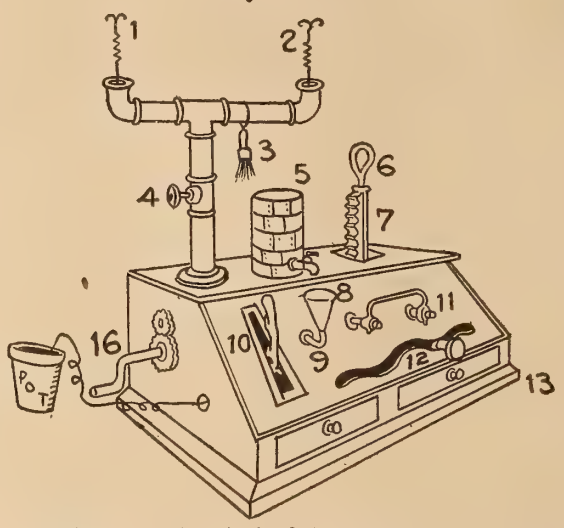
"THAT RED HEAD GAL"

Choose Your Weapons, Gentlemen

Dear Indi: Why this eternal controversy? Can't you settle it? Suggest you get the Third Trombone Player and Dielectric in Webster Arena, Pabst Park, and let them have at it with seven syllable words and pewter steins. And let the best man brag about it.

PETE PETITE

Cilly Circuits



Dear Indi: This hook-up is the Orphanola UV-29 and was designed after listening to several experts discuss, argue and lecture on the subject of Radio during office hours in an engineering department. It is Dalen's circuit. The parts follow: 1, Antenna and impedance checker; 2, low loss feature; 3, tickler; 4, valve to regulate frequency currents; 5, standpipe for static head; 6, push pull unit; 7, rack to produce straight line reception; 8, grid leak; 9, feed back; 10, station puller; 11, shafts connected so one-armed man can operate; 12, wave length producer; 13, concrete base for testing tubes; 14 and 15 shown in figure 2; 16, gears for changing diameter of coils; pot at left contains ground. JOHN J. SCHNEIDER

Silent Night

'Tis Silent Night with me tonight,
I sit and read and smoke
And listen to the family talk
And hear them laugh and joke.
I do not turn and twist the dials
And DX try to get—
I do not cuss my neighbor
With his blooping super-het.
I do not fuss and fume and roar—
Just let the bloopers blop.
For silent is the night for me—
My battery's in the shop!

OLD KING TUTT

Tuned Himself Out

Dear Indi: With the aid of Sir Oliver Lodge and Sir Conan Doyle, I have just pulled off an interview with the spirit of the first Englishman ever to commit suicide with the aid of his Radio.

He never tuned in to jazz, only to music. When the latter came along it happened to be Mendelssohn's "Funeral March." Struck by the majestic beauty of the piece and feeling that it was being played in vain, he heroically gave his life as a sound reason for the broadcast. LONDON BOBBY

Radio Rhymes

There, little crystal set,
Don't you cry—
You'll be a het'rodyne
Bye-an-bye!

SANTA FE BALDY

Might Freeze You Out

Fairice alaska.

Edator Indi: I got a lettr from the Patnt dept. of U. S today and he said they was getting the final papers out on my ice mashine. I have been offrd some Florida property for it but I aint as dumm as I look. One man has offrd me ½ interst in Ellis Island, just off New York harbour. I am going to think it over. He sais he gets lots of money out of it, renting rooms to forenurs. I think it would be a good trade, don't you?

Always as ever
KITTLE DRUMMER

FRANQUE FILOSOFEE

He Who Lies Last, Lies Best.

INDI

Police Protection

Condensed

BY DIELECTRIC

Sport fans are at last furnished from headquarters with the first-hand news of events in the ring, etc., which call forth the enthusiasm of excited crowds at the ringside. We may not "see" all the big fights as they are staged in the arena at Madison Square Garden, New York, but surely enough "good" fights will be pulled to make us grateful for the broadcasting by Tex Rickard from Station WMSG. The initial program featured some speakers of national fame and music equal to most that is heard nowadays. Announcement was made that this new station will aim to foster and develop interest in sporting events of all sorts. Ringling circus miked pretty well.

Station WNAC, Boston, presented a concert orchestra program the other evening which was a delight to anyone interested in this class of music. Selections were chosen that gave free play for individual voices in the orchestra to be heard in a kind of obbligato effect. After listening a long time to numbers allowing no such variation, it is refreshing to hear a flute, oboe, clarinet, French horn or tuba carry the theme above the accompanying instruments. It isn't necessary to choose "heavy" numbers for such presentation.

Another community concert proved satisfactory when Station WCCO, Minneapolis-St. Paul, staged one recently. It compared very favorably with those better known to the Radio public because of more frequent presentation and included instrumental selections well rendered. Somehow there is a feeling of informal fellowship when tuned to a community affair. It proved a good innovation.

Now the lovers of Hawaiian melodies must have their fill since Station WBAP, Fort Worth, had the good luck to present the Panther Hawaiian trio to their Radio audience. That doesn't mean that they wouldn't want to come back for more of the same entertainment, for they undoubtedly would, but merely to say how enjoyable it was.

An acceptable studio recital program was presented from Station WJR, Detroit, at least, it may have been liked by most listeners throughout. At any rate, one of the features had a lot to commend itself, and that was the quartet which sang with the sole intent to make friends of those tuned in. If there is lacking an unrestrained volley of encomiums, lay the fault at the door of an interfering station because of which the reception was nearly ruined.

Speaking of operations, the Evanston hospital will find itself flooded with applicants for admission following that concert by their nurses glee club a short time ago. Paradoxical as it may be, the really fine work of this glee club made many invite sickness just to be where those voices could be tuned in by pushing a buzzer. How else may the character of their ensemble singing be eulogized so emphatically. Our thanks to Station WEBH, Chicago.

Station WHT, Chicago, puts on a popular music feature which may appeal to many listeners. The best way to describe it to you is to suggest looking up their schedule and trying it out for yourself. I hope you'll like it, as the leader of one of our popular orchestras playing Bach fugues exclusively expresses his desire for approval.

SABBATH SHOULD BE MOTHER'S REST DAY

SIMPLE DINNERS ALLOW MORE LEISURE TIME

Careful Planning and Some Preparation Beforehand Will Make Sunday More Enjoyable for Housewife

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

WE IN America take great pleasure in promoting movements. We organize campaigns to improve child health and to conserve our natural resources. We have safety week, clean-up-week, and swat-the-fly week; we seem to be organized to do almost everything, but there is one movement I should like to organize and that is a campaign to make Sunday a day of rest for Mother.

We have traveled a long way from the strict observance of the Sabbath, which necessitated the preparation of all the food the day before. In most homes, Sunday is now more or less of a feast day. There are a number of reasons why we like to have the Sunday dinner unusually nice. It may be the only opportunity for all of Cousin John's family to have dinner with all of our family, and even though we do not have company, it is an enjoyable meal because we have time to eat and enjoy the food and each other.

By careful planning and some preparation beforehand, it is entirely possible to have a nice dinner even for guests and yet to prepare it with a minimum of time and effort. It may necessitate fewer courses and simpler food in place of the elaborate dishes requiring much preparation, but if the dinner is daintily served, the table arranged attractively, and Mother herself rested and happy, the dinner will be as festive as any one could wish.

Whatever your cooking equipment, meat that is broiled or cooked in the frying pan requires less time for cooking, but demands more attention at a time when you are preparing many other things. You must decide which is easier for you—a roast or a baked meat requiring long cooking or a steak or chops requiring shorter cooking but more attention.

Prepare Vegetables Day Before

It is an advantage to have the meat and vegetables combined in a casserole. If the vegetables are prepared the day before it takes only a short time to prepare the casserole right after breakfast. It will require no further attention until dinner time. I have a very good recipe for braised beef which requires about four hours baking. The vegetables may be cooked with the beef so that the main part of your dinner is ready when the meat is done. This is the way we prepare brazed beef in the Gold Medal Flour kitchen:

Three pounds beef from the rump or lower round, Gold Medal flour, salt and pepper, 2 thin slices of salt pork, ¼ cup diced carrots, ¼ cup diced onions, ¼ cup diced celery, 3 cups boiling water.

Method: Wipe the meat with a damp cloth. Dredge with flour. Sprinkle with salt and pepper. Fry out the pork and sear the entire surface of the meat in the hot pork fat. Place meat on a rack in a roaster or baking dish. Surround with diced vegetables. Add boiling water. Cover tightly and bake in a slow oven, 300°F, about 4 hours. When done, remove meat to a hot platter. Strain out the vegetables and make a thickened gravy of the remaining liquid. The amount of vegetables here given is sufficient only to add flavor to the meat. If you wish to have enough vegetables to serve with the meat, add a larger quantity of any kind you prefer and if necessary use more water to thoroughly cook the vegetables.

Baked Ham Good Oven Dinner

Another good suggestion for an oven dinner is to bake a slice of ham with raw sliced potatoes over the top. Pour milk over the ham and potatoes and bake in a slow oven as you would escalloped potatoes. Spinach goes well with the baked ham and potatoes for an extra vegetable.

A roast is as convenient as any other meat for Sunday and if the potatoes are browned in the roaster you have only the gravy to make the last few minutes before serving. For another vegetable, with the roast and browned potatoes, string beans may be heated with butter in the oven during the last few minutes of your dinner preparation or you may serve carrots which have been cooked the day before and require only a few minutes for reheating.

Meat loaf is always good. It may be prepared the day before or put on to bake early, or it may be baked on Saturday and reheated for Sunday dinner. With meat loaf, baked potatoes are convenient and perhaps another baked vegetable such as baked squash or corn. Or you might serve buttered or sour beets with this dinner. The beets may be reheated in the double boiler the last few minutes before serving.

A leg of lamb with mint sauce is another good suggestion. With this serve creamed potatoes or peas or a green salad.

Meat Balls Convenient

One of the most convenient quick meats is meat balls cooked in tomato sauce. Buy round steak and have it ground, or if you like, buy the regular hamburg which is already ground. Shape the balls and sear them in hot fat. After they are well browned and partly cooked, pour over a can of tomato soup and let simmer slowly until done. Since the tomato soup does not require thickening and is already seasoned, it saves the time necessary to make a sauce or gravy. With the meat balls you could serve rice or macaroni and perhaps a hot slaw or a simple cabbage salad.

For dessert, fresh fruit with cake or cookies attractively served is quite as acceptable as any elaborate dessert. Plain sliced oranges or grapefruit or any fresh or canned fruit may be used, dressed up with a bit of red jelly or a cherry. Whipping cream for dessert means another last minute task. Many fruits and puddings are equally delicious served with thin unwhipped cream or a custard sauce.

ANOTHER WOMAN IS PROGRAM DIRECTOR

Mme. J. S. Pamplin

SAINT PETERSBURG, Fla.—Radio has opened new occupations to women, and Station WIBC here is demonstrating that they can be successful in these new positions, for Mme. Jessie S. Pamplin is program director of the "Sunshine City" broadcaster. When WIBC went on the air, they looked about and found in their own city this remarkable woman. She was conducting a vocal studio, but volunteered to take on the new work. As artist, teacher and cach, Madam Pamplin is one of Florida's leading musicians. Her accomplishments as a linquist are also notable. She speaks five languages and sings six others.

Radio Club Notes

A superpower line, carrying 60,000 volts through northern New York, was found to be the source of interference experienced by Radio listeners in that section. In addition to the power line trouble, federal Radio inspectors found that poor rail bonding, also shade trees touching and grounding the primary of the distribution system of the electric light lines was responsible for added interference. Following an exhaustive test by representatives of the local Radio club and officials of the companies interested, suggestions for the elimination of the trouble were adopted.

* *

Here is good news for those living "out where the tall corn grows". The engineering department of the Iowa State Agricultural college, Ames, Iowa, have outlined a plan to pass judgement upon all types of Radio receivers sent them. The service will be furnished at cost.

Phone Wires Link KHQ to KJR

SEATTLE, Wash.—For the first time in the northwest several broadcasting stations, KJR at Seattle and KHQ at Spokane, were tied in simultaneous line for an experiment to send out the weekly program of the Keep Joy Radiating Order from their Belfry at KJR. Firms sponsoring the programs were delighted with the increased publicity resulting as noted by the hundreds of telegram and telephone calls received. Other northwest stations plan to join hands.

WOMEN'S PROGRAMS INDEX

Saturday

Atlantic	Eastern	Central	Mountain	Pacific
10:30 a.m.	9:30	8:30	7:30	6:30

WWJ (352.7m-850kc) Tonight's dinner.

12 n.	11 a. m.	10	9	8

WEAO (293.9m-1020kc) Housekeepers' half hour.
WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.
WGN (302.8m-990kc), Household hints.
WQJ (447.5m-670kc), Home Economics program; May 1, "Fish Salads."

12:30 p.m.	11:30	10:30	9:30	8:30

WGN (302.8m-990kc), Home Management period.

KMOX (280.2m-1070kc) Housewives' hour.

GARLANDS OF AIRY TUNES WILL

High Lights of the Air

GARLANDS of airy tunes will welcome in the first of May this year instead of the bright nosegays formerly dropped on the doorsteps. These gay melodies bringing whiffs of forest music will be the May Day gift of the Radio stations. No Radio fan will escape the charm of this Pied Piper, spring.

The Swanee Syncopators, the dance attraction on the Saturday night programs of Station WRC, have been named the second best Radio dance orchestra in the United States by Stuart Rogers, New York Radio critic. They were topped only by Vincent Lopez' Orchestra of New York. The Syncopators play regularly under the direction of Al Kamons.

National Music week will be observed by WTIC with features arranged by music lovers of New Haven. The New Haven Symphony orchestra, Horatio Park choir, the University Glee club, May Bradley Kelsey, soprano, and Harry B. Jepson, organist, will be featured during the Sunday afternoon concert May 2. On May 5 at 7:15 p. m. Eastern Standard time a grand opera concert will be presented from Dorscht hall. On May 6, at the same time, a sacred concert will be given under the direction of Leroy Baumgartner. Prof. Harry B. Jepson, organist, and the New Haven high school orchestra are the features of the Friday program.

Already the spring of the year brings promise of merry sunshine during summer vacations, and "the call of the wild" will be distinctly felt during the concert Tuesday, May 4, between 9 and 10 p. m. Pacific time, given in honor of Yosemite. Anthony Linden, solo flutist of the San Francisco orchestra, Glen Hood, banjoist, and Camp Curry's popular entertainer will be heard. Don Tresidder gives a talk on "The Outdoors."

Oratorios famous throughout the ages will be played by the KDKA Little Symphony orchestra Tuesday evening, May 11. This program will give in an attractive manner the history of this musical form.

Grieg's lovely Peer Gynt suite has been heard from many stations during the short life of Radio, but for the first time the poetic form of Ibsen's play will be broadcast Tuesday, May 11, by WGN, Chicago. The WGN ensemble will play the musical background.

Friday evening, May 7, the newly organized WBAL mixed quartet will broadcast its first concert from 10 to 10:30 p. m. Eastern Standard time. The members of this feature include: Louise Cline, soprano; Maud Albert, contralto; John Wilbourn, tenor; Walter N. Linthicum, basso. This quartet of well-known Baltimore artists is to be a regular Friday event.

Saturday, May 1

"a Step On the Stairs"

Broadcast as a Play

EPISODE TEN—THE SETTING

THE scene continues in the high-beamed hunt-room. Mary Williams admits she intentionally locked Mitchell in the cupboard in fear and for safe keeping. She is accused of preventing an officer from performing his duties and several suggestions are made that she might be in cahoots with crooks. Mary Williams asks Hazel Stanton where she fits in the picture. In reply Hazel Stanton discloses the fact that she is of the federal department of justice and orders Mary Williams' arrest for the murder of Jeremiah Turner. The "corpse" of Peleg comes to. He explains that he had gathered the guests together in an effort to have the killer confess. He had tapped the land wire of the station and expected to get the message through during a switch of controls. In the woods he met Teufel who, he imagines, was coming to the manse to warn his fellow crooks that the department was on the trail. He was chased by Teufel who pursued him through the station and shot the engineer. The letter was from John Carton but of no importance. Thinking something up at the house he returned there but had to go suddenly and left him shoes. Peleg clears Mary Williams of the crime by saying he killed the man himself. The tenth episode opens.

THE CAST

Mr. Everett.....Chief of Portsmouth Narcotic Squad
Mary Williams.....A youthful guest
Aunt Helen Holmes.....Relative of Peleg Turner
Hazel Stanton.....A young lady

GARLANDS OF AIRY TUNES WILL BE MAY DAY GIFTS OF STATIONS

High Lights of the Air

GARLANDS of airy tunes will welcome in the first of May this year instead of the bright nosegays formerly dropped on the doorsteps. These gay melodies bringing whiffs of forest music will be the May Day gift of the Radio stations. No Radio fan will escape the charm of this Pied Piper, spring.

The Swanee Syncopators, the dance attraction on the Saturday night programs of Station WRC, have been named the second best Radio dance orchestra in the United States by Stuart Rogers, New York Radio critic. They were topped only by Vincent Lopez' Orchestra of New York. The Syncopators play regularly under the direction of Al Kamons.

National Music week will be observed by WTIC with features arranged by music lovers of New Haven. The New Haven Symphony orchestra, Horatio Park choir, the University Glee club, May Bradley Kelsey, soprano, and Harry B. Jepson, organist, will be featured during the Sunday afternoon concert May 2. On May 5 at 7.15 p. m. Eastern Standard time a grand opera concert will be presented from Dorscht hall. On May 6, at the same time, a sacred concert will be given under the direction of Leroy Baumgartner. Prof. Harry B. Jepson, organist, and the New Haven high school orchestra are the features of the Friday program.

Already the spring of the year brings promise of merry sunshine during summer vacations, and "the call of the wild" will be distinctly felt during the concert Tuesday, May 4, between 9 and 10 p. m. Pacific time, given in honor of Yosemite. Anthony Linden, solo flutist of the San Francisco orchestra, Glen Hood, banjoist, and Camp Curry's popular entertainer will be heard. Don Tresidder gives a talk on "The Outdoors."

Oratorios famous throughout the ages will be played by the KDKA Little Symphony orchestra Tuesday evening, May 11. This program will give in an attractive manner the history of this musical form.

Grieg's lovely Peer Gynt suite has been heard from many stations during the short life of Radio, but for the first time the poetic form of Ibsen's play will be broadcast Tuesday, May 11, by WGN, Chicago. The WGN ensemble will play the musical background.

Friday evening, May 7, the newly organized WBAL mixed quartet will broadcast its first concert from 10 to 10:30 p. m. Eastern Standard time. The members of this feature include: Louise Cline, soprano; Maud Albert, contralto; John Wilbourn, tenor; Walter N. Linthicum, basso. This quartet of well-known Baltimore artists is to be a regular Friday event.

Saturday, May 1

"a Step On the Stairs"

Broadcast as a Play

EPISODE TEN—THE SETTING

THE scene continues in the high-beamed hunt-room. Mary Williams admits she intentionally locked Mitchell in the cupboard in fear and for safe keeping. She is accused of preventing an officer from performing his duties and several suggestions are made that she might be in cahoots with crooks. Mary Williams asks Hazel Stanton where she fits in the picture. In reply Hazel Stanton discloses the fact that she is of the federal department of justice and orders Mary Williams' arrest for the murder of Jeremiah Turner. The "corpse" of Peleg comes to. He explains that he had gathered the guests together in an effort to have the killer confess. He had tapped the land wire of the station and expected to get the message through during a switch of controls. In the woods he met Teufel who, he imagines, was coming to the manse to warn his fellow crooks that the department was on the trail. He was chased by Teufel who pursued him through the station and shot the engineer. The letter was from John Carton but of no importance. Thinking something up at the house he returned there but had to go suddenly and left him shoes. Peleg clears Mary Williams of the crime by saying he killed the man himself. The tenth episode opens.

THE CAST

Mr. Everett........Chief of Portsmouth Narcotic Squad
Mary Williams........A youthful guest

Photogravures of Your Favorite Artists

GALLERY OF RADIO STARS

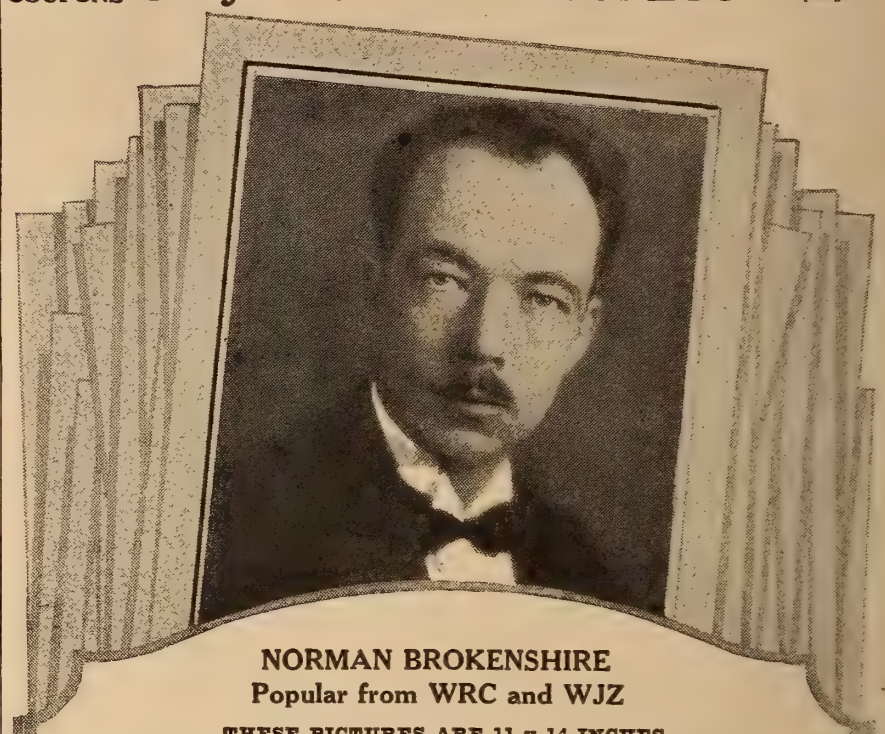
SUITABLE FOR FRAMING OR PLACING IN YOUR ALBUM

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

WITH COUPONS **Only 10c Each -- 3 for 25c** To cover cost of mailing and postage



NORMAN BROKENSHIRE
Popular from WRC and WJZ

THESE PICTURES ARE 11 x 14 INCHES

5 REASONS

Why Dr. Owens Specified
JEFFERSON
AL Sealed Transformers

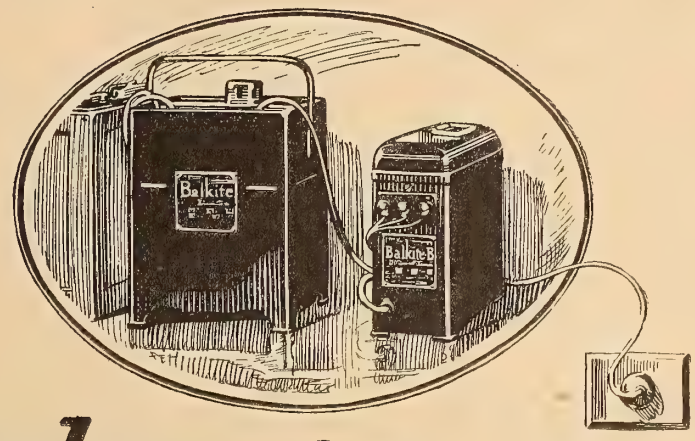
Dr. Owen of Oklahoma University selected the Jefferson A L Sealed Transfomer for his new supertorodyne circuit, described in Radio Digest, for the following reasons:

1. Nicety of balance, giving even amplification at low frequencies, and preventing resonant peaks at the higher frequencies.
2. Tests show a practically straight line curve from 30 cycles for the low notes up to 10,000 for the high.
3. Heavy insulation throughout, lowering resistance between the primary and core.
4. Can be used with the new power tubes.
5. This transformer is SEALED IN A METAL CASE, insuring protection against moisture and other outside influences.

Ratio: 2 to 1; price $6. Sold by leading dealers. If your dealer does not have Jefferson A L Transformers in stock, do not be satisfied with a substitute, but write us direct.

Jefferson Electric Mfg. Co.
506 S. Green St., Chicago, Ill.

Specialists in Electrical Precision Equipment



Noiseless—full radio power from the light socket

with Balkite "B" and Balkite Battery Charger

Noiseless, full, reliable radio power. It is absolutely essential to good reception.

With Balkite "B" and the Balkite Battery Charger you can have this power, always, whenever you need it, from the light socket.

Balkite "B" at $35* is unlike any other "B" device. It replaces your "B" batteries and supplies plate current from the light socket. It is entirely noiseless. It does not require replacements and will not deteriorate with use. It will outlive 20 sets of "B" batteries. To our knowledge not one has ever worn out. It is tested and listed as standard by the Underwriters' Laboratories. *It is absolutely guaranteed to give satisfaction.* Today over 75,000 Balkite "B's" are giving satisfactory service on all types of receiving sets.

The popular high-rate Balkite Battery Charger at $19.50* is absolute insurance against weak "A" batteries. Because it is entirely noiseless it can be used while the set is in operation. If your battery should be low you merely turn on the charger and operate the set.

Add these two permanent Balkite Radio Power Units to your set now. Thereafter you need never again worry about your power supply. Ask your dealer.

**Prices slightly higher West of Rockies and in Canada*

WHAS, Louisville, Ky. (399.8m-750kc), 7:30-9 p. m., concert, Louisville Music and Radio company.

WHB, Kansas City, Mo. (365.6m-820kc), 7-8 p. m., Sweeney Radio orchestra; Bert Beuder, soloist; Zelma Maddock, pianist.

WHO, Des Moines, Iowa (526m-570kc), 7:30-9 p. m., Sigma Alpha Iota national musical sorority; 11-12 midnight, Philbreck and his Younker tea room orchestra.

WOAI, San Antonio, Tex. (394.5m-760kc), 8:30 p. m., News and Express and college of music program.

WOAW, Omaha, Nebr. (526m-570kc), 6:50 p. m., Gilbert Jaffy, violinist; Harry Braviroff, pianist; 9, program; 10:30, Frank Hodek and his Nightingale orchestra.

WQJ, Chicago, Ill. (447.5m-670kc), 7-8 p. m., dinner concert; 10-1 a. m., Rainbo Skylarks; Dr. H. Lucille Long; Harold Olson; Clark's Hawaiian trio; Johnny Poat; Tell Taylor; 1-2, Ginger hour.

WSM, Nashville, Tenn. (282.8m-1060kc), 7 p. m., Beasley Smith's orchestra; 8, program, Mrs. L. L. Gamble; 10, David Libscomb college quartet.

Mountain Standard Time Stations

KOB, State College, N. M. (348.6m-860kc), 7:30-8:30 p. m., musical program, Mrs. Whalen, director.

Pacific Standard Time Stations

KFI, Los Angeles, Calif. (467m-642kc), 5:30 p. m., program, Eugene Biscailuz; 6:30, Carlyle Stevenson's orchestra; 7:30, Felipe Delgado and Edna Clark Muir; 8, Aeolian organ recital; 9, William MacDougall, Scotch singer; 9:30, musical program, joke contest; Jimmie Mack; 10, Packard ballad hour; Emma Kimmel, Pat O'Neal, Kray Tremaine, Ashley Sisters.

KGO, Oakland, Calif. (361.2m-830kc), 8 p. m., Mills college annual dinner.

KGW, Portland, Ore. (491.5m-610kc), 6-7 p. m., dinner concert; 8-9, concert, vocal and instrumental; 9-10:30, concert; 10:30-12 midnight, frolic. Keep Growing Wiser Order of Hoot Owls, Pantages stars, features.

KOAC, Corvallis, Ore. (280.2m-1070kc), 7:20 p. m., Arthur Kirkham, tenor; 8-9, musical program.

KTAB, Oakland, Calif. (239.9m-1250kc), 8-10 p. m., Breuner's.

KWSC, Pullman, Wash. (348.6m-860kc), 7:15 p. m., program, Wauna club of Asotin.

Theater Installs Ear Phones For Slightly Deaf Patrons

LONDON, Eng.—In order that theatergoers who are slightly deaf may not miss any of the fun in "The Farmer's Wife," London's most popular play, now in its third year at the Court theater, a novel Radio scheme has been introduced by the management.

"Lorgnette" head phones, or more correctly ear phones, have been installed in certain parts of the dress circle and stalls, so that members of the audience who are a little hard of hearing will not have their enjoyment lessened through missing some of the best points.

All the stories you hear of cost-savings by home-assembly of radios, no more than approximate the economies effected by Crosley methods of mass-production. Imagine, for example, a five-tube set of rare tonal quality, fine sensitivity, superb volume and exquisite beauty for $75! That is the price of the new Crosley 5-tube RFL . . . without accessories

West of the Rockies, add 10% to all prices

The New Radio Book

How to ≈ *understand radio, assemble circuits, improve reception, operate sets,* and is your Radio reference book.

The greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest, it supplies the demand for a book covering every phase of Radio. Starts at the beginning with simple explanation of Radio reception, with technical explanations of the different parts and leads right on to the more advanced instruction. A complete handbook serving as a ready reference in the Radio field. It gives suggestions on parts and sets which will prove to be a money saver. The full size template and working instructions for an efficient 7-tube super-het are essentially an important part of this book. Special chapter is devoted on "How to Operate," which gives detailed information on the operation of many well-known sets.

SOUTH AFRICA SHOW GETS U. S. PROGRAM

MESSAGE IS ALSO HEARD BY AUSTRALIAN FAN

2XAF, Schenectady, and Johannesburg Experimenter Successfully Arrange Broadcast Relay

SCHENECTADY.—2XAF and Grant Dalton, an enterprising South African experimenter, have demonstrated that it is possible to schedule an 8,050-mile Radio broadcast relay and make good on the program. It came about this way.

The annual agricultural show of the South African Union was held recently in Johannesburg. The show management believed that it would be a fitting climax to the week to give the visitors an opportunity to hear a Radio program from the United States. Cables were exchanged with the General Electric company and a definite time was fixed for the broadcasting, 4 to 6 p. m. Eastern time on the Saturday night the show was to close.

William M. Jardine, United States secretary of agriculture, prepared a greeting and other American agricultural leaders sent messages. There were also musical numbers and all were sent out on the 32.79-meter wave of 2XAF, from the studio of WGY here.

Even Australia Tunes In

South Africa reported by cable that the relay was a great success and then a few hours later, sifting through amateur channels, came a message from E. H. Cox, of Elsternwick, Victoria, Australia, to the effect that he had heard the whole program of 2XAF as late as 7 o'clock in the morning. Johannesburg got the program at about midnight.

South Africans cabled: "Much obliged your cooperation. Special program relayed Sunday a great success. Express our thanks to participants. South African agriculturists reciprocate wishes. Transmitting your Sunday morning dinner music."

Australian 14,000 Miles Away

The Australian, Mr. Cox (3BD), reported as follows: "Your concert to South Africa heard very loud here three hours after sunrise. Signal would travel eastward from you so distance would be 14,000 miles. Congratulations. Do you ever use 32-meter phone about 4 a. m. Eastern Standard time? Heard phone as late as 7 a. m. and carrier came through as late as 8 a. m."

2XAF is a little brother of the 50-kilowatt transmitter of WGY. It is one of six Radio transmitters on the 54-acre Radio laboratory of the General Electric company. The aerial is only 50 feet long and about the diameter of a lead pencil. 2XAF uses 10,000 watts of power.

Copyrights Busy Overseas

LONDON.—The initiative has been taken by the authors and dramatists of the Intellectual Cooperative society, which has just held a meeting in Paris under the presidency of M. Luchaire, director of the International Institute of Intellectual Cooperation, with the object of safeguarding the interests of artistic and literary property throughout the world.

Reader's Views

Wanna Learn Something?

In April 3 issue of Radio Digest I see that H. W. H. of Vandalia, Mo., thinks that listening in on a program of Station WOWL with a 3-tube set is such a wonderful feat. I, for one, do not think so. I have a 1-tube single circuit regenerative set.

On Friday, March 26, 1926, I listened in on Station KFIU, Juneau, Alaska, wave length 226 meters, power 10 watts. The distance is about 950 miles, air line. We had two head phones on the set, which were in use by my father and I. I will put anybody wise to the trick of receiving low power stations that will drop me a line, especially J. M. H. of Lake Charles, La.—John E. Heuer, Box 179, Trochu, Alberta, Canada.

Everybody Satisfied

I am of the same opinion as most B. C. L. At each intermission I think the number just played and the one to be played should be announced. For instance, this morning on KMA's early program, the announcer told that a certain selection would be played on the piano and when it was finished, he announced again what it was, then who played it and what the next number would be.

The way he announced gave those late tuning in a chance to know what they had just heard and by whom. If all would do this, I think the majority of B. C. L.'s would be better satisfied. —C.C.T., Howe, Nebr.

Pleases Individual Only

Don't you think it about time the broadcasting of listeners' congratulations to Radio performers was stopped? It seems to me perfectly all right for listeners to write, telegraph or telephone their approval of the programs to the broadcasting stations, but who wants to have half the evening taken up with announcing that Bill Jones' Superodox is working fine, and Cy Prime's one-tube Vox Populi is getting it clear as a bell? Of course everyone knows that such people simply want to hear their names broadcast. It is getting to be a regular nuisance, I imagine, to everyone except the individual who is waiting to hear his name heralded through the air.—J.A.B., Colorado Springs, Colo.

Just What It Means

I would like to voice my opinion on some of the letters in your Reader's View column.

If T.H., Okemah, Okla., had used a good standard dictionary he would have found out that "just" means "very lately, a moment ago," which surely justifies the way in which the announcers use it.

Also, what about someone with a new set who possibly hasn't heard a piece of music 150 times?

As to announcer giving a brief description of some of the classic music, I think it makes a piece much more interesting. In short, I think there is great improvement to be made in broadcasting, but not much will come from some of these cheap critics. I believe a decent letter to the station telling them what you like and don't like would bring better results. J.H.L., Lansing, Ia.

Plea for Fairness

During the past year, Radio has gone from bad to worse; at least, that is my opinion, due to the fact that the average listener is constantly criticising the broadcasters.

There are many cases to cite, but I know of one particular case where a certain party listened from 7 until 11:30 p. m., and was well satisfied. But at 11:35 the station announced an SOS at sea and shut down. The next day, a letter was speeding to them with all sorts of complaints against them, although the sender knew that SOS was the reason.

When people can get as mean as that I think they are the lowest type of humanity—sitting around a cozy fire and having no cause for alarm, while perhaps a hundred people af sea are relying on those few letters, SOS, for life itself, perhaps half frozen in the waters, men, women and children alike. I believe every good American citizen should be willing to shut off his or her set for a few minutes and even offer a prayer for the sake of the unfortunates.

I hope some of you other fans will take up the cause and make plain just what an SOS at sea means. A.F., Cedar Rapids, Nebr.

Poor Business

Concerning this business about announcer's not doing their work right:

Being an ardent worshipper of the great god, DX, I have had, of course, occasion many times to tune in stations where an announcer would not so much as offer the slightest clue as to the identity of the station. I think that such a habit or custom, or whatever it may be called, is not boosting a station, but is bringing upon it the ire of many Radio fans. It seems that every station would like to be on the right side of its listeners, but certainly the manager of a station that so closely hides its identity is not going about this affair in the right manner.

It's discouraging to listen to a station which might be far off without hearing where the station is. O.W.T., Baldwinville, Mass.

Permanent Test Period

Why wouldn't it be a good plan to have a permanent test period in the United States, devoting a short time on a certain day each week for this purpose, the time, if not the day, to be different in each time zone? Only call letters and location should be broadcast during this period, a la CZE, or if music, only a few bars at a time. A few stations could start the ball rolling, if necessary requesting other stations who follow suit to observe the same hour.—A.F.D., Baltimore, Md.

He's Laughing at You

Everytime I buy a new Radio Digest I get an awful laugh out of these wonderful tuners who pull in the 10-watt stations.

Let C.E.J. of Boston and H.W.H. of Vandalia, Mo., read this and weep.

On December 12, 1923, I pulled in KFJR at Stevensville, Mont., a distance of 1,500 miles, who was using five watts of power.

If any proof is needed, I will gladly send a photostatic copy of the affidavit Mr. A. C. Dixon sent me, or they can write to Mr. Dixon, KFJR, now located at Portland, Oregon.—R.A.V., Lafayette, Ind.

Bill Asks That Copyrighted Music Tell Reserved Rights

WASHINGTON, D. C.—Representative MacGregor of New York has introduced a bill in the house which has been referred to the committee on patents dealing with the Radio copyright situation.

The bill provides that the sale of copyrighted music composition shall carry with it the implied price to the purchaser or other lawful holder, to publicly perform it for profit or otherwise unless there shall be printed on the title page or othewise conspicuously displayed on it, a notice that the rights of such public performance are reserved to the author or owner. The bill affects composers and publishers and is along the line of certain suggestions made during the course of the recent Radio copyright hearings.

Iowa's attorney general, Benjamin Gibson, has joined forces with the Iowa Radio Listeners league to eliminate interference throughout the state. Mr. Gibson's first move will be the drafting of a statue aimed at manufacturers of Radio receivers which cause interference.

A "RADEX" Tuning Chart

Shows by dial numbers, wave length to which set is tuned. Tells where to place dials for any station. Identifies programs received without announcement.

Adapted to any set

Radio Comes to Rescue of Postmaster Who Had Chicks Stranded in Office

HOT SPRINGS, Ark.—That Radio serves in many curious ways was illustrated in Hot Springs, Arkansas, once more when the offices of Station KTHS, the New Arlington hotel, brought back the smiles to the lips of Postmaster Carey Johnson, after two days when all the joy had been abstracted from his busy life by the arrival of 100 chicks in his office.

He freely admitted that was too many chicks for his peace of mind, regardless of the fact that they were all beautiful specimens—of the feathered variety.

Can't Find Missing Keys

Life was going its merry round when a train brought in an even hundred pure bred chicks consigned to one A. B. Keys. Then the clouds began to darken the sunny skies of Postmaster Carey's morning when the carriers could not locate Keys. A search of directories failed to shed any light on the situation, and meantime the chicks got hungry and yet more hungry and their lamentations lifted skyward in outraged cluckings.

One day passed; then another of anxiety for men, postmaster and chicks. Finally a brilliant idea percolated to the postmasterial cranium. "Let's try Radio." Announcer G. C. Arnoux, of KTHS, was consulted. An hour later the call for Mr. Keys went out over the air, advising him to come get his chicks before the postal clerks took to the woods or made dumplings of same.

Ride of Hero of Tiger Creek

Far out in the neighborhood of Tiger Creek, beyond reach of mail routes or phone, lived a gent Yclept Swartz, and being a progressive farmer, he owned a Radio. Of course he possessed a mule. His Radio was pointed for KTHS and hearing the pitiful appeal of the post office, he saddled up Betsy and went speeding cross country a good two miles to the bank of the creek where resided the missing Keys.

Three hours later the much sought for owner of the chicks arrived, backed his wagon up to the post office and relieved the harassed postmaster of his unwelcome guests.

Is Postmaster Carey a Radio fan? We should hope to cheep.

STATIONS BOAST OF QUICK CHANGE OVER

TWO STATIONS in different vicinities, WJZ at New York and WKRC at Cincinnati, announce that they can now change over from one remote control pick-up point to another, while one announcer is in the middle of a sentence, and have the sentence completed at the second pick-up point by another announcer without listeners being able to detect a second's pause. Evidently both stations have been working along the same line of perfection.

Give Shell Race Data Fast By Short Wave Rebroadcast

SEATTLE, Wash.—When the University of Washington's star oarsmen drubbed the crew of the University of California recently on Lake Washington, Station KFOA "trailed" the races from beginning to end and gave the listeners probably a better picture than the spectators along the shore or in small craft along the cruise could get.

The Seattle Times press boat trailed close behind the racing crews and Palmer K. Leberman, short wave expert, broadcast the descriptions of the races "stroke-by-stroke" through a special 38-meter phone set with which the boat had been equipped. The 38-meter wave was received at the Times office and put on telephone wires which went through two exchanges before reaching KFOA's studio. Here the decriptions were listened to and repeated on 455 meters by the KFOA announcer.

A force of nineteen men was required to do this.

Stylish Flaring Model

$1.00 down!

Flat Silk Crepe

Don't miss this offer; only $1.00 down and then 6 months to pay for this ultra-stylish model of excellent quality flat silk crepe. Fashionably tailored in the new side effect now so popular. Skirt is flaring in front and trimmed at bottom with a band of contrasting color silk. See the stylish rounded collar—the attractive silk rose at the side. Back is plain except for a sash belt of self-material. Try and match this model anywhere else and see how much more you would have to pay. Comes in black, rosewood or palmetto green. Sizes 34 to 44. Total lengths up to 45 inches. No longer.

Order by No. S-6. Terms: $1.00 with coupon, then only $2.35 a month. Total Bargain Price, only $14.90.

No C.O.D. to Pay

6 Months to Pay

Do you realize how easy our monthly payment plan makes it for you to have this fashionable silk crepe dress? You pay only a little each month. Thousands of well dressed women buy our quality clothes out of the nickels and dimes they would otherwise throw away. You can too. Just try it. Send only $1.00 now. (No C. O. D.) Get this dress on approval. Try it on—judge it for yourself—see what an unusual bargain it is. Then decide. If perfectly satisfied send only $2.35 a month for 6 months. But act quick as our supply is limited. Send coupon and only $1.00 now.

No Risk to You. Money Back if Not Satisfied!

Elmer Richards Co.

Dept. 4415 West 35th Street, Chicago, Ill.

I enclose **$1** deposit. Send me the Flat Silk Crepe Dress **No. S-6.** If I am not delighted with the dress, I can return it and get my $1 back. Otherwise, I will pay **$2.35** a month until I have paid **$14.90** in all.

"The little wrinkle that makes my 'B' batteries last longer is using the right size Eveready with a 'C' battery"

"I USED to think that because the Eveready 'B' Battery No. 772 cost less than either of the larger Heavy Duty Eveready that I was saving money. As a matter of fact, on four or five tube sets, that was false economy.

"The right size Eveready 'B' Batteries to use depends on the number of tubes in your set. The life of the batteries depends on how much you listen in and on whether a 'C' battery is employed."

To get the maximum of "B" battery life and satisfaction, follow these simple rules:

On 1 to 3 tubes—Use Eveready No. 772.

On 4 or more tubes—Use the Heavy Duty "B" Batteries, either No. 770, or the even longer-lived Eveready Layerbilt No. 486.

On all but single tube sets—Use a "C" battery.*

Follow these rules, and No. 772, on 1 to 3 tube sets, will last a year or more; Heavy Duties, on sets of 4 or more tubes, eight months or longer.

The average year-round use of a set is two hours a day. If you listen longer, your "B" batteries will have a somewhat shorter life. If you listen less, they will last longer.

Our new booklet, "Choosing and Using the Right Radio Batteries," is free for the asking. It also tells about the proper battery equipment for the new power tubes.

*NOTE: A "C" battery greatly increases the life of your "B" batteries and gives a quality of reception unobtainable without it. Radio sets may easily be changed to permit the use of a "C" battery by any competent radio service man.

A STEP ON THE STAIRS

(Continued from page 12)

ily as the muffled roar of an automobile engine diminishing rapidly as the car of the state troopers swept out toward the Bay road, evidenced that the long arm of the law was gathering in its own. "There is a streak of light in the East. . . The dawn is coming."

"It has been a hard night for you, dear," remarked John, in a half whisper. "And you were wonderful through it all."

"I am afraid I am not a very good detective, John . . . Not nearly so good as Hazel Stanton. . . She has such admirable qualities as a policewoman."

"Forget Hazel Stanton. She was never anything but a minor character in the piece. And as a detective—bah! She was always picking the wrong one."

"She picked you, John. . . I could see it in her eyes. She was a woman first and a detective second, and I hated her. I believe if I hadn't hated her I shouldn't have mixed up in this business at all."

"Then there is that much to her credit anyway. She brought us together. I might still be flitting about in the dark if it hadn't been for your bravery."

"Bravery!" The girl laughed. "I brave? Why I was frightened to death. Every minute of this night I wanted you, Johnny. . . I was so alone . . . So helpless."

"Helpless? Helpless? If you've solved a murder mystery and captured a murderer while helpless, it ought to be a positive pleasure to see you work when you felt sure of yourself."

"Don't laugh at me, John, I mean it. Never in my life again will I be able to forget that horrible front door—firm and strong and tightly barred—but letting terrible creatures walk through it at will, in and out, in the dark."

"You needn't worry about the door any more. Uncle Peleg has had it nailed up. He says he is going away on his long cruise and try to do his permanent dying somewhere else so that his corpse won't have to be carried out through the Turners' last exit. He is giving us this house if you think you can stand to live in its shadows. . . And when we're married, we can cut a new door through the front wall with a glass panel in it looking out through the cedars toward the bay. . ."

He broke off suddenly and half rose from the davenport. The girl pulled him back with a start of terror.

"Listen, Johnny! What's that?"

"It's nothing, dearest. . . It can't be anything now."

"Don't leave me, Johnny. . . It's the step . . . the step on the stairs. . . The hall door is opening."

"It's Hari Singh."

The Hindu grinned.

"We have a visitor, Sahib," he said. "A clergyman, who says that Peleg Turner telephoned to him to come at once to marry someone."

"Call Uncle Peleg and show the gentleman in," directed John Carton.

"What are you delaying for, Hari Singh?" inquired Mary Williams.

CONCLUSION

KMTR IS "HIGH-BROW"

(Continued from page 13)

the start. Mammy Simmons, as all in Atlanta, Georgia will remember, was the Uncle Remus story teller at that city for a long, long time, and the memories of Joel Chandler Harris are now being kept alive out on the Pacific coast as well as in the South.

Outside of the concert hour in the evening and Mammy Simmon's home hour for the children, nothing is presented over KMTR but educational talks and lectures of the highest caliber given by men and women who are authorities in their respective lines. But one remote control studio is used although the station owns and operates the short wave broadcaster 6XBA, designed and built by its chief technician, Freeman Lang, as well as a fleet of public address systems mounted on automobile chassis, which enable the station to reach out and bring in almost any feature that might happen around Los Angeles.

To those who still think of Hollywood as a movie city, with nothing but Rolls-Royces on the streets and life one succession of gay parties, it would probably be a revelation to listen in on KMTR on a Tuesday evening between 7:45 and 8:30 to hear the broadcast of the Hollywood community sing where the people of Hollywood get together, just as they do in Podunk, Indiana, or any other town in America, and join in community singing.

So KMTR is a high-brow station and proud of it. As the directors say, nearly every Radio station in the country seems to be catering to the low-brow so why not have a few that are avowedly for the high-brow listener.

"BIG RABBIT"

(Continued from page 9)

I BREATHED with relief. Miss Tonneson at least was under the protection of Major Gaskill. The prospect of again striking the trail filled me with new life. I hastened to the water front and began making my way along the slips, inquiring about a boat, fearing the party had taken one of the large passenger steamers either for the upper St. Johns or for the East Coast.

At a slip at the front of Laura street I found the trail. A strange gasoline launch, unnamed, had been in the slip for several days and had left early that morning. It had taken aboard six barrels of gasoline consigned to William Duke and remained in the slip until shortly before eight o'clock when a tall white man, two negro men, and two women, both closely veiled, had boarded the launch, arriving in a taxi cab.

The launch had cast off immediately and proceeded up river. Several persons remembered the launch well. One had seen the party board her, and had observed that one of the women appeared to be sick, as she was supported by the white man and the other woman. The launch, according to the men who saw her, either was a stranger, or had been repainted since any former appearance in the port.

The crew consisted of three negroes, none of whom were known. The dock tender had thought the launch was the property of some of the wealthy winter resorters and had not paid much attention to her.

There was no doubt but that we were on the right trail, and that the party had gone up the St. Johns river. But where?

I still was seeking information when the steamer May Garner came down from the points up the river, and as she waddled into her slip, I approached to make inquiries whether she had passed a launch answering the description I had secured. Captain Grove said he had sighted perhaps a half dozen launches during the trip down from Green Cove Springs, several of which he knew.

He had observed one, a large, white cabin launch, which seemed to fit the description. He had noticed it particularly, because it seemed to be hugging the West side of the river, and was far out of the marked channel.

THE May Garner was at that time in the deep cove at Plummer's landing, and the launch, being more than three miles away and on the opposite side of the river, was indistinct. Captain Grove's attention had been attracted to it by its strange course, indicating either that it was in a great hurry and was making chances of grounding by cutting the corners or that it was striving to escape notice.

Satisfied that the launch was the one we were striving to trace and that its passage would be noted at points further up the river I hastened back to the Seminole where, in a short time, Borton rejoined me.

"We were right," he said shortly, seeming to have forgotten our little clash. "The porter is with them. None of the railroad people knows much. The launch was rented in the name of King, by a colored man, and paid for in advance. The party left the car a few minutes after the train reached Jacksonville, Major Gaskill, Miss Tonneson, Trimble and the maid in a taxi. Miss Tonneson either was drugged or sick. They half carried her. The car was switched out into the yards."

"Trimble returned after helping the women to the taxi and joined the negro porter. Evidently they carried us out of the car and dumped us alongside the railroad in the yards. They were afraid to have us found unconscious in the car for fear the cleaners would call the police. The whole party then went in taxis to a launch at the foot of Laura street. The cab starter heard directions given."

"I discovered that part of it," I assured him, and, as quickly as possible outlined to him the result of my investigations.

"GOOD—the trail leads up the river," Borton said. "No use starting this late today. They can't hide that trail. We must find out about the regular river boats, and lease the fastest motor boat we can get. This afternoon we must make the rounds of the lumber dealers and find where Gaskill's mills are located. Possibly they are going to one of his lumber camps. Then we'll get some sleep. We are both half dead and can't push much further without rest."

Anxious as I was to be on the trail I realized his plan was best. The excitement had buoyed us up during the day, but the deadening effect of the drug, the weariness of the ride, the shock of the abuse we had endured, all were telling upon us. I had scarcely realized how sore and weary I was until Borton spoke and then felt ready to collapse. A glance at Borton's face, drawn and gray from fatigue and suffering, proved that pursuit, for the time being, was out of the question.

For two hours more we dragged our pain wracked bodies around the city. In the first lumber office I learned that Gaskill was the ostensible owner of three saw mill plants; one near Federal Point, one near Sanford and a third on Cross Creek. The greater part of the land controlled by Gaskill had been cut over until the output of the mills was small and they were operated spasmodically.

Gaskill had attempted to sell tracts of land for colonization but the deal had fallen through. Borton returned soon after I completed my task. He had engaged a fast motor boat, the Jason, and had learned the time of departure of all up river steamers. We hardly could keep awake during the dinner and, before nine o'clock, we plunged luxuriously into soothing hot water, and afterward fell asleep in a few minutes, I to dream that I was rescuing Roberta Lee Tonneson from the clutches of a huge rabbit which grinned like Borton.

Dreaming of Roberta in the clutches of a grinning rabbit of giant proportions may have been prophetic for Wen. At any rate the two hounds are set for a devious water trail and the next episode will carry us into a strange and weird setting with the haunting shadows of the Big Rabbit, the girl and her guardians tantalizingly near and yet so far.

Super-Torodyne: An Improved 8-Tube Super

Part IV—Completed Wiring and Operation

By J. E. Owen, Univ. of Okla.

CONTINUING last week's article we shall complete the wiring of the Super-Torodyne as it would be used with an aerial, and will then consider circuit modifications which permit the use of a loop such as the one shown in figure 10.

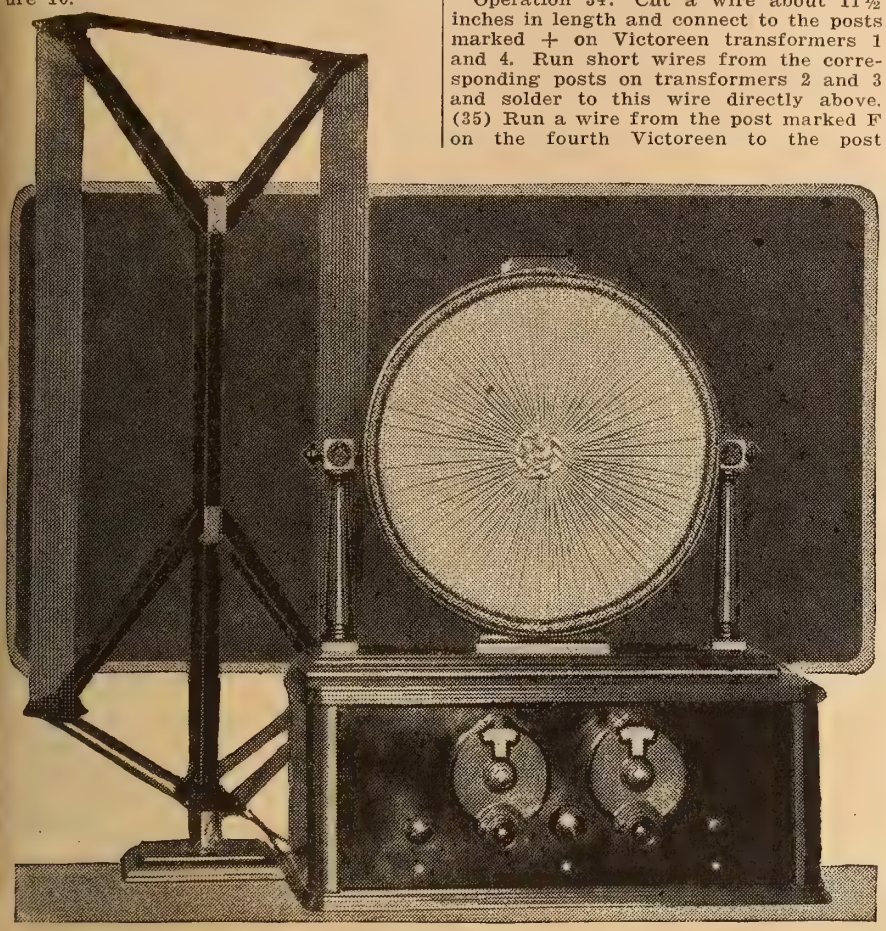

Figure 10

The Victoreen transformers may now be placed upon the sub panel and mounted at an angle of approximately 45 degrees, each to the other, as was explained in the second article.

Operation 27: Run a wire from P on socket No. 1 to P on the first Victoreen transformer. (28) Run a wire from G of socket No. 2 to G on the first Victoreen. (29) Run a wire from P on socket No. 2 to P on the second Victoreen. (30) Run a wire from G on socket No. 3 to G on the second Victoreen. (31) Run a wire from P on socket No. 3 to P on the third Victoreen. (32) Connect a wire from G on socket No. 5 to G on the third Victoreen. (33) Run a wire from P on socket No. 5 to P on the fourth Victoreen. Now run a wire from G on the fourth Victoreen under this transformer and toward the back, where it is connected to one side of the grid condenser of the second detector. A wire from the other side of this condenser goes to the post marked G on socket No. 6. These wires form the only support for the second grid condenser as may be seen in figures 4 and 7.

Operation 34: Cut a wire about 11½ inches in length and connect to the posts marked + on Victoreen transformers 1 and 4. Run short wires from the corresponding posts on transformers 2 and 3 and solder to this wire directly above. (35) Run a wire from the post marked F on the fourth Victoreen to the post marked — on socket No. 4, which is really the positive filament post. Take a wire about 8 inches long and connect the posts marked F on transformers 1 and 3. From the post marked F on transformer No. 2 run a lead to the wire directly above it and solder.

Operation 36: Drill a hole back of the hole behind Amperite No. 4. (37) Run a wire under the sub panel from the left terminal screw of the right Tobe fixed condenser up through and solder it to the wire that connects the binding post marked F on the Victoreens Nos. 1, 2, and 3. (38) Drill through the sub panel, back of the potentiometer and slightly to the right. Run a wire from the moving arm connection of this potentiometer through this hole and to the left terminal of the right Tobe condenser. (39) Drill two holes between Victoreens Nos. 1 and 2. Solder a wire to the lead which connects the posts marked + on the four Victoreens and run it through one of the holes just drilled and over to the right terminal screw on the left Tobe condenser. This wire should be insulated, particularly under the sub panel. A wire should be soldered to it and to the terminal of the Bremer-Tully choke that has no connection.

The binding post strip with its brackets should now be put on the sub panel, and over the Victoreen transformers. Connect a wire from the left binding post marked ANT to the post marked P on the left toroid coil. The second binding post which is also marked ANT is connected to the binding post T on the left toroid coil. Use spaghetti insulation on these leads. Connect the next binding post marked GND to the next one to it marked A BAT. There is a hole between Victoreens Nos. 1 and 2 through which there is no wire. (40) Connect a wire to the binding post marked A BAT—, run it down through this hole, and solder to the negative bus underneath the sub panel.

Operation 41: The next binding post is marked A BAT+. Run a wire from it to the next post which is marked C BAT+. Drill a hole between Victoreens Nos. 2 and 3. (42) Run a wire down through this hole, connecting at the top with the wire common to the binding posts marked B BAT—, C BAT+, and A BAT+. After it passes through the sub panel, bend it straight toward the front until it reaches the front panel, then bend it to the right until it comes directly below the Benjamin battery switch. Use spaghetti on this wire. It is now brought up and soldered to one terminal on the switch. A short wire connects the other terminal of this switch with the positive bus under the sub panel. (43) From the post marked F on the top Jefferson transformer an insulated wire is run to the binding post marked C BAT—. The next binding post after the B BAT— is the +B detector. An insulated wire is run from this binding post to the binding post on the lower Jefferson transformer marked B. The next binding post on the binding post strip is marked B AMP+. Drill a hole between Victoreens Nos. 3 and 4. (44) Drill another hole between socket No. 7 and the Jefferson transformers. Run a wire from the binding post marked B on the upper Jefferson transformer through this hole, across to the left, then bend to the back and up through the hole between Victoreens Nos. 3 and 4, and connect to the post marked B AMP+. A wire also con-

Gets Everything But Noise!

Read this convincing letter from a man who has "listened and marveled":

"Utica, N. Y.
Kane Antennae Co., Jan. 16, 1926.
Gentlemen:
We have found your Kane Antennae the greatest thing we have come across in the way of eliminating interference. It is a real life saver to us, as since we have installed it we get wonderful reception, where before we got only noise.
Very truly yours,
Utica Radio Supply Co.,
By M. Swire."

Improves Reception 60%

Entirely eliminates all power noises such as leaky transformers, generators, motor hums, Delco Plants, etc. Cuts static and regeneration howls and squeals in two. Proves statements of leading Radio Engineers that fully 75% of so-called "summer static" is nothing more than electric power interferences. Dr. Gehrig of Oakland, Cal., says it improves his reception fully 60 percent. Do away forever with disagreeable noises.

$1.00 *Brings BLUE PRINT Complete Working Drawings* and full instructions for erecting this wonderful Antennae. Just send $1.00 (a check will do. Stamps not accepted). A limited number available. Send TODAY.

NEW SUPER-TORODYNE

(Continued from preceding page)

nects this post to the one next to it marked SPEAKER. The other speaker post connects to the post on socket No. 8 marked P.

Test the Wiring

The Super-Torodyne is now wired. Be sure that the Amperite cartridges and the grid leaks are secure in their mountings, Amperites 7 and 8 being the No. 120 type. Insert tubes in their sockets. Connect the A battery to its terminals and notice whether the tubes all turn on and off as the Benjamin battery switch is operated. If everything is satisfactory, disconnect the A BAT+ lead and touch it to the post marked C BAT+. The tubes should now light. Next, connect the A BAT+ lead to the post marked C BAT—. The tubes should not light with the switch either in or out. Now connect the lead to the B BAT— post. The tubes should light with the switch on but should not light when the switch is off. Now connect it to the B+ and the SPEAKER posts in turn. The tubes should not light when connection is made to any of these posts. If the tubes light when they should not, carefully check the wiring until the mistake is found.

Operation of the Set

If the set performs as it should, connect the plus A lead to its post, also the C and B batteries as indicated by the binding posts and the wiring diagram. Connect the ground and the antenna leads, also the speaker to their respective posts. The receiver should now be ready for operation. Set the midget condenser at about half the capacity with the potentiometer near the negative side. Rotate the two main condenser dials until a station is found. Adjust the strength and selectivity of the set with the potentiometer and the midget condenser. A little practice will enable one to tune the set very rapidly and without oscillation in the first detector circuit.

The length of aerial used will depend on local conditions and the degree of selectivity desired. For average reception conditions, one of 60 feet will be sufficient, while a well insulated wire a few feet in length placed under the rug or around the picture moulding will be very good during the static periods of the year.

The use of a single wire aerial makes ease of installation, although it is often desirable to use a loop, particularly in localities congested with Radio traffic. With a medium length aerial, the Super-Torodyn will tune out local stations very effectively, even within a very short distance of such stations. This is due, in part, to the use of the toroid coils in the antenna and oscillator circuits.

The directional characteristics of a loop, however, give a higher degree of selectivity. In figure 10, the Super-Torodyne is shown with an Ajax loop, which is well fitted to the circuit. In figure 11 are shown the few modifications which are necessary in order to use this loop. The "center tap" on the loop is one turn off center, while the connections to be made are shown. No antenna coupler is used. With the Ajax loop, a .000032 mfd. midget condenser should be used for regeneration control.

As a large midget condenser has relatively small body capacity effects on the regeneration control, the tap was taken on the antenna coupler for use with a straight wire aerial in such a way that the mfd. midget condenser could be used.

In the same way that certain parts were specified for use with this receiver, the accessories required need some attention. For the reproducing element, a good speaker is recommended to take full advantage of the low base range of the Jefferson transformers and the enormous volumes that these stages can deliver. For the tubes, use only standard makes. By properly choosing the Amperite, storage battery instead of dry cell tubes may be used. Have your tubes tested and place the two best in sockets Nos. 1 and 5.

There are no major adjustments to be made in the Super-Torodyne when properly wired. Some minor adjustments have been described from time to time in these articles and when these are made and the set assembled according to the directions, you will find the Super-Torodyne a peer among receivers.

CLASSIFIED ADVERTISEMENTS

Classified advertisements in Radio Digest produce results. Have you a receiving set to sell? Do you want to buy a Radio? A classified advertisement in this column will sell your set.

Rates are twenty cents a word for each insertions, ten per cent for six insertions, fifteen per cent for twelve insertions, twenty per cent for twenty-four insertions. Name and address to be included at above rate. Cash should accompany order. Minimum of ten words.

Objectionable and misleading advertisements not accepted. Forms close three weeks prior to date of publication, which is first and fifteenth of each month.

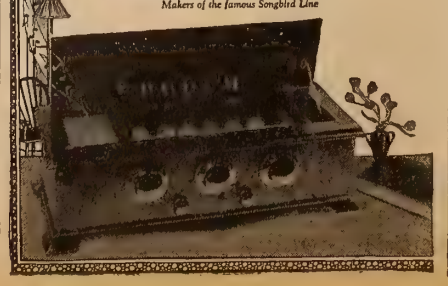
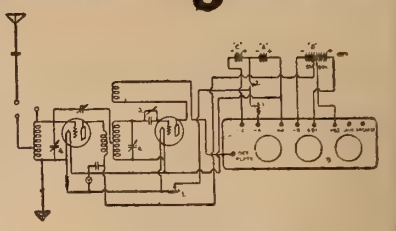
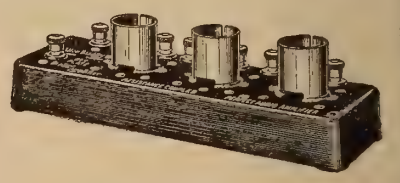
Nightingale
6-tube Set with Integral Loud Speaker $75
A wonderful, sharp tuning set of beautiful tone, made complete in our own factory. Five tube assembly suffices for most stations, but volume can be tripled by using 6 tube terminal. No wasteful neutralizing condensers but perfect balance of parts. *See Nightingale dealer or write to*
THE GUTHRIE CO., GRAFTON, OHIO
Makers of the famous Songbird Line



Improve the Browning Drake



with a Bradley-Amplifier
Resistance-Coupled
PERFECT AUDIO AMPLIFIER



THE Bradley-Amplifier is a ready-built, ready-to-install audio-amplifier. It contains no transformers, but is equipped with Bradleyunit resistors which *amplify without distortion.*

The quality of the Browning-Drake receiver, like any other selective radio set, can be improved by substituting the Bradley-Amplifier for audio-frequency transformers. Try the Bradley-Amplifier with the Browning-Drake receiver and be assured of amplification without distortion.

There are six Bradleyunit resistors mounted in the base of the Bradley-Amplifier. These compact units are of solid, molded material, baked under terrific pressure and fitted with silver-plated terminal caps. Bradleyunits do not deteriorate with age nor are they affected by temperature or moisture. They are permanently soldered into the Bradley-Amplifier, thereby assuring an amplifier which is permanently adjusted for maximum efficiency.

$15.00

(Note The second part of the station data list will appear next issue.)

CHALLENGE!

ONE DOLLAR will be paid to the Radio fan submitting the most errors in any one station's listing in this directory. Letters must reach Radio Digest office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be certified by the stations themselves, and NOT by comparison to other so-called accurate broadcasting directors and lists. Readers also must live in same state or province as stations corrected are located. Station verifications must accompany corrections.

That's just how sure Radio Digest is that this broadcasting station directory is correct! To make the challenge fair for everyone, broadcasting stations and their employes are barred from this offer. Why? Because the broadcasters are the source of all the data given herein. They are (or should be) interested enough to answer the inquiry sent them every time data on their station appears. This inquiry contains a proof of their last listing and must either be corrected or O K'd as correct and returned to the Digest. Nevertheless, sometimes the stations are careless and mistakes are made. But Radio Digest is so sure of the exactness of this directory that this challenge is made unconditionally.

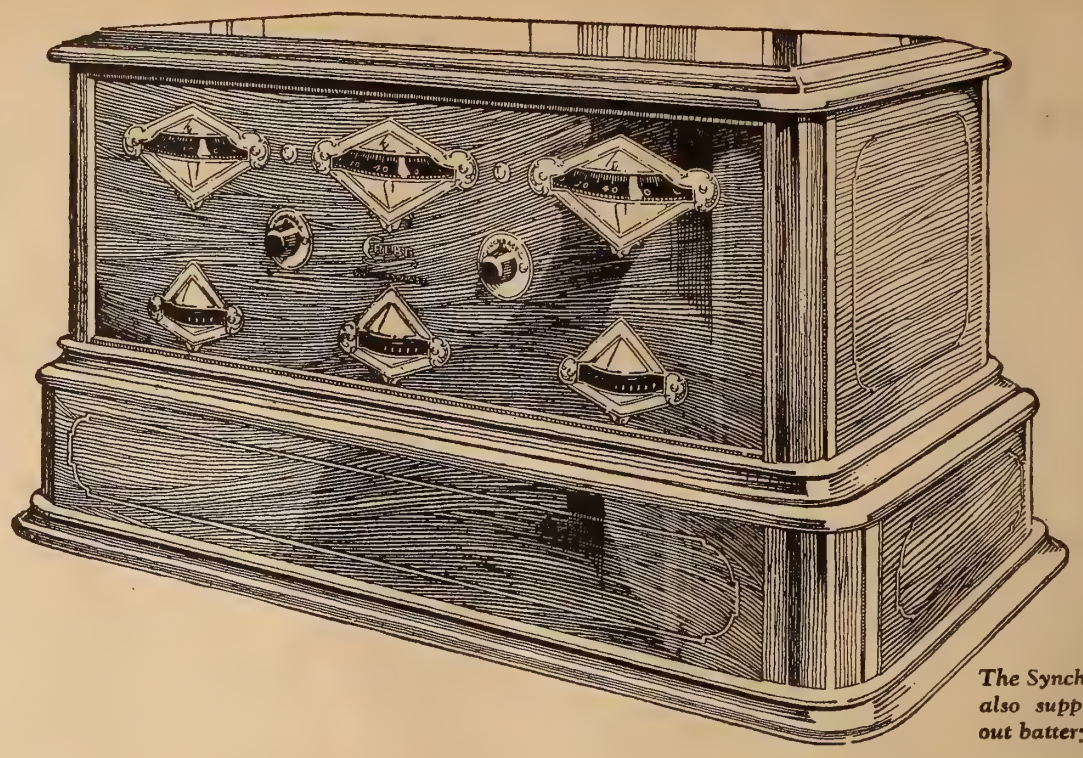
With reference to the directory: It appears in six parts, serially continuously; the first four parts are station data listings, arranged alphabetically; the fifth part is a state, city index of stations; the sixth part is a wave length index. The information contained in each station data listing is given in the following order: Call letters, city, state, wave length used, watts antenna input, owner's name, announcer's name, slogan used if any, name of listener in "club," schedule of operating hours, and kind of time used, as "Central," "Mountain," etc.

Six successive issues of Radio Digest will give one the most complete and accurate list of broadcasting stations obtainable. This service is original with this publication, and has been maintained from the start. Right of reproduction without permission of any or all of the data contained herein is denied.

"Where there is much merit there is great reward."

The merit of the Synchrophase has long been proven.

Doctor Why



The Synchrophase is also supplied without battery base.

The Practical Value of Superior Construction

OUT of the thousands of Grebe Synchrophase receivers sold during the past fall and winter, exactly seventy-three were returned to us for replacement or adjustment.

Isn't that about as near to 100 per cent perfection as human frailty can come?

The Synchrophase is built to give full satisfaction to its owner; its record shows that it does.

Ask your dealer to demonstrate the many exclusive Grebe features that, added to its sound construction, bring complete radio satisfaction

FIVE NEW FACES IN TOP 16 OF CUP RACE

BARNES, JOHNEN, BROKENSHIRE AND MAY IN LEAD

New Candidates Bring Total to 179—Standing with Votes to Appear Next Issue

Life for the average citizen is a series of ups and downs, and Radio announcers are no exception. Looking over the top sixteen candidates in the 1926 Gold Cup Award race, the Gold Cup editor notices that there are five who have had their ups and the same number who have experienced downs, since last issue.

Arranged in four groups of four, so that the actual vote won't prejudice your opinion before you are convinced which man is your favorite, the sixteen leaders this issue are:

First group: Pat Barnes, WHT; Norman Brokenshire, WJZ; Louis John Johnen, WLW; Earl E. May, KMA.

Second group: Henry Field, KFNF; Gayle Grubb or Gloomy Gus, KFAB; The Hired Hand, WBAP; Harold Isbell, KNX.

Third group: Robert W. Griffin, WHO; William (Bill) G. Hay, WGN; Peter MacArthur, WOC; Clyde A. Randall, WSMB.

Fourth group: G. C. Arnoux, KTHS; Phillips Carlin, WEAF; Sen Kaney, KYW; Jerry Sullivan, WQJ.

But It Doesn't Mean Anything

There they are, but it doesn't mean anything, for it is a long time before the contest closes and the winners are proclaimed. New faces in the top sixteen this issue are Gayle Grubb, Harold Isbell, Bill Hay, Peter MacArthur and Sen Kaney. Old faces disappeared below the top sixteen level since last issue are Milton Cross, Lambdin Kay, E. L. Tyson, Edward B. Husing and Leslie Joy. Are any of the latter men your favorites? Better save your votes for them because they need them.

Of course the preliminary standings do not indicate the real truth because dyed-in-the-wool listeners are saving their ballots from every issue until they get a COMPLETE set to cast for their favorites. The bonus vote of fifty is obtained by saving the ballots this way, and it means a lot of help to whatever candidate is the recipient.

Only 179 Want Prizes

The record has been broken so far as the number of candidates entered is concerned. Added to the 140 names already announced, there have been thirty-nine nominations made since last issue. The new entrees are:

Anderson, Henry, KSO.
Baker, Norman, KTNT
Cartier, Jacques, CKAC
Cisler, Stephen A., WDGY
Clarke, Ralph K., KOA
Coe, R. L., KSD
Craig, Bob, KFAB
Criley, Frank H., KLDS
Faassen, Joe, KSO
Fay, William, WGY
Finke, Harold, WGBT
Fricker, H. A., CKCL
Hardy, C., WGR
Hayes, C. H., KSL
Hernandez, Remberto O., PWX
Hurd, Robert, KFI
J. C. R., KOA
Legrow, Archie, WCSH
M Fee, John, WFBM
Marshall, M. A., KFLZ
Phillips, H. H., KWWG
Pierson, Wm. T., WCAP
Richards, Dudley D., WLS.
Richardson, Harry, KFJF
Rigg, M. A., Jr., WGR
Rose, William, CKCO
Sadler, Harry D., WLS
Simmons, Pate, KFNF
Spink, George, WLSI
Sweet, Wm. M., WRC
Swift, Gale, KYW
Talbot, Freeman, H., KOA
Thomas, Lloyd, KFKX
Tracy, F. N., WHN
Uncle Bob, WHEC
Uncle Wip, WIP
Waugh, Harry, WIAS
Wick, Bert, KDLR
Wynkoop, John, WCAU

And now for a surprise! Be sure you read the next issue of Radio Digest, out June 1, for it will contain the first standing of the leaders with actual numbers of votes received. The standing of the Canadian announcers, who are eligible for a special silver loving cup, will also be given.

Don't miss a single ballot, for when these are turned in to Radio Digest in a group of consecutive numbers, extra bonus votes are allowed the candidate voted for.

The ballots, top of this page, numbered consecutively, will appear in each issue of the Radio Digest until the close of the contest.

Each of these ballots will count for one vote when sent in separately. You can hold these ballots until you have four that are consecutively numbered and when they are sent in, a bonus of eight votes will be granted.

The larger the number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. And for a complete series of ballots, including one from each issue from March 27 to September 1, a bonus of fifty votes will be allowed.

COLLEEN MOORE IS PRETTY COVER GIRL

AND did you ever go tuning in the California stations when all of a sudden you came to KFI and the roguish voice of that bit of a lass we see so often in the pictures, Colleen Moore?

Then, 'twill be pleased you are to be looking at the Radio Digest cover this issue for there is the smiling face of her just as she stands babbling with her friend Mike in the KFI studio, the picture being taken especially by the movie photographer for the Radio Digest readers.

Looking Ahead

Beauty and Romance in a City That Still Lives Its Traditions and presents the charm and quaintness of half a century ago is the story of Montreal. It is called "The Little France of America," for eighty per cent of its population is French. Jacques Cartier, director and announcer for CKAC, is the nucleus of an interesting story in our next Radio Digest.

Californians Report Quite Regularly Hearing Voices from the Land of the Mikado, wafting over the vast ether expanse that domes the Pacific, and there have been numerous inquiries as to Radio broadcasting in Japan. There will be a feature with pictures on this subject in our next issue.

After reading developments in Following the Trail of Hugh Fullerton's Big Rabbit in this issue you will naturally expect a clash in our next installment. The chances are you will not be disappointed, but we can't give away the secrets here. This is Fullerton at his best.

Without Assuming the Feverish Rush of a Real Estate Boom, Oregon has, however, enjoyed an exceedingly rapid and wholesome growth during the past few years due to its temperate, equable climate, industry and agricultural attractions. The State Agricultural college at Corvallis has been a leading factor and its voice is Radio Station KOAC. See Radio Digest of June 1.

Lightning Arresters as Used with Radio Receivers Are Not Ornaments. Neither will any old A or B battery give you value received. Next issue's "Spring Cleaning" article tells the whole story.

Going Camping?—Then Build the "S.O.S." portable. Complete details covering the construction of a flyweight portable "super" will begin in the June 1 issue. Reserve your copy.

SHORT WAVES

By Marcella

Here's a cute note I received from the Silver Masked Tenor:

"Dear Marcella: A few weeks ago my good wife called my attention to your little article saying that our little daughter Rosemary was a boy. Rosemary, who by the way is eleven months old, felt rather hurt that you should call her a boy, and wants you to know that she is a GIRL. So I told her I would write you all about it. Sincere good wishes to you from, 'Mr. and Mrs. Silver Masked Tenor' and Rosemary."

* *

I've a confession to make. I know, and have known for a long time where Gene Rouse was announcing. Yes, he is announcing, but he won't let me tell you where. At least a score of you have guessed correctly. The rest of you will have to guess for yourselves, that is, unless Gene lets me tell. No Harriet, I am not Gene Rouse, nor his wife. And another secret I know is who Sam 'n' Henry really are. You'll have to guess that, too.

* *

Who thought Ralph Shugart, of WJJD, was married? That's out, as the umpire says. Jack Nelson, WJJD's genial and married director, however, may have an announcement to make ere long. And he intimates it won't be about Radio. No, he is not divorced and his wife hasn't made plans to get rid of him, to my knowledge. Yes, Patsy Joyce, both boys are very good looking.

* *

Jack Little is usually where you don't expect to find him. He's hard to locate, but when we do know, you'll find his name in the list of "headliners today" in the advance programs. That also holds for the Ray-O-Vac twins and Lew Ferris. The Ray-O-Vac twins were at WBZ, New England, the week of April 24, but that's 'way back.

* *

Boys, here's a tip. Tune in Miss Lorraine Allen at KUOA, University of Arkansas, some night. Then go back to page 3 of the April 17 issue of Radio Digest and look at her. She is a darling and the first coed to be president of the senior class at the university. Better hurry up for she will be graduted soon and some one else may get her. When to listen? Any Thursday night at 8:45 o'clock Central time. The title, "Queen of the Ivories," fits her to a tee.

* *

Now about Harry Bloom, who sings over WTAM from the Golden Pheasant, and Phil Julius, who does the same thing over the same station with the Royal Canadians. Harry is unmarried—yet—and very eligible. Stands 5 feet 10 inches, weighs 165 pounds, is 29 years old, has black hair and beautiful brown eyes. His hobbies, he tells me, are "books and women." Which do you prefer, Mr. Bloom? Answer: "Women, because they're harder to read through than books." Amen. Harry is Beau Brummel of Cleveland music publishers' representatives. Works for Remick. Heard also from Music Box restaurant.

Phil Julius is an inch shorter than Harry, a year younger, and three pounds lighter. Rest of physical description the same. His hair is curley, he is unmarried, and his hobbies are (1) baseball, (2) prize fighting, (3) cabareting, (4) fast ponies. Is an exclusive artist at the Music Box restaurant and sings for Mr. Mackay-Berlin.

* *

"Oh, Marcella. Is it really necessary for you to tell about me?" Yes, Louis John Johnen, of WLW, it is. So many girls have written to me and I simply MUST tell them you are single—in fact, the only eligible announcer in Cincinnati. Yes, girls, Louis is also a very good singer and has a number of operatic roles in his repertoire. He sang with the famous Cincinnati Zoo Opera company a few years ago and is going to participate in the operas this year, in addition to his duties as program director of the Crosley superpower station. Louis is of the intelligencia class. In fact, he likes nothing better than to discuss the classics and reads excerpts for his audience when not occupied as interlocutor in the famous Burnt Corker minstrels, which he started as a novelty for the air audience. He is a Phi Beta Kappa man; graduate of the University of Cincinnati and Conservatory of Music; can drive an automobile safely with one hand, etc. He registers 170 pounds on the scales of the Y. M. C. A. where he takes his daily exercises. His occulist says he has brown eyes while his tailor claims he is 5 feet 9 inches tall. His barber insists he has light brown hair. Louis is really a chemist but specializes in the analysis of the feminine heart.

* *

No, Mrs. S. J. F., Eddie Cavannaugh and his wife, Fanny, the "Gaelic Twins," are not at WFAA. They may be heard

(Continued on page 14)

THOUSANDS END MYSTERY STORY

STAGE HANDS' UNION EYES BROADCASTERS

WOULD HAVE STUDIOS HIRE SILENT SCENE SHIFTER

Omaha Union Manager Thinks Maybe Skilled Labor Needed to Move "Mike" or Chairs

By W. O. Wiseman

OMAHA, Nebr.—A move to put a silent scenery shifter in every broadcasting studio in the country has been launched by the Omaha local, International Association of Theater employes, led by H. H. Bushey, business manager of local stage hands.

Radio is making big inroads on theater employment, Mr. Bushey claims. It is only fair, he reasons, that the work done in connection with staging of Radio entertainments in studios should therefore be allotted to the stage hands' union.

"They put on plays and all such things at Radio studios," said Mr. Bushey. "I don't know what scenery is used in connection with these, but included in our union are many different kinds of stage mechanics and undoubtedly some of the work in connection with these stagings could be done by skilled stage hands."

Bushey Will Fight for Principle

The local union has passed a resolution directing Mr. Bushey to present the matter at the international convention of the I. A. T. E. in Cleveland in June. Mr. Bushey says he will go to Cleveland prepared to fight for the principle advocated by the Omaha local that Radio studios are places of amusement and must employ union stage hands.

"If the national association adopts this rule, we will ask talent to refuse to broadcast unless union stage hands are employed in conection with the studios," Bushey explained.

Orson Stiles, director of WOAW, the Woodmen of the World station here, said he thought the move a "huge joke." "We can move our own chairs in the studio," he added.

Frank Taylor in charge of WAAW, when told of the move said, "We have an announcer and an operator in our studios. A third employe would be in the way."

THREE PLANTS TO PUT DERBY ON AIR

Famous Kentucky Horse Race Classic Goes over WGN, WHAS and WEBH

CHICAGO.—Two leading Chicago stations WEBH and WGN, and the broadcaster of the Louisville Courier-Journal at Louisville, WHAS, will give followers of the turf detailed word pictures of all that takes place at Churchill Downs on Derby Day, May 15.

This is the second year WHAS and WGN have essayed the presentment of the famous classic of the "Sport of Kings." Last year both stations succeeded admirably in handling the Derby.

The broadcasting from all stations will begin on or shortly before 2 p. m. Central Standard time. All racing events, descriptions of the milling crowds, the music from two bands and a complete running story of the Derby will go on the air.

WGN, the Chicago Tribune station, also announces that it will broadcast the 500-mile automobile sweepstakes Monday, May 31, at Indianapolis Motor Speedway. This is the third year WGN has handled the Indianapolis auto races.

But There's Still 529 of 'Em to Select from

Commerce Department Warns Stations to Renew Licenses Early

WASHINGTON, D. C.—The total number of broadcasting stations on April 1 was 529, according to a recent report of the department of commerce. This is a decrease of 62 over the high water mark of May, 1923, when there were 591.

Stations which permit their licenses to expire without attempting to renew them immediately are having a hard time of it with the department of commerce. Through carelessness a number of stations fail to renew their licenses and they are automatically cancelled. In attempting to set aside the cancellation, the stations are to show that they are rendering a definite public service.

Telephone-Radio Mystery That Was Baffling Experts Found to Be Hoax

COATESVILLE, Pa.—Radio concerts picked up from distant stations over an ordinary telephone line at Brandamore, near here, which for two years had mystified telephone and Radio experts, have ended and the mystery has been cleared up by the admission of Earl Davidson, a Reading railroad telegraph operator, that the strange reception was a hoax.

Although he declined to go into details as to his methods, Davidson intimated that he had connected a concealed Radio receiving set with the telephone lines by means of a device of his own invention. He lost his job as a result of the hoax.

It was not uncommon for other employes to lift the telephone receiver to report a train and pick up a Radio program being broadcast from Atlanta, San Francisco and other distant American stations. On some occasions foreign stations, including Germany, were presumably heard.

The mystery drew Radio experts to Brandamore from many parts of the country, all of whom were baffled.

Then railroad officials became suspicious of Davidson. His movements were watched closely, but nothing was revealed. Finally it was decided to suspend him and this brought the mystery to a climax.

ONLY 20 YEARS OLD AND FAMOUS

THE story of Miss Lillian Knowles, opera star, sounds like the dream of a novelist. Things were in a terrible mess over in Europe when Miss Knowles' parents decided to leave England for America. She was just a child of eight and she remembers there was a great deal of excitement aboard ship when news came over the air that war had been declared.

It simply spoiled everything for Lillian. She had been having a lovely time, the pet of the whole ship and simply idolized because of her singing concerts. A famous maestro had taken her hand and told her mother that the child was destined to fame as a great singer. Furthermore he would be glad to take her to Italy and train her remarkable talents. Then the terrible war news! Confusion—everyone running back and forth and nobody knowing whether he was coming or going. At the gang plank the maestro disappeared.

Lillian's parents journeyed on to Chicago. Determined and ambitious for her brilliant daughter the mother devoted untiring effort in seeing that she was afforded all the training that was possible. At 12 the little girl was featured as a soloist by Dr. Francish Hemmington, famous music teacher. Then came more calamity. Affairs made it necessary for her parents to move to Kalamazoo and away from her teacher. But there were kind friends in the Michigan city. Appreciating her talent and necessities the Kalamazoo Music society sent her back to Chicago for development as an artist.

Mrs. Archibald Freer, wealthy and kindly woman, then entered Lillian's life and became her sponsor. Now a young lady, she was beginning to show results for all of her struggle upward and forward. She was introduced to opera and important concerts and was acclaimed a success. During the season now at hand she will be heard regularly on the WHT programs at Chicago.

AND MOST SOLUTIONS PICK WILLIAM CARYL

MRS. H. L. LENTZ, SALINA, KANSAS, AWARDED $250

Wisconsin Boy Takes Second Prize—Public Demand Causes Several Stations to Repeat Drama

FIRST PRIZE $250

Mrs. H. L. Lentz, 212 West Jewell St., Salina, Kans.

SECOND PRIZE $100

Clinton B. DeSoto, Owen, Wisconsin

THIRD TO SEVENTEENTH PRIZES $10 EACH

Mrs. Mary M. Burns, 426 Denver St., Albany, Ore.
Mrs. Roy Moton, 1416 East 16th St., Oklahoma City, Okla.
Marie Byrne, 929 26th Ave., Seattle, Wash.

Walter F. Sellon, 1000 Crain St., Evanston, Ill.
Mrs. Louise George, 421 Harrison Ave., New Orleans, La.
Don H. Shutt, 4207 Iroquois Ave., Erie, Pa.

"And so, dear friends of the Radio audience," as the silver-voiced announcer would say in conclusion, "our great mystery play, 'A Step On the Stairs,' comes to a close."

Above is the list of the prize winners and that is the main thing many thousands of Radio Digest readers and Radio audiences all over the United States have been waiting to see.

Radio Digest has a large file section full of letters and cards from listeners and readers all over the United States who have voiced their appreciation of the story and its correlated Radio drama. It can be estimated conservatively that not less than 5,000,000 persons in this country and beyond its immediate boundaries followed the ghostly quest of Uncle Peleg and the strange assembly of guests at that midnight seance in the old Turner manse on Pelican Bay.

Applause Letters Land Project

Robert J. Casey, the author who created the story at the special solicitation of Radio Digest, and Fred Smith who converted it to dramatic form are both to be congratulated and have been by these same letter writers.

The broadcasting stations and Radio Digest are pleased to have worked out this experiment so successfully together. The plan looked promising but it was a new idea. It had a long period to run. Suppose it didn't take? Then came the first installment in print, followed by the first episode on the air. No letters ever came to Radio Digest or into the stations that created a deeper interest than those first letters. Editors and artists gathered around, each individual reading and rereading every scrap of the mail.

"Here's a wow!" would come a shout as some particularly good letter was opened. It would be read aloud. Applause in a theater is easy, but a letter means effort and sincere interest and that is why every letter always is appreciated.

Stations Repeat Drama in Entirety

The second week found the applause letters even greater and more enthusiastic. The stations would send their letters to Radio Digest to read and Radio Digest would send its letters to the stations. Each week found the interest in the story and the innovation of turned-down lights and mystic effects more pronounced, and within the last two weeks there have been requests to broadcast the whole series in one evening's performance.

Several stations are considering this plan, especially as the only complaint received has been that the episodes were too short on the air. The first stations to present the complete play in one evening were WNAC of Boston and WEAN of Providence, both of the Shepard Stores, which presented all ten episodes the night of May 12. Then the General Electric Company station, KGO, at Oakland, California, will present all ten episodes on the evening of May 20 and the General Elec-

Splash! Over Went the Baby!

Sir Henry W. Thornton, (above), President Canadian National Railways, makes presentation speech in Ottawa by Radio while another pins medal on Mrs. Polyblank at O'Brien.

AND Plop! Over Went Mrs. Polyblank Right After Her! True Bedtime Story of Canadian Mother's Struggle in Icy Water to Save Child. Sir Henry Presents Medal by Radio.

By HAROLD P. BROWN

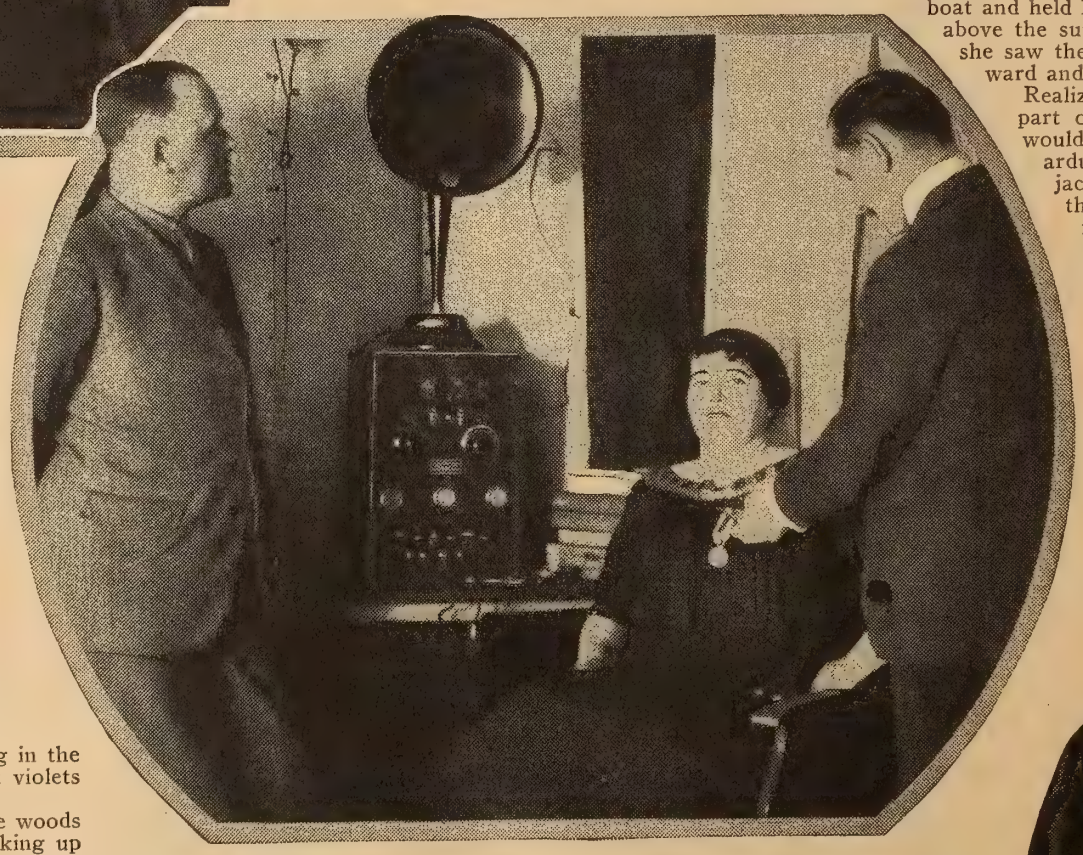
WHILE mother is turning down the covers (if you DO sleep with covers these days as they do in Quebec) and before you start stripping for bed you shall hear the true story of the little girl who tumbled into the lake and how Mrs. Polyblank got her medal.

Even in the summer time it never gets very warm in O'Brien, which is up toward the north pole in the western part of Quebec. And while the most of us are enjoying these beautiful May days I suspect the children of O'Brien are still looking for the first robin or maybe they are so far along as to be hunting in the woods over the hill for the first violets of the season.

By the way, bears live in those woods and just about now they are waking up from their long winter sleep and probably they, too, are hunting—hunting for their first square meal of the season. Let us hope that they do not meet the little girl who tumbled into the lake nor the two little children who belong to Mrs. Polyblank.

Soon Kitty Ryan—I believe that is her name, although Mr. Hanratty did not say in his letter telling me about it—will be three years old. There will be a birthday party and it will be the biggest "coming out" party O'Brien has ever known. By "coming out party" I mean something quite different than the ordinary kind, first, because the "coming out" part of it happened weeks and weeks ago, and second, because Kitty is so tiny.

SO I will tell you now about the "coming out." Kitty and her mother and Kathleen and Margaret and their mother and George and Daisy and Mrs. Polyblank were all out in a motor boat on Long Lac (another name for Long Lake), before the ice covered it all over. Mrs. Polyblank was attending to the motor, which sputtered and made a lot of noise. The two mothers were talking about the new mines that were being opened up in the neighborhood.



Above is actual scene of presentation of Mrs. Polyblank's medal. Left to right the participants are: Mr. Polyblank, civil engineer for the C. N. Ry. and husband of heroine; Sir Henry (his Radio proxy); Mrs. Polyblank in her ceremonial gown and the R. C. H. A. representative. Below are Mrs. Polyblank, the little Polyblanks and the Polyblank dog, out for exercise.

Margaret and George were pulling at each other with a piece of tie rope and Daisy and Kathleen were investigating the remnants of a lunch basket. Nobody was paying any particular attention to Baby Kitty who had clambered her way toward the front end of the boat.

Finally Mrs. Polyblank got the engine running smoothly and turned to talk to her friends. Her eye took in the four children in the pit and then she glanced forward over the engine. Her eyes popped out of her head. Motioning the others to keep still she stepped forward quickly, for Kitty had clambered up on the prow of the launch and was looking over the edge at the spray.

But just then one of the women's nerves gave way and there was a scream. Kitty looked up in surprise, lost her balance and—splash! Mrs. Polyblank caught a glimpse of a scared little face sinking under the clear icy water as they swished by.

"Stop the boat!" she called, jumping over the side without the slightest hesitation.

But the other two women were utterly paralyzed with horror. They just stood in their tracks and moaned. The boat raced on with no hand on the rudder. Mrs. Polyblank swam under water with her heavy clothing pulling and dragging her down as it became soaked and water logged. But she caught the little girl who had tumbled from the boat and held her up. As she raised her head above the surface for a fresh breath of air she saw the motor boat still plunging forward and making for the shore.

Realizing that she must get rid of part of her heavy clothing or both would drown she managed slowly and arduously to remove coat, sweater jacket and heavy overskirt—at the same time keeping Kitty's frantic little form above water. A man saw her from the shore and started out with a boat. It seemed to Mrs. Polyblank he never would reach her, that she would have to give up. But she fought on and on and kept Kitty's nose up with supreme desperation.

Mrs. Polyblank would never pass for a sand crane. She is a big-hearted woman and God has fashioned her in proportion so it was no

KFJF Boasts First Radio Post

AMERICAN LEGION Establishes First Radio Post in Oklahoma City and Conducts Regular Meetings Over Air for Members Scattered Hundreds of Miles Over State. "Every-buddy" Invited to Listen to Programs.

THERE'S nothing Bolshevik about Oklahoma. When Uncle Sam found he had a big war on his hands and needed an army of hard hitting, fast shooting fighting men, he knew what to expect from Oklahoma and got it.

Oklahoma doesn't boast the largest population in the Union, but her men are one hundred per cent for the Stars and Stripes and have well developed trigger fingers not so far removed from the precision of pioneer days.

It is therefore not surprising that Oklahoma is splendidly represented in the American Legion and that she has established the first American Legion Radio Post in the United States. This post, No. 300, is located in Oklahoma City, and broadcasts every Saturday night and Sunday afternoon over Station KFJF. Its slogan is "Voice of the American Legion."

"Why don't you give us a special American Legion program?" was the plaint of numerous queries received by Dudley Shaw, general manager and director of Radio Station KFJF, nearly a year ago. He called on legionnaires for advice. A special entertainment by the local organization was arranged. It was a triumph.

"Give us another Legion program," came hundreds of letters, in response.

"WISH we could join that wide-awake bunch of soldiers at Oklahoma City," wrote men from isolated sections, the oil well camps and farm settlements. And then it was discovered that a Radio post of the Legion would be a great boon to ex-service men who found it inconvenient to attend stations established elsewhere. A charter was applied for and granted.

D. G. Rixey was elected post commander with the hearty endorsement of General Roy Hoffman, commander of Oklahoma City Post No. 35, and brigadier general in command of the 93rd division in the World War. The other officers of the Radio post are: Frank F. Tracy, first vice-commander in charge of music division; Jim Hatcher, second vice-commander in charge of speakers' division; Forest Parrott, third vice-commander in charge of communications division; Paul Haskett, M. D., fourth vice-commander in charge of service division; Wayne Vargason, fifth vice-commander, entertainment division; Tom Lowry, sixth vice-commander, athletic division; George Baker, seventh vice-commander, Americanization division; Mike Peshek, Jr., post adjutant; J. N. Brown, finance officer; C. R. Mooney, sergeant-at-arms; Isaac E. Kelso, post chaplain; Dick Lowry, M. D., post historian; Robert C. Graham, "Sergeant Bob," post program announcer, and George H. Gabus, Radiotrician.

"Any man or woman eligible to join the American Legion," said Vice-Commander F. F. Tracy, "who lives in a community where there is no Legion post can join our outfit. We also have associate memberships in our Radio post for members already belonging to the American Legion."

EVERY Saturday night at the hour of 12, American Legion Radio Post 300, is called to order by the presiding officer, generally represented by "Sergt. Bob" Graham, official announcer.

The usual formalities are complied with. Scattered out over the area hundreds of miles apart the members in the oil camps, the farming communities, the hospitals, small towns and wherever ex-service men may be found the members are tuned in, take part in the meeting and the entertainment. There is nothing secret about it and its meeting is open for all outsiders who choose to listen.

"And if the gentleman at Pawhuska will desist from heckling the comrade at Checotah, we will now have a report from the commander of the entertainment division. I asked the comrade at Pawhuska—and, while I'm on my feet, I'd be pleased if Comrade Hornbeck at Shawnee will remove his feet from the table and stop snoring before I send the sergeant-at- (*Continued on page 28*)

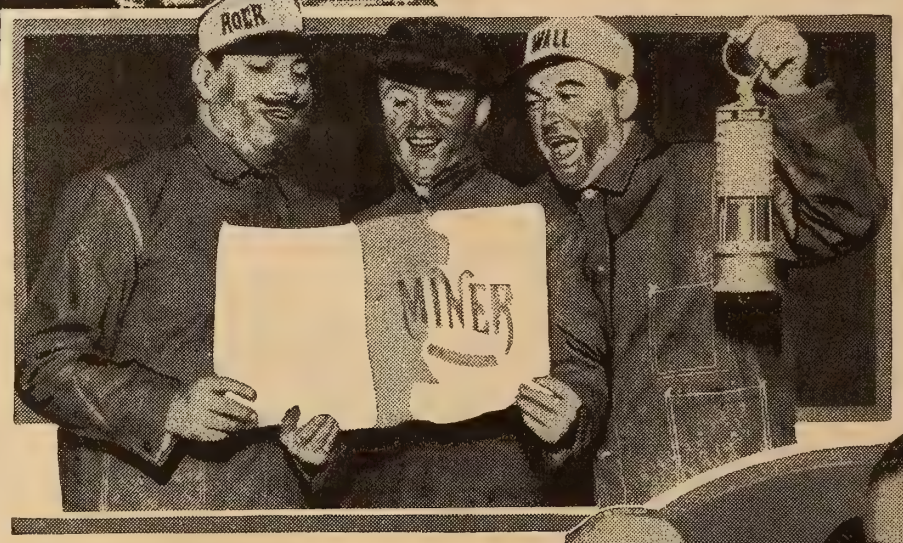
"Less argument between Comrade O'Hara at Pawhuska and Private Grady at Checotah," says "Sergt. Bob" Graham (right) at microphone addressing members of Legion Radio post scattered hundreds of miles apart.

Sometimes "Sergt. Bob" is busy as legislator at state capitol and his place at mike is taken by Announcer Harry Richardson (above). Below is Dudley Shaw, manager at KFJF and at left are Mr. and Mrs. S. E. Ramseyer.

"Pep! A little more pep in that last line, boys," calls Mr. R. M. Shaw (above) director. Art Fowler (below) and his uke have singing acquaintance with all listeners of KFJF.

"Clothes Make WMCA Mike"

TED NELSON Finds Heart and Soul Beneath Tin Ear and Dolls Radio Interlocutor in Proper Raiment. May Solve Important Problem for Theatrical Broadcasters.



Just a wee bit o' Scotch between the Radio Franks and their friend, Mike, at WMCA, (above). At right is original trio of Radio Franks—Bessenger, White and Wright—where Mike played a minor role.

By MARSHAL TAYLOR

TIN EARED MIKE has been the dismay of the profession ever since broadcasting became an art—and let no man dare say it is not an art. He has been accused of a metalic coldness totally incompatible with the inspiration demanded by stage celebrities who have sought his acquaintance. He stands unbending, undraped, disinterested in the velvet-swathed inner-inner sanctum of the studios. He is the hol(e)y of holies before whom the great and meek bow and offer living sacrifices and yet, like a graven image, his aureole of cavernous ears emits no expression, no sign of approval or disapproval.

Sweating and trembling, a certain Broadway celebrity stepped out of the WMCA studio into the reception room at the Hotel McAlpin the other day. He seemed utterly distraught. He stammered and appeared at a loss to gather his wits together to relate what was on his mind.

"I'm ruined, ruined!" he finally wailed. "I got all tangled up and the more I tried to get untangled the more of a mess I made of it. That perforated alarm clock on a crutch simply got my goat. Probably one million four hundred eight and a half people in the United States think I'm a blathering idiot after listening to my gibberish attempt at broadcasting."

"Don't worry," smiled Ted Nelson in a soothing way. "They probably think you were putting it on—if you really feel so upset about it. Al Herman will do a little of his blackface stuff and everything you said that didn't register will be forgotten."

But that night Ted lay awake thinking about the matter. The "perforated alarm clock" with a crutch hobbled up and down over his prostrate frame. The thing at least should have been decent enough to wear a pair of pajamas. Pajamas!

Ah-ha! The big idea!

"Pajamas? Certainly, why not?"

So it turned out that the only trouble with Tin Eared Mike at WMAC had been that folks failed to appreciate his personality. They had only regarded him as a piece of tin, whereas he had a living soul and, not merely one heart, but thousands of them, all responsive and susceptible to every human emotion.

"THE best way to get along with Mike," said Ted next day as he returned to the studio with an armful of parcels, "is to treat him like a pal. Forget about the Big Tin Ear. Be chummy and have some regard for his feelings. Get the idea that he has eyes and mouth and body, wears his own clothes and has sentiment just like anyone else. Harry, will you be kind enough to close the door and give us—Mike and me—a little privacy for a few minutes? And please watch out that none of the ladies enter until I give the word."

It was about fifteen minutes before the door opened again and Ted invited the others in.

"Ladies and gentlemen," he said, bowing gracefully and gesturing toward a smiling figure in Scotch kilties and all that goes with them, "may I have the pleasure of presenting to you none other than our old friend, Mike, who will entertain us this evening in a little skit entitled Hither and Thither in the Heather with the celebrated Radio Franks."

"Wonderful!"

"Marvelous!"

"Hoot mon!" exclaimed one of the Radio Franks, coming into the room at that moment. "Dinna ye say the bairn's name was 'Mike'?"

"Beg pardon, Frank," smiled Ted, "perhaps it was 'Mac.'"

"Young mon," said the other Frank, turning to the newly haberdashered Mike, "Ah ha' a min' to hug ye wi' ye bonny smile an' noo we'll ken what we're aboot."

And that was as it was and as it is.

If you have listened to the Radio Franks since Mike, or "Mac," has joined them properly garbed as a playmate rather than as a graven, unsmiling image you must have noticed the difference. You felt that you were "Mac" and just another one of the Franks having the time of your life.

But Mike, with the big idea, is as versatile as any other actor. If it's Herman and his bones Mike becomes "Rastus" or "Topsy." And he does not stand like a naughty pickaninny with his face in the corner. He has roller skates and romps around playing tag with Herman in the McAlpin grill. It's amazingly direct and insinuating if you happen to be at the other end of the ether lane when they are on the air together.

Perhaps Ted Nelson has solved the problem. Who knows but life-like automatons with microphones in the shape of human heads or the heads of animals that can blink and smile and wiggle their ears may mark another period of evolution and, perhaps, in a million years or so there may be another famous trial at which the wise men of the earth will assemble and discuss the question of whether the Mike of that day has descended from Tin Eared Mike of today.

* * *

FRANK BESSENGER, who is at the left in the upper picture, was born in Owasso, Michigan, grew up there, then graduated from the Detroit Conservatory of Music and soon earned more than local fame for his captivating tenor voice.

Frank White, the other member of the duo, is a "singing Gopher." His career began in Minneapolis. Later in New York he was a member of the original Shanley trio and a leading "booster" for the Irving Berlin songs.

The two Franks met at the Berlin studios and casually tried out a song together. It was found their voices were exceptionally well matched and they teamed together.

Below is Al Herman, famous blackface comedian, getting confidential with Mike Alpin disguised as a pickaninny an' Laws Sakes! Yo' should see dat baby Charleston!

Rough Ridin' Airboys At WAFD

PORT HURON Listeners "Het Up"

When Smitty's Ether Busters Ride Untamed Electrons Without Saddles or Bridles and Mount a Bucking Bass Horn for a Race Around the Air Corral. Ironing Club Wins Mother's Heart.

BACK in school days we discovered in our geographies that the lower peninsula of Michigan is a mighty mitten with a big thumb that sticks up into the ribs of old Lake Huron. A thumb on a mitten anywhere is a particularly important digit and right where the Michigan thumb knuckle comes you find the city of Port Huron.

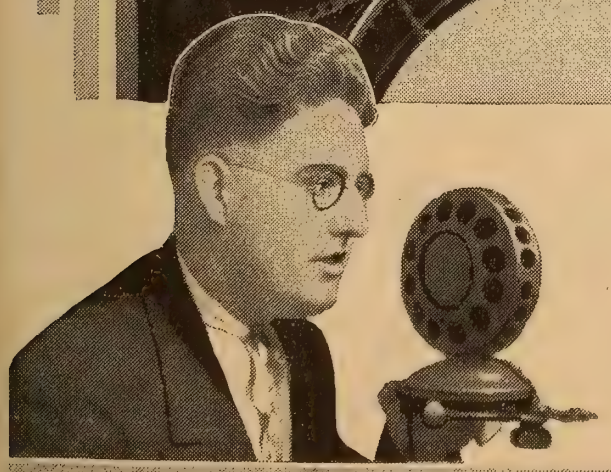
That's where the punch is and if you don't believe it tune in WAFD one of these evenings before Old Man Static get too onerous. Port Huron is a wonderful place to live when summer breezes blow, but when Jack Frost rides the wind she has to take a lot of punishment. It isn't so bad these days with WAFD throwing out a cheerful fireside glow for hundreds of miles, even across Huron into the more sparcely settled districts of Canada.

is known for his "cayenne" pep, which helps to add warmth to his share of the program.

Another chill dispensing musical unit of the WAFD station is the "Foot Warmer's" orchestra. You know how it works. You wade in through the snow and stomp it off your feet as you climb the steps. Then you stand on the door mat and kick off the rest, as much as you can. But your feet are still cold as you enter the house. Then you tune in the WAFD "Foot Warmers." Good-bye cold feet. That hot jazz-ban-jo-sax-pi-an-o-drum-bum-bum will start an agitation of the pedal extremities sure to dissolve the last atom of congealed kinks. Take the "Foot Warmer" treatment and you'll never have chilblaines, say the listeners of WAFD.

On April 3, Radio Digest published on its cover the very

A wild, unbridled cornet calms down and becomes a thing of joy when it touches the lips of the fair Selina Harbaugh (above). These are the "Foot Warmer" musicians. Their instruments start the blood circulating and toes tingling to jazz.



Mickey Russell's (above) songs and stories smooth the wrinkles from mother's brow during Ironing Club hour. Sybil Sharrard (right), with Ether Busters, rides the artist grand side-saddle or standing.

"Yes, sir, WAFD certainly does warm up the atmosphere. Take those fire blazin' Ether Busters that put on an air-rompin' rodeo every Saturday at midnight, Smitty leadin' the bunch of tootlin' cayuses burnin' up the electrons like streaks of blue lightnin'," said Zeke Jones, who lives about forty miles in from the Bay on a 160-acre farm.

"YOU don't mind the weather so much when you come in from beddin' down the stock, your nose and finger tips tinglin' from the cold," continued Zeke. "You drop a coupla big chunks o' hard maple in the old Detroit heater, tune in WAFD, sit in the rocker with your feet on the stove rail and listen. 'Whoo-oo-pee!' That's Smitty lettin' the bars down for the Ether Busters. 'Oom-pah! Oom-pah! Oopy-oopy-oom-pah!' That's the old bass horn r'arin' on his hind legs, snortin' and tryin' to throw his rider without success. You can jest see his big, brass throat bellowin' and blowin' like he was 'fraid the kittle drum was shootin' peas at his ears. All the time his front feet is pawin' the air and keepin' time with the cornet, trombone and woodwind ponies."

The Ether Busters were organized by Stanley G. Smith, known to most of the listeners as "Smitty," who announces for the Albert B. Parfet company. "Smitty" also

charming picture of Miss Eva Sharrard. The Sharrard sisters, Eva and Sybil, help to make receiving sets popular within the Port Huron area. They are regular artists on the WAFD staff and if television ever becomes a practical reality with moving picture screen over the mouths of loud speakers, Eva and Sybil stand a fair chance of receiving the lion's share of applause cards. Both are pianists with Eva taking a turn at the pipe organ when occasion demands. Sybil is one of the members of the Ether Buster outfit and takes the artist grand side-saddle, standing up and hanging from the pedals without missing a note.

These are just some of the things that seem to make the Port Huron broadcasters stand out as unique and which may account for their especially large audience of listeners.

Ever hear of the "Ironing Club?"

Very exclusive—very! It's limited almost exclusively to mothers. Yes, there are a few young men and a few young women but they belong to the general subsidiary organizations better known as "Press Clubs."

There are branches of the "Ironing Club" in every state in the Union. It's a hard club to get into but if you have plenty of pull on the Ironing Board you can get in and on and over. Kenneth McManus, better known to the WAFD listeners as "Mickey Russell," is the male conductor of the "Ironing Club" in that sector and convenes daily sessions at 10 o'clock in the morning.

While the club women who belong to the "Ironers" are guiding the hissing-hot smoothers over dad's shirt or sister's bungalow apron "Mickey" irons his way into her heart with a jolly song or a funny story. Somehow there is something in Mickey's voice that smooths the furrows out of mother's brow, the creaks of the ironing board are dimmed into silence and it all helps to buoy up the heavy iron when her arm and back are aching.

These are just some of the things that seem to make the Port Huron broadcasters stand out as unique and which may account for their especially large audience of listeners.

BIG RABBIT

by HUGH FULLERTON

"GO FIND Major Gaskill and do not come back until you do."

This was the final order of the stern little banker in one of the leading Atlanta institutions when I answered his summons and he had outlined to me such of the facts as he knew concerning the major's disappearance. The major had not only speculated with his own funds but involved resources of the bank and the inheritance of my beloved Roberta Tonneson, who lived as a ward in his pretentious home in Atlanta.

I received an advance of $1,000 expense money and hastened to the room where Dick Borton, my newspaper reporter chum, and I had taken up our temporary residence. It was understood he was to assist me in this assignment that meant more to me than any mere financial reward.

"To take up the trail where it leaves off we should start where the major was last seen in public and that was his home," counseled Dick. I agreed with him and found Roberta in a state of semi-siege. A giant negro named Trimble seemed to be in charge of the household and Roberta surreptitiously let me know that she was afraid of him. She did not know where the major had gone but promised to send me a note in case any further danger developed or she received any news.

I had hardly gotton back home and left again with Dick when Roberta's servant followed with a note. Trimble had discovered our arrangement and was to take Roberta away that very day. Dick and I located them aboard a train about to leave. They were in a private car. We tried to conceal ourselves aboard but were discovered, beaten by Trimble and later, while unconscious, dumped from the train at the outskirts of Jacksonville, Florida.

There was some satisfaction in the discovery that Major Gaskill was one of the party and Roberta was not entirely unprotected in the hands of the giant Trimble. Although physically distraught we managed again to find the trail and arranged to follow them after a night's rest up the St. Johns river.

CHAPTER VI

Borton Disappears

IT WAS after eight o'clock the following morning before either of us awoke from the sleep of utter exhaustion into which we fell almost as soon as we rolled into our beds. Then Borton crawled with stiff and aching limbs from his bed and shook me into unwelcome consciousness, grinning at his own pains and at my grimaces of agony.

"Never mind, old scout," he said consolingly, "you'll probably be sorer than that before the day is ended if you don't get busy and work the aches out. I've sent down for a pint of witch-hazel and have filled the tub with sizzling water. Take a hot bath, then I'll rub you down with the witch-hazel and, afterwards, if you feel able, you may do the same for me."

Half an hour later, the hot water and the massage having worked a miracle in reviving us from the effects of the treatment we had endured, we went to breakfast.

"I have been planning for today," said Borton, following his usual custom of assuming command and giving orders. "We will have to work fast and we'll cover more ground if we separate. You've handled motor boats and know something of machinery so you'll get the worst end of the job to start with. I'm going up the river on the Crescent which leaves in an hour. You take the Jason; that's the name of our boat. Hire a darky to help you with the boat as far as Plummer's, which is a station a short way up the river. Drop him there and hire another one to help you as far as Mandarin. Then pick up another one and cross over with him to Orange Park. Pick up a new darkey at every landing. Here is a map of the river. Stop at Switzerland, Green Cove and Federal Point and meet me at Palatka before dark. You'll have plenty of time to loaf along and listen to people."

"What's the object of changing helpers at each landing?" I asked, puzzled by the odd program he had mapped out for me.

"I'LL TELL you, but if you laugh I'll throw this toast at you and it is half an inch thick in marmalade," Borton replied seriously, lowering his voice so that the negro waiter could not overhear. "I want you to talk rabbit with every negro you hire. If you can get any of them to talk, and I doubt it, try to find out whether or not the Big Rabbit is returning or is already returned. Try to find out where he is to be found and all you can about him."

"What sort of a joke is this?" I demanded, thinking the time ill chosen for joking, although there was something in Borton's tone and manner that did not reflect a jest. "Is this a good time for me to waste a day making a fool of myself and asking idiotic questions?"

"Is the Big Rabbit here, or coming?" Borton asked without looking up. With a crash one of the finger bowls fell to the tile floor. The grin faded from the face of the negro and was replaced by a scowl of sudden suspicion. He stood shivering as if in fright . . . . and made a sign with his finger in the water spilled upon the floor.

Borton always goes by contraries. My peevishness appeared to please instead of to nettle him and he grinned exasperatingly as he threatened me with his marmalade smeared toast.

"Keep cool, Wendell Phillips," he advised. "Watch and listen and you'll see whether it is any joke. Oh George."

The call was addressed to our waiter, a good natured appearing darky who was approaching with his perpetual deferential bow.

"Many rabbits around here, George?" Borton inquired with assumed carelessness as the finger bowls were placed before us.

"Yes, sah; yes sah; a great extravagance ob dem, sah. Yes, sah, I specks dere's a powerful lot ob dem, Sah."

"Is the Big Rabbit here, or coming?" Borton asked without glancing up.

With a crash one of the copper finger bowls fell to the tiled floor. The grin faded from the face of the negro and was replaced with a scowl of sullen suspicion. He stood shivering as if in fright for an instant then, stopping suddenly, he made some sort of a sign with his finger in the water spilled upon the floor. I gazed at him in surprise and amazement.

"ARE you expecting the Big Rabbit soon?" Borton inquired, cooly ignoring the dropping of the finger bowl.

"Ah doan know nothin' 'bout no Big Rabbit," he muttered sullenly as he eyed Borton with evident distrust not unmixed with fear. He was still scowling and watching us covertly when we tipped him and left the room and, glancing back, I noticed him making signs over the coins on the table before picking them up.

"You saw?" Borton asked quietly as we descended the stairs. "Perhaps you will be convinced it isn't a joke."

"What the dickens is all this monkey business?" I demanded, stopping and confronting him in irritation. "Isn't there enough mystery about this affair without dragging in a lot of conjuring tricks and devil business to complicate it and to mystify me?"

Dick did not reply for an instant, but stood frowning thoughtfully. "Wen," he said, slipping his arm into mine and speaking so earnestly I realized he was not striving to revenge himself upon me for my skepticism. "I have a theory. It is so preposterous I would not tell it to anyone and expect anything but a laugh. But you must remember I was born and reared in the South, over in the black belt of Alabama, where the negroes, yes, and many of the whites, hear tales and believe in things you Northerners would laugh at as ignorant superstitions. I am not at all sure I am on the right trail, but if my theory works out I predict you will make a cross mark in the dust every time a rabbit runs across the road in front of you for the next hundred years. It may sound like a childish thing—but remember we are dealing with child minds in powerful men's bodies."

He spoke with such convincing earnestness I knew he meant it and that far from being in a mood to jest, he was in solemn earnest.

I pressed him to tell me his theory.

"NOT enough time," he said, "I'll give it to you tonight at Palatka. I must hustle. It is almost time for the Crescent to start. Don't forget the stops, and—watch for Rabbit tracks."

He grinned mischievously as he hastened away down across Bay street to board the steamer which already was sounding its first warning whistle.

Had it not been for the seriousness of the errand and the air of mystery which had clouded every move we had made I would have enjoyed that day on the St. Johns river more than I had enjoyed anything in years. It was still winter up 'home' in the Northland, but spring had come to the Land of Flowers. The fresh green of the trees and grass, the flash of white and gold from dogwood and jasmine, the scent of orange blossoms and jasmine on the soft breeze, mingling with the incense of the pine woods made the day ideal.

The engine of the Jason worked like a watch and we went skimming easily up the river, running almost twenty miles an hour. I was too busy and too mystified and worried to spend much time admiring the broad reaches of the river, or the beautiful wooded banks, where the huge, live oaks, covered with a mourning veil of moss, were broken and highlighted by the magnolias, just starting to flower.

The first negro I employed was loitering on the dock at Jacksonville, watching me as I tested the engine. He was in a loquacious good humor and eager to earn a dollar and his fare back, to aid me. He gave me the names of the owners of the fine houses as we flashed past Riverside, and asked childish questions about my business and my errand on the river. I nursed his good humor, and finally, thinking the time was ripe to wheedle some information out of him, I inquired:

"Did the Big Rabbit get back yet?"

His eyes grew large. His good humor changed to scowling suspicion. He declared he knew nothing about any "Big Rabbit" and, after a few minutes of confusion, attempted to mislead me by asking what I meant about a rabbit. He appeared relieved and glad to leave me when we reached Plummer's where I waited until he had started to find a way to return to the city, then employed a fisherman to assist me over the next stage.

THE dollar I offered him and permission to tow his row boat behind the Jason set him in a high humor, and as soon as we put out I inquired of him concerning the Big Rabbit. His loquacity ceased. Under a volley of questions he admitted, "Ah done heerd sompin' 'bout it —I dunno."

I paid him at Mandarin and shipped a weazened old negro who boasted that he "use ter run on de ribber." All I could extract from him was a sullen assertion; "Ah doan know nothin' 'bout no Big Rabbit."

Him I discharged at the end of the long dock at Orange Park, tied up the boat and loitered for a time. A group of colored men and boys was gathered along the pier fishing for bream and cat fish and to them the old negro, I felt certain, made some sign, or whispered something for, when I strove to hire one to go with me to Switzerland, all refused with sullen silence and resentful looks.

I was compelled to proceed alone on the beautiful but discouraging voyage southward along the river. Everywhere my experience was similar. Not one word of enlightenment could I extract from any one of the ten negroes employed during the day. Yet the manner in which my questions were received, the sullen suspicion with which they regarded me afterward, the undoubted symptoms of alarm, convinced me that each one of them knew much more than he pretended. What it was I could not even guess.

I fouled the screw of the motor boat in some floating water hyacinth above Fairview, and was delayed almost an hour before I could work clear of the plants which almost choked the river below the bridge at Palatka, so it was almost six o'clock when I reached the dock, tied up the boat and hastened to the Putnam House where I had arranged to meet Borton.

The Crescent had arrived and departed hours before, yet no Borton was in sight. As soon as I wrote my name on the register the clerk of the hotel glanced at the book and handed me a note which I read with some consternation. It was hastily scrawled on hotel paper and said:

"On hot trail. Pressing it. Wait for me here. May telephone or telegraph if delayed. Dick."

I WAS crestfallen and a little jealous at the idea I might fail to get in at the finish and that Dick, as usual, would get the major portion of the glory. Still, my hopes of success revived, and the discouragement over my failure to extract any information from the negroes faded. I realized that, in dealing with colored people, Dick had me at a great disadvantage. I was tired and sore and sulkily resentful of the idea that Dick might rescue Miss Tonneson while I idled

in the town waiting for him in helpless futility.

I was compelled to confess to myself that, half consciously, I had been calculating upon being the hero of that rescue myself and had been staging rescue scenes, with the heroine safe in my arms and the curtain descending. I reflected, disgustedly, that I might have known handsome Dick Borton would be the hero, and decided to turn in, leaving word that I was to be called the moment Borton arrived or any word came from him, then sensibly concluded a good night's sleep was the best way to assist.

For a day and a half I was left cooling my heels around the hotel, fretting and fuming over the enforced idleness, yet fearing to leave even for an hour lest some message should come from Borton and find me absent. The second afternoon, when no word had come, I tuned up the Jason and decided to run down to the Gaskill sawmill near Federal Point to see whether I could not pick up some trail independently, or at least learn something about the Major's activities in that part of Florida. I remembered that the little banker in Atlanta had seen it from the river on the journey up from Jacksonville. The mill manager, a huge black man with but one eye, informed me politely enough that Major Gaskill had visited the mill about a week before but had left, presumably returning to Atlanta. The mill, he said, had not been sawing much timber, the pine on the tract owned by Gaskill having been cut off until the output did not even justify the keeping of a tow boat.

MAJOR GASKILL, however, had informed him he was planning to secure a large run of logs soon and had ordered arrangements made to increase the working force to a double shift when he sent orders. I inquired of the man whether he knew anything of the Big Rabbit and he said he didn't know anything about that 'nigger foolishness.' He was from the North, a skilled machinist and sawyer and not in sympathy with the people of his own race in that section.

I sent that boat nearly full speed back to Palatka, hoping Borton had reappeared, but was disappointed. My anxiety and restlessness were increasing with every hour and I raged internally at Dick for running into danger alone when the wait of a few hours would have permitted us to proceed together.

The evening was a beautiful one. The full moon rose early and, after dinner I went out into the wide piazza to watch the effect of the moonlight upon the river and to smoke. I was deep in thought, striving to figure out what Borton's weird theory might be and evolve some theory of my own when I heard my name spoken. An instant later I was on my feet shaking hands with John Danforth and saying:

"Well, Dan, what brings you into this corner of the world?"

"I was thinking of asking you the same thing when I saw you sitting there dreaming," he laughed. "Come up to my room. I have the ingredients there even if this is a dry country and me a goverment man. I'd rather talk in private."

"Lucky thing for me, meeting you this way, Dan," I said as we ascended the stairs, "I'm badly worried and need advice."

It was a lucky turn of affairs. Two years before I had made the acquaintance of Danforth, a quiet, soft spoken little man who was engaged in the immigration secret service. He had helped me in running down several newspaper stories and occasionally, I had been able to give him information. Thus we had became good friends. In a few minutes we were locked in his room and he was concocting a toddy with the hand of a master. It was not until he poured my drink that he renewed his query as to my business in Florida. Determined to trust him in everything and to seek his assistance I related briefly, our adventures of the last few days.

"You needn't fear me much as your rival in the detective business," I concluded, crestfallen, "I confess I'm utterly up stump until Borton returns."

THE little detective had listened almost in silence, occasionally frowning slightly or nooding his head in understanding. Two or three times he had remarked, "I don't like that." He appeared more and more serious and his brow clouded as I described what I knew of Borton's last move and showed him the note.

"Does your friend Borton know these turpentine and timber darkies?" he asked soberly.

"He knows more about them than any man in America," I said. "He seems to take them more seriously than I ever did and he will not be liable to be caught napping. He seems to think they are dangerous."

"He may get through all right if he understands what he is up against," said Danforth, puffing his cigar thoughtfully, "but I'd rather tackle the wildest cannibal tribe in Africa, than to get mixed up with a crowd of these Florida timber and turpentine negroes, especially when they can get alcohol or bootleg hootch."

He studied over the situation for some time, frowning heavily and smoking as if worried.

"I'm hired by a timber owners' association to run down a gang of log thieves. Stealing logs is so common it scarcely is noticed in this district, but one gang appears to have made organized raids and stolen millions of feet of choice timber, the best pine, without leaving a trace. The big operators are getting tired of it."

"Any clue as to the thieves?" I asked carelessly, for to tell the truth I was not thinking of Danforth's problem, but of my own.

"Not a trace. I have tried everything. The only information I have found came from a drunk. In fact I got him drunk, suspecting he knew something. He told me the Big Rabbit was gnawing the trees down."

I jumped as if he had struck me with a pin.

"The Big Rabbit?" I demanded sharply. "Has everyone down here gone crazy?"

I laughed, but the laugh did not ring true.

"What do you know about the Big Rabbit?" Danforth asked quickly.

"Nothing—only that is what Borton went after, a 'Big Rabbit.'"

Danforth suddenly started forward in his chair.

"Borton after the Big Rabbit?" he demanded, excited for the first time.

"Why the deuce didn't you tell me that? I'm afraid your friend is in worse trouble than we dreamed of. We'll be lucky if we ever see him alive."

"What is it? What is all this mystery?" I demanded, alarmed by his tone and manner as well as his words.

"No one knows excepting the negroes," he replied. "And they won't tell. It looks as if you and I will work together from now on. If we don't get some word from Borton by morning we will start in search of him—or of his body."

CHAPTER VII

Ready for the Rabbit Hunt

RESTLESS and excited, stirred to alarm because of Danforth's positive fear over what I had chosen to regard skeptically as a vague superstition, I tossed for a long time, sleepless, before finally falling into a troubled slumber.

Danforth had convinced me that there was real peril and more than ever I blamed Borton for starting the chase without waiting for me to arrive in Palatka. It must have been shortly before two o'clock in the morning when a cautious knocking on the door of my room aroused me.

Springing from bed, fully awake in an instant. I flashed on the electric light and unlocked the door.

Borton, disheveled, plastered with mud, his clothing in ruins and soaked with mud and water, reeled into the room and fell, rather than sat down in a chair.

"Help me undress, I'm all in," he mumbled, almost incoherent from utter weakness.

"Where have you been? Why did you leave me? What has happened?"

I bombarded him with questions for an instant, then seeing his pitiable condition, fell to work to tear off his soaked shoes and his matted remnants of clothing.

"You've had a terrible trip," I exclaimed, finding his body scratched and covered with blotches from the bites of insects. "What in Heaven's name, have you been up to?"

"WADING through swamps, up to my chin. Swimming, fighting snakes, climbing trees." In spite of his weariness he strove to grin, but with poor success.

Seeing he was spent almost to the last ounce of his strength I desisted from questioning, dragged off the remnant of his clothing and, rolling him in a blanket, helped him onto a bed while I soaked towels in hot water, bathed him and rubbed him down with some of the whiskey Danforth had insisted upon leaving in the room in case I wanted a nightcap. A drink of the potent "moonshine" administered after the rub down revived Borton a little.

"Haven't slept since I saw you," he half whispered, "I'm all right—not hurt, only dog tired and need sleep. Got to have sleep. Leave a call so I can catch the train into Jacksonville in the morning, and don't fail to get me up. Its got to be done; and its a case of life or death. Don't ask questions. I'm too tired to talk. Tell you more in the morning."

"One question, Dick," I insisted. "Did you find them?"

"No. But I know where they are. They're safe—yet. Call me at five thirty sure. No, you can't go. I must do it myself."

He had anticipated my demand to make the trip to the city in his stead, and as I started to protest his eyes closed, his voice trailed off into a half sob and half sigh. He was sound asleep and snoring before I had finished wrapping the bed clothing around him.

I was in a fever of excitement. The idea of waking Danforth and asking his advice appealed to me but was cast aside. I waked the night clerk and impressed upon him the necessity of waking me at five o'clock and bribed one of the colored boys to stay awake until certain he had me out of bed. Then I decided the best thing to do was to get the most sleep possible and rolled into bed, and, in spite of excitement and anxiety, fell asleep.

I WAS determined to go into Jacksonville with Borton on the morning train if he would not permit me to go in his stead. My brain kept whirling around and around over the same orbit of thought through that maze of mystery all through my troubled sleep. It seemed but a few minutes before the bell boy was hammering on my door and insisting upon earning his tip by seeing me awake and out of bed before he would desist.

Dressing hastily, I aroused Borton and, in the half light, watched his sufferings as he dragged his aching body from the bed. The short, heavy sleep had revived him somewhat although his face was drawn and haggard and he moved as if every turn of muscle was agony.

"I don't think you're able to go," I protested as I acted as his valet and assisted him in dressing.

"I've got to do it—or I would have sent you," he said, wincing with pain.

"I'd like about a week in bed but I'll get some sleep in on the train and coming out."

"Do you think I'm going to let you go alone again?" I demanded hotly.

"You'll have enough to do," he retorted, "I wish we had half a dozen more with us to help. There's plenty to do. You stay here and have the launch all tuned up and ready to make all the speed there is in her. Load her with provisions for three or four days and take plenty of extra gasoline. Get two magazine guns somewhere, and a sawed off shotgun with plenty of buckshot shells if you can. If necessary appeal to the sheriff or whoever is in charge here—but get them. Then get the oldest suit of clothes you can and some burnt cork because I want to black up and play negro for a few days. Now don't start asking fool questions. It would take hours to explain and then you wouldn't understand. But do as I tell you. I've thought it all out. I wish we had another man we could trust."

"I've got him," I responded quickly, forgetting some of the many questions that arose to my lips.

"WHO is he? Can he be trusted?" snapped Borton, hastily arraying himself in clothing from our scant supply and a shirt and collar procured by the bell boy who was hanging around, eager to help, and puzzled by our behavior.

"Danforth, the little detective from the immigration bureau," I told him.

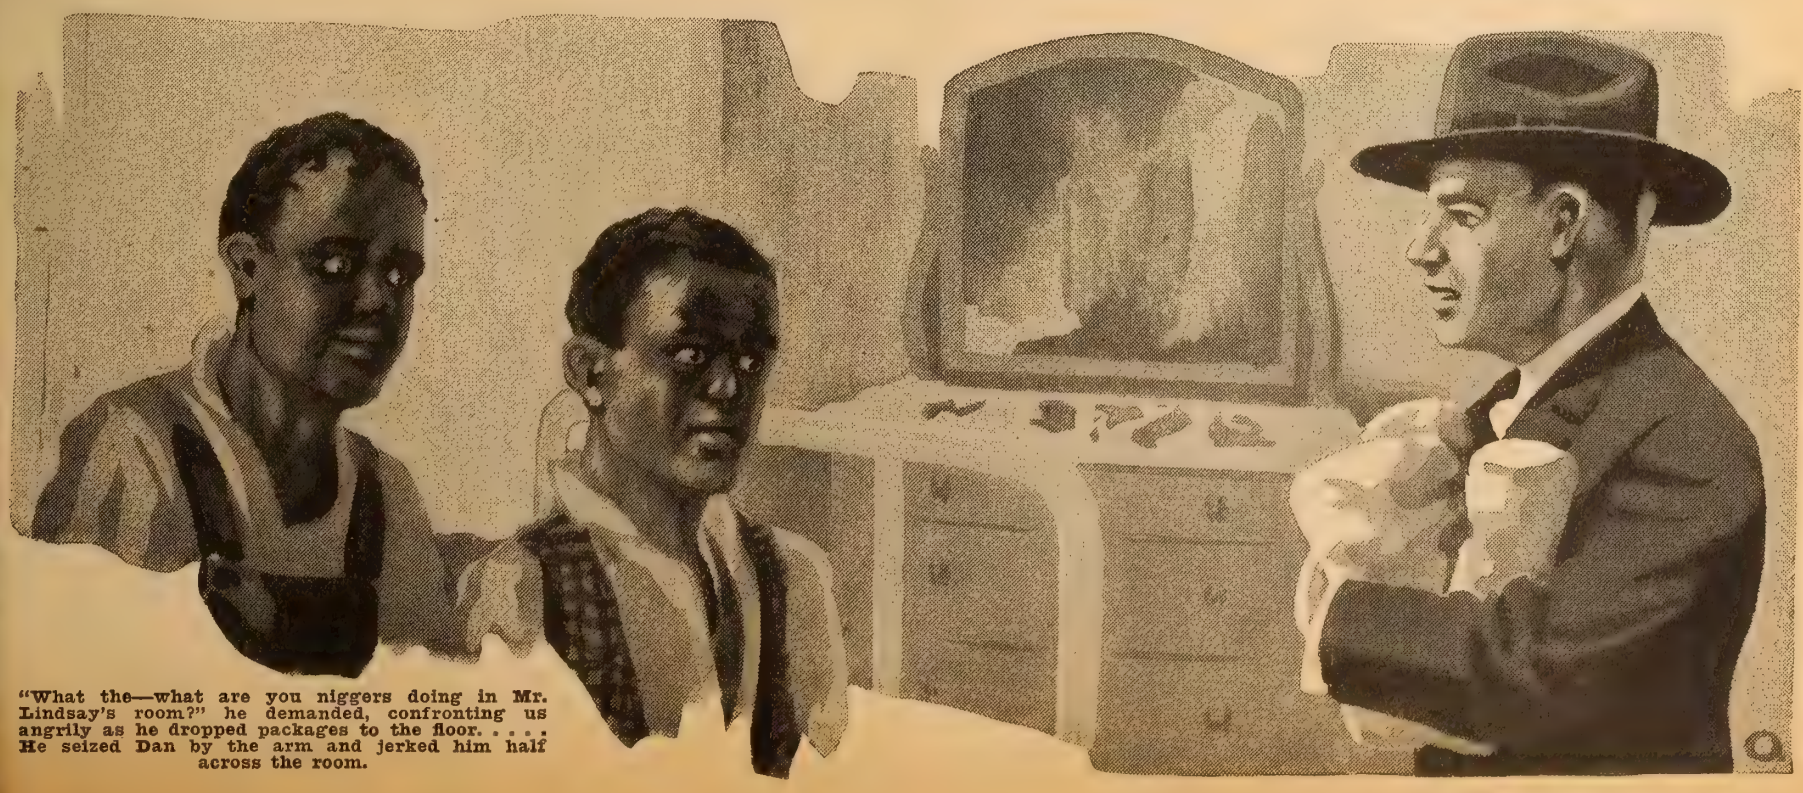
"You probably remember hearing me speak of him. He is down here on business but said last night he was willing to help and that he thought you in serious danger."

"I was," said Borton. "We'll need him. Is he game?"

"As a pebble," I vouched for Danforth. "You remember he is the fellow who took those three Hungarians out of the boat in the Lower Bay a couple of years ago when they were trying to break quarantine and brought them in in a row boat after a fight?"

"I remember him. He'll do—if he wants to join us. Tell him it may be a case of a fight against odds, but I hope

(Continued on page 28)



"What the—what are you niggers doing in Mr. Lindsay's room?" he demanded, confronting us angrily as he dropped packages to the floor. . . . . He seized Dan by the arm and jerked him half across the room.

Old Man Static's Funeral

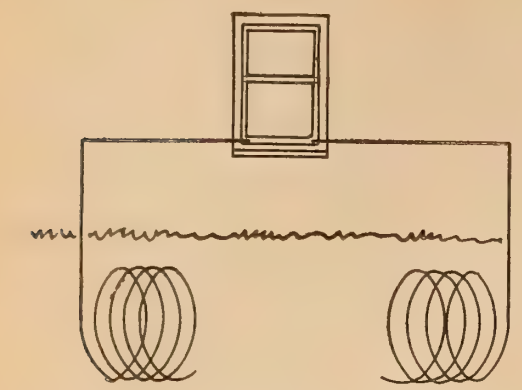


Figure 2. A variation whereby the two buried coils are inductively coupled together.

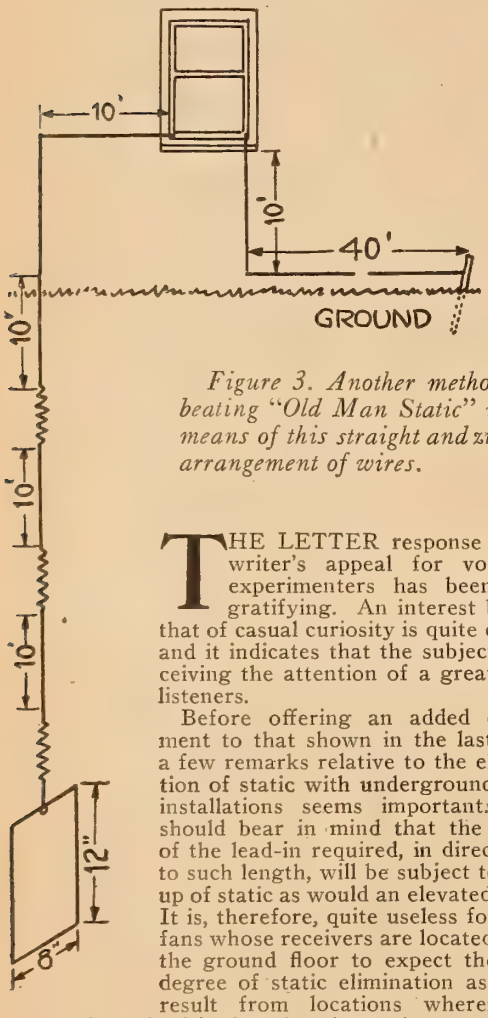

Figure 3. Another method of beating "Old Man Static" is by means of this straight and zigzag arrangement of wires.

IT IS REAL Work to Bury An Aerial Seventy-Five Feet Long, But If That Work Would Remove the Static Blotches from Your Summer Reception, Would You Do It? Many People Have. Part II.

By MILO GURNEY

THE LETTER response to the writer's appeal for volunteer experimenters has been most gratifying. An interest beyond that of casual curiosity is quite evident and it indicates that the subject is receiving the attention of a great many listeners.

Before offering an added experiment to that shown in the last issue, a few remarks relative to the elimination of static with underground aerial installations seems important. One should bear in mind that the length of the lead-in required, in direct ratio to such length, will be subject to pick-up of static as would an elevated aerial. It is, therefore, quite useless for those fans whose receivers are located above the ground floor to expect the same degree of static elimination as would result from locations wherein extremely short lead-in lengths above the ground are required. Another point to bear in mind is that irrespective of location, the outer earth terminal location of the antenna should be kept fairly moist, as should the ground earth connection. This in effect means that one must expect to devote some attention and care periodically to the installation.

As promised in the last article, figure 2 indicates a modification of Mr. Guyer's method of reception. No drastic change has been made other than that the axis of the coils has been changed with reference to the earth. They are now upon the same plane and inductively coupled. In working a system of this kind one avoids a purely directional effect, and the resulting coupling appears in some localities to add materially to the signal strength. In arranging such an installation various separating distances between coils and in several conditions of earth dampness were tried, with the conclusion that no fixed distance of separation can be established as best. A general review of the experiments indicates 3 to 4 feet as most desirable.

It was noted that a static reduction was to be had when the lead-in was made of lead covered cable. This cable was then grounded, a practice which brings the exposed lead-in exactly to earth potential.

The third experiment, one which offered much of interest, is shown in figure 3. Here the ground lead consisted of 50 feet of number 14 insulated copper wire. From the receiver this wire was brought directly to the earth a distance of about 10 feet. It was then run in a direction at right angles to the outlet and one foot underground for the remaining distance of approximately 40 feet and grounded to a 6-foot pipe driven into the earth.

The antenna consisted of 75 feet of the same wire placed as follows. Passing through the window from the receiver it turned and ran in the opposite direction to that of the ground lead for about 10 feet, then down to the earth and at right angles to the ground. Thus the antenna and ground leads were located at 90 degrees or a right angle to one another. Ten feet from the point where the antenna entered the ground eighteen inches deep, it was laid zigzag as shown in figure 3. The length of the folds or "zigs" was approximately 12 inches and the length of each zigzag portion was such as to use about ten feet of the wire. From this point the wire was again run for a distance of 10 feet straight when the process of zigzagging as shown in figure 3 was again repeated. Again it was continued as a straight wire for 10 feet, etc., according to figure 3, and again zigzagged. This last zigzagging consumed the remainder of the wire.

The full length of wire from the point where this antenna entered the ground, was buried approximately 18 inches deep. The final operation was that of connecting a 12 inch by 8 inch piece of 10-gauge copper sheet to the outermost end of the wire. This was securely soldered to the antenna, but before burying, was given three coats of thick shellac in order that it would be well insulated.

Figure 4 depicts the method employed for the burying of this plate, the process being that of making a strong sal ammoniac solution and into this mixing ordinary blotting paper. A sufficient quantity of the paper

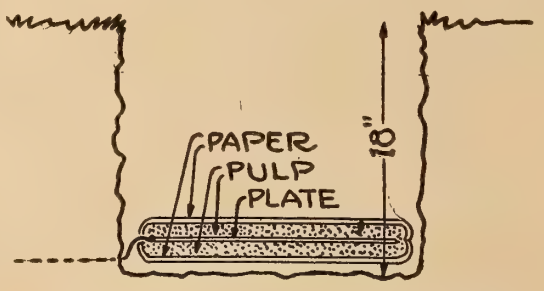

Figure 4. Here's how to bury the plate on the end of the straight-zigzag antenna.

was used so that all of the solution was absorbed and formed a pulpy mass. At the bottom of the opening for the reception of this plate was laid a small section of building paper while over it was placed a thick layer of half the putty-like sal ammoniac pulp. Next in order was laid the copper plate, while over this was placed the remainder of the pulp mixture. The whole was now covered with another sheet of building paper. Then the earth opening was filled with dirt and tamped well.

Something New!

MORE tricks from the bag of the experimenter, Mr. Gurney! In the next article of his series he will have a conversation with you about "horizontal" aerials. Now horizontal aerials are not merely aerials that stretch parallel with the ground for a distance, then drop down to your receiver with another wire going from the set to the ground. They are something new—entirely new—and worth "playing" with.

You'll be surprised to learn that some Radio waves prefer to travel along on a horizontal plane only. Queer, but it's true.

This article will not appear next issue, but soon. In the meantime get busy with the spade and report your buried antenna reception results to Mr. Gurney. Don't forget to tell him exactly how you have your antenna buried. Draw a rough picture to convey the idea correctly.

Someone, we don't know who, is going to discover the perfect static-free antenna, and it may be you. Let's go!

—THE EDITOR.

It will be apparent to those following this description that an effort was being made to secure at this final end a capacity to ground which would be as lasting as possible, and furthermore it is obvious that any other method for the securing of a near permanent condition may be employed.

This particular installation presented an unusually interesting group of experiments. With the first operation of the receiver even a novice could at once detect that the signal strength had been very materially increased while so far as could be ascertained the static level remained approximately constant with that of Mr Guyer's first experiment. By this is meant that the total elimination of static was impossible, not only in this instance, but in all of the other attempts to get rid of it.

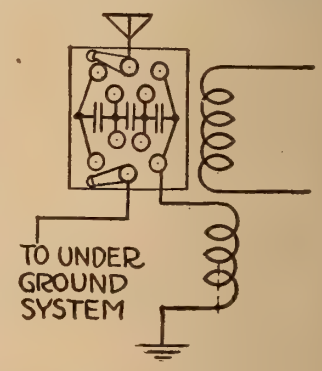

Figure 5. A selectivity switch worth making.

However, it should also be clearly understood that this and other experiments were considered as quite successful and perhaps pointing the way to a final solution. Yet, the author desires to emphasize that at no time was reception entirely free from this disturbance. There were many evenings when we were elated with the results obtained and led to believe that the research work need not continue further. On such occasions the interference was so slight that, except as a background with very weak signals, it could not be heard. Then would come an evening when the "Big Boy" who bosses the static producers would crack the whip and make them go to work with a vengeance. Upon such evenings there was no denying that the underground scheme did not make our receiver entirely immune. This effect was not that of the usual static "showers," which sound so much as rushing crackling water, but did appear as breakdowns similar to condenser overload discharges. However, at no time, with one exception, were they annoying.

A careful log was kept for a period of three weeks upon this particular installation, from which excerpts will be offered as of possible interest to the reader experimenter. As most of you will be interested in the comparative signal strength received upon the underground as against a 100-foot single copper wire aerial placed 30 feet above earth, the following will be of interest. The elevated aerial showed an average of 20 per cent more signal strength in each instance. From this it

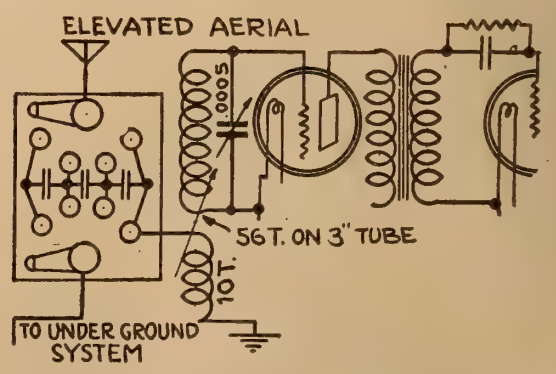

Figure 6. Here is suggested a method of coupling the input of buried antenna to your set.

is to be deduced that for extremely loud signals or distance the underground aerial suffers by comparison with the elevated, while to the contrary and in favor of the underground system, the static level was materially reduced when using the underground system. Stations which were received on the elevated aerial with a static level which practically blanked even fair reception, could be brought in on the underground system with fair volume and very little static.

It's Time for Spring Cleaning

WINTER PLAYS a "Dirty" Trick on Your Radio. Get on the Job with the Robin's First Note. Here Are a Few Hints on Operation and Set Maintainance for You. Part I.

By the TECHNICAL EDITOR

BEGINNING as a most healthy infant, Radio has progressed until it ranks as sixth among the great industries. Out of this wonderful development comes the need for a series of articles which will not only offer suggestions for the installation, operation and maintainance of receivers, but also the inclusion of a handy reference chart covering the usual ills which befall a set, together with methods for correcting them.

Radio receivers have now reached a stage of refinement where aerials not to exceed 100 feet in length, including the lead-in, are enough for the reception of most of the high-powered stations. Number 14 single strand enameled or otherwise insulated copper wire is to be preferred, for both the antenna and its lead-in. Insulated wire is recommended not only because its use offers less fire hazard and possibility of accidental ground contacts, but because such covering protects against early oxidization and soot accumulations, each of which evils add resistance to the circuit. Greater

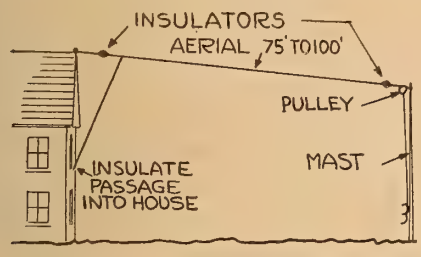

Figure 1. Typical aerial installation where mast supports one end.

aerial lengths may be used in localities known as "dead spots" in order to secure a greater signal pickup. However, the use of longer aerials not only increases the capacity, but also requires much greater care for stable installation.

Single or multiple wire aerials are in a measure directional, that is, aerials will favor the reception from stations in line with the horizontal direction in which it points. It is advisable, therefore, to consider this feature when making the installation by pointing the aerial in the direction in which the major stations you desire to receive are located.

Figure 1 pictures a satisfactory method for the in-

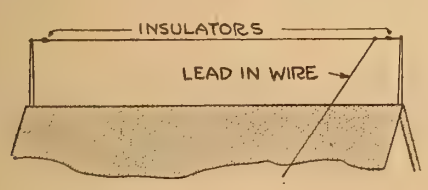

Figure 2. If there is space on the roof, such an installation is possible.

stallation of a single wire aerial in localities where the erection of a ground pole or mast is possible, while figure 2 is typical of the method which should be followed in the erection of a roof antenna where ample space is available. While it is generally known that all aerials should be well insulated from their supporting wire or masts, there remains a considerable misunderstanding relative to the type of insulator which should be used. As safety is of first importance, it is obvious that any old type of insulator will not serve.

Figure 3 shows the style which offers the greatest security. The reader's attention is called to the peculiar method used for assuring safety. Two interlocked horizontal U's form the scheme of its construction. Upon careful inspection it will be apparent that even though the insulator should break, it still remains impossible for the antenna to fall as the two wires will be looped together. While glass insulators are to be preferred, high grade porcelain is also acceptable. The size selected should be liberal. The baby type of insulator is not worthy of consideration as entirely too early after its installation its efficiency is impaired by the high resistance accumulations which provide a pathway to mischief.

While the use of insulated wire has been advised for antennas, this does not mean that bare copper wire of an equal gauge cannot be used. Except in localities where there is smoke in the asmosphere, a bare wire will serve very well. Lead-in wires must, however, be insulated and their junction with the aerials well soldered. Failure to make a secure soldered joint spoils in direct ratio ones ability to secure successful reception over an extended period.

As this series of articles is intended not only to assist the owner of a receiver in securing maximum results from his investment, but to point the way for the proper installation of the required accessories, it is then most important to give a somewhat detailed description covering the proper method of bringing the lead-in into the interior of the house. Wherever possible, this junction should be made at an end of the aerial. From this point it should pass down to its point of entrance and be kept well away, say three or four feet, from the roof and walls of the building.

Two insulators must now be placed close to the opening where the wires are to go into the building, one about ten inches below this opening and the other about three inches below. (See figure 4). The lead-in should now be anchored to the lower insulator and then re-anchored to the topmost one, where it should end. A portion of the insulation adjacent to the lower anchor should be removed from the wire and a soldered tap taken off which should be connected to the lightning arrester. The ground connection to this arrester should also be of number fourteen copper wire and placed so as to go in as direct a line as possible to the earth or a water pipe to which it is to be soldered. It is well also to attach this ground wire to insulators as it passes from the arrester to the ground, in order to insure that lightning will have no leakage to the building. It is important to run this particular ground wire in a direct line to its ground connection. The reason is that electricity, irrespective of character, dislikes exceedingly to follow any other path than a straight line. Any interference offered by angles in the wiring can but act as chokes to retard lightning's passage and should therefore be avoided.

A further removal of the insulation from the lead-in at the topmost insulator should be made and the wire which is to pass into the house be connected and soldered at this point. In summary, we have then a lead-in installation which not only offers thorough lightning protection, but also a desirable moisture drain.

A porcelain tube inserted through the partition for the admission of the wire going to the receiver is preferred, although the market affords several devices in the form of insulated flat strip lead-ins which are safe and acceptable. It remains as most important, irrespective of type used, that the wire leading from the receiver to the antenna lead-in connection must be soldered.

Do You Know?

LIGHTNING never strikes twice in the same place—there isn't usually anything left to strike.

Which reminds me that altogether too many users of Radio receivers use lightning arresters—after the house has burned down. Some advocate their use immediately after the receiver has had a shock and a scorching. I said some. But—

The Board of Insurance Fire Underwriters demands their use as a safeguard with each Radio receiver. The board ought to know. Of course, yours is a different house, yours is. Lighting will never strike your house except when it has lost the address of that mean man whose house it was going to strike. And—

Then you'll be sorry. So will I and also the lightning, because we all made a mistake. You will build a new house, and insist upon the installation of a lightning arrester with your Radio. Then I'll thank you and tell you something about their value and how to install them in the next issue, out June 1.

—THE TECHNICAL EDITOR.

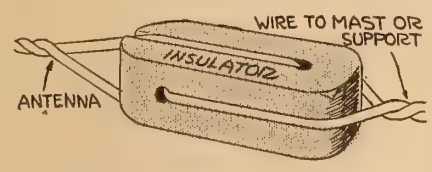

Figure 3. A "safety" type of aerial insulator which will not drop the wire.

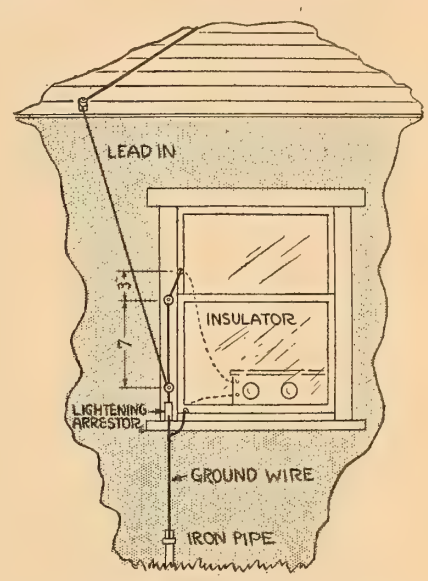

Figure 4. Showing the proper method of bringing lead-in and ground wires to lightning arrester and into house to receiving set.

The subject of "grounds," concerning the wire which runs from the receiver to an earth or ground connection, can but repeat the axiom that "No Radio receiver is any better than its ground." This is a real, wide-awake Radio truth. Grounding on hot water pipes will not do. Grounding on cold water pipes is also to be avoided if one can take advantage of securing a

Figure 5. A good ground connection is a most important essential.

moist earth ground. Moist terra firma has many competitors, yet to date stands in a class by itself without fear of being surpassed.

Earth grounds which are satisfactory may be made by driving a six foot galvanized iron rod into the earth. The exposed end, about six inches long, should be thoroughly cleaned and the ground wire of the receiver connected to it by wrapping several turns tightly around the pipe and soldering.

Should it be impossible to secure an earth ground, the second choice is a cold water pipe. Select the one closest to the street and ahead of the water meter, and attach the ground wire after cleaning the pipe in the same manner as was suggested for attachment to the earth ground. Often, with water circulating in such a pipe it is quite impossible to solder the wire. In such cases, shut off the water supply and drain the pipe, or if this cannot be done, the scraped portion should be thoroughly wrapped with tin foil and the strap form of ground clamp attached. The ground wire is then fastened tightly to the clamp. If no ground clamp is available, the wire should be wrapped securely around the tin foil (see figure 5) and over this another layer of tin foil should be placed. This completed, the connection should be covered liberally by wrapping the whole with several layers of electrician's tape. The purpose of the tape is to act as a barrier against air reaching the electrical connection and corroding it.

(In the next article, lightning arresters and the importance of their use will be discussed, together with suggestions for the selection of the proper A and B batteries and their care. This article contains a wealth of information.—Editor's Note.)

Where Is the Chaos?

SEVERAL weeks ago Federal Judge Wilkerson in Chicago said the government was wrong and that the Zenith Radio corporation was not criminally liable for choosing its wave length and hours of operation. Interpretation of that decision indicates that Secretary of Commerce Herbert Hoover and his aides did not know the 1912 Radio law thoroughly or else neglected its proper application.

The old adage that ignorance of the law is no excuse seems to our minds as particularly fitting.

Whether or not 500 other broadcasting stations like the decision or not, and some of them do not, the fact remains that WJAZ was within its rights. Furthermore, the decision of Judge Wilkerson brings out dust-covered and concealed bits of the old Radio act which might have been and still may be applied to govern broadcasting partially and to refuse to license stations not engaged in the commercial communication or Radio manufacturing and experimentation businesses.

Mr. Hoover is credited by the press with statements that the federal judge's decision would mean chaos in broadcasting. We have not heard that chaos up to the time of going to press. We will go further and say that we do not expect any such Radio chaos ever to result. Frankly, we cannot understand why Mr. Hoover is attempting to scare the Radio industry in such fashion. He asks that the White bill be rushed through.

He is in favor of the White bill. At the fourth Radio conference he declared against being given too much power. Careful readers of the White bill say that this instrument continues to give him very great powers. True, a commission is provided, but its powers are not so stong.

Let us not be rushed into unfavorable legislation by this cry of "wolf." Let us carefully weigh the Dill and Borah Radio bills before we are hoodwinked into unconsciousness.

There is and will be no chaos. Only the Radio communication or manufacturing and experimenting companies now holding licenses can legally switch their waves, and only then between certain limits. But none will. They are afraid of losing the public good will—that intangible but valuable asset they set out to acquire when they started and continued to broadcast.

Read and Shake Your Head

WE HAVE just finished a book, "Pegasus," by Col. J. F. C. Fuller, an Englishman, and published by E. P. Dutton and company, New York. It deals with the problem of transportation, and of empire building and making work for the unemployed by successfully developing means of transportation.

Colonel Fuller's work is a brief but well organized and very readable text. It sets you to thinking. We recommend it most highly to those of you who are satisfied that there is such a thing as progress and that there are most effective methods of attacking a problem than is whip-sawed daily, monthly and year in and year out by the politicians in Parliament or Congress.

What relation has it to Radio and why are we discussing it? Because:

Transportation and communication grow hand in hand. The former is better with the latter than without. The author visions a possible future when the medium of one will be the medium of the other; when transportation will be by means of Radio waves in the ether; when we and our baggage, as do now our voice and music, will speed along at the rate of 186,000 miles an hour through the ether.

The vision described in the last paragraph is but a part of his book, however. The colonel delivers a far more practical message, practical in that it can be employed today, immediately, in solving the transportation problem.

We wonder how many skeptics will shake their heads in doubt after reading this editorial. If you do, don't go to a specialist. You're normal. We expect just that reaction from the mass. But genius is abnormal and will not sneer.

RADIO INDI-GEST

A Bum Steer

The Night Herd sat on the old corral fence,
Waitin' for steers to go to fifteen cents
When the weeds flew up and tickled his heel
And he fell off the fence on a banana peel.
So he said to himself, "the market I'll get,"
And went in to tune his old super-het,
But his wife was usin' the set that day
Listenin' to music from old KHJ.
And when the set he tried to take,
She combed his hair with the garden rake
And busted his back with a fryin' pan
And heaved a flat iron as out he ran.
So back he went and sat on the fence,
While the price of steers went to seven cents.

OLD KING TUTT

SHORT SHAVES
By Barbara

Yes, yes, ohhhhh my, my, yes, Alloashus, Mr. Persimmon of Station OBOY is a man. Tst... Tst... Tst. Shame on you for even suggesting such a thing. Why anybody, even Mr. Persimmon, knows that one is supposed to eat cherry pie with one's knife, doesn't one? Do you? I do too. I think I'll take it up for a pastime. It seems to be so popular nowadays. Chewing tobacco, I mean.

* * *

Now kiddies, I'll tell you some real dirt. Uh, huh. Jack Pott, favorite at BLAH, is supposed to be a fine married man, but I understand he is going to leave his wife. Yes indeedy, hot stuff, what? The doctor says he cannot live. Isn't that nice? But sh-h-h, don't tell anybody, 'cause I've already tipped off my favorite undertaker.

* * *

No Garlica, Vernon Velvatone is not homely, oh mercy no. He is about seven feet tall, wears number twelve shoes, has one glass eye and a wooden leg, and thin—say he's so thin he could take a bath in a bud vazz, I mean vase. His kinky, snarled hair is only mangy in spots, and his lovely, stringy mustache just reeks with halitosis. Yes, and he ties the ends of it together so prettily beneath his undershot chin. Don't you think so? Oh yes, goodness yes, I think so too. Can he roller skate? You should see Vernon massage the concrete every morning on his way home from work to visit with his darling little 226-pound wife. She's so frail, but she's not afraid to stay home alone at night because she listens to him read the ads every night and his sweet, whiskey voice, resembling a porcupine gargling ground glass and burrs, soothes her just like balloon tires.

* * *

What terrible crime would you like unearthed about your most hated soprano? Don't need to drop me a note, kiddies, because I'll unearth it anyway. BARBARA

A Wise Fan

There was a man from our town
And he was wondrous wise;
A Radio he built himself,
'Twas of a goodly size.
His Scotch friends came from everywhere
To listen in each day;
But when he charged them fifty cents,
He frightened them away.

JEAN McMICHAEL

STATUE TO "DIELECTRIC" TO BE ERECTED IN MILLER FALLS; GREAT RADIO CRICKET RECOGNIZED AT LAST; A MONUMENTAL ACHIEVEMENT

City to Honor Writer of Snappy Critickcisms—Will Shoot Fiendish Third Trombone Player at Dedication—Dictionary Thrown for Loss

MILLER FALLS, N. J.—What is said to be a prime achievement is seen in the erection here of a statue to "Dielectric," arch enemy of jazz music and stirring author of "Condensed" criticisms appearing in the adjacent column.

The statue, which is of solid concrete with the exception of the head which is pure ivory, is to be placed in Schlitz Square. It shows the full length figure of "Condensed" gazing with regal contempt in the direction of the local Schlitz beer saloon, where a regenerative set nightly grinds out jazzotic strains.

One foot rests on a dictionary with the inscription, "Dictionarium este de bunkum," which means interpreted, "I carry my own spelling." Facing the figure on bended knees is a replica of David Scaremoff, big-hearted manufacturer of Radio tubes, price $9.50 to $2.00, depending on competition. He is offering Dielectric a Whistlinghouse R. C. set. Several groups surround the figures. One is a band of Congo head hunters cutting down Whitman's Jazz band. Another shows Irving Berlin dragged before the Inquisition to be burned at the stake. A third group shows classical authors singing loud athemas. Fourth, and last, shows The Third Trombone Player eating humble pie on the way to the gallows.

The objection to this worthy project has been raised by a few jealous so-called humorous writers that it would not be fitting to erect a monument to a man who is not yet dead. As this is merely a question of time, it can not be held against the acceptance of such a fitting tribute.

THE THIRD TROMBONE PLAYER

FRANQUE FILOSOFEE

It's a long program that has no announcement.

INDI

News of the Week

Condensed
BY DIELECTRIC

Very much pleasure was experienced in the all too brief time allotted a string quartet in the studio of Station WSAI, Cincinnati, and it is not the easiest thing to derive pleasure when static is almost constantly interrupting. Yet their playing of some very brilliant passages in selections of a bouyant character mark that feature distinctively. The soprano soloist had no difficulty in compassing the range of that more or less famous aria from the grand opera Herodiade. However much you may tire of the soprano singer in general, at times we hear one whose voice overcomes our prejudice, or, whose conscientious effort sweeps aside the determination to tune them out.

A recent feature with none (or few) detracting elements was the singing by the Atlanta music club chorus; well-trained singers with acceptable vocal equipment. One of the numbers they offered that must have met with the approval of the majority of listeners in the Radio audience was the Beethoven minuet, sprightly and graceful throughout.

It is never a hardship to mention the work of the Formica orchestra, for they play uniformly well whatever is contained on their programs. On an evening recently, this orchestra shared attention with the Formica string quartet, the latter playing one of Schubert's beautiful melodies in a wholly entrancing manner. Other numbers were presented with the sole intent to reach approving decisions from their auditors—sometimes the end of the selection is the only goal. Station WLW, Cincinnati, broadcasts these concerts.

Station KDKA, Pittsburgh, arranged a program of selections chosen from light operas with a record of public approval. These were presented by a capable cast, whose most distinctive numbers came from the wealth of melodious material left us by Victor Herbert. So long as music of this class is enjoyed, so long will the public respond with enthusiasm to Herbert compositions.

The Mooseheart station, WJJD, is in such Radiowise hands as to practically guarantee programs coming over with everything in their favor. This is fortunate for those who delight in the Palmer House Victoreans and symphonic players. They make music carry a message of cheer to the thousands regularly tuned to this station.

Additions to any broadcasting station entertainers are received with scepticism until they prove themselves worthy. This happy state came to the Humming Birds immediately upon their appearance before the mike in Station WGN, Chicago, studio and each time they grace the ether with their singing, many are added to the long list of admirers.

Baseball is back with us once again with all of the excitement attending the pitching contests, pill sluggers' exhibitions and expert Radio observers, cataloguing of succeeding incidents through the games. Possibly no other event, certainly no other sport, can command the number of Radio listeners that make it a point to be at their sets during such afternoons as the big leaguers are on the air.

Station WOK, Chicago, recently arranged a program with variety to spare when its features included orchestra numbers, an organ recital and vocal and instrumental selections—all popular in interest, though not entirely "popular" in content. These diversified programs hold first place in the estimation of many Radio audiences.

CHARGES A.T. AND T. HIDES BEHIND N.A.B.

MUSIC COPYRIGHT BILL IS CAUSE OF WORD BATTLE

Composers' Society Declares Dill-Vestal Bill Unconstitutional and Favoring Broadcasters

By L. M. Lamm

WASHINGTON, D. C.—Charging that the American Telephone & Telegraph company is hiding behind the skirts of the National Association of Broadcasters and that it is in fact the power behind the throne, spokesmen of the American Society of Composers, Author and Publishers recently concluded their opposition to the Dill-Vestal Radio copyright bill before the joint congressional committee on patents.

Among those appearing in opposition to the bill were Gene Buck, president; John Philip Sousa, vice president; E. C. Mills, member of the executive committee, and Nathan Burkan, counsel of the American Society.

Mr. Burkan, cousel for the society, who made the concluding statement for the authors told the committee that the Dill bill is unconstitutional, and he contended that through this bill the broadcasters of the country are trying to use congress as a threat against the composers.

Burkan Hurls Bombs

The Dill bill, Mr. Burkan said, would deprive the authors of their broadcasting rights and he challenged congress to pass any legislation favoring the broadcasters. He told the committee that the American Telephone & Telegraph company has the Radio industry of the United States in its grip, and he charged that the Dill bill was not introduced in good faith. He also referred to the National Association of Broadcasters as a "fake organization."

During the course of the testimony, Senator Butler of Massachusetts, chirman of the committee, read into the record a communication from Secretary of Commerce Hoover in which the secretary denied ever having advocated any kind of a tax license on the listener, which Representative Sol Bloom of New York, a member of the committee, said the secretary had suggested several times.

Mills Makes Claims

Mr. Mills, who was referred to at former hearings as a member of the triumvirate of the American Society, told the committee of the work and organization of the society, and said that it had no secrets from either the public or its members.

He claimed that when Radio became popular the sales of sheet music declined materially. He said further that in his opinion Radio will drive the phonograph companies out of business eventually. Without the music, Mr. Mills said, broadcasting stations would be inarticulate. He admitted, during the course of his testimony, that the American Society, had first charged WEAF, New York, a license fee of $500, that it had been raised to $2,500, and that it is now being asked to pay $25,000.

New Chain to Pick-up Atlantic City's Best

WPG, WIP, WCAE, WMAF and WGBS Form Link for Summer

ATLANTIC CITY, N. J.—One of the most important moves in eastern broadcasting will take place early in June, when five large stations, WPG of Atlantic City, WIP of Philadelphia, WCAE of Pittsburgh, WMAF of South Dartmouth, Mass., and WGBS of New York, will form a chain to broadcast features from Atlantic City.

The first program will be put on June 12.

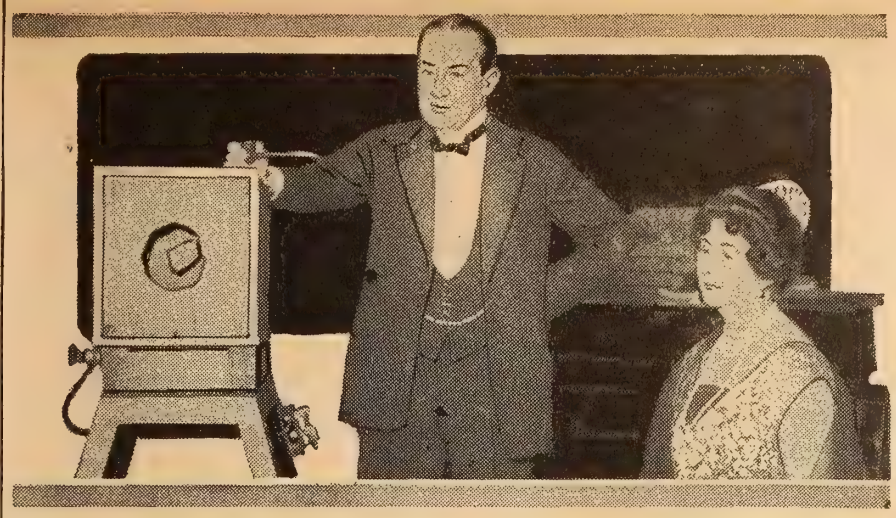
For three years WIP has broadcast from Steel Pier in Atlantic City. Now, with WPG, the municipal stations of the seashore resort, in the field, and controling a large number of features, WIP has linked up with this station, and both are building a magnificent joint studio on Steel Pier.

Edward A. Davies, director of WIP, announced that five internationally known bands will be broadcast through the chain. They include the Goldman band, Sousa's, Conway's, Creatore's and a musical organization from Chicago.

Powerful Spanish Station

LONDON.—The new Barcelona broadcasting station, EAJ1, on top of Tibidabo, 1,745 feet high, and the loftiest hill in the vicinity of the Catalonian capital, has just been completed. It has a wave length of 325 meters. The station is the most powerful in Spain, and one of the most powerful in Europe.

PREMIER BALDWIN TAKES COMMAND



When the British general labor strike took effect several weeks ago in England, Premier Baldwin stepped to the fore and took command of everything including broadcasting. Under his direction broadcasting was continued but strike propaganda was not allowed to go over the air. The above picture shows the premier and his wife in the studio of 2LO, London, just after he had assumed control.

Radio Club Notes

A man who has done much to relieve the interference from Cottrell ore precipitators in the vicinity of Butte, Montana, was the guest of Radio Digest recently. Fond mothers now and then have a mania for tacking on names to regular fellows which don't quite fit. Why Mrs. Wileson picked on the name Abner for her son, now with the Montana Electric Co., when Jack or Buck or some regular "he" name would fit him better is beyond us.

* *

Evansville, Ind., Radio dealers are digging down in their pockets to help establish a sinking fund for the Evansville Radio listeners' club. Money seems to be an essential and helping with their dollars to clear the air is good work.

* *

Experiments being made with a device designed by A. D. Eberly, interference expert of the Spokane, Wash., Radio Listeners' association, may point the way to the elimination of interference from the operation of street cars. Announcement of the decision of the Spokane United Railways to extend the tests made during the past several weeks was made recently by R. A. Willson, superintendent.

"One car has been equipped with Mr. Eberly's device and while the experiments have not been sufficient to arrive at a definite decision the results look promising," Mr. Willson said after studying the report on the tests. "We are now equipping three more cars with the device and as soon as enough devices are delivered, will equip all the cars on one line, to continue the tests. However, we cannot tell how satisfactorily the devices are until tests on more cars have been made."

Dr. C. Hale Kimble, president of the listeners' association, declared that if Mr. Eberly's device is successful and is adopted, it will result in solution of a large part of the general interference problem.

* *

Owen A. Davis, secretary of the Zanesville, Ohio, Radio club, advises that the activities of the club will not only follow the usual efforts toward the elimination of interference but also include the employment of a "Trouble Shooter."

* *

While on the above subject, may the editor suggest that each member of a Radio club should first look into his own "glass house" and learn to tune his receiver so as not to cause annoying interference for others who are equally anxious to "get that program."

WOMEN TAKE HONORS IN ONE TUBE SET TEST

Win Three Prizes Offered by Crosley Radio Corporation

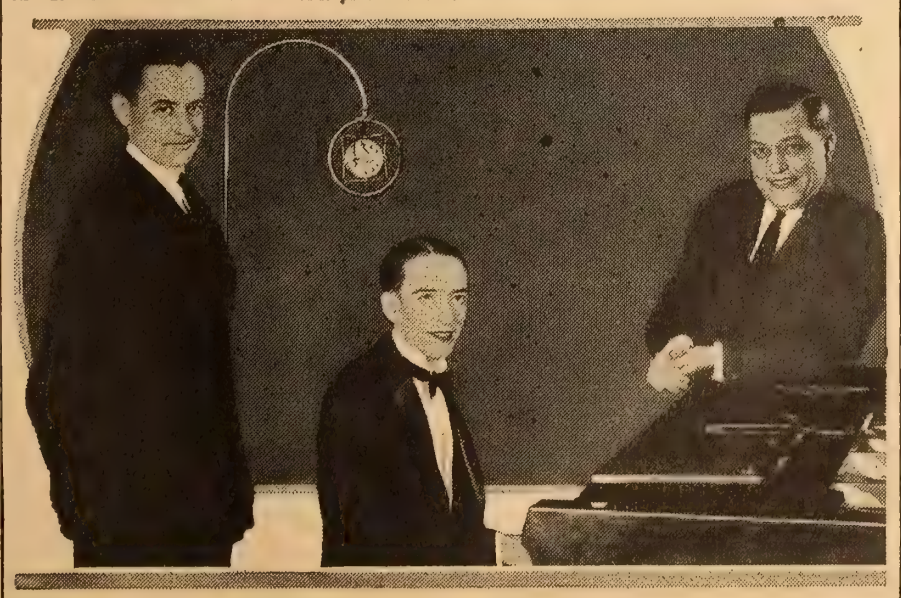
CINCINNATI.—First, second and third prizes in the January section of the one-tube Radio contest conducted by the Crosley Radio corporation, were recently awarded to feminine fans, whose letters on reception were adjudged to be the best of the hundreds received.

Winner of the special money grand prize in the reception contest will be announced soon. Powel Crosley, Jr., donated several valuable prizes, the first one being $1,000 for the best report of reception with any one tube receiver, either home or factory built. The other prizes were six valuable pedigreed police dog puppies and several receiving sets.

Florence E. Beam, Box 208, Willock, Pa., won first prize for the month of January, one of "Deeka's" puppies. This puppy's father, "Deeka," is a famous police dog which has traced many criminals.

Radio receivers were won by Clara Bell McCaslin of Franklin, Ind., and Mrs. L. V. Tangeman, 7029 South Chicago ave., Chicago.

SNODGRASS AND WITTEN AT MIKE



Although not heard on the air as often as several years ago when this famous pair were heard almost nightly from WOS, Jefferson City, Mo., Harry Snodgrass, "King of the Ivories," and J. M. Witten, his announcer, now and then make their way to a microphone in some city where their travels may take them. The team is still engaged in vaudeville. Photo, taken in WREO studios, at Lansing, Mich., shows, left to right, Witten, Snodgrass and Earl Holbeck, a soloist.

LENGTHEN, IMPROVE A.K. CONCERT SERIES

ATWATER KENT REWARDS APPLAUSE WITH ENCORE

Summer Not to Interrupt—WEAF Chain Features Also to Continue as During Winter

NEW YORK.—The public's appreciation of the Atwater Kent hour of good music has made its continuance throughout the summer and further extension in the fall Mr. Kent's announced policy. During the summer months the weekly Sunday concerts will be of a lighter type and occupy but one-half hour. Originally it had not been planned to run the series of concerts through the summer, but the feature has met with such widespread approval that discontinuance was not even considered.

The summer concerts begin at 9:15 Eastern daylight savings time, 8:15 Central daylight saving or Eastern Standard, and 7:15 Central Standard time. They are broadcast by WEAF, WEEI, WSAI, WCAP, WCCO, WGN, WGR, and WWJ.

Greater Stars Will Appear

The closing winter series concert broadcast May 2 marked the appearance before the microphone of the most distinguished group of opera and concert artists ever assembled in a studio for a single evening. This was made possible by the recent signing of a new and more liberal agreement with the Metropolitan Opera company. The new agreement, Mr. Kent states, will allow him next season to present an even greater number of the famous artists of the world through his Sunday evening Radio concerts. While he has presented some of the most noted musical artists, Mr. Kent has been prevented hitherto from broadcasting other famous stars because of rigid contracts the Metropolitan Opera company had with them for their exclusive services.

WEAF to Give Goldman Concerts

Coincident with the statement of the new Atwater Kent policy comes word that the majority of WEAF's chain features will continue without interruption throughout the summer. In addition, arrangements have just been completed to broadcast again the popular Goldman band concert series direct from New York university through WEAF, beginning on June 14.

All regular chain programs, with the exception of the A. & P. Gypsies, Davis Saxophone octet, Happiness Boys and the Whittall Anglo-Persians, have definitely announced their plans to broadcast all summer long. The remaining four features, no doubt, will make plans to continue also.

KOA TO PRESERVE 'OUT WEST' MUSIC

Mile-High Station Prepares for Denver Music Week Festival in May

DENVER.—Primitive and modern music which preserves the spirit of "Out West," will be one of the unique Radio attractions, it is announced, when Denver's gigantic music week festival is broadcast by KOA, the mile-high station of the General Electric chain beginning Sunday, May 16.

"This ethereal menu embraces a host of unpublished songs which were taken down from oral recitations," declares Ralph Freese, of the Denver announcing staff, who is organizing this program.

"Introductory features will be music of the earliest Indian tribes in both the Northwest and Southwest," he continued. "This includes rampage songs of the ber of Indian hymns which were sung to painted and plumed warriors, and a numthe gods of rain and sunshine."

Music week broadcasts over KOA's channels include more than 100 events, it is said, lasting over a period of eight days. Taking part will be musical organizations of more than thirty-five western cities.

Beg Your Pardon

In the first May issue of Radio Digest among the group of "Step On the Stairs" player pictures, the photograph of Miss Betty Sowell of the WOAW Players, Omaha, was said to be the picture of Miss Betty Lowell of KOA, Denver. Radio Digest wishes to beg the pardon of Miss Sowell, of WOAW, for this error.

KFWI, San Francisco, has recently verified its reception in Paris, France, on the night of April 11, 1926.

SHORT WAVES

By Marcella

(Continued from page 2)

over KYW every Tuesday and Thursday night between 9:30 and 11 Central time. I don't know who is doing the 6 a. m. announcing at WFAA but have written to learn. Incidentally, Tommy Malie and Jimmy Steiger are also on KYW at the same time. It's a good program. Eddie and Fanny are also doing quite a bit of vaudeville work.

* *

"Big Bad Bill" Goodrich, of Missouri Valley, Ia., piano pounder and warbler at WOAW, is called what he is because he is anything but. This in answer to Elizabeth Ann, Jeanette, et al. Description; height, 5 feet 8 inches; weight, about 150 pounds; eyes, brown; hair, brown; degree of pulchritude, good looking; hobbies, motion pictures and Jack Little's trills; personality, plus; matrimonial condition, single. I'm sure he didn't mean to swear, but most men will occasionally, you know, Elizabeth.

* *

Has Graham McNamee a family? Only a charming wife, Kay-tee. Harold Isbell is married to a very good looking wife whom he adores deeply. He is good looking, has curly black hair and is a neat dresser. For the benefit of G. W., I will add that Mr. Isbell has taken leave of KYW and gone back to Los Angeles, this time to work for KNX. Herbie Mintz may be heard on WENR's afternoon programs. These he directs.

* *

PAGING: Coleman Getts, once at WTAS, Elgin; Vernon Buck, singer for Witmark at one time; Joe White, tenor, who about two years ago was singing over WEAF and WOR. Any late news about the gentlemen will be greatly appreciated by your humble servant.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

OLD STATIC'S FUNERAL

(Continued from page 10)

The composite result was such as to make your choice of aerials quite that of "Hobson." In other words, with the elevated system, both static and extrème volume was to be had; with the underground, diminished volume and a pleasing absence of annoying static or disrupting discharge effects were obtained.

One experiment used with this installation which assisted in the determination of the relative values of each antenna, was the insertion with a multiple tap switch of three .00025 mfd. fixed condensers in the aerial lead-in wire to the receiver. This was so arranged that either the elevated aerial or the underground system could be brought into this switching arrangement and made to pass through either one, two or the three of the fixed condensers in series. After a fashion this was equivalent to changing the fundamental of the aerial in use. From this arrangement it was passed on to a 10-turn primary coil (or directly to the aerial binding post) which was placed upon a rotor within the secondary input to the first tube and made variable.

The combination of the two resulted in securing not only the desired selectivity but control of the received energy. The scheme is shown in figure 5 while figure 6 gives the values which were used. This plan is not offered as new, yet the writer believes that many have not seen or used it. Hence it is offered not only as a most practical scheme but one which would materially improve the selectivity of a great many receivers irrespective of the kind of aerial with which they are used.

In order that many of you may have an opportunity to determine results with the underground system shown, the next article of this series will discuss and offer a type or several types of the so-called horizontal aerial.

There has been very little research work done with such receptors. That reported to the writer's knowledge only covers short wave reception and transmission of the 40 to 100-meter class. Suggestions covering reception upon the broadcast band will be presented both in underground, semi-underground and elevated horizontal types.

The field offers so much of interest and yet possesses so little which may be used as precedent that it is hoped the matter presented will serve as the nucleous for much added constructive experimentation.

In closing, the author wishes to state that through an error the underground aerial system shown in the first May issue was credited to Mr. Guyer. Radio Digest is pleased to apologize to Mr. Edward Jones, of New Orleans, who was the originator of and holds a patent covering this idea.

(Horizontal aerials will be described by Mr. Gurney in his next article which, however, will not appear next issue. In the interim, we suggest that readers experiment with the buried antenna and make known to the author the results of their work.—Editor's Note.)

BETTY'S SCHOOL ENDS FOR SUMMER PERIOD

HOME EXPERT WILL PROBABLY BE ON AIR IN FALL

Mail Reveals Wide and Varied Audience of Gold Medal Talks—Queer Incidents Related

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

FOR the past five months I have had the privilege of talking to you through the medium of the Radio Digest, as well as from thirteen of the larger broadcasting stations in the United States. On May 14, I broadcast my last talk of the season, and consequently this is my final article for my friends among readers of the Radio Digest. I hope, however, that I can meet with you either over the air or through this publication again next fall. My plans have not been definitely arranged as yet for next year, and for that reason I cannot commit myself.

Whether I continue with these articles and my Radio talks will depend a good deal on an investigation of mail I have received during the past year in an effort to determine whether or not my talks may have been of real assistance to you. While the lecturer, actor or concert singer may meet many of his or her audience personally, we of the Radio must get our applause via Uncle Sam's mail.

Even Young Lad Enrolls

I have been very happy over the letters you have sent me. Some of the readers of the Radio Digest who were not in territories covered by my broadcasting have even sent me samples of dishes they have prepared from my recipes, as well as suggestions which have been of great assistance to me in my work. I assure you that I appreciated them all.

I wish I had the time and the space to tell you of all the interesting letters I have received. I would like to cite a few which came recently. A little twelve-year-old boy in Pennsylvania wrote me that he had enrolled for one of the cooking schools despite the fact that one of his boy friends called him a "sissy." He said that he advised the other youngster that if he would learn to cook, he would not have to run around to the neighbors' houses to find his mother when he wanted dinner. He asserted that it was nothing to be ashamed of for a boy to know how to cook.

Invalid Makes All Dishes

A woman in Connecticut wrote me that she had made all of the recipes which I had given out, from a wheel chair, and I am happy to say that she qualified to receive a diploma in our third cooking school.

A new type of Radio party was originated by a friend of mine in Kansas City, Mo. She planned what she called a Betty Crocker dinner for her friends. The invitation consisted of calling each of the guests-to-be on the telephone and then blowing into the phone as they removed the receiver. She then asked, "Hello, did you get that? Well, it was air. It was an invitation for yourself and husband to an Air Dinner to be given on such and such a date."

I was particularly gratified with a report from a young married woman in Massachusetts. Before her marriage, she said, she was a professional woman to whom cooking and housekeeping in general seemed a very lowly duty. Marriage, she said, did not change her views. Instead of taking pleasure in her work at home, she longed to be out "doing something." Last fall, she said, she began to listen to my Radio talks and to try the recipes. She had good results, became interested, and now says that when she is out with a group of women she can talk recipes, cooking, and homework as enthusiastically as any of them.

Man Turns Cook; Surprises Wife

All of my mail, however, did not come from the gentler sex. A man in Wausau, N. Y., wrote me that while confined to his home with grippe recently he tuned in on the Radio just in time to hear me giving a recipe for Orange Cake. His wife was downtown, so he decided to copy the directions. He became so interested in it, he said, that he determined to try his hand at baking, something he had never attempted before in his life. When his wife came home, he said she was very much surprised to find a nice orange cake awaiting her, and he declares that if he ever decides to become a cook, he will take his instructions over the Radio.

My letters have come from women of all ages and classes, from invalids, from the blind, women in the cities, and women on the farms. Even the wife of one lighthouse keeper on the Atlantic coast has been one of my listeners.

In all of my talks and recipes I have tried to give you something practical, economical, and useful. Many of my most successful recipes have been developed from the suggestions sent in to me by the listeners to my Radio talks and the readers of this publication.

As I said before, I cannot state definitely what the plans for next year will be, but I surely hope that I will have the privilege of talking to you and writing for you again. If you have not written me before, I will certainly be glad to get at least a card from you.

KYW WOMEN'S HOUR INCLUDES MUSICALE

CHICAGO.—Many items of much interest to women, may be tuned in on the "Women's Hour," from 3 to 4 p. m., Central time, each Friday afternoon, from Westinghouse Station KYW.

The "Women's Hour" is a broadcast inaugurated some time ago by KYW and includes an assembly of afternoon music, intended to entertain afternoon visitors in the home, as well as other subjects of particular interest to women.

Miss Mary Casey, who is the announcer and conductor of this broadcast, has several well-known Radio personalities on her staff, including Mrs. Anna J. Peterson whose "Table Talks" have become a recognized institution, and John C. Cutting, the "Uncle John" of KYW, who has for some time been broadcasting a daily description of the proper handling of steaks and chops.

"Sunshine Lady" Leads Farmerkinites in Song

WKAR Joy Spreader Has Loyal Following of Children

Smile, smile, a sunny smile.
Smiling all together makes sunshiny weather
Smile, smile, a sunny smile—
Smiling merry sunshine band.

EAST LANSING, Mich.—This is the song of the Sunshine Lady of Station WKAR, located at Michigan State college here, who broadcasts her "Farmerkin" stories to boys and girls of Michigan and other states every Monday evening from 7 to 7:15 o'clock, Eastern Standard time.

The Sunshine song is a parody on "Hail, Hail, the Gang's All Here," and it is one of the many songs and poems that have made her popular with her child listeners.

Last fall Mrs. Stockman began telling bedtime stories over the Radio. She calls them "Farmerkin" stories. They so delighted the children that they are writing her from all over Michigan and telling her how much they enjoy her programs.

APPLY EARLY FOR "MISS RADIO" JOB

Annual Search of Radio World's Fair for Air Queen Is Now on

NEW YORK.—Who is "Miss Radio 1926"? The title and accompanying honors will go to the feminine fan who sends to the Radio World's Fair the most interesting account of her experiences in listening in, together with her opinion as to how broadcasting might best serve the interests of the women of America. A log of stations received should also be submitted.

Last year the silver cup emblematic of highest honors in the Miss Radio contest was won by Rena Jane Frew, a college girl of Beaver, Pa., who had taught Radio to youths in the high school of her city. Hundreds of letters were received testifying to the tremendous interest in Radio displayed by women.

Entries in the competition should be sent, before August 15, to G. Clayton Irwin, Jr., of the Radio World's Fair, 1475 Broadway, New York city.

The winner will be announced a week later and will be guest of honor at the opening of the fair on September 13. Cups will also be given to second and third prize winners.

WOMEN'S PROGRAMS INDEX

Saturday

Atlantic Eastern Central Mountain Pacific
10:30 a.m. 9:30 8:30 7:30 6:30
WWJ (352.7m-850kc) Tonight's dinner.
12 n. 11 10 9 8
WEAO (293.9m-1020kc) Housekeepers' half hour.
WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.
WGN (302.8m-990kc), Household hints.
WQJ (447.5m-670kc), Home Economics program; May 15, "Salads from Sunny Lands."
12:30 p.m. 11:30 10:30 9:30 8:30
WGN (302.8m-990kc), Home Management period.
12:35 11:35 10:35 9:35 8:35
KYW (535.4m-560kc), Table talk.
2 1 12 n. 11 10
KGW (491.5m-610kc), Household helps, shopping guide.
KMA (252m-1190kc), Domestic science topics.

WGN WILL BROADCAST KENTUCKY

High Lights of the Air

BEWARE Saturday afternoon, May 15, of betting according to the advice of Sam 'n' Henry because they are accompanying Quin Ryan, announcer of WGN, to Louisville and will be heard at intervals during the broadcast of the Kentucky Derby. From noon until the time the last horse in the final race gallops down the home stretch, WGN will be on the air. Every shout, every hoof-thud and all the color of the famous day will be brought to the homes of listeners. WEBH, Chicago, and WHAS, Louisville, will also broadcast the event.

Choristers with pig-tails and ribbons, blouses and short breeches will hold the microphone at WHAD, Milwaukee, Saturday afternoon, May 15. These youthful singers are between the ages of 8 and 14. Their simple rendering of "The Spider and the Fly," "The Little Sheperd Boy," "The Little Maids from School," and "The Sandman Is Calling You," will appeal to any grownup.

"The Three Fingered Villain" is the title of a talk which Professor George A. Hill of Wesleyan university will give from WTIC on Wednesday, May 19, at 8 p. m. Eastern Standard time. In order not to disappoint any who may be expecting a highly melodramatic monolog of blood and thunder, we will explain that the name of the villain is Poison Ivy, and that Professor Hill is to give an instructive talk on the venomous vine, including detailed instructions for curing all so unfortunate as to meet with it while walking in the woods. WTIC also announces a series of three recitals by Madame Fely Clement this month. Madame Clement who was well-known as a former member of the Boston Opera company, has recently returned from a successful European concert tour.

Canadians are celebrating a national holiday Wednesday, May 26, in Empire Day. Songs from England, Wales, Scotland, Ireland, Australia and Canada may be heard by tuning in CNRM, Montreal.

So many requests have been received by KOA, Denver, and KGO, Oakland, to repeat the mystery drama, "The Step On the Stairs," that the entire play will be given again at both stations. You may get all the thrills of this story by tuning in KGO on Thursday, May 20. KOA gives the production Monday, May 31.

The collegiate note will be struck at WLIT Friday evening, May 21, when members of the University of Pennsylvania give "Pinafore" over the air. This is one of the important broadcasts of the season.

An opera star who belongs to Radio is Margery Maxwell. Formerly a member of the Chicago Civic Opera company, Miss Maxwell has been adopted by Chicago Radio stations. Whenever a station opens or gives a birthday party she is invited to sing. She appears Friday, May 28, at KYW during the Federal Master Artists' concert.

This will be the third year that WGN has brought the auto race to the invisible Radio audience. Monday, May 31, the Indianapolis 500-mile auto race will be described by Quin Ryan. Many famous racing authorities will offer information during the race.

WGN WILL BROADCAST KENTUCKY DERBY, INDIANAPOLIS AUTO RACE

High Lights of the Air

BEWARE Saturday afternoon, May 15, of betting according to the advice of Sam 'n' Henry because they are accompanying Quin Ryan, announcer of WGN, to Louisville and will be heard at intervals during the broadcast of the Kentucky Derby. From noon until the time the last horse in the final race gallops down the home stretch, WGN will be on the air. Every shout, every hoof-thud and all the color of the famous day will be brought to the homes of listeners. WEBH, Chicago, and WHAS, Louisville, will also broadcast the event.

Choristers with pig-tails and ribbons, blouses and short breeches will hold the microphone at WHAD, Milwaukee, Saturday afternoon, May 15. These youthful singers are between the ages of 8 and 14. Their simple rendering of "The Spider and the Fly," "The Little Sheperd Boy," "The Little Maids from School," and "The Sandman Is Calling You," will appeal to any grownup.

"The Three Fingered Villain" is the title of a talk which Professor George A. Hill of Wesleyan university will give from WTIC on Wednesday, May 19, at 8 p. m. Eastern Standard time. In order not to disappoint any who may be expecting a highly melodramatic monolog of blood and thunder, we will explain that the name of the villain is Poison Ivy, and that Professor Hill is to give an instructive talk on the venomous vine, including detailed instructions for curing all so unfortunate as to meet with it while walking in the woods. WTIC also announces a series of three recitals by Madame Fely Clement this month. Madame Clement who was well-known as a former member of the Boston Opera company, has recently returned from a successful European concert tour.

Canadians are celebrating a national holiday Wednesday, May 26, in Empire Day. Songs from England, Wales, Scotland, Ireland, Australia and Canada may be heard by tuning in CNRM, Montreal.

So many requests have been received by KOA, Denver, and KGO, Oakland, to repeat the mystery drama, "The Step On the Stairs," that the entire play will be given again at both stations. You may get all the thrills of this story by tuning in KGO on Thursday, May 20. KOA gives the production Monday, May 31.

The collegiate note will be struck at WLIT Friday evening, May 21, when members of the University of Pennsylvania give "Pinafore" over the air. This is one of the important broadcasts of the season.

An opera star who belongs to Radio is Margery Maxwell. Formerly a member of the Chicago Civic Opera company, Miss Maxwell has been adopted by Chicago Radio stations. Whenever a station opens or gives a birthday party she is invited to sing. She appears Friday, May 28, at KYW during the Federal Master Artists' concert.

This will be the third year that WGN has brought the auto race to the invisible Radio audience. Monday, May 31, the Indianapolis 500-mile auto race will be described by Quin Ryan. Many famous racing authorities will offer information during the race.

NOT a dental ad at all, but the Sunny Southern Four, Choc Phillips, Billy Heran, Eddie Chittenden, Less Applegate with the Marcus Show of 1926, facing the mike with a bit of humor at WSMB. Wednesday nights at 10:45 p. m. Central Standard time, they are ready to ride the ether. Madame Fely Clement, right, may be heard May 17 to 24, at WTIC, Hartford. This well-known singer was for four years a soprano with the Boston Grand Opera company. Not only has she made America recognize her as a singer but Europe also. She has just returned from a successful tour of continental Europe. Few American opera stars have achieved this triumph. Teaberry time at KDKA, Pittsburgh, practically means Jim Hughes, left. He is the author of these merry skits, the comedian and announcer, and he knows just how to tickle the Radio listener's funny bone.

Size 11x14 inches

Photogravures of Your Favorite Artists

GALLERY OF RADIO STARS

By special arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost. Below is only a partial list of the photogravures now included in the Gallery of Radio stars. Complete list in April 10 issue.

16 Leo Fitzpatrick, "Merry Old Chief," WJR
17 Henry Field, 1925 Gold Cup runner-up
18 Al Carney, organ favorite at WHT
20 Vincent Lopez, No. 1 Pennsylvania orchestra
21 E. L. Tyson, pleasing voice at WWJ
23 Art Gillham, "The Whispering Pianist"
24 Paul Greene, announcer at WSAI, "bridge voice"
25 Harry Ehrhart, "Dream Daddy" at WLIT
26 Correll and Gosden of "Kinky Kids Parade" fame, at WEBH and other stations.
27 Norman Brokenshire, popular at WRC, WJZ

COUPON NO. 20

This coupon entitles the holder to one photogravure selected from the Radio Digest Gallery of Radio Stars when accompanied by ten cents to pay the cost of mailing and postage. Three consecutively numbered coupons entitle the holder to three photogravures when accompanied by 25 cents. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

Gets Everything But Noise!

Read this convincing letter from a man who has "listened and marveled":

"Omaha, Nebraska,
February 10, 1926.

Kane Antennae Co.,
Gentlemen:
I received 2BD, Aberdeen, Scotland, on a "Kane Antennae," during the recent International Tests. Reception was officially verified by Radio Broadcast Magazine who conducted the tests. I built the Antennae a year ago from one of your blue prints. It has more than met expectations in the elimination of outside electrical interference, as well as in increased volume and distance.
GUY H. CRAMER."

Improves Reception 60%

Entirely eliminates all power noises such as leaky transformers, generators, motor hums, Delco Plants, etc. Cuts static and regeneration howls and squeals in two. Proves statements of leading Radio Engineers that fully 75% of so-called "summer static" is nothing more than electric power interferences. Dr. Gehrig of Oakland, Cal., says it improves his reception fully 60 percent. Do away forever with disagreeable noises.

$1.00 *Brings BLUE PRINT Complete Working Drawings*

and full instructions for erecting this wonderful Antennae. Just send $1.00 (a check will do. Stamps not accepted). A limited number available. Send TODAY.

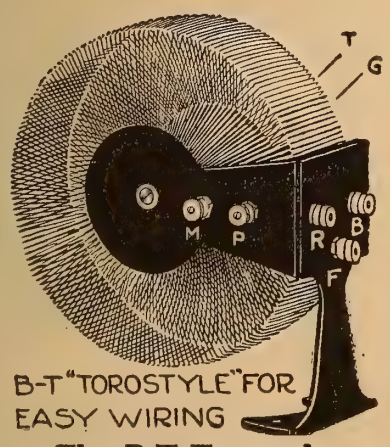
A Letter from Italy



B-T "TOROSTYLE" FOR EASY WIRING

The B-T Torostyle

is used in the Counterphase circuit. Made in three styles each for a specific purpose.

Type TA—Antenna coupler.....**$4.00**
Type TC—Coupling stages..... **4.00**
Type T4—For B-T. 4-tube sets.. **4.00**

Via Cittadella No. 64,
Piacenza, Italia.

April 19th, 1926.

The COUNTERPHASE SIX is the greatest Radio success at the Milan Fair. The B-T proved itself superior to all Italian, German, French and American apparatus here exhibited.

The COUNTERPHASE SIX is the only set that can cut out the local broadcasting station of Milan and tune in Rome, Hamburg, London, Paris, Madrid, Prague, thru the interference produced by the hundreds of other receivers here exhibited. We demonstrate exclusively on an indoor antenna.

I found difficulty in obtaining a horn that could stand the volume delivered by the set.

A. VENTURINI.

No. 6 Counterphase Kits, for 6-tube sets.....**$38.00**
No. 5 Counterphase Kits, for 5-tube sets..... **28.50**

Coming—

NEW B-T OFFERINGS

HERE'S A TIP—
"Better Tuning" is a booklet published from time to time which tells all about new B-T apparatus and hook-ups; also has general interest articles. By subscribing you will be informed on the latest—Send 10c for the 9th Edition.

B-Battery Eliminators complete.
B-Battery Eliminator Parts.

OVER WENT THE BABY

(Continued from page 4)

simple matter to get her into the boat after the man finally arrived. She was half dead from exhaustion and after she saw that Kitty was safe she did not seem to worry much about her own rescue. But she rested for a few minutes by hanging onto the chain at the bow and finally succeeded in rolling over into the boat without capsizing it.

The terror stricken companions in the motor boat had let it go of its own accord until it came to shore and started up the bank before it stopped.

Soon the story spread along the line of the railway where Mr. Polyblank is employed as a civil engineer. He was just about the proudest husband and father in the world when he heard what his wife had done. And the story traveled until it reached Montreal and the office of the president of the lines, Sir Henry, himself.

"That woman deserves a gold medal," said Sir Henry.

The Royal Canadian Humane association took up the suggestion. They passed resolutions and ordered a medal of pure gold with a proper inscription and a design.

"Now come to Montreal," wrote the commissioners, "and the president will present the medal with fitting ceremonies at a public testimonial."

Mrs. Polyblank read the letter, looked over at her husband and laughed.

"That's a joke," she said. "Probably I was the only one who could swim and you don't think I'd leave the little thing drown, do you? No, I'll stay home and get the meals for my family. Really, I don't see how I could take the time to get away. There's the mending and the washing and, no, thanks very much. Couldn't possibly get away although I appreciate the courtesy—"

Then came a day when a tall, well-dressed man knocked at the door of the tarpaper covered shack of the Polyblanks on the new mining frontier at O'Brien. Several of the neighbors and friends also found occasion to call. They sat in the parlor and Mr. Polyblank tuned in the Radio.

Mrs. Polyblank was startled to hear her name announced over the air. It was the voice of Sir Henry W. Thornton. He was talking to her, telling her of what Canada thought of her exploit. People were listening to him all over the Dominion. She was in the presence of a great audience, greater than she had ever seen in all her life.

"And in token of this valiant deed, this remarkable example of devotion and womanly valor that came so near costing you your own life, I hereby present you with this medal of the Royal Canadian Humane association—" Mrs. Polyblank listened as in a dream. And at that moment the stranger opened a small jewel box and lifted the shining medal which he gallantly pinned to Mrs. Polyblank's dress.

It seemed as though Sir Henry was right there in the little room with the other friends and neighbors. His voice came out of the loud speaker clearly and distinctly. To other listeners it seemed as though the whole ceremony was in some big auditorium.

Will Mrs. Polyblank be a guest at Kitty's birthday party? Will she get a big slice of the birthday cake with three candles made from the tallow of a fat bear that lived in the woods over the hill? She will! She will!

And will she wear her beautiful, shiny gold medal?

Now you just guess.

KFJF FIRST RADIO POST

(Continued from page 5)

arms to eject him from the canteen. Thank you, and, as I said before, if you spit on the floor at home you may do so here. We want you to feel at home. And now, Mr. Vargason, you will read the report." This is purely a supposititious interlude in the course of an imaginary session of a Radio post.

There always is plenty of talent among the members or their friends and they follow the wishes of their associates and correspondents in presenting the programs. "Sergt. Bob" is especially gifted with a Radio voice. He fought with the Marines on the other side. Sometimes he is assisted by Harry Richardson, one of the regular announcers at KFJF. "Sergt. Bob's" Radio experience may serve in a broader scope should he become "loud" speaker at the House of Representatives. He already is a member of the legislature.

Much of the snap and zest of the KFJF programs is due to the vigorous direction of R. M. Shaw and among the star entertainers are Art Fowler, "Wizard of the Uke," and Mr. and Mrs. S. E. Ramseyer with the trombone and harp.

Thanks to KFJF, here is a chance for the buddies in the Southwest to meet up with their comrades of the big war, no matter how far they may be from post headquarters. Here is contact with forces on the front line of industry, pioneering and lads who are still down with wounds in the hospital wards. It seems to be an idea that can be expanded over the country with profit.

"BIG RABBIT"

(Continued from page 9)

not. Black him up, too, as we will rely upon disguises."

"Where is Major Gaskill and Roberta—I mean Miss Tonneson?" I asked and flushed, quickly realizing I had used the name by which I had come, unconsciously, to think of her. Borton grinned idiotically, but permitted my slip to pass without a remark.

"They are somewhere in the swamps of the Ocklawaha river," he replied seriously. I do not know the exact spot, but can get near it. I tried to reach it on foot through the swamps, and failed. I know the negroes get through on paths, but I got off the trail and wandered for twenty hours." He shuddered at the recollection of his experience.

"I'm glad now I missed it," he added. "Night before last, while I was the unwelcome companion of a couple of alligators and a dozen or so moccasins on a cypress hummock I overheard enough to understand it was the luckiest thing in the world for me that I had lost myself. If I had stumbled into the place unexpectedly—"

He checked himself and shrugged meaningly.

"What did you hear? Who was talking?"

"A BUNCH of negroes passing along the trail. They were speaking of Trimble, although they did not use his name. It seems he had issued orders for them to meet at a given point—and I was not far from that point. If I had gone on a short distance I would have come upon a crowd of them and—well, I wouldn't have been back. By the way, Wen, don't be surprised if we run across some surprisingly big rabbit tracks."

He added the last a little maliciously, but I had not time to question him further or get more information as the little automobile was honking its warning and notifying him it was time to start for the train. When he had gone I turned in to get two more hours sleep. Then I awakened Danforth and, at breakfast told him of Borton's return and of his peculiar orders.

"I'm in on this to the finish," Danforth said. "I wish Borton had told us more of the situation. As it is the only thing to do is to follow his instructions. He has a scheme in mind—and his idea of disguises is sound—if it is night."

During the morning we carried out the instructions and made the purchases and arrangements suggested by Borton. The hours seemed to drag and we improved the time by testing the boat's engine, cleaning the spark plugs and purchasing arms and supplies. To secure the arms we had to appeal to a deputy sheriff who, when Danforth identified himself and explained that he was in pursuit of timber thieves, readily assisted us in securing a young arsenal, lending us guns from his own supply, which was plentiful.

"Look here, Dan," I remarked as we tested the boat, "I don't want to drag you into this affair and have you take all this trouble and perhaps risk without chance for reward. We need your help, but we want you to get something from it if we are successful."

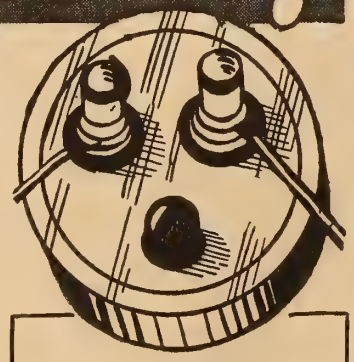
"MY DEAR boy," said the little detective heartily, "in the first place I'd go if only for the fun of the thing. In the second place I'm tolerably certain you are not in this for what money you may get. In the last place I am beginning to think that maybe I am using you and your pal for my own ends. I have an idea your friend has put me on the

(Continued on page 29)

No More Static!

NEWEST, most startling invention eliminates static under all weather conditions. No loss of volume. Everything comes in clear and strong. No more exasperating buzzes, squeaks, and howls.

Start to enjoy the pleasure of your radio. Install a Static Eliminator and you can forget all about static forever. And not only that. You will increase the selectivity of your set—you will be able to tune out other stations easier, sharpen signals, remove noises, lessen interference, and prevent re-radiation. Over a half million Static Eliminators in use now. Thousands being sold daily. You will be enthusiastic too when you hook it up to your set and hear the amazing difference.



STATIC Eliminator fits all makes of radio sets. A child can hook it up in half a minute. Lasts a lifetime.

The Static Eliminator is sturdily made to give many years of perfect service. A simple, but effective device that hooks up to any make of set in 30 seconds. Complete, easy to follow directions included with every Eliminator. You will be amazed at the immediate improvement in your results. Mail coupon for your Eliminator now.

Amazing Low Price

$1.00 Postpaid

This wonderful new invention sells for only $1.00. Users say it's easily worth ten times this price because it produces such a wonderful improvement in receiving power and clearness of all radio sets.

Satisfaction Guaranteed

You will be delighted with the results of this remarkable instrument. That's why we guarantee absolute satisfaction. Money back if Static Eliminator is returned within 5 days. Don't be without it another day. Begin at once to know the real joy of receiving all stations without interference. Mail this coupon with a dollar bill—TO-DAY!

"MARVELOUS!" Users Write

"I find your Static Eliminator to be the most wonderful addition to a radio set in all my experience. It sure does the work."—J. J. Aldrich, 172 N. 4th St., Columbus, Ohio.

"Am surprised at the wonderful results I am obtaining. I am now receiving stations with clearness that is truly remarkable."—Thos. C. Smith, 2582 Parve Ave., New York.

"Your Static Eliminator is a great help. It gives me a wide receiving range. Last night in less than one hour, I had about 15 different stations."—R. D. Smith, Box 365, Clermont, Florida.

"I like the Eliminator fine. I wouldn't sell it if I couldn't get another."—Burt W. Thompson, Homer, Mich.

The Reader's View

Hoover Cause of Radio Chaos

We have no one to blame but Secretary Hoover of the department of commerce for the chaos he claims there is in Radio.

The chaos in Radio today, is not brought about by improper Radio laws; does not require immediate legislation to be rushed through congress; but is the direct result of gross discrimination in Radio administration by the department of commerce, of which Mr. Hoover is the guiding hand. One glance at the government chart No. 1806, "Distribution of Broadcasting Stations of the United States" (which I forced into the records, page 179 of the hearing on the Dill Radio bill before the senate committee on interstate commerce), will prove my statements.

This map, drawn by the department of commerce, shows 466 stations crowded down on the lower wave lengths between 280 and 200, just 80 meters. On some of the wave lengths are crowded as many as 26 stations, and at this date, records will show possibly over 30 stations crowded on one wave length. On the upper band, between 280 and 545 meters, a wide range of 265 meters, there are only 105 stations and none of these wave lengths have over four stations on them. If that is not discrimination, what can it be? It is worse, it is dangerous usurpation, it is palpable usurpation and may the day be near when some senator will introduce a resolution in the senate, asking for a complete investigation of Secretary Hoover's Radio administration. It is that which is needed now; not legislation, because the 1912 law is a good law; no one even tried to disobey it until Hoover showed unfairness. His discrimination has forced the broadcaster to step over his head to find a wave length upon which he could breathe.

All the department of commerce need do to eliminate the chaos in Radio, is to re-allocate the wave lengths, and this can easily be done as follows: Between 280 and 200 meters they now use 40 wave bands, with 466 stations crowded on these 40 bands, which is an average of over 11 stations on each wave length. Between 280 and 545 meters are 47 wave lengths now in use, with only 105 stations on them, or an average of 2 to 3 on each of the higher bands. Altogether there are 87 wave lengths used. According to their map No. 1806 published October 28, 1925, there is shown a total of 571 stations, which with 87 available wave lengths, would average only about 6 stations on each wave length.

This can be done. There can be no argument to the contrary because already they have placed over 30 stations on one wave length, and to cut it down to only 6 on each would smoothe out the interference so that the good stations on the crowded lower wave lengths will get out just as well as those on the higher lengths.

Of course, the public realizes that the department and those interested in gaining a monopoly of the air will not favor such a re-allocation; they want less stations on the air, and will do all they can in this unfair discrimination against the independent stations so that they cannot get out good and so that the listener will learn to condemn them. It all ends in creating a bad feeling against the independent stations, who in reality give good programs; variety programs with a homelike atmosphere.

Eventually the chain stations, with their influence, will crowd the independents off the air, have the field to themselves and then the public shortly thereafter will be paying a monthly rate for their privilege of listening to Radio programs. The private interests control every other public commodity, and will soon have Radio in their clutches.—Norman Baker, president of the American Broadcasters, owner and operator of Calliaphone Studio K-"TNT" at Muscatine, Iowa.

STEP ON STAIRS PRIZES

(Continued from page 3)

tric Company station, KOA, at Denver, will present all ten episodes the night of May 31. These are all the definite dates that have been sent to Radio Digest at this time.

How Prizes Were Awarded

It is with regret that Radio Digest is unable to award prizes to all of the thousands of listeners and readers who have sent in their solutions for the final chapter. Authors and editors were surprised that so many guessed "Cousin William" as the actual murderer of Jeremiah Turner. But few were successful in their conclusion as to why and what was meant by Uncle Peleg when he said he had done the killing.

The letters that won the leading prizes received the greatest number of votes from the judges who read all letters stating that "Cousin William" was the guilty one. All the others came in order of the number of votes. Both the first and second prizes were awarded for exceptionally well-written story chapters. Mrs. Lentz carried on the characters with remarkable verity, and although her methods of arriving to the correct conclusion were entirely different than the author's, her version could have been substituted for the author's without question.

Boy Winner Is Student Writer

Clinton B. DeSoto's letter states that he is a boy, 14, and that he is going to follow literature as a profession. His chapter was worthy of the work of a professional writer. He divided his chapter according to the Radio Digest style and, with pen and ink, drew in initial letters for these divisions. He made Ardwyn bluff Peleg Turner until the latter admitted that he did not kill his brother, Jeremiah. Then from Hari Singh he learned that William Caryl had been in the house the night of the murder. Caryl attempts to escape through the door of death but is overtaken by Tolliver who chokes him to the point of death when he makes his confession.

Credit Is Due Stations

Radio Digest is planning for an important announcement to be made late in the summer for a sequel to this experiment that will in all probability receive even a more comprehensive endorsement than did "A Step On the Stairs."

Credit for the success of "A Step On the Stairs," is shared equally by Radio Digest and the following stations, some of which added a special staff of artists to present the play while others were those who have pioneered in Radio drama from the beginning:

KGO, General Electric Co., Oakland, Calif.
KOA, General Electric Co., Denver, Colo.
WBAP, Star-Telegram, Fort Worth, Tex.
WCCO, Gold Medal, Minneapolis-St. Paul, Minn.
WGY, General Electric Co., Schenectady, N. Y.
WHO, Bankers Life Co., Des Moines, Iowa.
WLW, Crosley Radio Corp., Cincinnati, Ohio.
WMAQ, Daily News, Chicago, Ill.
WNAC, Shepard Stores, Boston, Mass.
WEAN, Shepard Stores, Providence, Rhode Island.
WOAW, Woodmen of World, Omaha, Nebr.
WOC, Palmer Chiropractic School, Davenport. Iowa.
WOR, L. Bamberger Co., Newark, N. J.
WRC, Radio Corp. of America, Washington, D. C.
KTHS, New Arlington Hotel, Hot Springs, Ark.

"BIG RABBIT"

(Continued from page 28)

right trail in my own case and that our work lies along the same lines."

"Well—if you look at it that way—" I hesitated.

"I do," Danforth interrupted quickly but kindly. "And look here, boy, there is another reason. I'd be the last fellow in the world to refuse what help I may be able to give if that little girl means anything to you—and I think she does."

I never had admitted openly, even to myself, how much Roberta Lee Tonneson had come to mean to me. It seemed presumptious folly to think a girl, young and beautiful, perhaps wealthy, who scarcely knew me, or anything about me, might come to care for me. Yet the little detective's simple words and sincere sympathy brought realization of the state of affairs and, almost without thinking, I blurted out;

"She does, Dan, she does. She is the world to me."

I hesitated, stammered and stood looking foolishly at him as I realized what I had said and finished weakly. "Don't mind what I said, Dan. Forget it. I didn't realize what I was saying. Why, I've hardly spoken to her, she scarcely knows me."

"Thought I recognized the symptoms," Dan laughed so understandingly I felt better. "Good luck to you. Now let's get down to the river and practice with these guns, to get used to them. Do you shoot?"

"Hardly at all, since I was a boy," I replied glad and relieved to turn from the too delicate subject although, having spoken openly of my love for the girl I had met but once, I felt better and somehow more determined and confident. "My practice since I went to New York has been confined to an occasional shot in some gallery at Coney."

"We cannot expect Borton back much before three o'clock. The first train he

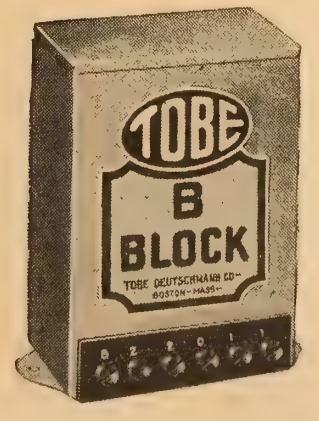
TOBE *means "The Better Condensers"*

to increasing thousands of intelligent and discriminating Radio buyers.

When you buy those condensers for your new B-Eliminator or power amplifier, for your improved-quality audio amplifier or for by-passing your B-batteries, ask your dealer for TOBES. That is all you need to say. He will know what you mean and you in turn will be insured against condenser trouble.

Remember, TOBE means "better condensers."



Tobe B Block
Type 760

Contains in one case all the filter capacities required in a B-Eliminator filter. It saves you $2.50 over the cost of separately cased condensers, saves wiring and time. Its binding posts are at the bottom, where they belong, out of the way of chance contacts with the fingers of the dusting housewife or inquisitive child. This means SAFETY.

Price—$11.00

We have tried to make it possible for you to get TOBE apparatus at your dealers. Ask him first,—if it happens he is not stocked, we shall be glad to forward your order on receipt of check or money order.

Tobe Deutschmann Co.
CORNHILL **BOSTON, MASS.**

CLASSIFIED ADVERTISEMENTS

Classified advertisements in Radio Digest produce results. Have you a receiving set to sell? Do you want to buy a Radio? A classified advertisement in this column will sell your set.

Rates are twenty cents a word for each insertions, ten per cent for six insertions, fifteen per cent for twelve insertions, twenty per cent for twenty-four insertions. Name and address to be included at above rate. Cash should accompany order. Minimum of ten words.

Objectionable and misleading advertisements not accepted. Forms close three weeks prior to date of publication, which is first and fifteenth of each month.

"BIG RABBIT"

(Continued from page 29)

can catch out of Jacksonville comes at 2:47. It will steady our nerves and pass the time if we practice shooting."

WE RACED down the river with the Jason doing more than thirty miles an hour in the short spurts when I cut loose to see how fast we might be pushed in an extremity and landed at a piece of cut over pine land, where we spent an hour getting accustomed to using the borrowed guns. I did fairly well for a novice after getting the hang of the weapons and observed with grim satisfaction that Danforth sprinkled eight shots in a few seconds within three inches of a bit of paper tacked to a tree thirty yards distant. We ran back to Palatka and lunched early.

"We might as well make up now," Danforth suggested, throwing away the cigar he had but half smoked after luncheon. "I imagine we had best be ready when Borton comes, as he probably will want rapid action. He may want the boat to start at the first possible minute. Come over to the drug store a moment; I have an idea."

Danforth made several small purchases and distributed the packages in various pockets.

"Red and blue fire and some other dope that may come in handy, he explained as he assumed a businesslike manner. "I have put a couple dozen turpentine torches in the boat and a lantern. I imagine we may need the fireworks if my theory of what Borton is planning is correct."

FOR the next hour Danforth and I were in my room making up. In spite of the seriousness of the program we laughed at each other until the tears washed grooves in the black and compelled us to retouch our faces. I was as black as Satan's pet cat with grease paint and cork and Danforth had essayed to make up as a lighter colored man because that shade went better with his bristly sandy hair. I was the turpentine camp type of negro and was arrayed in a suit of clothes procured for me by one of the porters at the hotel, to whom I explained that we were going to look over some swamp timber and did not want to spoil our better clothes. Dan was of the river type of negro and when he had completed his makeup he was beyond recognition.

Just before three o'clock an automobile raced up to the hotel and slid to a stop. Borton leaped out almost before the machine had come to a standstill and a minute or two later he burst into the room, his arms loaded with bulky but evidently not heavy packages.

"What the— what are you niggers doing in Mr. Lindsay's room?" he demanded confronting us angrily as he dropped packages to the floor and springing toward Danforth. He seized Dan by the arm and jerked him half across the room before either of us had an opportunity of explaining. I rolled upon the bed, convulsed with laughter at this proof of the excellence of our disguises. Borton, looking at me bewilderedly for an instant, realized his mistake and releasing Danforth, grinned.

"It's on me," he said, "but it is a compliment to the makeup. I suppose you are Wen's friend, Danforth," he added extending his hand, "I would have asked you to carry my grip if you had been at the station."

We laughed as they shook hands. Then Borton sobered quickly and asked:

"All ready?"

"Yes—everything we can think of."

"Let's go."

"Aren't you going to black up?" I inquired.

"No. I have my disguise here," he replied, motioning toward the packages, "I reckon it will be the queerest you ever saw, Mr. Danforth," he added, turning to the detective. "I know from what Wen tells me that you will go through with whatever comes, but I want to warn you before we start that this is desperate business and that, if we are caught—"

He did not complete the sentence as Danforth, drollingly dropping into his character, remarked;

"Ah reckon ah'll be dar, boss."

"GOOD," Borton ejaculated earnestly shaking hands again, "let's start. We must get to the place, or near it by dark, by a little after seven thirty at the latest, or we may be too late."

"How far?" I inquired.

"Don't know. Maybe forty miles, maybe fifty, depending on the curves in the river. It twists like a crippled snake. Ever been up the Ocklawaha?" he turned the question toward Danforth.

"Once, on a pleasure trip. I remember parts of it well."

"That's lucky. I know the lay of the land—which is mostly water—when we get close to the place we are going, but nothing at all about the lower river, excepting the parts of it I swam."

Fearing to attract attention we slipped out the side door of the hotel and formed a strange procession as we started for the river. Five minutes later we had stowed the new packages in the boat and shoved off from the dock.

I twirled the wheel twice, the splutter of rapidly exploding gasoline filled the quiet reaches of the river as the Jason shot out from the dock, carved a rainbow in the water and with the engine picking up speed steadily the knife like prow carved the placid surface until two thin sheets of spray were thrown higher than the rail as we tore under the center span of the railroad bridge and raced southward up the St. Johns.

Continue on through the tropical jungle with these brave men who seek the Big Rabbit, a beast far more terrible than any creature of the African wilds. In his mysterious power is the beautiful Roberta. The men have determined to kill her if they can not effect her rescue. They near the end of the trail in the next installment.

Radiophone Broadcasting Stations

Corrected Every Issue—Part II

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

(Note—The second part of the schedule list appears below. The first appeared last issue.)

(The third part of the directory of station schedules will appear next issue.)

Better now for $9.75 than it was in 1920 for $85

Recall that in 1920 a one-tube radio sold for $85. Today Crosley makes a better one for $9.75 [The Crosley Pup]. There's the picture of Crosley manufacturing genius.

This year will see the millionth Crosley radio set produced. And somewhere, the first hundred still bring joy and satisfaction to their owners. Only this winter, one of Crosley's early one-tube radios won a nationwide radio reception contest, in which one-tube sets of all makes and dates were entered.

Powel Crosley, Jr., has so improved tuned radio frequency circuits in the present Crosley sets, that experts the country over have grown wildly enthusiastic over their performance.

"*The first set to beat my pet—*", says one fan. "*The only set I have ever seen that would tune out our local station in our building*", writes another. "*How can Crosley do it for the money!*" is one exclamation, typical of hundreds of letters.

These new Crosley sets are truly wonderful for they not only represent a tremendous forward step in radio development, but are offered for even less than the closing-out prices of questionable and obsolete sets.

See and hear the new Crosley sets at your nearby Crosley dealer's.

Prices slightly higher west of the Rockies—For descriptive catalog write Dept. 49

THE CROSLEY RADIO CORPORATION, CINCINNATI, OHIO

Powel Crosley, Jr., President

Owning and Operating WLW, first remote control super-power broadcasting station in America

CROSLEY RADIO

Better-Costs Less

Manufactured under Armstrong U. S. Patent No. 1,113,149, or under patent application of Radio Frequency Laboratories, Inc.

Mass manufacturing operations on the million scale has so saved pennies in production that the public sees them reflected in dollars saved on the retail prices of Crosley radios.

One great example of this is the Crosley Musicone.

Its success created so great a demand that a saving to the public of $2.75 was soon effected through increased production. Today it is the fastest moving item in radio—its quality of reproduction and its low price is inducing the rapidity by which it is replacing thousands of other type speakers.

MAY TOPS STANDING IN GOLD CUP AWARD

BROKENSHIRE AND BARNES FOLLOW CLOSE BEHIND

Hired Hand Shows Fourth in Spite of Himself—Lillian Shaw Leads Canadian Field

Stand by for the shock, for we are about to divulge the first actual standing, with votes, of the 1926 Radio Digest Gold Cup Award. The warning is given primarily because your favorite announcer probably will not rate where you think he should. In that case, there is nothing to be done about it, except to save more votes and work hard to get your friends to save votes for your choice.

Remember that consecutive votes, sent in together, earn a bonus. The longer the series of consecutive numbers, the greater the bonus.

Earl E. May, owner and announcer of KMA, Shenandoah, Ia., has sprung the big surprise and tops the list. Although Norman Brokenshire, of WJZ, New York, and Patrick Henry Barnes, of WHT, Chicago, are running close second and third, respectively to Mr. May, the large metropolitan listener populations of either of these two cities may require a lesson in teamwork before they can equal the support of the sparsely populated area, relatively, about Shenandoah, Ia.

H. H. Popular in Spite of Himself

Fourth in standing comes the Hired Hand, of the Forth Worth Star-Telegram station, WBAP. While his present vote is less than half that of either of his three leaders, indications and rumors point at the conclusion that this veteran of the microphone is to be feared.

The Hired Hand, strange to say, is polling his large vote in spite of himself. He has sent three "threatening" letters to the Gold Cup Award editor, demanding that his name be withdrawn, but the editor laughed at him, and told him that he would have to win the gold cup one year before he could withdraw.

Attempting to dodge this ruling, the famous Hired Hand has gone on the air and denounced himself as a candidate to no avail. The votes keep rolling in.

Standing of Leaders

The standing of the twenty-five leading American announcers, as this issue went to press, follows:

Earl E. May, KMA	12,729
Norman Brokenshire, WJZ	10,916
Patrick Henry Barnes, WHT	10,083
The Hired Hand, WBAP	4,724
Peter McArthur, WOC	3,058
Phillips Carlin, WEAF	2,881
Louis John Johnen, WLW	2,877
Clyde R. Randall, WSMB	2,736
Lester Palmer, WOAW	1,732
Gayle Grubb, KFAB	1,705
Robert W. Griffin, WHO	1,684
Henry Field, KFNF	1,680
Lambdin Kay, WSB	1,528
Chester Gaylord, WTAG	1,481
Wm. (Bill) Hay, WGN	1,468
Jerry Sullivan, WQJ	1,273
Harold Isbell, KYW	1,252
G. C. Arnoux, WGY	1,245
Paul Johnson, WCCO	1,167
The Janitor, WFAA	1,019
Jennings Pierce, KGO	962
H. Dean Fitzer, WDAF	920
Frank Lane, KVOO	906
Sen Kaney, KYW	887
N. Dean Cole, WHO	813

Silver Cup Canadian Standing

It will be remembered that a large silver loving cup was proposed as prize for the most popular Canadian announcer in 1926. Last year such a cup was awarded to D. R. P. Coats, CKY's chief announcer. He has withdrawn from the 1926 contest and is supporting one of his assistants, Miss Lillian Shaw. The standing follows:

Lillian Shaw, CKY	1,529
H. C. Fricker, CKCL	480
Geo. A. Wright, CNRY	383
Bert Hooper, CKCK	301
C. Walter Darling, CFCF	95

Incidentally, the American announcer finishing second in the 1926 Gold Cup Award, will be presented with a large silver loving cup which is a duplicate of the Canadian prize.

GUS EDWARDS STAR IS ON FRONT COVER

BROADWAYMEN and others will recognize Radio Digest's cover girl this week. They will remember seeing Doris Walker twinkling over the footlights in Gus Edwards' particular array of American beauties.

The program people in charge of the official launching of the new Madison Square Garden Radio Station, WMSG, spent a great deal of time and exercised much care in combing the available talent in New York for that occasion. Gus Edwards was booked for a full hour, and when he offered Miss Doris Walker and Miss Ruth McDonald, "The Harmony Babies of Broadway," the whole affair was a huge success.

Despite the fact that the award is nearly half finished, nominations continue to be made. Eleven new names, bringing the total entries to 190, were added since last issue. The candidates newly named are:

E. J. Bowers, CFCA	Otto Lowe, KPO
Father James F. Cronin, WLWL	Dick McMurray, KUT
J. L. Fox, KFH	W. G. Patterson, KWKH
Edwin Kent, WHT	Ralph Shugart, WJJD
W. J. Kotera, WOAW	Fred Slouton, WOAW
	Fred Williams, WOAW

Don't fail to get the second June issue of Radio Digest, out June 14, to see the revised American and Canadian standings of contestants.

Looking Ahead

Among the Paradoxes of City Nomenclature Occurs the Word, "New." Our oldest cities are "New." New Orleans is no exception. Out of its quaint and picturesque characteristics and manners has arisen the broadcasting station, WSMB. You'll read about it in the next Radio Digest, out June 14.

"True Story of the First Municipal Broadcasting Station in the World" and the second licensed station in the United States—Station WRR, owned and operated by the City of Dallas—as told by W. J. Reid, secretary of the city Radio commission, will also be in the mid-June Radio Digest.

In the Mississippi Valley There Is a Tendency to Linger Over the Dials when they are set at 273 meters for the St. Louis Star station, WIL. There is something novel in the way the "Little Old Professor" at the station handles the programs. Tune in the mid-June Radio Digest for particulars, out on June 14.

Hugh Fullerton's Great Story, "Big Rabbit," Will Arrive at It's Thrilling Climax in the second June number of Radio Digest. An introductory review of the preceding chapters will make it possible for the reader to understand this story of the Florida jungle.

Nashville, Tenn., Is Famous for—Well, Mr. B. L. Lowe, for illustration, who constructed his underground antenna out of a ten-gallon crock and receives 37 stations without old man static getting a look in. The next issue, out June 14, will contain this most interesting article on buried antennas.

Radio Digest's S-O-S Portable Made a Killing. The second and last article will cover the complete wiring, testing and operation. Build this if a simple, practical "Super" strikes your fancy.

SHORT WAVES

By Marcella

Gladyce, our best "asker", wants to know if Jack Smith, Victor record artist, and Jack Little are one and the same. I frankly don't know, but have written the Victor company. While waiting for a reply, I'll just broadcast this query to anyone who may know. Anybody have the information?

Now back to Gladyce who asks to have the low-down on the Mona Motor Oil Twins. The banjo-mandolinist and his singing partner are, in my estimation, two of the best-looking males who ever peered into a microphone. Both of that brunette, Jack Pickford type. Look on page eleven of our April 10 effort and you'll see them. Don't believe that either are married, and would hate to be disillusioned. Both are young—about 24 years apiece. Nationality, American; favorite dish, pie. They started at KOIL, their home station, which is owned by the Mona Motor Oil company of Council Bluffs, Ia. Then Mr. "Mona" decided they were too good to be kept from the world, so he started them on a tour of all the stations. The good-looking twins are now doing the Pacific coast.

Here, you sisters of the Underwood, read this excerpt from Gladyce's letter and let's have a good cry. "Note the absence of the typewriter? I am sitting here with my back to it and every once in awhile I turn around and GLARE at it. Honestly, I get so tired of typing, that I have to rest from it occasionally. I know you can sympathize with me, as I suppose you have to write your 'copy' on one." Yes, "Glad," I do.

* *

Gerald Deering, ex-WMC announcer, left that position to work for the Tennessee State Marketing bureau. He is clean-cut, and slender, but short. I wouldn't call him handsome, but he has very polite ways and that make his medium features really seem handsome. This in answer to Dimples. As for his martial state, Dimples, you had best write to "Miss Kitty" Nelson at WMC, who can give you the last minute data.

* *

Mary, Judith and Jeanette, you are just six months late on the trail of John T. Schilling, blond WHB announcer, for he was married last fall. Yes, it was a true Radio romance—he met her in the Sweeney school studio. Description of him: height, 5 feet 10 inches; weight, 165 pounds and no contours; hair, blond and a lot left; age, 29 summers and winters; eyes, blue and happy; degree of pulchritude, looks well in a dress suit but feels terrible; likes, musical instruments in tune, good cigars, l. w. and b. (well maybe); personality, positive-ly winning, according to the way his wife coyly looks at him; dislikes, artistic temperaments.

* *

Now Mr. J. F. S., since you got "all thrilled" over Miss Eva Sharrard's picture on the front cover of the April 3 issue of Radio Digest, here are all the important facts and figures. Yes, she's just as pretty as her picture. This talented pianist of Port Huron, Mich., who gives many pleasant hours to WAFD listeners is but 19 years old. She is of medium height and weighs just 98 pounds. She has small features, a medium dark complexion, sparkling brown eyes and dark brown hair which is cut very short. If you like brunette types, you will certainly "fall" for her winsome smile.

* *

Eddie Ellingson is one of the "Harmony Boys" at KFAB, Nebraska Buick station at Lincoln. Gloomy Gus is the other very popular member of the team. Eddie has one of the sweetest voices on the air and can make you cry with classical as well as popular numbers.

* *

No, C. M. B., Lee Sims hasn't left KYW for good. He is on the road under contract to appear at various theaters for the next few months. He is with Bobbie Brown, Gail Bandell, the Harmony Girls, and Charlie Schultz. The troupe is booked as the "KYW Gloom Chasers." They all will return to KYW after the tour.

* *

Yes, Nate Caldwell, former "Joy Digger," announcer for WBBM and later KMOX, has returned to WBBM, the Stewart-Warner Air theater. He can't stay away from Chicago, you know, because all of his best girl friends live there.

* *

Phil Friedlander is in hiding, I guess, since he tangled with Chicago's state's attorney, Mr. Crowe. At least he isn't on the air. Harry Geise withdrew his membership from the Alimony club, but he is not permanently connected with any station at this time.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

URGE SET MAKERS HELP STATIONS

SENATE REPORTS ON COMPOSITE AIR BILL

STILL POSSIBILITY THAT RADIO WILL HAVE LAW

Senators Favor Commission—Combine White, Dill and Borah Bills—Little Time Left

WASHINGTON, D. C.—Indications are at the time this report is written that if the present session of congress is to enact any Radio legislation it will be in the nature of a new Radio commission which will take the jurisdiction of Radio out of the hands of the department of commerce where it has been lodged ever since there was any law and place it entirely in the hands of a commission.

Both President Coolidge and Secretary of Commerce Hoover have stated publicly that they were opposed to a Radio commission, but in spite of these protests senate leaders are going ahead, and in this connection the senate committee on interstate commerce has reported to the upper house the White bill severely amended. That bill now provides for a commission of five members at a salary of $12,000 a year, and is a composite of the White Radio bill which passed the house, the so-called Dill bill, and the Borah bill.

The bill as reported carries many added features to the Radio bills which have so far been discussed by congress and is intended to take care of the entire Radio situation for a period of years, leaving considerable to the discretion of the commission.

Indications are, at the time of this writing, that if the senate can be made to take up the bill, that it will be passed without much opposition. The trouble will be to get the bill before the senate during the closing hours of this congress, which already are well occupied.

KFWB STAFF RANKS HIGH IN POPULARITY

HOLLYWOOD, Calif. — Station KFWB, the movie broadcaster, almost made a clean sweep of a contest sponsored by a Los Angeles newspaper when Charlie Wellman, KFWB's popular announcer, recently won first prize as most popular announcer heard from the dozen odd Los Angeles and Hollywood stations, while Mable Leonard, pianist and studio accompanist for KFWB, took first prize as most popular Radio entertainer.

THREE FAIR STARS OF MICROPHONE

When little Helen Rauh, center, plays the piano at WHT, Chicago, everyone tunes in for the program. Left is Ruth Bramberg, violin student at the Oregon Agricultural college who plays over KOAC. Right, Anastasia Rabinoff, dramatic soprano who is well liked at KYW, Westinghouse station at Chicago.

Radio Brings Auto Tourist To Bedside of Dying Wife

SAN FRANCISCO.—Station KPO here recently proved the means of bringing Allen Straight, traveling by automobile through Southern California, to the bedside of his dying wife in Loveland, Calif. When Mrs. Straight suffered a stroke of paralysis, relatives were unable to reach her husband and appealed to KPO.

CKY Starts Second Annual Series of Astronomy Talks

WINNIPEG, Man.—CKY here has recently commenced broadcasting its second annual series of lectures on the stars. The talks are illustrated by means of a simple system devised by D. R. P. Coats, which he has named "Stellagrafs."

Arrangements have been made with a local astronomer, A. W. Meggett, for the erection of a 3½-inch telescope on the roof of CKY on certain nights during the summer, when listeners are invited to come and see for themselves some of the wonders which they have heard described in the talks. Admission to view through the telescope is controlled by tickets which are issued to CKY listeners.
